INTRODUCTION

Welcome to The University of Auckland. This *Calendar* provides details of the University regulations and programmes, together with general information about the University and its staff, and the facilities and services which are available to staff and students.

The Academic Year

The academic year at The University of Auckland is divided into two semesters. Each semester covers a period of about 15 weeks comprising approximately 12 teaching weeks followed by three weeks for study and examination. The first semester starts at the beginning of March and the second semester in mid-July. Each semester has a mid-semester break which lasts for one to two weeks. During the three weeks after the end of lectures, there is a period of study followed by the examinations for the courses studied during that semester. There is a three-week inter-semester break during which results will be published and any further admissions and enrolments processed. At the end of the second semester there is a 13-week break. A small number of specialist courses may be taught during the inter-semester break. A Summer School comprising six weeks operates from the beginning of January. A limited number of courses are available.

The Points System

The value allocated to each course is standardised and is given as a number of points, each degree, diploma or certificate being made up of a specified number of points. From 2006, most courses are offered in values of 10, 15, 20 and 30 points. For instance, the programme for some Bachelors degrees requires the completion of a total of 360 points and most Masters degrees require 120 points. The points value for diplomas and certificates varies according to the discipline and content and full details are listed in the regulations.

Planning a Programme

This *Calendar* contains the regulations and requirements for each faculty's degrees, diplomas and certificates. It is important that students read the regulations for the programme they plan to take and ensure that they complete the prerequisites required for subsequent study. The details for each course are listed by faculty, in alphanumeric order in the Course Prescriptions, followed by a summary of course availability for 2010. In addition, there is a range of Interfaculty and Conjoint degrees which are administered and supervised across the faculties. Students planning a programme are also advised to consult faculty and departmental handbooks and seek advice about programmes and course options through the faculty offices and student centres. Intending students should phone 0800 61 62 63 or visit www.auckland.ac.nz for general advice and for information on how to access more specific course advice from faculties.

Admission and Enrolment

The University of Auckland has an online system for admission and enrolment. All new students, and those not enrolled in 2009, who are intending to study at the University in 2010, should complete the online Application for Admission (www.auckland.ac.nz/apply_now). Doctoral students should first complete the Expression of Interest online. If students do not have access to online facilities, Application for Admission forms are available by phone, by mail or in person from: ClockTower Student Information Centre, The University of Auckland, 22 Princes St, Private Bag 92019, Auckland 1142, New Zealand, email studentinfo@auckland.ac.nz, phone 0800 61 62 63.

Students continuing study in a programme commenced before 2006 should refer to the Transition Regulations Handbook, available at www.auckland.ac.nz/transitionregulations and are encouraged to seek enrolment advice from Faculty Student Centres or from the ClockTower Student Information Centre.

Official Communications to Students

Electronic Mail is an official and the primary means of communication with students. All official email to a student will be sent to a student's current University email address (netid@aucklanduni.ac.nz) and the student is responsible for ensuring that any desired forwarding to other addresses is in place and operating correctly. Failure to read an email does not free the student from understanding or complying with the message.

THE UNIVERSITY OF AUCKLAND

Arms of The University of Auckland

Heraldic Description

Azure between three Mullets Argent an open Book proper edged and bound Or with seven clasps on either side Gold on a Chief wavy also Argent three Kiwis proper. On a scroll set below the Arms appear the words 'Ingenio et Labore'.

Symbolism

The open book together with the motto 'Ingenio et Labore', freely translated as 'by natural ability and hard work', indicate in a general way the aim of the institution, and combined with the three stars express the idea of learning pursued under the sky of the Southern Hemisphere. The kiwis are indicative of New Zealand as the bird is absolutely confined to its islands and the silver wavy chief upon which they are set directs attention to the fact that Auckland is on the sea coast.

The shield, minus the ribbon containing the Latin motto, is used in combination with the logotype 'The University of Auckland' and bar elements to form the University Mark. Guidelines for the Mark are prescribed in the University's Style Guide.

History of The University of Auckland

As early as 1862 an unknown writer, 'J.G.', proposed in *Chapman's New Zealand Monthly Magazine* that a university should be established in Auckland. No one took up the suggestion. In the South Island, where the inhabitants were wealthier and keener on education, a university was established in Otago in 1869 and a college in Canterbury in 1873. In 1870, Parliament passed legislation to create the University of New Zealand as an examining body with affiliated teaching colleges. An Auckland politician, later Speaker of the House of Representatives, Maurice O'Rorke, tried to induce Parliament to place the University in Auckland, but he failed. The University of New Zealand had no fixed abode; its Senate met in the main towns in turn.

The citizens of Auckland did nothing to establish a college, but some so-called 'university' instruction was provided at the Auckland Grammar School. One student, Kate Edger, in 1877 became the first woman to graduate BA at a British university.

In 1878, O'Rorke was appointed chairman of a Royal Commission to report on higher education. It recommended that university colleges should be established at Auckland and Wellington. In 1882, the Auckland University College was set up by Act of Parliament. Thus the College was a creation, not of the citizens and local government, like those in the south, but of the State.

The applicants for the first four chairs, of Classics and English, Mathematics, Natural Science, and Chemistry and Physics, were interviewed in England by the New Zealand Agent-General and some of the most famous scientists and scholars of the day, including the great Benjamin Jowett of Balliol College, Vice-Chancellor of Oxford University. The men appointed formed an impressive group. The chemist, F.D. Brown, had studied both in France and Leipzig as well as London, and taught at Oxford and London. He had published a dozen papers. Algernon Phillips Thomas, the biologist, was a Balliol man who had discovered the life history of the liver fluke. The classicist, T.G. Tucker, was to become a famous scholar. When he left to go to Melbourne University in 1885, he was succeeded by Hutcheson Macaulay Posnett, an Irishman who had written several books, including one on comparative literature, what would now be called the sociology of literature, a subject which he is credited with inventing. The first professor of Mathematics was drowned shortly after he reached Auckland and he was succeeded by W.S. Aldis, who had been the senior wrangler at Cambridge and was the author of several mathematical books.

The College was formally opened on 21 May 1883 in the Choral Hall, then the largest hall in Auckland. The Governor, Sir William Jervois, announced that the College was to be a thoroughly democratic institution, open to all, women as well as men, and to all classes. He remarked that the first College building was a barn. It was, in fact, a disused courthouse.

When O'Rorke had first tried to secure a university for Auckland, in 1872, he had suggested housing it in Government House, left empty when the capital was moved to Wellington in 1865. This immediately aroused opposition in the newspapers, for many Aucklanders hoped that the capital – and the governor – would eventually return to Auckland. These conflicting ambitions lay at the basis of a recurrent feature of the history of the College, the great 'site row' which raged with particular violence in the years 1909-12, with the College trying to get at least part of the grounds of Government House while numerous citizens strongly opposed it. One result was that for years the College had no permanent site or permanent buildings. Instead, it acquired the disused Admiralty House and

a building which had been the original Parliament House. In 1907, the Choral Hall was purchased.

In 1917, the College occupied the deserted Grammar School. Not until 1926 did it acquire its first permanent building, now The ClockTower Building, in Princes Street.

The College was poor: its statutory grant was for many years only £4,000 a year, while educational reserves were of such poor land that they brought in very little. It was small: there were 95 students in 1883; 156 by 1901. Many of the students had not passed the matriculation examination. Most of them were part-time, trainee teachers and law clerks, music students from 1888 onwards, commerce students by 1905. The College was dominated by the lay members of Council, especially by Sir Maurice O'Rorke, who was its chairman from 1883 to 1916. When Professor Aldis complained in 1892 that he had found the College stables occupied by O'Rorke's son's polo ponies he was dismissed! Despite a prolonged public controversy, Council would not reinstate him. Posnett also left, in 1891.

Some of the best professors departed. Most of the remainder grew increasingly out-of-date in their subjects. There was no system of sabbatical or study leave until the 1920s. The teachers simply handed on traditional knowledge: research was not expected and was rarely done. The staff lectured for very long hours. In some subjects research was impossible. For instance, the Library took no mathematical journals, so the mathematicians knew little about recent work. Some students, however, carried out good research, notably in Chemistry. In general, the students were given a good, traditional undergraduate education, but standards were not rigorous and had in some subjects declined by the 1920s.

In that decade and well into the 1930s the College was ruled by a Registrar, Rocke O'Shea, and a new Chairman (President after 1924), another former Cabinet Minister, Sir George Fowlds. Under their not always benevolent dictatorship some improvements were made. The first New Zealand graduates with postgraduate education abroad were appointed to the staff, notably the very able economist, Horace Belshaw, the philosopher, R.P. Anschutz, and the physicist, P.W. Burbridge. An excellent researcher, W.F. Short, was appointed as a lecturer in Chemistry.

Some advances were made in providing professional education. The only such education offered at the College was in Law, which attracted large numbers of students. The only 'professional schools' recognised by the University of New Zealand were Medicine at Otago and Engineering at Canterbury. In 1906, the College established a School of Mining, which covertly by degrees was turned into a 'School of Engineering'. After fierce battles with Canterbury, fired by provincial rivalry, the Auckland School received University recognition for its teaching in the first two professional years. Students then had to go to Canterbury to complete their final year of education. In the course of this battle, in 1917, the College also began instruction in architecture.

During the depression of the early 1930s there was great disputation and rancour.

The temporary appointment of a lecturer in History, J.C. Beaglehole, later a world famous scholar, was terminated, his friends believed, because of a letter of liberal or radical tendency, to a newspaper, defending the right of communists to distribute their literature. This episode led to a Council election in which a liberal, Hollis Cocker, displaced a conservative. The College Council now adopted resolutions in favour of academic freedom and received the undeserved congratulations of the flower of the British academic establishment, including Lord Rutherford and Wittgenstein. At this time, in a modern terminology, the College 'came alive'. For instance, some students, led by James Bertram, established a new literary journal, *Phoenix*, which was the focus for the first literary movement in New Zealand history: Allen Curnow, A.R.D. Fairburn, R.A.K. Mason and other writers, later distinguished, wrote for it.

The College received a great intellectual stimulus in 1934 when four new professors arrived, H.G. Forder, a very able mathematician, Arthur Sewell, a brilliant lecturer in English, a classicist, C.G. Cooper, and a new historian, James Rutherford.

The College had never had academic leadership. Cocker came to dominate it before and during the Second World War as much as had O'Rorke and O'Shea. But Council now appointed the first Principal (later Vice-Chancellor) K.J. Maidment. He came in 1950 and remained for two decades. He was a Classics don from Merton College, Oxford.

The 1950s was a very difficult period in the history of the College – The University of Auckland, as it was called from 1958 onwards. There was a further, fierce 'site row'. Council wanted to move to a larger site out of town. The National Government in 1956 offered Government House to the College as a compensation for staying in Princes Street. Another 'save Government House' campaign followed. Both academic staff and the public were deeply divided over the issue, which was resolved in 1960: the University was to stay where it was.

The 'site row' held up the building programme for about six years, while student rolls rose rapidly, to 4,000 by 1959, with the result that there was bad overcrowding in quite inadequate buildings – army huts, for instance, were erected. Universities everywhere were expanding rapidly. New Zealand salaries were low and many able Auckland staff were recruited by Australian or other universities. Despite these problems, there was significant progress. New subjects were introduced: Geography, Anthropology, Maori Studies, Fine Arts. There was a new emphasis on staff research. Many of the new and younger academics became very active researchers, as could be seen in the growing lists of staff publications.

A general improvement in conditions was spearheaded by a committee, the Hughes Parry Committee, which reported on University conditions. Staff salaries were raised. For the first time the students were given fairly

generous bursaries, which led to a rapid increase in the proportion of full-time students. The government grant to the University rose rapidly.

There was a massive university building programme, and over the next two decades the campus was transformed as one large building after another was erected: Fine Arts, Science, Engineering buildings, a Student Union, a new Library. A number of new subjects were introduced, including Political Studies, Art History, and Sociology. In 1968, teaching commenced in the new Medical School, which was the most important 'new development'. The period of intensive new construction ended with completion of the new School of Music in 1986 and the Marae complex in 1988. A new precinct to the north of Waterloo Quadrant houses the Law School which moved into its new premises in 1992.

By the end of the 1960s Auckland had the largest University Library in the country, whereas it had usually been the smallest. Most of the credit for this belonged to Kenneth Maidment. One other change must be mentioned. In 1962, the University at last became independent, when the University of New Zealand was abolished.

When Dr Kenneth Maidment departed in 1970, there were 9,300 students. His successor, Dr Colin Maiden, was an Auckland engineer who headed a research division of General Motors in Michigan. One of the first things that struck him in Auckland was the paucity of student facilities. He pushed ahead to get them a theatre, a splendid gymnasium and recreation centre, and a large playing field 'complex'. The entire administrative organisation, from faculties and committees to deputy vice-chancellors, was reformed. The academic boom of the 1960s continued well into the 1970s and several new buildings, like Human Sciences, were built and new subjects, like Management Studies and Computer Science, were introduced.

The 1970s brought numerous social changes: an increase in the proportion of Maori and Polynesian students and in the proportion of women as well as in the proportion of older students. Only in the years 1975-81 were the first two women professors appointed, Marie Clay and Patricia Bergquist. At a time of high inflation, the government grant to the University rose rapidly, to \$95.2 million by 1989. Nevertheless there was a certain austerity by then, in a bleak economic climate, but after a century of growth the University seemed sufficiently strongly established in the community to withstand hard conditions.

Its position was indeed to be challenged in the following year. The wide-ranging restructuring of education undertaken by the Labour government encompassed the universities, and their autonomy and their identity were seen to be threatened. As a result of efforts by the universities, supported by alumni, some changes were secured in the Education Amendment Act 1990, but the University Grants Committee was abolished, the universities were placed directly under the Ministry of Education, and the composition of the Council was altered.

Anxious to respond to the demand for university education, the University offered courses at other tertiary institutions in Auckland and Northland. Acquiring buildings used for the 1990 Commonwealth Games village, the University began to develop a campus at Tamaki, initially offering teaching in Commerce. It was obliged, like other universities, to introduce quotas for all first-year courses in 1992, breaking the historic policy of 'open entry'.

The Tamaki Campus is now developing into a research led, innovation campus with links to industry. The campus also has a postgraduate focus. Academic departments at Tamaki specialise in the areas of population health, biodiversity and biosecurity, information technology, psychology and speech science, materials and manufacturing, wine science, and sport and exercise science.

From the mid-1990s, the University introduced semesters, launched its first major fund-raising appeal and inaugurated its Summer School. It joined Universitas 21, an international network of research-intensive universities in Australasia, Asia, North America and Europe, as a foundation member.

Following the appointment of Dr John Hood as fourth Vice-Chancellor in 1999, alliances were forged with Auckland University of Technology and Manukau Institute of Technology (where Bachelor's degrees are now offered in Teaching and Visual Arts). Nursing, Pharmacy and Software Engineering degrees were introduced.

Online enrolment, the first at a New Zealand university, began operating in 2001. In August 2001, the University hosted with the New Zealand Government a major international conference on 'Catching the Knowledge Wave'.

In 2008, the student roll was 38,551 (30,172 EFTS) and external research revenue totalled \$191 million.

The University of Auckland is host to four of the eight Centres of Research Excellence funded by the Government. In 2004 it was designated the country's leading research university 'on virtually any measure' in the Performance Based Research Fund assessment carried out by the Tertiary Education Commission. In the PBRF assessment released in 2007, The University of Auckland again emerged as the New Zealand university with the greatest overall strength. In 2008 The University of Auckland was placed 65th in the *Times Higher Education-Quacquarelli Symonds* world university rankings and it was again first in New Zealand in the Shanghai Jiao Tong University rankings.

Major new buildings have greatly enhanced the City Campus: the impressive Kate Edger Information Commons and Student Commons, the Engineering Atrium and greatly expanded library wing, and a seven-floor extension to the Science Centre which houses Computer Science and Software Engineering. A Fale Pasifika opened in 2004 and the Owen G Glenn Building, a large and striking new complex for the Business School, was completed in 2007. Architecture, Dance Studies, Fine and Visual Arts, Music, and

Planning have combined to form the National Institute of Creative Arts and Industries.

The University of Auckland and the Auckland College of Education amalgamated in September 2004 to form a Faculty of Education. The new faculty, based primarily at the College's campus in Epsom, aims to become New Zealand's leading provider of professional education.

Dr John Hood was appointed Vice-Chancellor of the University of Oxford from October 2004. He was the first person from outside the 900-year-old university to take up the position.

Professor Stuart McCutcheon, formerly Vice-Chancellor at Victoria University of Wellington, started as Vice-Chancellor at Auckland in January 2005. Under his leadership a strategic plan setting out a vision of the University in 2012 was adopted in 2005. Progressive attainment of its objective of making Auckland a world-class university in New Zealand underpins annual planning and resource allocation.

The University has adopted a Campus Development Strategy which envisages a major investment in infrastructure over the next decade. The first major project is the \$240 million redevelopment of the Grafton Campus to refurbish laboratories, upgrade plant and construct new space. The new South Pacific Centre for Marine Science, based at the Leigh marine laboratory, will foster marine research and educate visitors on the marine environment.

In 2008 the University marked its 125th Jubilee. Staff, students, alumni and friends took the opportunity to reflect on and celebrate past achievements and look forward to the future.

A 'Leading the way' fundraising campaign is more than half-way towards meeting its target of \$100 million by 2012.

The University

The University now has five campuses with eight faculties representing each of its main disciplines: Arts; Business and Economics; Creative Arts and Industries; Education; Engineering; Law; Medical and Health Sciences; and Science. In addition, Theology is offered through a School of Theology which will be part of the Faculty of Arts from 2010. There is a growing number of teaching departments, ranging from Accounting and Finance to Surgery. Some departments are associated with more than one faculty.

Many courses and research activities reflect Auckland's and New Zealand's place in the world. Pacific archaeology, ethnology and languages, for example, are stressed in the Anthropology Department. Geographers carry out fieldwork in the Pacific Islands while University scientists make frequent study trips to the Antarctic. Asian languages, including Chinese, Japanese and Korean, are taught and Pacific Island languages have been introduced since 1991. New Zealand's concerns and problems are addressed in subjects as diverse as Sociology,

Education, Social Work, Medicine, Engineering and Architecture. The Geothermal Institute is one of four international centres which provide training in Geothermal Technology. Amalgamation with the Auckland College of Education in September 2004 established The University of Auckland as a leading provider of teacher and human services education.

The University of Auckland recognises research and research-led teaching as a primary responsibility of its academic staff. As the leading research University in New Zealand, The University of Auckland is committed to the quality and excellence of its degree courses including its postgraduate and doctoral programmes. Approximately 8,000 students are enrolled in postgraduate studies, 1700 of these in doctoral programmes. While research is more often basic than applied, what is discovered may ultimately prove eminently practical. The Yacht Research Institute's contribution towards New Zealand's campaigns for the America's Cup is one notable example. The research laboratory at Leigh, east of Warkworth, carries out marine fieldwork. Various research centres cross disciplinary boundaries. The Faculty of Medical and Health Sciences is one of the largest single research institutions in New Zealand.

Structure of the University

The Council

The University's governing body is the Council, a mixture of elected staff, students and graduates, and outside appointees. The Vice-Chancellor, the University's chief academic and administrative officer, is also a member. Council is chaired by the Chancellor who is a lay member of the Council.

The Senate

On academic matters, Council is bound to consult the Senate which the Vice-Chancellor chairs. This body includes all the professors, some non-professorial staff and student representatives. The Senate takes advice from the Education and Research Committees, and from specialist committees, dealing for example with the Library, Information Technology, and the Faculties.

The Faculties

Each faculty is a subcommittee of Senate and is headed by a Dean who is usually supported by Associate Deans, a Faculty Registrar and other administrative staff. The Dean is responsible for coordinating the academic and research activities of individual departments and liaises with both the Registry and the Senate committees on regulations, staff appointments, buildings, research funding, library facilities, timetabling etc. The faculty and departmental offices provide assistance to students who are encouraged to contact the relevant staff for information and advice. Handbooks are available from both faculty and departmental offices.

Central Administration and Services

Day-to-day central administration and service provision is performed by the Vice-Chancellor's Office and Academic Services, Auckland International, Campus Life, Centre for Academic Development, Centre for Continuing Education, Communication and Marketing,

Equity Office, External Relations, Financial Services, Human Resources, IT Services, Property Services, School of Graduate Studies, Schools Partnership Office, Student and Information Services and University Library.

The City Campus

The City Campus, established in 1883, is in the heart of Auckland City, separated from the tower blocks of the central business district by historic Albert Park on its western flank. To the southeast lie the trees and open spaces of the Auckland Domain. Its proximity to the cultural and commercial amenities of the country's largest city, attractive green setting and harbour views bestows advantages enjoyed by few inner city campuses anywhere.

The City Campus has developed extensively during its existence with many refurbished and new building works. Among the major building projects completed in the last year were Lecture Theatre upgrades for Biology, Maths/Physics, the Library basement and a refit of 58 Symonds St. A start was made in 2009 on an extension of the Thomas Building housing Biological Sciences to include modern biological research laboratories.

Major project work in 2010 will include completion of the Thomas Building Extension. A major focus will be to continue the current planning work for the City Campus redevelopment.

The Tamaki Campus

The Tamaki Campus is located on a 32-hectare site in St Johns, 9 kilometres from the City Campus. In 2001, a new vision was developed for the 'green fields' Campus which will see it evolve as a unique national project with facilities and programmes designed to contribute to New Zealand's development as a knowledge society and economy. The Campus aims to be research led, postgraduate intensive, interdisciplinary and entrepreneurial. It seeks to be complementary to the other campuses of the University.

To achieve this vision, the Tamaki Campus is being developed around five major disciplinary themes related to international foresight and to export growth areas for New Zealand. These themes are:

- Health, Sports and Community
- Information Technology, Communications and Electronics
- Environment, Energy and Resources
- Materials and Manufacturing
- Food, Wine and Biotechnology.

The vision includes the development of a Research Integration Campus enabling research institutions and businesses to co-locate with the University. This concept recognises the significant opportunities that co-location delivers in terms of creating wealth from knowledge for the benefit of New Zealand's economy and society.

For students, this development provides practical examples of problem solving from a commercial environment, work opportunities, and an insight into the business ethos of our allied partners. Tamaki is an ideal location for the knowledge economy and to develop the skills required by employers in today's business environment.

The Tamaki Campus offers undergraduate and postgraduate programmes, as well as interdisciplinary research centres:

- The Faculty of Medical and Health Sciences' School of Population Health offers many postgraduate programmes in addition to the undergraduate Bachelor of Health Sciences and Certificate in Health Sciences. Sections of the School include Audiology, the Clinical Trials Research Unit, Epidemiology and Biostatistics, General Practice and Primary Healthcare, Health Systems, Pacific Health, Social and Community Health and Te Kupenga Hauora (Māori Health).
- The Faculty of Science undergraduate and research programmes include Biological Sciences, Computer Science, Applied Behaviour Analysis, Health Psychology, Clinical Psychology, Polymers and Coatings, Speech Language Therapy and Speech Science, Sport and Exercise Science and Wine Science. Tamaki Research Centres in Science include Image Technology and Robotics; and Biosecurity and Biodiversity.
- The Faculty of Engineering has a major research centre at Tamaki, the Centre for Advanced Composite Materials in partnership with the Polymer Research Group from Chemistry. This centre has strong links with the plastics and materials industry sector. A recent development has been the establishment of the Materials Accelerator (in collaboration with the Faculty of Science) which aims to transform the manufacturing sector through partnerships between research and industry)
- The Faculty of Education offers graduate courses in Counsellor Education.

The Campus has three cafes, high quality teaching and computing facilities, and has excellent playing fields and spacious clubrooms on Colin Maiden Park. The Tamaki Library has a growing collection of print materials such as books, serials, DVDs and other items which support the subjects taught on the Campus. Access to the University's extensive subscriptions to electronic resources is through the Library's home page using tools such as the Catalogue and Library databases. Physical items from other locations can be accessed at Tamaki through the intercampus delivery service (ICLDs). A library teaching programme is offered in consultation with academic staff and a full range of information services is provided by library staff.

Tamaki offers a broad range of student services and a regular free bus service for Tamaki-based students operates between the City and Tamaki campuses. Lectures at Tamaki begin 30 minutes past the hour to allow both staff and students, respectively, to teach and to attend classes on both campuses. Parking on the Tamaki Campus is currently free for both staff and students.

The Grafton Campus

Located opposite Auckland City Hospital and the entrance to the Domain, the Grafton Campus covers a 2.2 hectare site on Park Road, Grafton. Originally established for the School of Medicine in 1968, the site was recognised as a separate Medical and Health Sciences Campus in 1995 and in 2008 was formally designated as the Grafton Campus. It is currently the base for the Faculty of Medical and Health Sciences and the Faculty of Science's Department of Optometry and Vision Science.

The Grafton Campus offers student and staff amenities including an information commons, cafeteria, common room, study space, and the specialist medical library, the Philson. The Campus also houses a number of significant research facilities, including the Centre for Brain Research, a state-of-the-art Biomedical Imaging Research Unit, the Centre for Advanced MRI, the Neurological Foundation Human Brain Bank, sophisticated data acquisition and analysis facilities, a DNA sequencing facility and the Auckland Medical Research Foundation Medical Sciences Learning Centre which provides teaching in anatomy, radiology, pathology, and clinical skills in a modern purpose built facility. An Advanced Clinical Skills Centre at the nearby Mercy Ascot Hospital also provides a state-of-the-art environment for simulated training in surgery and anaesthesiology.

In close proximity, Ferncroft Street is temporarily home to the Faculty of Medical and Health Sciences' Administration and Office of the Dean, as well as the School of Nursing, the Learning Technology Unit and the Centre for Medical and Health Sciences Education. Clinical staff from the Faculty's School of Medicine also occupy the Auckland Hospital Academic Centre in the Auckland City Hospital Support Building, as well as having a presence at Middlemore, North Shore, Northland, Rotorua, Waikato and Waitakere Hospitals. The Liggins Institute, a multidisciplinary medical research institute, is located across the road from the Grafton Campus at 2-6 Park Avenue.

Work has recently commenced on an extensive programme designed to transform the Grafton Campus into a modern biomedical and health education and training facility. This work will include refurbishment of the existing buildings to provide high quality research laboratory space, a major upgrade of the central plant and infrastructure and the construction of new space to provide extended student facilities, and to accommodate the return of the School of Nursing, Faculty Administration and the Liggins Institute from their off-campus sites. This work is expected to be completed in late 2012.

Other recently completed building work on the Campus includes the redevelopment of level 5 into modern laboratories and research accommodation for neuroscience and the Centre for Brain Research, a fit-out of level 6, and the completion of a GLP laboratory (AnQual Laboratories).

The Epsom Campus

The Epsom Campus was established in 1926 as the site of the Auckland College of Education, formerly known as the Auckland Teachers' College and the Auckland Teachers' Training College (established 1881). Upon the amalgamation of the Auckland College of Education and The University of Auckland in 2004, the Epsom Campus became the primary site for the new Faculty of Education. The 11.5 hectare campus on Epsom Avenue is approximately four kilometres from the City campus and three kilometres from the Grafton Campus. It is flanked by the Mt Eden Village to the west, Maungawhau (Mt Eden) Domain to the north, and directly adjoins Auckland Normal Intermediate and Kohia Schools and Melville Park to the south and south-east. The campus is well sited for major transport routes. Established trees and gardens complement diverse facilities including pool, gymnasium, café, marae, tennis courts, health and counselling centre and early childhood centres to make this an attractive study location.

The Epsom Campus also houses The University of Auckland Centre for Educational Leadership, Team Solutions, the offices of the Starpath and asTTle projects, the Sylvia Ashton Warner Library and the Kohia Teachers' Centre and retail outlet. These facilities are also a drawcard for practising professionals.

The Tai Tokerau Campus

The Tai Tokerau campus in Whangarei was established by the Auckland College of Education in 1992. Centrally located in Alexander St, opposite Forum North, the campus offers lecture rooms, student centre, library, and a base for a range of Faculty of Education programmes and staff. The Tai Tokerau campus also provides a base for a wider presence of The University of Auckland in the North.

The University of Auckland Trusts and Foundations

The University of Auckland Foundation incorporated under the Charitable Trusts Act, and registered under the Charities Act, is the principal single Foundation for The University of Auckland. It has an independent Board of Trustees responsible for the stewardship, management and appropriate distribution of philanthropic funds, including bequests, given as financial support for the University. Donations can be made for specific purposes, either as an endowment or as an amount that can be used for a specific period of time.

Support is generally for five key purposes:

- Student scholarships and prizes (for both academic excellence and for financial hardship)
- Academic positions
- Facilities and equipment
- Visiting and travelling awards (international exchanges)
- Capital works.

In total there are four bodies which have registered charitable status in their jurisdictions. This allows for donors who are registered for tax purposes in these countries to take advantage of the tax deductibility available when making a gift. The four Trusts are:

1. The University of Auckland Foundation Inc. (established in 2002) and based in Auckland
2. The School of Medicine Foundation (established in 1995) and based in Auckland primarily for the benefit of the Faculty of Medical and Health Sciences
3. The Friends of The University of Auckland (established in 2000) and based in the United States
4. The UK Friends of The University of Auckland (established in 2001) and based in the United Kingdom.

In addition The University of Auckland itself has attained (2006) charitable status in Canada.

The University of Auckland name/logo can only be cited for philanthropic purposes with the consent of the University Council.

The Hood Fund, established to mark the contribution of John Hood to the University, is administered by The University of Auckland Foundation, together with funds established to mark the Centenary of the University, to further international exchange of knowledge and experience and academic excellence.

Interest in The University of Auckland Foundation and Hood Fund should be directed to the University Registrar or to the External Relations Department.

Information on making a donation, including a bequest to any of the four Trusts above should be directed in the first instance to the Foundation Manager, the Office of External Relations and Development.

Alumni Relations

The University's alumni, now numbering more than 132,000, form an influential community of scholars both in New Zealand and overseas. As members of the Court of Convocation they are eligible to vote for graduate representatives on the University Council. They are entitled to a wide range of benefits including *Ingenio*, the twice-yearly alumni magazine and the regular email newsletter @auckland. The Alumni Relations Office also organises regular local, national and international events for them.

The University of Auckland Society is a sub-group of the Alumni Relations Office. They work to promote and further the University's best interests. The University jointly hosts with the Society the Distinguished Alumni Awards dinner.

The Alumni Relations Office is based in University House, 19A Princes Street. Further information can be found at www.alumni.auckland.ac.nz

Auckland UniServices Ltd.

Auckland UniServices Ltd is a company legally separate from The University of Auckland but its shares are held in trust by the University. All profits made by UniServices are returned to The University of Auckland.

The objectives of UniServices are to:

- Commercialise University-sourced technology and innovations.
- Carry out research contract work for outside organisations.
- Contract with clients for education and training programmes for groups.
- Undertake any other commercial work considered to be advantageous.
- UniServices owns the intellectual property of the University which arises from research activities.
- UniServices will evaluate the commercial potential of new ideas, innovations and inventions produced by University staff and students and, where there is judged to be a good possibility of commercialisation, will arrange patent protection or advise on copyright and/or confidentiality agreements.

The main office of UniServices is located in UniServices House, 70 Symonds Street, and is open during normal working hours, phone +64 9 373 7522.

Alliances with Other Tertiary Institutions

The University has alliances with other tertiary institutions in the Auckland region.

Auckland University of Technology

The University of Auckland and the Auckland University of Technology entered an alliance in 1999. The alliance provides for the development of complementary teaching programmes and co-operative activities in administration, research and procurement. A Joint Board between the two institutions oversees the operation of the alliance.

Manukau Institute of Technology

In 1999 The University of Auckland and the Manukau Institute of Technology signed a Deed of Cooperation with the aim of enhancing the availability of University qualifications to students in the Manukau region. The University of Auckland Programme at Manukau offers the degrees of Bachelor of Education (Teaching) and the Bachelor of Visual Arts. These programmes are taught at the Manukau Institute of Technology Campus. For further information on these programmes and on admission and enrolment, contact the Course Information Centre at Manukau Institute of Technology, or the ClockTower Student Information Centre at The University of Auckland.

ADMISSION AND ENROLMENT 2010

The University of Auckland has an online system for admission and enrolment.

Admission to The University of Auckland

All new students and those not enrolled in 2009 who are intending to study at the University in 2010, are required to complete an Application for Admission form. The form may be completed online at www.auckland.ac.nz/apply_now or be obtained by telephoning 0800 61 62 63. For students who do not have access to Internet facilities, a Help Lab is available at the address below. Doctoral students should first complete the Expression of Interest online; they should present themselves at the Graduate Centre to accept their offer and to be enrolled.

ClockTower Student Information Centre
The University of Auckland
22 Princes St
Auckland 1142
New Zealand
Email: studentinfo@auckland.ac.nz

All Applications for Admission by new students will be acknowledged. Students will receive an offer of a place in programmes (degree, diploma or certificate) for which their admission is approved. **This offer of a place must be accepted online before the student proceeds to enrol in the course/s of their choice.**

Enrolment at The University of Auckland

Students enrol in courses online from a remote site, or from one of the Help Labs at the University.

Admission and Enrolment Timetable

Applications for Admission can be submitted at any time throughout the year, but must be received by published deadlines.

Students must enrol as soon as possible after acceptance of an offer of place, as many University of Auckland courses are very popular and have a limited number of places available.

ADMISSION REGULATIONS

Application for Admission

All students intending to study at The University of Auckland for the first time, and those students not enrolled at The University of Auckland in the previous calendar year, must submit an Application for Admission. To enrol applicants must meet (a) the admission requirements as detailed below and (b) any specific programme entry requirements. Students whose admission to a programme is approved will receive an offer of a place and on acceptance of this offer may proceed to enrol online in courses.

Prerequisites and Conditions

- 1 Subject to the Council's statutory powers to decline admission and enrolment (whether for insufficiency of accommodation or of teachers or for other cause) and to Regulation 2, a person is eligible to be admitted to the University and to be admitted as a student if that person:
 - a has satisfied the requirements for entrance to a university in New Zealand
 - or
 - b is granted Special Admission
 - or
 - c is granted Discretionary Entrance
 - or
 - d is granted admission *ad eundem statum*, based upon study at a secondary school or another tertiary institution:
 - (i) at entrance level,
 - or
 - (ii) with credit,
 - or
 - (iii) with graduate status.
- 2 Unless Senate approves otherwise, a person who has not reached the age of 16 years by 31 December in the year preceding that in which admission is sought will not be eligible to be admitted to this University.
- 3 A person seeking to be admitted to the University must:
 - a comply with these regulations
 - and
 - b sign and date the declaration on the Application for Admission form which includes the words:

'I promise to abide by the Statutes and Regulations, and comply with the reasonable requirements of The University of Auckland'.
 - or
 - c accept that completing and submitting the Application for Admission online constitutes signing and dating the declaration as defined under the Electronic Transactions Act 2002.

Requirements for Entrance to a University in New Zealand

- 4 a **National Certificate of Educational Achievement**
From 2005: a minimum of 42 credits at level 3 or higher on the National Qualifications

Framework, including a minimum of 14 credits at level 3 or higher in each of two subjects from an approved subject list, with a further 14 credits at level 3 or higher taken from no more than two additional domains on the National Qualifications Framework or approved subjects; plus, a minimum of 14 credits at level 1 or higher in Mathematics or Pangarau; plus, a minimum of 8 credits at level 2 or higher in English or Te Reo Māori; 4 credits must be in Reading and 4 credits must be in Writing.

b Bursaries examination

Up to and including 1986: an aggregate total of 160 marks in four subjects.

From 1987 to 1992: four individual subjects with D grades or higher. (Practical Art up to 1988 counts as two subjects for this purpose.)

From 1993 to 2003: three individual subjects with C grades or higher plus Higher School Certificate, or an 'A' or 'B' Bursary.

c UE gained before 1986.

d Up to and including 1992: a combination of credits, in a minimum of four subjects, gained from UE before 1986 and/or Bursaries Examinations since. A credit required a mark of at least 40 percent in 1986 or a D grade or higher from 1987 on. (Practical Art up to 1988 counts as two subjects for this purpose.)

From 1993 to 2003: a combination of credits in three individual subjects in the Bursaries Examination plus Higher School Certificate.

e Up to and including 2003: 13 credits in three different subjects at Level 3 or above on the National Qualifications Framework and Higher School Certificate.

Note: Credits in approved subjects from the National Qualifications Framework, and grades C or better in NZUEBS or equivalent, may be combined to make up the equivalent of three C passes.

Special Admission

- 5 a A person who does not hold a university entrance qualification but who is a New Zealand citizen or permanent resident and has attained the age of 20 years on or before the first day of the semester in which a proposed programme is offered is eligible to be granted Special Admission.
- b A person seeking Special Admission to the University has to apply for it in accordance with the Admission Regulations and submit evidence of age and educational qualifications.
- c Senate may waive the age requirement where an applicant is in its opinion otherwise fit to be admitted and, in particular, has satisfied any qualification for admission specified in the regulations for that programme of study.
- d A person seeking to be admitted to The University of Auckland who wishes to be

granted credit for any prior learning must apply under Regulation 7 (Admission at Entrance Level or with Credit).

Discretionary Entrance

- 6 a A person under the age of 20 years who does not meet the University Entrance standard, but
- (i) is a citizen or permanent resident of New Zealand or Australia*;
 - and
 - (ii) has received secondary schooling to at least New Zealand Year 12 level (or its equivalent overseas) and earned at least 14 credits in an approved subject at Level 2 towards NCEA (or its equivalent);
 - and
 - (iii) has met the literacy and numeracy standards required for University Entrance, or their equivalents;
- may apply for Discretionary Entrance.
- * *Australian applicants' most recent year of schooling must have been in New Zealand.*
- b Persons who have undertaken Year 13 study beyond 1 June at a New Zealand secondary school may normally not be admitted under the Discretionary Entrance provisions before July in the following year. Admission will be at the discretion of the University.
- c In special circumstances the Chair of the New Zealand Vice-Chancellors' Committee's Sub-Committee on University Entrance may permit persons who do not fulfill clause 6a(ii) or clause 6a(iii) above to apply for Discretionary Entrance.
- d A person studying at a New Zealand secondary school, who is attempting to qualify for entrance to the University, may apply for Discretionary Entrance in the same year for the purpose of enrolling in papers offered in Summer School. Any person admitted under this regulation who does not, in the following January, meet the University Entrance standard will be required to withdraw from the University and may re-apply for admission at mid-year. Students required to withdraw may complete their Summer School programme before doing so, but any courses passed will not be credited to a qualification until a University Entrance qualification is gained.
- e A person seeking Discretionary Entrance to the University must apply by completing the requirements prescribed on the Discretionary Entrance form.

Admission *ad eundem statum* (Admission at Entrance Level or with Credit)

- 7 a **From a New Zealand university**
A student from another university in New Zealand, including a student who had enrolled at The University of Auckland previously, who wishes to reapply to The University of Auckland must submit an Application for Admission form and may apply for credit under the provisions of the Credit Regulations.

b **From another tertiary institution in New Zealand or overseas**

A person who wishes to be admitted to the University and who has gained appropriate qualifications validated by the New Zealand Qualifications Authority or from an overseas institution may be granted admission by this University:

- (i) at entrance level
- (ii) with credit towards a certificate, diploma or a Bachelors degree for work which in the opinion of Senate is substantially equivalent and is in accordance with the credit regulations
- (iii) with graduate status.

c **From a New Zealand secondary school**

New Zealand citizens, permanent residents or international students who have gained from a New Zealand secondary school an entrance qualification approved by the New Zealand Vice-Chancellor's Committee for the purpose of admission *ad eundem statum*, may be granted admission *ad eundem statum* to this University.

d **From an overseas secondary school**

New Zealand citizens, permanent residents or international students who have gained an appropriate overseas qualification may apply to have that qualification recognised as being equivalent to a university entrance qualification set out in Regulations 4a–e above. A New Zealand citizen who has completed a year of academic study overseas, which is deemed to be at the equivalent of Year 13 in New Zealand, whether or not a formal academic qualification has been obtained, may apply for Discretionary Entrance, if appropriate, or may apply for *ad eundem statum* entrance under this clause.

- e A person seeking admission under this regulation has to apply by completing the requirements on the Application for Admission form.

- 8 a Credits may be specified or unspecified and the grant of admission may include permission to advance in specified subjects or courses.
- b Prerequisite courses or programmes may be prescribed as a condition of the approval to proceed to a higher degree or other qualification.

Students Enrolled at Another Educational Institution

- 9 a When they enrol, students are required to declare if they are intending to enrol concurrently during the year in question at any other educational institution.
- b A student at a New Zealand secondary school who satisfies the admission requirements and who has the specific written approval of the institution's principal may, with the approval of Senate or its representative, enrol in up to 15 points per semester.

English Language Competence

- 10 a Applicants for admission to The University of

Auckland must provide evidence acceptable to the University of their competence in both written and spoken English.

- b For admission purposes, the University will be satisfied of an applicant's competence in English:

(i) If English is the applicant's first language;

or

(ii) If the applicant has a New Zealand university entrance qualification;

or

(iii) If the applicant has an overseas university entrance qualification from a country where the main language is English and the main language of instruction and assessment for that qualification was English;

or

(iv) If the applicant performs to a satisfactory standard, as set down by the University Senate from time to time, in an approved English Language test;

or

(v) If the applicant provides other evidence acceptable to the University of competence in both written and spoken English.

- c If the applicant is age 20 years or over, and is a New Zealand citizen or permanent resident, this regulation does not apply.

Note: Under the provisions of the Education Act 1989, The University of Auckland may require students over the age of 20 applying for admission to any restricted entry programme to provide evidence of English language competency.

ENROLMENT AND PROGRAMME REGULATIONS

Academic Calendar

- 1
 - a The academic year will begin on the first day of January of the calendar year and will end on the last day of December of that same calendar year.
 - b There will be a Summer School and two semesters in each year.
 - c The Summer School will begin on the second working day after the New Year break and will end with examinations held over three days commencing the second or third Monday in February.
 - d The first semester will begin on the ninth or tenth Monday of the calendar year and end on the 26th Monday of the calendar year, the final three weeks and one day of which will be a study and examination period.
 - e The second semester will begin on the 29th or 30th Monday of the calendar year and end on the 46th Monday of the calendar year, the final three weeks and one day again being a study and examination period.
 - f Each semester will include a break of at least one week after about six weeks of teaching.

Definitions of Full-time Study

- 2 Full-time study is defined as a student workload of:
 - a not fewer than 100 points over two semesters in one year

or

 - b not fewer than 50 points in one semester

or

 - c not fewer than 25 points in Summer School.
- 3 Part-time study is defined as a student workload of:
 - a fewer than 100 points over two semesters in one year

or

 - b fewer than 50 points in one semester

or

 - c fewer than 25 points in Summer School.

Points

- 4
 - a
 - (i) A student may enrol in up to 170 points in an academic year for a Bachelors degree, diploma or certificate, subject to the provisions of the Academic Progress regulations
 - (ii) Provided the 170 point limit is not exceeded, a student may enrol in:
 - (a) up to 80 points in each of Semesters One and Two
 - (b) up to 30 points in a Summer School.

Note: A recommended full-time programme in Semesters 1 and 2 would normally comprise a total of 120 points.

- b
 - (i) For a Masters degree, PhD or other doctorate, where another programme is included in the enrolment, a limit on points may be determined by the Dean of Faculty or delegated representative in any particular case provided that the Masters, PhD or doctoral programme will always comprise more than half of the total points for which the student has enrolled.
 - (ii) Students who are eligible to claim student allowances and/or an additional student loan entitlement and wish to enrol during the summer vacation period in order to work on their thesis, dissertation or research topic are required to complete a Course Alteration Form.

Note:

- a *This regulation provides the opportunity for Masters students to include their thesis, dissertation or research topic in their enrolment together with the required courses in any academic year.*
- b *Before completing a Masters degree or submitting a thesis, a student needs to have enrolled in, and paid the specified fees for at least the minimum number of points as set out in the relevant degree course regulations.*

General Programme Provisions

- 5 a For the purposes of this section of the Regulations a representative of Senate includes a Dean; and the Deputy, or Associate of a Dean; and a Head of Department and the Deputy or Associate of a Head of Department.
- b Subject to the Admission Regulations and to the express provisions of any other statute or regulation, every student for a certificate, diploma or degree programme must:
- (i) be admitted to the University;
 - and
 - (ii) follow the prescribed programme in the order prescribed or indicated in accordance with the regulations governing that programme;
 - and
 - (iii) comply with the provisions of the Examination Regulations.
- c Each student must ensure that, before confirming their enrolment, their proposed programme and enrolment:
- (i) complies with the regulations of the qualification to which they have been admitted;
 - and
 - (ii) does not involve lecture clashes.
- d Senate or its representative may in exceptional circumstances approve:
- (i) a proposed enrolment which does not in every particular satisfy the regulations for the programme for which the student is intending to enrol;
 - or
 - (ii) a variation in the programme to avoid lecture clashes.
- e Where an approval of a proposed programme as a whole is declined by a representative of Senate the student may appeal to Senate whose decision shall be final.
- f Where electives are prescribed for a programme, Senate may at its discretion determine which of them shall be available in any semester provided that sufficient electives are available to enable students to complete their programme.
- g A student who has enrolled for the second semester in a course or courses that have a first semester prerequisite or corequisite and who fails the prerequisite/corequisite course(s) may not proceed with the second semester enrolment unless a concession is granted by the relevant Dean.
- h Where in the opinion of a Head of Department an insufficient number of students has enrolled in a course taught in the Department or where there are insufficient staff to teach it, that Head of Department may, with the approval of the Dean of Faculty, cancel that course not later than one week after the beginning of the semester in which it would have been taught, if the essential prerequisites for any student's enrolment are not thereby affected. A student is not to be charged a

fee for any alteration to enrolment required because of the cancellation of a course.

Restrictions

- 6 a A student may not normally enrol in the same semester for more than two different programmes.
- b
- (i) A student may not enrol in the same semester for courses the content of which is substantially similar.
 - (ii) A student may not enrol for any course the content of which is the same as, or substantially similar to, any course for which credit has been received, provided that in exceptional circumstances Senate or its representative may permit such enrolment for a Certificate of Proficiency.
 - (iii) Work submitted for credit towards the result in any course may not be resubmitted in respect of any other course.
- c A student who has twice enrolled in, but has failed to be credited with a pass in, a course is not entitled to enrol again in that course other than in exceptional circumstances approved by Senate or its representative.
- d A student may not be admitted to a programme for a qualification for which the requirements have been completed or which has already been awarded or conferred, unless specific provision is made in the regulations for the relevant programme or special approval is given by Senate or its representative.
- e Unless special approval is given by Senate or its representative, a student may not be admitted to a programme for a postgraduate qualification
- (i) for which the student has previously failed to meet the requirements
 - or
 - (ii) the content of which is the same as, or substantially similar to, any qualification for which the student has previously failed to meet the requirements.
- f
- (i) A student who has not enrolled in a course for a programme for a period of five years shall have their admission to the programme discontinued and must apply for readmission to that programme before any further enrolment for the programme.
 - (ii) Specific conditions may be imposed on the enrolment of a student re-admitted to a programme after discontinuation.

Enrolment

- 7 a Following acceptance in a programme of their choice, students can enrol in courses online. For late enrolment see the Late Enrolment provisions in this section.
- b Students whose dissertations or theses for a diploma or degree are incomplete are required to be enrolled until the dissertation or thesis is presented.

Late Enrolment

- 8 a Subject to the availability of courses and/or availability of places in a course, a late enrolment may be accepted
- after the day prescribed and before the deadline for additions and deletions;
 - after the deadline for additions and deletions upon payment of a late enrolment fee.
- b The choice of courses for students who enrol after the closing date for enrolment will be determined by Senate or its representative and will not necessarily be those proposed by the students concerned. In determining such courses, Senate is to have regard to the prior claims upon both laboratory and classroom space of those students who have enrolled at or before the prescribed time.

Not-for-credit Courses

- 9 a Subject to the Admission and Fees Regulations, a student who has a personal interest in a course and for whom enrolment for a Certificate of Proficiency is deemed inappropriate, may apply for enrolment in a Not-for-Credit course.
- b Enrolment is at the discretion of Senate or its representative.

Changes to Current Enrolment**Deadlines for Additions and Deletions**

- 10 The last dates for additions and deletions under Regulations 11 and 12 are set out below:

Semester courses enrolled in	Deadline for additions/deletions
First Semester courses	2nd Friday of semester
Second Semester courses	2nd Friday of semester
Double-semester courses	4th Friday of first semester for the course
Summer School courses	7 days inclusive from the start of Summer School
Quarter courses	2nd Friday of quarter

Note:

- It is not sufficient for a student to notify an addition or deletion solely to the Department – it must be done online.*
- Amended fees invoices (including credits) for any changes to enrolment will be issued after the close of the official alteration period.*
- Where special circumstances apply, a student may apply for an exemption from additional fees from the Director, Academic Services (or delegated authority).*
- Deadline dates are calculated from the start of the semester, quarter or Summer School. For courses that start on other dates, the deadline will be calculated from the start of the course.*

Additions

- 11 Students wishing to add a course to their current enrolment may do so online, where the approved limit has not been reached or where the available resources have not reached capacity.

Deletions

- 12 a A student wishing to delete a course may do so online.
- b The course will be deleted from the student's academic record.

Late Deletion

- 13 a Late applications to delete a course or courses will be considered by the Director, Academic Services (or delegated authority) only in exceptional circumstances (such as illness, injury or events beyond the control of the student) and upon submission by the student of appropriate evidence.
- b Applications must be made on the Late Application to Delete a Course form and must be received by the last day of lectures of the semester or quarter for the course.
- c Following the decision on an application for late deletion of a course, the student may apply for reconsideration of that decision. An application for reconsideration must be made:
- in writing to the Director, Academic Services no later than four weeks after the student is notified of the decision
- and
- must be accompanied by further evidence in support of the application.

Substitutions

- 14 a Where a Department directs a student to substitute one course for another in the same subject, the student may do so on the appropriate form and with the approval of the Dean of the appropriate Faculty.
- b Courses may be substituted up until three weeks before the end of lectures for the semester in which the course is taught.
- c A course may only be substituted with a course which is of the same duration, same points value and taught in the same semester.
- Note: Where students are directed to take a more/less advanced Second Semester course in place of a First Semester course, they will be permitted, if necessary, to make a late deletion.*
- The substituted course will be removed from the student's academic record.
 - There will be no adjustment to the student's tuition fees. If there is a variation between charges payable in respect of the substitute and the substituted course, the student will be required to pay only the difference in those charges.
 - There will be no refund of any fees or charges for the substituted course.

Withdrawals

- 15 a Any student wishing to cease attendance in a programme or course after the period specified for deletion may apply to do so by obtaining the approval of the relevant Head of Department and the Dean of the Faculty for that programme. Application must be made on the Course Alteration Form.

- b The last dates for withdrawals are set out below:

Semester courses enrolled in	Deadline for withdrawals
Semester courses	3 weeks before the end of lectures
Double-semester courses	3 weeks before the end of lectures in the 2nd Semester
Quarter courses	2 weeks before the end of lectures
Summer School courses	1 week before the end of lectures

- c The course will remain on the academic record and show as a withdrawal.
- d All fees will remain owing.
- e For calculation of Satisfactory Progress (under Regulation 18 of these regulations) withdrawal will be counted as a failure.
- f For selection into a limited-entry course, a withdrawal is counted as a failure.
- g Where withdrawal from a course will not reduce the student's enrolment to less than 100 points over the academic year, the withdrawal from that course will not affect selection into limited-entry courses.
- h For student allowances withdrawal from a course will count as a failure and automatically reduce the number of points in which the student is deemed to be enrolled.
- i If a student who ceases to attend lectures fails to complete the Course Alteration Form, the course(s) will be recorded as 'Did not sit' and will count as a failure for all purposes.
- j Applications to withdraw submitted after the dates in Regulation 15b and before the end of the semester or quarter will be considered by the Director, Academic Services (or delegated authority) only in exceptional circumstances (such as illness, injury or events beyond the control of the student) and upon submission of the appropriate evidence.

Refund of Fees

- 16 a Where a student applies, before the dates specified in Regulation 10, to delete all courses of the current enrolment, a full refund of all tuition fees and the Student Services Fee will be made.

Note: A student who has deleted all courses is no longer deemed to be enrolled.

- b Where a student applies, before the dates specified in Regulation 10, to delete one or more but not all courses of the current enrolment, a refund of the fees for the course(s) deleted will be made.
- c Where a student has been permitted by the Director, Academic Services, under Regulation 13, to delete a course after the prescribed date because of illness, injury or exceptional circumstances beyond the student's control, a refund of tuition fees will be granted in accordance with the Tuition Fees Refund Guidelines below, provided that Senate may in its discretion increase this

percentage, but there will be no refund of the Student Services Fee.

Note: Tuition Fees Refund Guidelines:

- a For single-semester courses which are deleted:
- (i) before the commencement of the mid-semester break for that semester: 50 percent
 - (ii) thereafter no refunds will be granted.
- b For double-semester courses which are deleted:
- (i) before the commencement of the mid-semester break for the First Semester: 75 percent
 - (ii) before the end of the First Semester: 50 percent
 - (iii) before the commencement of the mid-semester break for the Second Semester: 25 percent
 - (iv) thereafter no refunds will be granted.
- c For Summer School courses which are deleted:
- (i) before the end of the second week from the start of Summer School: 50 percent
 - (ii) thereafter no refunds will be granted.
- d For quarter courses which are deleted:
- (i) before the end of the fifth week of the quarter: 50 percent
 - (ii) thereafter no refunds will be granted.

Academic Progress

- 17 a Regulations concerning academic progress apply to all programmes at The University of Auckland unless otherwise specified in the particular regulations for certificates, diplomas and degrees printed elsewhere in this *Calendar*.
- b The application of these regulations includes students intending to transfer to The University of Auckland from any other New Zealand university and those students applying for admission having previously studied at another tertiary institution.
- c Summer School is classified as a semester for the purposes of academic progress.
- d A quarter is classified as a semester for the purposes of academic progress.

Requirements for Satisfactory Progress

- 18 A student is required to attain a Grade Point Average of at least 0.8 in the last two semesters in which they were enrolled.

Unsatisfactory Progress

- 19 a A student who fails to meet the requirements of satisfactory progress will, in the next two semesters of study, be restricted to:
- (i) not more than 45 points in the first semester of enrolment (other than Summer School)
 - (ii) not more than 60 points in the second semester of enrolment (other than Summer School)
 - (iii) not more than 25 points in Summer School.
- b The records of a student whose enrolment is

- restricted under the provisions of Regulation 19a will be referred to the relevant faculty for review of the restriction which may be varied if appropriate.
- c A student whose enrolment is restricted under the provisions of Regulation 19a, and who fails to attain a Grade Point Average of 0.8 or better in the next two semesters of study, will be suspended from enrolment at The University of Auckland for the next three semesters.
 - d Students suspended from enrolment under these provisions may apply to Senate for reconsideration of their suspension where they consider that medical or other exceptional circumstances should be taken into account. Where such reconsideration is given, Senate or its representative (the Dean of the Faculty concerned) may:
 - (i) confirm the suspension
 - or
 - (ii) permit a student to enrol under specific conditions.
 - e A student permitted to re-enrol under conditions specified by Senate or its representative, but who fails to satisfy those conditions during the next three semesters, will be automatically suspended from enrolment at The University of Auckland for the following three semesters.
 - f A student is entitled to re-enrol without any restriction that might be imposed under these regulations where any condition(s) imposed in the previous three semesters have been satisfied.
 - g A student suspended under Regulations 19c or 19e must apply for readmission to a programme.
 - h A student who fails on a second or subsequent occasion to meet the requirements for satisfactory progress, will be excluded from The University of Auckland for the next nine semesters.
 - i A student excluded under Regulation 19h must apply for readmission to a programme.
 - j Students excluded from enrolment under these provisions may apply to Senate for reconsideration of the exclusion where they consider that medical or other exceptional circumstances should be taken into account. Where such reconsideration is given, Senate or its representative (the Dean of the Faculty concerned) may:
 - (i) confirm the exclusion
 - or
 - (ii) permit a student to be readmitted under specific conditions.
 - k Where a student has not been enrolled at a

tertiary institution for a period of five or more years, any conditions previously applicable in respect of that student's academic progress will be cancelled.

Note: any specific conditions applied by Senate or its representative are to take precedence over the requirements set down in Regulations 19a, c and h.

- 20 Applications to Senate must:
 - a be made on the appropriate Reconsideration of Suspension or Exclusion form
 - and
 - b if special consideration is sought for medical or other exceptional reasons, include evidence
 - and
 - c state the programme for which the student intends to apply, should the application for readmission be successful
 - and
 - d reach the Director, Academic Services, by the closing date for enrolment for that semester.
- 21 Any student declined readmission at this University under the Unsatisfactory Progress Regulation may within 14 days appeal to the Council against the decision of Senate.
- 22 Provided that the student is enrolled in no other course, Regulations 17–21 do not apply to a student enrolling in any one of: case study, dissertation, original investigation, practicum, thesis or the Degree of Doctor of Philosophy.

Vice-Chancellor's Special Powers

- 23 a The Vice-Chancellor may give such direction, or make such provision as he or she thinks fit, for the relief of undue hardship where it is shown to his or her satisfaction:
 - (i) that an alteration or amendment to statutes or regulations involving a change in a programme or in examination requirements has caused a student hardship
 - or
 - (ii) that official advice has been given in writing and acted upon, and it is later found that the courses the student has taken do not accord with the programme regulations and that hardship would be caused if the student were to be compelled to comply with the full requirements of the regulations.
- b A student may appeal against any decision of the Vice-Chancellor under this Regulation to the Council by giving notice in writing to the Registrar within 14 days of being notified of the decision. The Council shall have the power to make such provision as it may think fit. The decision of the Council on any appeal under this Regulation shall be final.

CREDIT REGULATIONS

Credits

- 1 a A student may, with the approval of Senate or its representative and on payment of the prescribed fees under the Fees Statute, be granted credit towards a programme approved by the Dean of Faculty concerned under the provisions of these regulations.
- b A student may not be granted further credit for work already credited under this regulation.

Credit from Another Tertiary Institution: Transfer Credit

- 2 a A student who applies for admission to The University of Auckland and has undertaken a programme at another tertiary institution in New Zealand may be granted appropriate credit towards a degree or other qualification of The University of Auckland on the basis of work successfully completed in the previous programme.
- b A student who has gained from an overseas institution an appropriate qualification, or credit towards a qualification, validated by the New Zealand Qualifications Authority, and who is granted admission by this University, may be granted appropriate credit towards a qualification of The University of Auckland on the basis of work successfully completed in the previous programme.
- c To be awarded an undergraduate degree of The University of Auckland, a student must complete at least the equivalent of a full time year of study as an enrolled student at The University of Auckland.
- d Credit granted under 2a or 2b above may be specified or unspecified and the grant of admission may restrict advancement in specified subjects or programmes.
- e
 - (i) Credit granted under 2a or 2b above will normally be granted only for courses at Stage I and Stage II. Only where prior approval for exchange or study abroad enrolment has been granted, or in exceptional circumstances, will the grant of credit be considered at Stage III for courses taken at Stage III at another tertiary institution.
 - (ii) Where Parts are specified for a Bachelors degree, credit may be awarded within a Part according to suitability of course content and professional requirements and irrespective of the Stage of the course passed.
 - (iii) Only where prior approval for exchange or study abroad enrolment has been granted, or in exceptional circumstances, will the grant of credit be considered for courses taken at another tertiary institution at postgraduate level or for a postgraduate degree, diploma, or certificate.
- f Credit will not be available for any course

passed at another tertiary institution with a conceded or restricted pass.

- g Credit may be refused for courses passed more than five years previously.

Approved Study at Another Institution

- 3 a A student who is enrolled at The University of Auckland and who concurrently enrolls and completes courses at another tertiary institution, which they wish to credit to their University of Auckland qualification must:
 - (i) Seek from the Dean of the relevant faculty prior approval of the proposed concurrent enrolment and confirmation that the courses will satisfy the regulations and requirements for the qualification for which the student is enrolled at this University and that appropriate credit may be granted.
 - (ii) Apply for credit in accordance with these regulations when the official results are known.
- b Any credit granted from study at a Summer School will be added to the current year of study at this University.

Note:

- (i) Where prior approval has not been sought, credit will not normally be granted.
- (ii) This regulation applies to Summer School study at an institution other than The University of Auckland with the intention of requesting credit for a University of Auckland qualification.

- 4 Where study at another institution is approved as part of a study abroad or exchange arrangement, credit may be approved for Stage III or postgraduate level courses if the successfully completed study is deemed appropriate for such credit by the Dean of the relevant faculty.

Cross-credits and Internal Credit

- 5 a In this Regulation 'cross-credit' means a course which is common to two University of Auckland undergraduate qualifications, which may be Bachelors degrees, undergraduate diplomas and undergraduate certificates, and is credited to both. 'Internal credit' means credit awarded to a programme for one or more courses passed for another University of Auckland qualification, which cannot be designated as a cross-credit.
- b A student taking two programmes may only be awarded as cross-credits and/or internal credit the maximum allowed for one, but not both, of the programmes.
- c A course which is designated a cross-credit may not be credited to more than two qualifications.
- 6 a When calculating cross-credits between a second and third qualification, points from previously granted cross-credits may not be used. The maximum number of cross-credit points that may be granted is based on one

third of the points not previously designated for cross-credits.

- b A Stage III course that fulfils the Stage III requirements of one qualification may not be designated as a cross-credit to meet the Stage III requirement of another qualification.
- c A student may not designate as a cross-credit any course passed with a conceded pass or a restricted pass. If that course is compulsory, another course may be substituted for it as Senate or its representative may approve.
- d Designation of courses as cross-credits, as permitted by these regulations, is subject to the approval of the Dean of the relevant faculty or their nominee.

Limits

- 7 Subject to any other provisions of these regulations or the relevant Programme Regulations:
 - a In the case of qualifications of equal value, the total value of cross-credits and internal credit is limited to one third of the total value of the degree, diploma or certificate.
 - b Where the qualifications concerned are of different values, the total value of cross-credits and internal credit may not exceed one third of the total points value applying to the qualification of lesser value.
 - c Other than under the provisions of Regulations 2e(iii) and 4, cross-credits and transfer credits are not available for Masters degrees, Bachelors Honours Postgraduate degrees, doctorates, postgraduate certificates and postgraduate diplomas.

Limits on Cross-credits for Conjoint Degrees

- 8 a A conjoint degrees combination is considered to be two degrees for the purpose of calculating cross-credits.
- b
 - (i) A maximum of 80 points may be cross-credited from a completed conjoint degree component to another qualification.
 - (ii) A maximum of 80 points may be cross-credited from a completed qualification to a conjoint degree component.
 - (iii) The apportionment of the points to the components of the conjoint degrees combination is subject to the approval of the appropriate Deans or their representatives.

Reassigned Courses

- 9 a A student may apply, by submitting an Application to Reassign Courses form, to reassign courses passed for, and assigned

to, one qualification to another qualification for which the courses are available.

- b A student may not reassign courses passed for one qualification to another once the qualification for which the courses were passed has been awarded.
- c A student may not reassign to another qualification any course passed with a conceded pass or a restricted pass. If that course is compulsory, another course may be substituted for it as Senate or its representative may approve.
- d A student may apply to reassign a course or courses passed for a Certificate of Proficiency to a taught Masters degree, a postgraduate diploma or a postgraduate certificate provided that:
 - (i) no more than 30 points are reassigned
 - (ii) the enrolment in the postgraduate qualification is no later than three semesters from the initial enrolment in the course(s) reassigned from Certificate of Proficiency
 - (iii) the application to reassign is made at the time the student is admitted to the postgraduate qualification
 - (iv) the course is available in the schedule of the qualification to which it is reassigned.
- e Courses which are reassigned cease to be credited to the former qualification.

Review and Appeal Procedure

- 10 a A student may make a complaint about a decision under these Regulations to the Admissions Office or Student Records Office, as appropriate.
- b If the complaint is unable to be resolved by the Admissions or Student Records Offices, it will be referred to the Faculty concerned for reconsideration.
- c If a student remains dissatisfied following Faculty reconsideration, a written appeal for a review of the credit decision may be submitted to the Director, Academic Services.
- d The Credit Review Board will consider all appeals for review of credit decisions on behalf of Senate.
- e Students who are submitting an appeal have the right to be heard in person.
- f The decision of the Credit Review Board must be recorded and the appellant informed of the decision in writing.
- g The decision of the Credit Review Board is final.

GENERAL REGULATIONS – MASTERS DEGREES

The following regulations take precedence over the specific regulations for each Masters degree published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific degree regulations for each Masters degree and the Guidelines for Masters students.

Note: For the purposes of these regulations:

- (i) a thesis or research portfolio is worth between 90 and 120 points
- (ii) a dissertation or research project is worth between 30 and 80 points.

General Requirements

- 1 A student enrolled for a Masters degree at this University must pass the full points value specified in the degree regulations. The total enrolment may not exceed the minimum points requirement for the degree by more than 40 points.

2 Deadlines for Completion

Degree Points	Semester of initial enrolment	Number of semesters to complete degree		Due date for submission of theses or research portfolio	Due date for short extensions
		Full time	Part time		
120					
Research Masters	Semester One	2	4	15 December	28 February
	Semester Two	2	4	1 May	15 July
Taught Masters	Semester One	2	8	N/A	N/A
	Semester Two	2	8	N/A	N/A
240					
	Semester One	4	8	15 December	28 February
	Semester Two	4	8	1 May	15 July

Notes:

- 1 For these purposes, the nominal starting date for Semester One is **1 March** and for Semester Two **15 July**.
- 2 In all cases for the calculation of due date, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.
- 3 Part-time study is defined as a student workload of fewer than 100 points over two semesters in one year or fewer than 50 points in one semester.
- 4 Where the enrolment in the programme is partially full-time and partially part-time, the maximum time for completion is to be based on the period for completion for part-time study provided that one semester of full-time study counts as two semesters of part-time study for the purposes of calculation of the completion date.
- 5 Due dates for submission are calculated according to the number of weeks available to complete the thesis or research portfolio, including the summer period.

Completion of Requirements

3 a Thesis or Research Portfolio

- (i) A student whose programme includes a thesis or research portfolio must complete the requirements in accordance with the schedule in Regulation 2. However, the Head of the Department concerned may

approve a short extension of time as shown in the schedule.

- (ii) If, in exceptional circumstances beyond the student's control, the thesis or research portfolio has not been able to be completed by the specified deadline (including any approved extensions given under Regulation 3a(ii)), Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not normally exceeding one semester, for the work to be completed.

b Dissertation or Research Project

- (i) A student whose programme includes a dissertation or research project must complete the requirements by the last day of the final semester of enrolment in the dissertation or research project.

- (ii) If, in exceptional circumstances beyond the student's control, the dissertation or research project has not been able to be completed by the above deadline, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

c Taught Masters

- (i) A student whose programme does not include a thesis, research portfolio, dissertation or research project must complete the requirements by the end of the final semester shown in the schedule above.
- (ii) Extensions of time to complete work in examined courses or 100 percent coursework courses will not be granted beyond the end of the semester(s) in which the course is offered.
- (iii) A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 2 in order to complete the degree.

Tuition Fees for Extensions of Time

- 4 Where an extension of time for the submission of a thesis, research portfolio, dissertation or research project is approved under Regulation 3a(ii) or 3b(ii), students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student's current enrolment period in the course has ended.

Honours

- 5 Where the regulations provide for the award of Honours, a Masters degree may be awarded with Honours where a student's overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

Eligibility for Honours

- 6 Where the requirements for the degree have not been completed in accordance with Regulations 2 and 3 a student's eligibility for Honours will lapse. However, on the recommendation of the Head of Department, Senate or its representative may approve the retention of eligibility for Honours.

Theses

- 7 a The student is to submit two hard-bound copies of the thesis to the Graduate Centre by the date indicated for completion in the Schedule.
- b The Head of Department is to transmit the submitted copies to the examiners.
- c On completion of the examination, the supervisor of the thesis will be responsible through the Head of Department for the deposit of two copies with the University Library.
- d Prior to 1 January 2011 a student may also deposit a digital copy of the thesis at the same time as the thesis is submitted to the Graduate Centre.
- e On or after 1 January 2011, a student is required to deposit a digital copy of the thesis at the same time as the thesis is submitted to the Graduate Centre.
- f The digital thesis deposited shall be formatted as specified in the Guidelines on Formatting and Submitting a Digital Thesis at The University of Auckland.
- g After examination, a Masters thesis which is deposited in digital form will be accessible to authenticated users through the University's digital repository unless embargoed under clause 24 of the Examination Regulations.
- h Theses which are failed in the examination will be removed from the University's digital repository.

Research Portfolios, Research Projects and Dissertations

- 8 a Research portfolios, research projects and dissertations are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 3a or 3b.
- b The Head of Department is to transmit the submitted research portfolio, research project or dissertation to the examiners.
- c Copies of research portfolios, research projects and dissertations are not deposited with the University Library, nor deposited with the University's digital repository.

Substitutions and Failed Courses

- 9 Masters students may not change their enrolment

in a course after the last date approved for deletions, except in exceptional circumstances as provided for in the Enrolment and Programme Regulations under Changes to Current Enrolment.

- 10 A Masters student may not normally re-enrol in a failed course except as provided for in the regulations relating to aegrotat and compassionate passes. In exceptional circumstances, the student may apply to Senate or its representative, on the recommendation of the Head of Department, for permission to re-enrol in the course and where approval is granted, the result achieved in the first attempt will not be considered in arriving at the overall grade for the programme.
- 11 Except as provided for in Regulation 10, calculation of the overall grade will include the grades given for all courses attempted in the degree. For the purposes of grade or mark calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Suspension

- 12 Enrolment for a Masters degree will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the degree.

Transfer Credits, Cross-credits and Reassignments

- 13 a **Transfer credits**
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Masters degree.
- b **Cross-credits**
Courses may not be cross-credited into or from a Masters degree.
- c **Reassignments**
With the approval of the Head of Department, courses may be reassigned as specified in clause 9 of the Credit Regulations.

Certificate of Proficiency

- 14 a The Certificate of Proficiency regulations under 'Other Programmes' apply.
- b A Certificate of Proficiency course may not be reassigned to a Research Masters degree.
- c A Certificate of Proficiency course may be reassigned to a Taught Masters degree as specified in clause 9 of the Credit Regulations.

Transitional Certificate

- 15 The Transitional Certificate regulations under 'Other Programmes' apply. A Transitional Certificate course may not be reassigned to a Masters degree.

Variations

- 16 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Masters degree.

GENERAL REGULATIONS – BACHELORS HONOURS POSTGRADUATE DEGREES

The following regulations take precedence over the specific regulations for each Bachelors Honours Postgraduate degree published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific degree regulations for each Bachelors Honours Postgraduate degree. The Bachelors Honours Postgraduate degree will not be awarded until the requirements for the qualifying Bachelors degree have been awarded.

Note: For the purposes of these regulations:

- (i) a Bachelors Honours Postgraduate degree is worth a total of 120 points.
- (ii) a dissertation or research project is worth between 30 and 80 points.

General Requirements

- 1 A student enrolled for a Bachelors Honours Postgraduate degree at this University must pass the full points value specified in the degree regulations. The total enrolment may not exceed the minimum points requirement for the degree by more than 40 points.

Duration of Enrolment

- 2 The requirements for a Bachelors Honours Postgraduate degree must be completed within:
 - a one year of initial enrolment for the degree if enrolled full-time
 - or
 - b two years of initial enrolment for the degree if enrolled part-time.

Completion of Requirements

- 3
 - a A student enrolled for a Bachelors Honours Postgraduate degree must complete all work in taught courses by the last day of the semester in which the course is taught.
 - b A student enrolled in a dissertation or research project of 30 points or more must complete the dissertation or research project by the last day of the final semester of enrolment in the dissertation or research project. In exceptional circumstances beyond the student's control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.
 - c A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the duration of enrolment specified in Regulation 2 in order to complete the degree.

Tuition Fees for Extensions of Time

- 4 Where an extension of time for the submission of a dissertation or research project is approved under Regulation 3b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student's current enrolment period in the course has ended.

Honours

- 5
 - a The Bachelors Honours Postgraduate degree may be awarded only where a student's overall grade is sufficiently high.

- b Honours will be awarded in either of two classes: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.
 - c Where a student's average grade is insufficiently high to be eligible for the award of honours, Senate or its representative may approve the reassignment of points to the relevant Graduate or Postgraduate Diploma.
- 6 Calculation of the class of Honours will include the grades given for all courses attempted in the degree. For the purposes of this calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Dissertations and Research Projects

- 7
 - a Dissertations and Research Projects are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 3b.
 - b The Head of Department is to transmit the submitted dissertation or research project to the examiner(s).
 - c Copies of dissertations and research projects are not deposited with the University Library.

Suspension

- 8 Enrolment for a Bachelors Honours Postgraduate degree will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the degree.

Transfer Credits, Cross-credits and Reassignments

- 9
 - a **Transfer credits**
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Bachelors Honours Postgraduate degree.
 - b **Cross-credits**
Courses may not be cross-credited into or from a Bachelors Honours Postgraduate degree.
 - c **Reassignments**
 - (i) With the approval of the Head of Department, courses may be reassigned as specified in clause 9 of the Credit Regulations.

- (ii) In certain circumstances, Senate or its representative may approve the reassignment of points to the relevant Postgraduate degree as provided for in Regulation 5c.

Certificate of Proficiency

- 10 The Certificate of Proficiency regulations under 'Other Programmes' apply. A Certificate of Proficiency course may not be reassigned to a Bachelors Honours Postgraduate degree.

Transitional Certificate

- 11 The Transitional Certificate regulations under 'Other Programmes' apply. A Transitional Certificate course may not be reassigned to a Bachelors Honours Postgraduate degree.

Variations

- 12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Bachelors Honours Postgraduate degree.

GENERAL REGULATIONS – POSTGRADUATE DIPLOMAS

The following regulations take precedence over the specific regulations for each Postgraduate Diploma published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific regulations for each Postgraduate Diploma.

Note: For the purposes of these regulations:

- (i) a Postgraduate Diploma is worth a total of 120 points
- (ii) a dissertation or research project is worth between 30 and 80 points.

General Requirements

- 1 A student enrolled for a Postgraduate Diploma at this University must pass the full points value specified in the postgraduate diploma regulations. The total enrolment may not exceed the minimum points requirement for the postgraduate diploma by more than
 - a 40 points
 - or
 - b 20 points in the case of a student with credit granted from a postgraduate certificate.

Duration of Enrolment

- 2 a The requirements for a Postgraduate Diploma must be completed within
 - (i) one year of initial enrolment for the postgraduate diploma if enrolled full-time
 - or
 - (ii) four years of initial enrolment for the postgraduate diploma if enrolled part-time.
- b In the case of a student who has completed a postgraduate certificate for which credit is granted to a postgraduate diploma the requirements must be completed within
 - (i) one semester of admission if enrolled full-time
 - or
 - (ii) two years of admission if enrolled part-time.
- c In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.

Completion of Requirements

- 3 a A student enrolled for a Postgraduate Diploma must complete all work in taught courses by the last day of the semester in which the course is taught.
- b A student enrolled in a dissertation or research project of 30 points or more must complete

the dissertation or research project by the last day of the final semester of enrolment in the dissertation or research project. In exceptional circumstances beyond the student's control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

- c A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the duration of enrolment specified in Regulation 2 in order to complete the postgraduate diploma.

d Fine Arts Studio

A student enrolled in the Postgraduate Diploma in Fine Arts must complete their individual programme not later than 1 November in the year in which the work is undertaken or by such other date as may be approved by the Head of School of Fine Arts.

Tuition Fees for Extensions of Time

- 4 Where an extension of time for the submission of a dissertation or research project is approved under Regulation 3b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student's current enrolment period in the course has ended.

Distinction or Merit

- 5 a The Postgraduate Diploma may be awarded with Distinction or Merit where a student's overall grade is sufficiently high.
- b Distinction or Merit is normally awarded only if the requirements for the Postgraduate Diploma are completed within
 - (i) 24 months of initial enrolment
 - or
 - (ii) 12 months of initial enrolment in the case

of a student with credit granted from a postgraduate certificate.

- 6 Calculation of the award of Distinction or Merit will include the grades given for all courses attempted in the diploma. For the purposes of this calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Dissertations and Research Projects

- 7
 - a Dissertations or Research Projects are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 3b.
 - b The Head of Department is to transmit the submitted dissertation or research project to the examiner(s).
 - c Copies of dissertations and research projects are not deposited with the University Library.

Suspension

- 8
 - a Enrolment for a Postgraduate Diploma will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the diploma.
 - b In the case of a student who has completed a postgraduate certificate for which credit is granted to a postgraduate diploma admission to the postgraduate diploma must take

place within five years of completion of the postgraduate certificate.

Transfer Credits, Cross-credits and Reassignments

- 9
 - a **Transfer credits**
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Postgraduate Diploma.
 - b **Cross-credits**
Courses may not be cross-credited into or from a Postgraduate Diploma.
 - c **Reassignments**
With the approval of the Head of Department, courses may be reassigned as specified in clause 9 of the Credit Regulations.

Certificate of Proficiency

- 10
 - a The Certificate of Proficiency regulations under 'Other Programmes' apply.
 - b A Certificate of Proficiency course may be reassigned to a Postgraduate Diploma as specified in clause 9 of the Credit Regulations.

Transitional Certificate

- 11 The Transitional Certificate regulations under 'Other Programmes' apply. A Transitional Certificate course may not be reassigned to a Postgraduate Diploma.

Variations

- 12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Postgraduate Diploma.

GENERAL REGULATIONS – POSTGRADUATE CERTIFICATES

The following regulations take precedence over the specific regulations for each Postgraduate Certificate published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific regulations for each Postgraduate Certificate.

Note: For the purposes of these regulations a postgraduate certificate is worth 60 points.

General Requirements

- 1 A student enrolled for a Postgraduate Certificate at this University must pass the full points value specified in the postgraduate certificate regulations. The total enrolment may not exceed the minimum points requirement for the postgraduate certificate by more than 20 points.

Deadlines for Completion

- 2
 - a The requirements for a Postgraduate Certificate must be completed within
 - (i) one semester of initial enrolment for the postgraduate certificate if enrolled full-time
 - or
 - (ii) four semesters of initial enrolment for the postgraduate certificate if enrolled part-time.
 - b In all cases, the semester of initial enrolment is deemed to be the first semester in which

the student enrolled for a course which is assigned or reassigned to the programme.

Completion of Requirements

- 3
 - a A student enrolled for a Postgraduate Certificate must complete the requirements by the last day of the final semester of enrolment in the programme.
 - b Extensions of time to complete work in examined courses or 100 percent coursework courses will not be granted beyond the end of the semester(s) in which the course is offered.
 - c A student who has failed a course or courses of no more than 20 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 2 in order to complete the postgraduate certificate.

Suspension

- 4 Enrolment for a Postgraduate Certificate will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding one semester. In such cases the period of suspension will not count towards the time limits for the certificate.

Transfer Credits, Cross-credits and Reassignments

- 5 a **Transfer credits**
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Postgraduate Certificate.
- b **Cross-credits**
Courses may not be cross-credited into or from a Postgraduate Certificate.
- c **Reassignments**
With the approval of the Head of Department,

courses may be reassigned as specified in clause 9 of the Credit Regulations.

Certificate of Proficiency

- 6 a The Certificate of Proficiency regulations under 'Other Programmes' apply.
- b A Certificate of Proficiency course may be reassigned to a Postgraduate Certificate as specified in clause 9 of the Credit Regulations.

Transitional Certificate

- 7 The Transitional Certificate regulations under 'Other Programmes' apply. A Transitional Certificate course may not be reassigned to a Postgraduate Certificate.

Variations

- 8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Postgraduate Certificate.

GENERAL REGULATIONS FOR NAMED DOCTORATES

These Regulations apply to all doctoral degrees except the Doctor of Philosophy and Higher Degrees, and should be read in conjunction with the regulations for those degrees.

The 'Department' is the Department or School or other academic unit in which the candidate is registered, and the 'Head of Department' is the head of that academic unit.

Registration

- 1 a The recommendation for registration by the Head of Department is to include
- (i) the proposed date of registration,
 - and
 - (ii) nominations for supervisors,
 - and
 - (iii) satisfactory evidence that the candidate meets the admission criteria and has the ability to follow the proposed programme of study,
 - and
 - (iv) confirmation that the School/Department accepts responsibility for making satisfactory supervision arrangements and providing research resources and facilities over the whole enrolment for the degree.
- b The Board of Graduate Studies will appoint two supervisors for each candidate, or one supervisor and one advisor, the main supervisor being a staff member of the Department. The supervisor(s) must be actively involved in research in the candidate's general field, and must either hold a doctoral degree or be appropriately qualified and experienced.
- c Candidates wishing to present and defend a thesis in Māori must, before applying to the Head of Department to be registered, obtain the permission of the Pro Vice-Chancellor (Māori). When such permission is granted, the Pro Vice-Chancellor (Māori) will make a recommendation in writing to the Board of Graduate Studies as to;

- (i) whether the candidate has adequate fluency and literacy in Te Reo Māori in the subject area of the thesis,
- and
- (ii) the likelihood of being able to find appropriately qualified examiners for the thesis.

Reviews of Progress

- 2 a At the end of each year of study the main supervisor, the candidate and the Head of Department are to submit, through the Associate Dean (Postgraduate) of the Faculty, a joint report to the Board of Graduate Studies on the candidate's progress. As part of this report the main supervisor and the Head of Department are to make one of the following recommendations:
- (i) that the candidate's registration be continued;
 - or
 - (ii) that the candidate's registration be continued subject to specified conditions;
 - or
 - (iii) that the candidate's registration be terminated.
- The candidate shall be given an opportunity to make written submissions to the Board of Graduate Studies on the above annual report.
- b Where a recommendation is made under Clause 2a(ii), the Head of Department will also recommend to the Board of Graduate Studies any specific goals and/or conditions

to be met by the candidate and the time in which these are to be completed. At the end of this period the Head of Department and main supervisor will advise the Board of Graduate Studies whether or not these requirements have been met. Registration will terminate if the specified conditions have not been fulfilled to the satisfaction of the Board of Graduate Studies.

Enrolment and Fees

- 3 a Candidates for the degree must be enrolled and pay all prescribed fees including tuition fees in each academic year for which they are registered. Candidates need not pay tuition fees for any period during which their registration is suspended.
- b On enrolment in each academic year every candidate must pay the prescribed fees for that academic year.
- c A candidate who submits a thesis or terminates their registration will receive a refund of one-twelfth of the tuition fee paid for each complete month of the period between the date of submission of the thesis or termination of registration and the end of the academic year for which fees have been paid.
- d Unless otherwise exempted under the relevant regulations, all candidates must pay the prescribed Building Levy and Student Services fees and any other fees as may be prescribed from time to time. There is no refund of these fees.
- e No thesis will be accepted for examination unless all outstanding prescribed fees including tuition fees have been paid for the academic year in which a candidate is registered.

Changes to the Conditions of Registration

- 4 a The Head of Department may, after consultation with the candidate, make a written recommendation to the Board of Graduate Studies via the Faculty Associate Dean (Postgraduate) for changes in the conditions of registration for the candidate. After considering a recommendation from the Head of Department, the Board of Graduate Studies may, after considering any submissions made by the candidate, change the conditions of registration for any candidate.
- b When necessary, the Head of Department is to recommend changes to the supervision of the candidate for approval by the Board of Graduate Studies. This will normally be required when a supervisor is granted leave, resigns or retires.
- c When the Board of Graduate Studies is

satisfied that there is sufficient reason, it may extend a candidate's submission date. Before approving an extension of submission time the Board of Graduate Studies will require the candidate, the supervisor(s) and Head of Department to agree on the programme of supervision and schedule of research considered necessary for submission by the new date proposed.

- d Where a candidate is unable to continue with their research programme because of circumstances beyond their control, the Board of Graduate Studies may suspend their registration for a specified period of time. The conditions of Clause 7f of the Statute for the Degree of Doctor of Philosophy 2008 will apply.
- e The Board of Graduate Studies may terminate the registration of any candidate who fails to make payment of any prescribed fees including tuition fees, or for any other reason specified in Clause 7g of the Statute for the Degree of Doctor of Philosophy 2008. Before making a decision to terminate a candidate's registration pursuant to this clause or otherwise, the Board of Graduate Studies will allow the candidate a reasonable opportunity to respond.

Appeals

- 5 a If a doctoral candidate believes that he or she has been significantly disadvantaged by the examination process, or by any part of the examination process, then a written appeal may be made to the Board of Graduate Studies, setting out the grounds of the appeal. All relevant documents relied upon must be submitted with the appeal. Clauses 10d and 10e of the Statute for the Degree of Doctor of Philosophy 2008 shall then apply.
- b Candidates, supervisors or Heads of Department may appeal against any decision of the Board of Graduate Studies concerning matters other than examination normally within three months of the making of the decision, on the grounds that:
 - (i) relevant information which was not available to the Board of Graduate Studies at the time of its making the decision has since become available
 and/or
 - (ii) the procedure adopted in arriving at the decision was unfair.
 The appeal must state clearly all grounds relied on by the candidate and attach all relevant documentation. Clause 10b of the Statute for the Degree of Doctor of Philosophy 2008 shall then apply.

THE LIMITATION OF ENTRY STATUTE 1991

At The University of Auckland this 18th day of February 1991. Pursuant to Section 224 of the Education Act 1989, as amended by the Education Amendment Act 1990, the Council of The University of Auckland hereby makes the following Statute:

- 1 a This statute may be cited as The Limitation of Entry Statute 1991.
- b This Statute came into force on 1 January 1991.
- 2 Where the Council is satisfied that it is necessary to do so because:
 - a students cannot be allocated places in appropriate lecture rooms or laboratories at times when they can reasonably be expected to attend
 - or
 - b the number of teaching staff does not ensure all students expected to seek a place in a particular programme or course can be adequately taught;
 there shall be deemed to be an insufficiency of accommodation or of staff.
- 3 The maximum number of students that may be enrolled for any such programme or course shall be determined by the Council from time to time after considering any recommendations from Senate and be published in a schedule to this Statute.
- 4 In determining such maximum number of students the Council may, after securing a recommendation from Senate:
 - a prescribe academic standards to be achieved as a prerequisite for enrolment for any such programme or course
 - and
 - b prescribe other criteria for selection of students to be permitted enrolment for any such programme or course.
- 5 The Limitation of Entry Statute 1985 is hereby repealed.

Enrolment Limitations 2010

This Schedule is made under the provisions of clause 3 of the Limitation of Entry Statute 1991.

Limited-entry Programmes and Courses

Because of insufficient accommodation and restrictions on staffing there will be a limitation on the number of students who can be enrolled in 2010 in the programmes and courses listed below.

Approved Limitations

- 1 Students must apply for a place in any limited entry programme. Unless otherwise specified in the **Closing Dates for Admission to Specified Programmes, the closing date for Application for Admission is 8 December 2009 and for Enrolment is 14 February 2010. The closing date for Admission to Summer School is 1 December 2009 and for Enrolment is 22 December 2009.**
- 2 Application for places in any limited-entry programmes and/or courses will be made online, or in person.
- 3 Applications received after the specified closing dates will be given reduced priority in consideration for a place in a limited-entry programme and/or course.
- 4 All applicants for open-entry programmes who are qualified for admission will be accepted, although they may not be selected into all courses

of their choice as some courses have a limit on the number of students that can be accepted.

- 5 Where the number of applicants for a place in a limited-entry programme or course exceeds the approved number of available places, the faculty or department concerned will select students in accordance with criteria that have been approved by the University Council.
- 6 Where a course is taught in both semesters, the Selection Committee will allocate students to the First or Second Semester where numbers of applications for one semester exceed places available.
- 7 Selection criteria will be available from the faculty or department concerned for the information of students. In general, selection will be based upon academic merit. In those cases where the scholastic record is insufficient, eg, Discretionary Entrance and Special Admission, other criteria such as the recommendation of the School Principal or Advisor, or employment history, will be taken into account. Account will also be taken of the University's Equal Educational Opportunity objectives. Limitations on programmes and courses are listed below.

FEES STATUTE 2001

1 Title and Commencement

This statute may be cited as the Fees Statute 2001 and came into force on 1 January 2001.

2 Interpretation

In this statute unless the context otherwise requires:

'Act' means the Education Act 1989.

'Building Levy' means the levy to be paid by each enrolled student towards the provision of University buildings and facilities which provide student support services.

'Council' means the Council of The University of Auckland.

'Domestic Student' has the meaning given in the Act.

'Due Date' is the date specified on the Fees invoice.

'Enrolment' means enrolment in a programme or course at the University.

'Enrol' has a corresponding meaning.

'Fees Invoice' means an invoice or an invoice/statement, or online invoice/statement for the fees and charges payable by a student as a condition of enrolment.

'Foreign Student' has the meaning given in the Act.

'Staff Member' means a member of the staff of the University.

'Student' includes a Domestic Student and a Foreign Student who is:

a Duly enrolled as a student of the University

or

b Applying to enrol as a student of the University.

'Student Loan' has the same meaning as it has in section 2 of the Student Loan Scheme Act 1992.

'Student Services Fee' means the fee paid by an enrolled student for student support services provided by the University.

'University' means The University of Auckland constituted under The University of Auckland Act 1961.

'University Services' means those services provided by the University that can be accessed by a student on request or application, such as enrolment or the provision of an official academic transcript.

3 Tuition Fees

3.1 The Council may prescribe from time to time Tuition Fees payable by:

a Domestic Students; in compliance with section 227 of the Act;

and

b Foreign Students or any categories of Foreign Students; in compliance with section 228 of the Act.

3.2 Tuition Fees may be prescribed either by resolution of the Council or by a schedule to this statute.

3.3 The Tuition Fees prescribed by the Council at the date when this statute comes into force apply until other Tuition Fees are prescribed in place or in addition to them.

4 General Fees

4.1 The Council hereby prescribes the General Fees specified in the schedule.

4.2 The Council may from time to time by resolution vary the amount of, or delete, any General Fee specified in the schedule or prescribe any additional General Fee.

4.3 Any such variation, deletion, or addition shall apply from the date specified in the amending resolution.

5 Additional Fees/Charges

5.1 Faculties and Departments of the University may impose charges to recover costs in providing Students with:

a Copies of study material and other material relevant to a course or a programme or the means of access to that material;

b Services incidental to courses or programmes as, for example, field trips and site visits.

6 Payment of Fees and Charges

6.1 Tuition Fees, General Fees and any charges imposed pursuant to section 5.1 that are included on the Fees Invoice rendered to a Student shall be paid by the student forthwith on receipt of that Fees Invoice.

6.2 All Students must pay the full amount on their Fees Invoice by the due date.

6.3 Charges imposed on a Student pursuant to section 5.1 that are not included in a Fees Invoice shall be paid by the Student on demand.

6.4 Any instalment of a Student Loan (within the meaning of the Student Loan Scheme Act 1992) that is available to a Student and received by the University in respect of his or her enrolment shall be applied toward payment of the Fees Invoice rendered to that Student on the occasion of that enrolment.

7 Refunds

7.1 The Council may by resolution prescribe from time to time in accordance with sections 227 and 228 of the Act;

a The circumstances in which Domestic Students and Foreign Students are or may be entitled to a refund of all or any part of the Tuition Fees and General Fees paid or payable to the Council;

and

b The quantum of those refunds.

7.2 The circumstances in which a refund may be made and the quantum of that refund

that pertains when this statute comes into force, continues until a change is prescribed by resolution.

- 7.3 The Council will take all reasonable steps to ensure that both Domestic Students and Foreign Students are given written notice of the circumstances in which they are or may be entitled to a refund of all or any part of the fees that have been paid or are payable by them to the Council.
- 7.4 The refund of all or any part of a Tuition Fee or a General Fee that was paid by an outstanding Student Loan shall be applied in reduction of that loan.

8 Non-payment of Fees and Charges

- 8.1 Where a Student does not pay:
- a The Fees Invoice rendered to that Student;
 - or
 - b A charge for that Student imposed under section 5 on demand;
- then, until those fees and charges are paid in full and without prejudice to the right to recover the unpaid fees or charges at law; the Council may:
- (i) Delete the enrolment of that Student from a course or courses;
 - (ii) Withhold the formal notification of the results of any examination of the Student;
 - (iii) Decline to re-enrol the Student;
 - (iv) Decline to release the Student's academic record;
 - (v) Exclude that Student from the University;
 - (vi) Withhold any Degree or Diploma certificate from that Student;
 - (vii) Restrict that student's access to University Services.

8.2 Application for Reinstatement

- a A student upon whom a penalty is imposed under section 8.1(i) may apply to have his/her enrolment reinstated upon payment of the outstanding amount owing and the Course reinstatement fee as outlined in Schedule – Part A.
- b To be eligible to complete course requirements, a student must apply for course reinstatement two weeks before the beginning of the examination period within the year which enrolment in the course(s) took place.

- 8.3 A Student upon whom a penalty is imposed under section 8.1 may by giving written notice to the Director, Academic Services within eight days of the penalty having been imposed, apply to the Council or duly constituted Committee of the Council to review the imposition of that penalty. The notice must set out the reasons for the review. The decision of the Council or its Committee is final.

9 Non-attendance

- 9.1 A Student who stops attending lectures or classes in a course or courses remains liable for the fees prescribed for that course or courses.

10 Revocation

- 10.1 The Fees Regulations are hereby revoked.
- 10.2 Notwithstanding the revocation of the Fees Regulations, the Council may recover any unpaid fees or charges levied under those Regulations and impose any of the penalties prescribed in section 8.1 until those fees or charges are paid in full.

INTERNATIONAL STUDENTS

The following notes are intended to be a general guide for international students wishing to be admitted to The University of Auckland. Further information and application details are available from Auckland International.

Admission

International students should apply for admission using the nDeva online application. Intending applicants should note the following general points:

- 1 All international students enrolling in an undergraduate programme must hold, as a minimum requirement, an acceptable university entrance qualification.
- 2 All international students seeking admission to graduate or postgraduate programmes must hold, or expect to hold before the start of the programme, a recognised first degree in a relevant discipline.
- 3 Applicants whose first language is not English are required to provide satisfactory evidence of their proficiency in English. International applicants entering the University on the basis of NCEA or Cambridge International Examinations (CIE) must meet the standard literacy requirements for admission. International applicants entering the University on the basis of qualifications other than NCEA or CIE must meet a specified score in IELTS or TOEFL, or must have completed and passed the Foundation Certificate in English for Academic Purposes (FCertEAP), or an approved alternative. The minimum score required in IELTS for admission to the University is an overall score of 6.0 with no less than 5.5 on an individual band. The minimum score required in TOEFL is 550 (paper-based test), or 213 (computer-based test); with a TWE (essay) of 4.5, or 80 in IBT (Internet-based test) with a writing score of 21. Higher requirements may be imposed by faculties for entry to specified undergraduate and postgraduate programmes. Detailed minimum English language proficiency requirements are available on request from Auckland International.
- 4 It is the responsibility of all international students to ensure that they have appropriate and current health insurance for their period

of study in New Zealand. Health and travel insurance is a condition of enrolment, and as such, must be valid for the entire duration of study. A student's enrolment cannot continue in the event of their insurance cover being declined. Further information and application forms are available from the Auckland International website www.auckland.ac.nz/uoa/is-health-and-travel-insurance

- 5 The majority of international students must have a student visa before entering New Zealand. All students must have a valid student permit for the duration of their studies. For further information, including countries from which students may enter without a visa, visit Immigration New Zealand's website www.immigration.govt.nz
- 6 An offer of admission at the University does not guarantee that the student will be issued with a student visa.
- 7 Permanent residents of Australia and New Zealand, Australian citizens, and students from the Cook Islands, Tokelau or Niue who are New Zealand citizens, are eligible for enrolment on the same basis as New Zealand students and do not need to apply for admission as international students.

International Student Fees

- 8 The above fees (refer to Schedule – Part C) apply to students who:
 - (i) are not citizens of New Zealand or Australia (refer note 7 above)
 - or
 - (ii) do not hold permanent residence status in New Zealand or Australia
 - or
 - (iii) have been granted a New Zealand Ministry of Foreign Affairs and Trade Fees Scholarship
 - or
 - (iv) are being fully funded under the New Zealand

Ministry of Foreign Affairs and Trade Official Development Assistance programme.

or

- (v) are not participating in an official University of Auckland exchange programme.

Current fees can be obtained from the staff at Auckland International.

International Scholarships

There are several international scholarships available for international students from selected countries identified by the Asian Development Bank-Japan Scholarship Unit (ADB-JS), the New Zealand International Aid and Development Agency (NZAID NZ Development Scholarships); Commonwealth Scholarships, and Education New Zealand; the New Zealand International Doctoral Research Scholarships (NZIDRS).

The University of Auckland also offers University of Auckland International PhD Fees Bursaries and University of Auckland International PhD Scholarships at PhD level for international students from all countries.

Further information on available international scholarships and the international scholarship application process is available at www.auckland.ac.nz/international

EXAMINATION REGULATIONS

These regulations should be read in conjunction with other examination publications which contain more detail and particular instructions. The publications are:

For staff: Instructions to Examiners and Assessors.

For students: Examination Instructions – Regulations and General Information. (These are mailed to all examination candidates before each examination period.)

Requirements

- 1 In order to be credited with a course, a candidate needs to have:
 - a enrolled in accordance with the Enrolment Regulations
 - and
 - b attended classes to the satisfaction of Senate
 - and
 - c completed to the satisfaction of the examiners such oral, practical, written or other tests or assignments as have been prescribed for completion during the course
 - and
 - d completed to the satisfaction of the examiners and in accordance with these regulations any examination prescribed by Senate
 - and
 - e made any payment due by that candidate to the University.

Note: Candidates are to be informed by each department of the specific requirements for courses in that department and the extent to which coursework will be taken into consideration in assessing final results. In some cases candidates may not be permitted to sit the examination,

as a result of unsatisfactory or incomplete coursework.

Work Other than Examinations

- 2 a It is the responsibility of each candidate to ascertain the nature of the requirements for each course from the department or faculty concerned.
- b Provided that candidates have met deadlines set for this work, examiners should normally have determined and returned interim or definitive grades for this work before sitting of the examination, if one is prescribed.
- c Unacknowledged copying or plagiarism in completing this work is treated as an examination offence.

Time of Examinations

- 3 a The examination will be held at the times specified in the timetable each year.
- b A candidate may not be examined in any course or part of a course at any time other than that set down for them in the timetable, except when, with the approval of Senate, a different time may be approved because of special circumstances, provided that there is

the payment of the extra fee prescribed in the Fees Regulations.

Place of Examinations

- 4 All students have to sit their examinations at The University of Auckland except when, with the approval of Senate, a different examination centre may be established because of special circumstances, provided that there is the payment of the extra fee prescribed in the Fees Regulations.

Special Examination Conditions

- 5 A candidate who is permanently or temporarily disabled in a manner which affects their ability to undertake examinations under the prescribed examination conditions may, upon production of the appropriate evidence, obtain from one of the following bodies a recommendation which, subject to the approval of Senate or its representative, will enable that candidate to be examined under conditions which take account of the particular impairment: Student Health; Student Counselling or Student Learning Centre.

Direction of Examinations

- 6 a The examinations will comprise such written, oral and practical examinations as the examiners may determine.
- b Where degree regulations or prescriptions permit, or Senate, upon such conditions as it thinks fit, approves, the examiners may in respect of any examination release to the candidates the whole or part of the examination paper in advance of the sitting of the examination.
- c Candidates will write out answers to the questions in the presence of a supervisor, who is to be appointed or approved by the Manager, Examinations Office in accordance with detailed instructions furnished by the Examinations Office.

Materials Permitted in the Examination Room

- 7 a A candidate must not bring to an examination any written or printed matter or any blank paper except by direction of the examiner.
Note: Candidates are to be informed by each department of the specific books or materials allowed for particular examinations. Details are also explained in the Examination Instructions.
- b (i) All books and papers not approved for use in the examination, along with any spare personal belongings brought to the examination must be left in such part of the room as the supervisor directs.
- (ii) The University does not guarantee safekeeping of students' possessions in any circumstances, inside or outside examination rooms. Students concerned about the security of valuable possessions, briefcases etc during examinations will need to make alternative arrangements for their care, or ensure that they do not bring these possessions to the University

on days when they are required to attend examinations.

- c A candidate may not bring into an examination an electronic calculator except by direction of the examiner. A calculator is defined as an electronic device capable of processing, storing or retrieving information, which has the primary purpose of mathematical calculation. Any calculator permitted to be taken into an examination must be hand-held, self-powered and noiseless. It must not make use of an audible alarm or facilities for 'wireless' transmission or reception of information.

General Conditions:

- (i) *other than spare batteries and calculator, supplementary material (eg, operating manuals) related to the use and operation of the calculator will not be permitted in the examination room*

and

- (ii) *in all cases it is the responsibility of the candidate to maintain the operation and operating power of the calculator.*

Note: Candidates are to be informed by each Department of the specific types of calculators allowed for particular examinations. Details are also explained in the Examination Instructions.

- d No other electronic device is allowed in the examination room unless specified by the examiner.
- e Any cellular telephone brought into an examination room must have all functions switched off and must be left in such part of the room as the supervisor directs.
- f Any cellular telephone or electronic device not permitted in an examination room under Regulation 7d that is found in the possession of a student during an examination will be removed and not returned to the student until after payment of a fine of \$100.
- g Audible alarms may not be used on any devices permitted in the examination room. Any device that emits an audible sound signal or alarm during an examination will be removed and not returned to the student until after payment of a fine of \$150.
- h Where specified material or calculators are permitted under items 7a and 7c above, examiners are required to be present at the commencement of the examination to check material brought into the examination room.
- i Candidates will be asked to show their student identity cards on entry for verification purposes and must display them on their desk for the duration of the examination.

Timekeeping of Examinations and Conduct

- 8 a (i) A candidate will not be allowed to enter the room later than exactly halfway through the period specified for writing the examination.
- (ii) Latecomers will not be given any extra time for the examination.

- b Candidates will be allowed to read their examination papers for a period of not more than 10 minutes before the examination commences but may not use any writing materials until the room supervisor announces that they may do so. During this time and during permitted resting periods, no reference is to be made to any book in an examination where books are allowed.
- c Candidates must write out answers to examination questions in the official script book that is provided by the University unless otherwise directed by examiners in the exam instructions. No part of the script book may be torn out or removed from the examination room.
- d A candidate must not communicate with an examiner in regard to an examination either in the script book or otherwise, except through the Director, Academic Services.
- e A candidate must not communicate with another candidate in the examination room or copy from another candidate's answers.
- f Candidates will not be readmitted to the examination room after they have left it unless, during the full period of their absence, they have been under approved supervision.
- g All paper used during the examination must be handed to the supervisor before the candidate leaves the examination room.
- h A candidate will not be permitted to leave the examination before 15 minutes after half of the period specified for writing the examination has elapsed and then only with the permission of the supervisor and upon handing in the script.
- i No candidate will be permitted to leave the examination room during the last 15 minutes of the examination.
- j A candidate must not continue writing an answer after the supervisor has announced the expiration of time. In no circumstances is any time over and above the time allotted to any examination to be allowed to candidates for reading over their scripts or making any amendment or addition to scripts.
- (i) has committed a breach of these regulations
or
(ii) has been notified that he or she has failed to comply with any Statute or any other Regulation of the University and (where the failure is capable of remedy) has been given a reasonable time to remedy the failure without having done so;
then the Discipline Committee may:
 - (iii) suspend for such time as it may prescribe the release to the candidate of the results of any examination
 - (iv) decline to credit to the candidate's programme any course or courses
 - (v) cancel any pass with which the candidate may have been credited in the course or examination in respect of which the breach occurred
 - (vi) disqualify the candidate from sitting any examination for such period as it may prescribe
 - (vii) impose any one or more of these penalties.
- d The Discipline Committee may also impose, in the circumstances stated in clause 9b of this Regulation, the following penalties prescribed in clause 9d of the Disciplinary Statute, that is to say:
 - (i) a fine not exceeding \$1,000
 - (ii) a limitation or prohibition on attendance at any Class or Classes or the use and enjoyment of any of the Facilities
 - (iii) a suspension from attendance at the University or any Class or Classes for such a period as it thinks fit
 - (iv) cancellation of Enrolment of a student at the University or in a programme or training at the University
 - (v) a penalty in the form of requiring the offender to remove any defacement to University Premises or property or to render services to the benefit of the University or its students
 - (vi) any one or more of these penalties.
- e A candidate upon whom a penalty is imposed under these regulations may apply for a review pursuant to section 11 of the Disciplinary Statute.

Misconduct

- 9 a Any complaint that a candidate has committed an examination offence will be referred to Senate to determine whether the complaint should be investigated. For the purposes of this Regulation an 'examination offence' includes any breach of rules relating to the conduct of examinations and any dishonest practice occurring in the preparation or submission of any work (whether in the course of an examination or not) which counts towards the attainment of a pass in any subject, or otherwise occurs in connection with any examination.
- b If Senate determines that a complaint against a candidate should be investigated, it will refer that complaint to the Discipline Committee.
- c Where the Discipline Committee is satisfied that a candidate:

Missed Examinations

- 10 a A candidate who has missed an examination by reporting for it at the wrong time cannot sit that examination at another time except for candidates enrolled for Masters or Bachelors Honours degrees, or a Postgraduate Diploma, for whom special arrangements may be made.
- b Candidates other than those enrolled for Masters or Bachelors Honours degrees, or a Postgraduate Diploma, may apply for a special pass in the missed examination by completing the appropriate form and submitting it to the Director, Academic Services, not later than one week after the missed examination.
- c In considering a special pass application,

Senate or its representative may take into account the candidate's work in that course or in that subject or a particular element of hardship as it sees fit.

Aegrotat and Compassionate Consideration

11 a An application for Aegrotat or Compassionate Consideration may be made by candidates who have been prevented from being present at an examination or who consider that their preparation for or performance in an examination has been seriously impaired by temporary illness or injury or exceptional circumstances beyond their control, if the following conditions are satisfied:

- (i) They must be enrolled for the course.
- (ii) The application form must be submitted to the University Health and Counselling Service within one week of the date that the examination affected took place, or if more than one examination has been affected, then within one week of the last of those examinations.
- (iii) The medical certificate or statement of exceptional circumstances on the application form must be completed in accordance with Regulations 11b and 11c below.

b In the case of illness or injury, a registered medical practitioner must:

- (i) State when the practitioner saw the candidate. This should be on the day of the examination, or if this is not possible, on the day before or the day after. For impaired preparation, the medical certificate should cover a period within the fortnight immediately preceding the examination, unless special circumstances apply.
- (ii) Give sufficient detail of the illness or injury to show clearly that the candidate was not responsible for the illness or injury.
- (iii) State whether, in the practitioner's opinion, the illness or injury of the candidate at the time either prevented the candidate from taking the examination, or was likely to have seriously impaired the candidate's preparation for it or performance in it.

c In the case of exceptional circumstances beyond the candidate's control, the statement of circumstances must be supported by suitable evidence.

d The application will be considered by Senate or its representative only if the medical or counselling adviser to the University reviews the evidence submitted and confirms that:

- (i) the candidate was not responsible for the illness or injury or exceptional circumstances

and

- (ii) because of the illness or injury or exceptional circumstances the candidate was either prevented from being present at the examination or the candidate's

preparation for or performance in the examination was likely to have been seriously impaired.

e The candidate may be granted an aegrotat or compassionate grade by Senate or its representative if the above conditions are satisfied and there is a recommendation for an aegrotat or compassionate grade from the appropriate Head of Department or Dean.

f To make a recommendation for an aegrotat or compassionate grade, the Head of Department or Dean must certify that:

- (i) the candidate's coursework in the course was well above the minimum pass standard or, where relevant, the minimum standard for a class of Honours, Merit or Distinction

and

- (ii) for a candidate who sat the examination, the mark attained in the examination was lower than expected taking into account the candidate's coursework in that course

and

- (iii) the candidate is in their opinion clearly worthy of a pass in the course or, where relevant, to be awarded First or Second Class Honours, Merit or Distinction.

g If a recommendation is required for a course with no coursework, the Head of Department or Dean may take into account the coursework and examination performance in any other courses for the same degree, where this is available to them.

h When considering the application, Senate or its representative may take into account the candidate's work in other courses, or approve an aegrotat or compassionate grade other than that recommended, as it sees fit.

i The above is subject to the restrictions that:

- (i) No more than one third of the total points value credited to a degree or diploma may be awarded with an aegrotat or compassionate grade granted under this Regulation.

- (ii) A candidate for a Masters degree, Bachelors Honours Postgraduate degree or a Postgraduate Diploma in which Honours, Merit or Distinction is available may:

- (a) instead of applying for aegrotat or compassionate consideration, apply to re-enrol in all of the courses affected

or

- (b) apply for aegrotat or compassionate consideration in courses worth up to the points limit specified above, and to re-enrol in any other affected courses in order to retain eligibility for Honours, Merit or Distinction.

j A candidate who applied for Aegrotat or Compassionate Consideration in any course may, in exceptional circumstances and on a recommendation from the Head of the Department, be granted permission by

Senate or its representative to take another examination, either written or oral, in that course.

- k The provisions of Regulation 11 apply to:
 - (i) Any final written examination presented for a course for a degree, diploma, or certificate.
 - (ii) Any final practical examination presented for a course for a degree, diploma, or certificate, other than a Music Performance examination.
- l The provisions of Regulation 11 apply (with necessary changes) to:
 - (i) The final submission in each year of work for the practical subjects for the Degree of Bachelor of Fine Arts, Postgraduate Diploma in Fine Arts or the Degree of Master of Fine Arts.
 - (ii) The final submission in each semester of studio work for the Degrees of Bachelor of Architectural Studies and Bachelor of Architecture as if such final submission were an examination and as if the date upon which such final submission was due were the date of examination.

Note: The fees for Aegrotat and Compassionate Consideration are listed under the Fees Regulations in this Calendar.

Reconsideration

- 12 a Following the decision of Senate on an application for Aegrotat or Compassionate Consideration, the candidate may apply to the Director, Academic Services, for reconsideration of that decision.
- b An application for reconsideration must be made:
 - (i) in writing to the Director, Academic Services, no later than four weeks after the student is notified of Senate's decision
 - and
 - (ii) must be accompanied by further evidence in support of the application for aegrotat or compassionate consideration.
- c Where the application seeks reconsideration of the effect of any medical evidence previously supplied or consideration of any additional medical evidence or both then:
 - (i) If the medical or counselling advisor who reviewed the medical evidence previously submitted did not confirm that the requirements of Regulation 11d(i) and 11d(ii) had both been met then all the medical evidence shall be referred to a medically qualified independent person ('Referee') to determine that question. The Referee's decision will be final and conclusive.
 - (ii) If the requirements of Regulation 11d(i) and 11d(ii) have been found (either on the first application or by a Referee on reconsideration):
 - (a) not to have been met, then the application shall be declined;
 - (b) to have been met, then Senate or its representative shall consider

the other factors to be taken into account in terms of Regulation 11 and determine whether or not to grant the application and that decision shall be final and conclusive.

Written Tests

- 13 Where a percentage of the marks awarded for a course is allocated to a prior written test, and candidates are prevented by temporary illness or injury or exceptional circumstances beyond their control from sitting the test, or consider that their performance in the test has been seriously impaired by any of those causes, then, if the conditions in Regulations 11c to 11f (with the necessary changes) are complied with, the candidates may on application and at the discretion of Senate:
 - a be permitted to sit another written test
 - or
 - b receive a mark for the test based on the average of marks awarded for other coursework
 - or
 - c take a viva voce examination
 - or
 - d have the percentage of marks allocated to the test reallocated to the examination.

Results Determination

- 14 In determining a candidate's result the examiners:
 - a may take into consideration the work done by the candidate during the course
 - b are to give due weight to reports on practical work done by the candidate wherever these are required
 - c are to include marks obtained by the candidate where Senate has allotted a percentage of marks for on-course assessment in that course.

Grades and Marks

15 Pass Marks

A pass mark is 50 percent or over.

16 Pass Grades

There are 11 pass grades:

A+	High first
A	Clear first
A-	Bare first
B+	High second
B	Clear second
B-	Bare second
C+	Sound pass
C	Pass
C-	Marginal pass
Pass	Ungraded pass
Conceded pass	

17 Fail Grades

There are four fail grades:

D+	Marginal Fail
D	Clear Fail
D-	Poor Fail
Fail	Ungraded Fail

18 Conceded Passes

- a Conceded passes apply only to courses taken

towards a Bachelors degree (other than a Bachelors (Honours) degree) or towards an undergraduate diploma comprising not fewer than 240 points.

- b A candidate may, at the discretion of the relevant Faculty, be considered for a conceded pass. No application by the candidate is required.
- c A conceded pass, if granted, may not be declined by the candidate.
- d A conceded pass will apply only to the programme for which it is awarded and may not be transferred or credited to any other programme.
- e A candidate granted a conceded pass in a course who wishes to take that course again may do so only for Certificate of Proficiency.
- f **For the degrees of:**

BA	BPE
BBIM	BPerfArts
BCom	BProp
BEd(Tchg)	BSc
BHSc	BSocSci (Human Services)
BHumServ	BSW
BMus	BTheol

Conceded passes will be awarded by a meeting of the Examiners for the Faculty concerned, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions.

One course to a maximum value of 30 points may be conceded provided:

- (i) the concession will allow the student to complete the degree
- (ii) the course conceded is not a course counting towards the student's major requirements
- (iii) the student obtained a grade of D+ in the course
- (iv) the result was achieved in the last two semesters of enrolment, one of which may be a Summer School.

Note: A conceded pass will not be given for a course failed at another university.

g **For the degree of LLB:**

Conceded passes will be awarded by a meeting of the Examiners of the Faculty, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:

- (i) one course to a maximum value of 20 points may be conceded
- (ii) the concession will allow the student to complete the degree
- (iii) the course is not one of the core law subjects prescribed by the New Zealand Council of Legal Education
- (iv) the student obtained a grade of D+ in the course
- (v) the result was achieved in the last two semesters of enrolment, one of which may be a Summer School.

h **For the degrees of:**

BArch	BOptom
-------	--------

BAS	BPlan
BE	BTech
BFA	BVA

Conceded passes will be awarded by a meeting of the Examiners for the Faculty concerned, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:

- (i) that by the award of a conceded pass the student will complete a Part or all courses enrolled for in that year;

and

- (ii) a maximum of 20 points per Part and a maximum of 20 points in any one academic year may be conceded;

and

- (iii) that to be eligible for the award of a conceded pass in any course the student must have achieved a grade of D+ and an overall GPA of 2.5 or better in that year.

i **For the degree of BEd(TESOL):**

Conceded passes will be awarded by a meeting of the Committee of BEd(TESOL) Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:

- (i) that by award of a conceded pass the student will complete that Part;

and

- (ii) a maximum of 15 points in any one Part be conceded;

and

- (iii) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in that Part.

Where a candidate has a fail grade of D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work, then a pass in that Part may be awarded under the following provisions;

- (iv) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners;

and

- (v) deferred results be limited to a maximum of 15 points in any Part;

and

- (vi) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better;

and

- (viii) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

j **Medical and Health Sciences**

- (i) **For the degree of MBChB, Parts II and III:**

Conceded passes will be awarded by a meeting of the Committee of MBChB

Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:

- (a) that by award of a conceded pass the student will complete that Part;
and
- (b) one course to a maximum value of 30 points in any one Part be conceded;
and
- (c) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in that Part.

Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:

- (d) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners;
and
- (e) deferred results be limited to no more than two courses with a total maximum value of 45 points in any one Part;
and
- (f) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better;
and
- (g) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

(ii) **For the degree of MBChB, Parts IV, V and VI:**

Conceded passes in components of the Part will be awarded by a meeting of the MBChB Examiners, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:

Parts IV and V

Where a student has not achieved a pass in a particular component or components of a Part the Examiners may:

- (a) withhold the result pending the completion of specified additional work and/or examination to the satisfaction of the Examiners;
and/or

- (b) grant a conceded pass for a single component of the Part.

If in the opinion of the Examiners for MBChB a particular weakness in a component or components is

such that it cannot be addressed by the setting of additional work and/or examination, the student will fail that Part.

Part VI

Where a student has not achieved a pass in a particular component or components of this Part, the Examiners may withhold the result and require a further period of assignment to a department. This will involve postponement of qualification. If in the opinion of the Examiners for MBChB a particular weakness in a component or components is such that it cannot be, or has not been, addressed by this additional work, the student will fail that Part.

(iii) **For the degree of BNurs, Part I:**

Conceded passes will be awarded by a meeting of the Committee of BNurs Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:

- (a) that by award of a conceded pass the student will complete that Part;
and
- (b) a maximum of 30 points in the Part be conceded;
and
- (c) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in the Part.
Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:
- (d) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners;

and

- (e) deferred results be limited to a maximum of 30 points in any Part;
and
- (f) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better;
and
- (g) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

(iv) **For the degree of BPharm:**

Conceded passes will be awarded by a meeting of the Committee of BPharm Examiners, provided that the Dean has the power to award where such

power is authorised by the Examiners, in accordance with the following provisions:

(a) that by award of a conceded pass the student will complete that Part
and

(b) a maximum of 15 points in any one Part be conceded

and

(c) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in that Part

(d) a maximum of two conceded passes are awarded for the degree.

Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:

(e) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners

and

(f) deferred results be limited to a maximum of 30 points in any Part

and

(g) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better

and

(h) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

k Undergraduate Diplomas

For all undergraduate diplomas comprising 240 points or more a conceded pass may be awarded by a meeting of the Examiners for the Faculty concerned, provided that the Dean of the Faculty has power to award where such power is authorised by the Examiners, in accordance with the following provisions. One course to a maximum value of 20 points may be conceded provided:

(i) that the conceded pass may only be awarded where it would permit the student to complete his/her diploma

and

(ii) that the student has obtained a grade of D+ in that course.

l Conjoint Degrees

For all conjoint degrees consideration for the award of conceded passes will be in accordance with the provisions for the particular degree as set out in (f), (g) and (h) of this section.

Deferred Results

19 Bachelor of Optometry

Where a weakness occurs in the clinical practice

component in certain double-semester Stage III and Stage IV courses, the result of the course or courses will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners. The work will be examined in the following February.

Recount of Marks

20 By making application not later than seven weeks after the last day of the examination period, any candidate sitting a written examination only may have the marks awarded for their examination script recounted. A recount of marks covers a careful rechecking of the marks recorded by the examiner and ensures that no answer, or any part of an answer, submitted by a candidate has been overlooked.

Note: For the prescribed fee for an Application for Recount of Marks see the Fees Schedule in this Calendar.

Availability of Scripts

21 a By making application during the three months after the end of the examination period for the examination, a candidate may obtain a photocopy of their examination script.

b By making application not before three months and no later than four months after the end of the examination period for the examination, a candidate may request the return of their original examination script.

Note: No further consideration of the examination script will be undertaken after the original script has been returned to the student. Examination scripts will normally be retained only for six months after the examination period and thereafter will be destroyed.

Theses and Dissertations

22 Where a thesis or dissertation is required as part of an examination the following conditions apply.

a Theses

Details of the submission and binding requirements for a thesis are listed in the General Regulations – Masters Degrees.

b Dissertations

Binding requirements for dissertations will be defined by the Faculty.

c Degree of Doctor of Philosophy

(i) Details of the submission and binding requirements for PhD theses are contained in the Statute for the Degree of Doctor of Philosophy – PhD.

(ii) On completion of the examination, the candidate is to submit either three hardbound copies of the thesis or two hardbound copies and one digital copy of the thesis to the Graduate Centre as specified in Clauses 9q and 9r of the Statute for the Degree of Doctor of Philosophy. A short abstract not exceeding 350 words is to be included with each copy and bound into the

hardbound copies of the thesis. The Graduate Centre is to deposit two hardbound or one hardbound and one digital copy with the University Library. The disposal of the third hardbound copy shall be at the discretion of the Head of the relevant Department.

Notes:

- a *In the case of PhD theses, once the degree has been awarded a further unbound copy of the thesis and abstract may be supplied to the University Library if the candidate wishes to have the thesis published by University Microfilms International. Information regarding this will be forwarded to the candidate when the degree is awarded.*
 - b *Candidates are recommended to obtain the booklet Guide to the Presentation of Theses from the Library before proceeding with the typing and binding of the thesis or dissertation. A clear, legible type style is to be used.*
- 23 In any thesis or dissertation, plagiarism or unacknowledged or unauthorised copying is not acceptable and will be treated as an examination offence.

Embargoing of Theses

- 24 a A thesis will normally be available for public consultation unless there are compelling reasons for restricting access to it.
- b Access to a thesis may be restricted, normally for a maximum of two years, if it contains confidential and sensitive material that would:
- (i) breach prior contractual arrangements with outside organisations
- or
- (ii) prevent or jeopardise an application for a patent, licence, or registration

or

- (iii) provide good reason for refusing to disclose the contents of the thesis, consistent with the provisions of the Privacy Act (1993) or the Official Information Act (1982).
- c An application for an embargo is to be made by the author of the thesis and/or the supervisor, through the Head of Department and the Associate Dean (Postgraduate) of the appropriate Faculty to the Dean of Graduate Studies.
- d If an embargo for a thesis deposited in digital form is approved, only the author, title, abstract and other metadata (as specified by the University Librarian) of the full digital copy held by the University will be accessible through the University's digital repository.
- 25 The University Librarian or a delegated authority has a right to make and supply copies of theses and dissertations in terms of Section 56 of the Copyright Act (1994) unless the author has imposed conditions restricting the reproduction of their work for a stipulated period.

Failed Theses

- 26 a Where a thesis or dissertation has failed the examination, that thesis or dissertation is not to be deposited in the University Library.
- b Where a thesis or dissertation has passed, but requirements for the degree have not been met, the thesis or dissertation is not to be deposited in the University Library.

GENERAL STATUTES AND REGULATIONS

Conferment of Academic Qualifications and Academic Dress Statute 1992

- 1 Every degree and every diploma of the University shall be conferred or awarded in pursuance of a resolution of the Council and at a meeting of the Council.
- 2 Every degree and every diploma of the University shall be conferred or awarded by the Chancellor, or if they are absent from the meeting or incapacitated by sickness or otherwise, by the Vice-Chancellor or Pro-Chancellor. The Council may also authorise another person to confer degrees or award diplomas at a particular ceremony.
- 3 Every recipient of a degree shall receive a certificate in appropriate form, under the Common Seal of the University, that their degree has been conferred and stating the class of honours (if any awarded).
- 4 Every diploma shall be in appropriate form under the Common Seal of the University.
- 5 At a specified time or times each year the Council shall meet in convocation of the University to confer degrees and award diplomas. Persons wishing to have their degree conferred or diploma awarded (whether in person or in absentia) at such a ceremony shall make application to the Registrar not later than the date specified in the *Calendar* for this purpose.
- 6 The form of words to be used by the Chancellor, the Vice-Chancellor, Pro-Chancellor or such other person as may have been appointed by the Council to confer degrees or to award diplomas shall be as follows:
 - a **Degrees**
'By the authority vested in me by resolution of The University of Auckland Council I [NAME], [POSITION], confer the degrees stated upon those who, within their several faculties, have satisfied the requirements of this University.'
 - b **Diplomas**
'By the authority vested in me by resolution of The University of Auckland Council I [NAME], [POSITION], award the diplomas stated upon those who, within their several faculties, have satisfied the requirements of this University.'
- 7 In appropriate circumstances, the form of words to be used by the Chancellor, the Vice-Chancellor, Pro-Chancellor or such other person as may have been appointed by the Council to confer degrees and to award diplomas shall be as follows: 'By the authority vested in me by resolution of The University of Auckland Council I [NAME], [POSITION], confer the degrees and award the diplomas stated upon those who, within their several faculties, have satisfied the requirements of this University.'
- 8 The academic dress worn by members of the University at any public ceremony of the University shall be the costume appropriate to their degree, but doctors may on special occasions wear a scarlet gown and graduates admitted *ad eundem statum* may wear the academic costume of their own university. Unless the holder of a diploma is also a graduate the only academic dress they may wear is an undergraduate gown and the scarf appropriate to their diploma.
- 9 The academic costumes of The University of Auckland shall be as follows:
 - a The robe for the Chancellor of the University is a blue damask gown with facings of gold lace, bearing on each shoulder the coat of arms of the University. The cap is a black velvet trencher with gold lace and tassel. The robe for the Pro-Chancellor is a black gown with facings of blue silk and gold lace, bearing on each shoulder the coat of arms. The cap is a black velvet trencher with gold tassel. The robe for the Vice-Chancellor is a blue silk gown with facings of silver lace, bearing on each shoulder the coat of arms. The cap is a black velvet trencher with silver lace and tassel. The robe for the Registrar is a gown of black silk with facings of blue silk, bearing on each shoulder the coat of arms. The cap is a black velvet trencher with a black silk tassel. The robe for the Kaumatua and the Kuia is the Fellows gown of the colour University blue to be worn with a black scarf lined with the colour University blue bearing on each lapel the coat of arms. The cap is a black velvet trencher with a black silk tassel. The academic dress for Graduation Officials shall be the costume appropriate to their degree. In addition, the gown shall bear on each shoulder the coat of arms of the University, and the trencher shall have a blue tassel. Graduation Officials who are not graduates shall wear an undergraduate gown bearing the coat of arms of the University on each shoulder.

- c The hood for a Bachelor with Honours degree is as for the relevant Bachelors degree, with the addition of a 25mm ribbon band on the outside of the hood, alongside the fur. The colour of the ribbon band is the same colour as the lining.

The hood for a Bachelors degree for which the prerequisite is another Bachelors degree within the same Faculty, is as for a Bachelor with Honours degree, with the addition of a second 25mm band at a distance of 25mm from the first band. Both bands are the same colour as the lining.

Where there is more than one Masters or Bachelors degree within a Faculty, the hoods for such degrees are lined with satin in the colour approved by Council. The first such degree will have no ribbon band, but subsequent degrees of this nature will be distinguished by the addition of a 25mm band on the edge of the satin. The colour of the ribbon band for the first subsequent degree within a Faculty will be dark brown, and any further subsequent degrees of this nature within the Faculty will be in another colour which is not taupe, nor unless otherwise approved, the colour used to line the hoods for any other degree.

The hood for an Interfaculty Bachelors degree or Masters degree is lined with the colour of the Faculty primarily responsible for the degree, with the addition of a 25mm ribbon band on the edge of the satin. Where there are two Faculties involved, the colour of the ribbon band is the colour of the hood lining of the second Faculty. Where more than two Faculties are involved, the colour of the ribbon band is taupe.

- d The gown for the degrees of Doctor of Clinical Psychology, Doctor of Education, Doctor of Fine Arts, Doctor of Medicine, Doctor of Music, Doctor of Musical Arts and Doctor of Pharmacy is as for the Cambridge Master of Arts with the addition of facings of 50mm wide satin. The hood is made wholly of satin and this and the facings of the gown are of the following colours for the different degrees:

Clinical Psychology	dark blue
Education	emerald green
Fine Arts	gold
Medicine	crimson
Music	white
Musical Arts	white
Pharmacy	grey-green

- e The gown for the degree of Doctor of Philosophy is as for the Cambridge Master of Arts, with the addition of 100mm satin facings, made up of 75mm of scarlet edged with 25mm of gold. The hood is made wholly of scarlet satin.
- f The gown for the degrees of Doctor of

Engineering, Doctor of Laws, Doctor of Literature, and Doctor of Science is as for the Cambridge Master of Arts, but is made of black silk, or scarlet silk or cloth. The hood is made wholly of satin, and is of the following colours for the different degrees:

Engineering	dark violet
Laws	light blue
Literature	pink
Science	dark blue

- g The cap for all graduates other than Doctors and the officers of the University is a black trencher with a tassel. The cap for all Doctors other than officers of the University is as for the full dress Cambridge Doctor of Philosophy, namely a round black velvet bonnet with a gold cord around the crown ending in tassels.

- h The scarf for a diploma is to be made of the same black material as the gown with a band of colour in plain satin as in existing hoods down the centre edge. The colour is to match the degree cluster most closely associated with the diploma. The lining is to be the same colour as the band. The width of the scarf at the base is to be 140mm in total, the black being 100mm and the colour 40mm, and narrowing behind the neck. A band of the lining colour is to be stepped down from the inside edge to the outside edge of the black material at the base of each side of the scarf.

The diploma scarves are as follows:

Doctor of Engineering
Doctor of Literature
Doctor of Laws
Doctor of Music
Doctor of Science
Doctor of The University of Auckland
A Masters degree in any Faculty of the University

- 4 The Council may confer a degree or award a diploma previously included in a University of Auckland Degrees and Diplomas Statute on a person who had been enrolled in a programme leading to that qualification prior to its deletion from the Statute provided that person
- had completed a significant component of the course of study prior to the deletion of the degree or diploma
- and
- has completed a course of study in accordance with the provisions of the regulations for that degree or diploma.

- 5 The Degrees Statute 1990 is hereby repealed.

The Honorary Degrees and Awards Statute 1998

Pursuant to sections 192 and 194 of the Education Act 1989 and section 20 of The University of Auckland Act 1961 the Council of the University makes the following statute:

- 1 This Statute may be cited as the Honorary Degrees and Awards Statute 1998 and shall come into force on the 16 March 1998.
 - 2 The Council may at its discretion:
 - a Confer the following honorary degrees:
 - Doctor of Laws
 - Doctor of Science
 - Doctor of Literature
 - Doctor of Music
 - Doctor of Engineering
 - Doctor of The University of Auckland
 - A Masters degree in any Faculty of the University;
 - and*
 - b Award the title 'Fellow of the University' ('Fellowship').
 - 3 The University Honours Committee of the Council shall consider nominations and make recommendations to the Council for the conferring of any honorary degree or fellowship under this Statute.
 - 4 The University Honours Committee shall henceforth consist of:
 - a the Chancellor who shall be the Chair of the Committee
 - b the Vice-Chancellor
 - c the Pro-Chancellor
 - d one member appointed by the Council
 - e two members of Senate elected by Senate
 - f a student member of the Council.
 - 5 The Council may, from time to time, approve guidelines for the award of honorary degrees and fellowships and, in making its recommendations, the University Honours Committee shall ensure that it complies with all those guidelines.
 - 6 The Council may also, in its discretion and on the recommendation of the University Honours Committee:
 - a award the title 'Professor Emeritus' to a retired member of the academic staff who held the office of a Professor of the University immediately before his or her retirement
 - b award the title 'University Librarian Emeritus' to a retired member of staff who held the office of University Librarian immediately before his or her retirement and who has a record of long and distinguished service to the University as the University Librarian.
- 7.1 The University Honours Committee may recommend to the Council, for the conferment of an Honorary Doctor's degree:
 - a Any person who:
 - (i) is academically distinguished, or has made a distinguished contribution in creative or artistic fields, and has, or has had, some intimate connection with the University
 - or*
 - (ii) has shown strong interest in the well-being of the University by benefactions, or in other appropriate ways
 - or*
 - (iii) is of international repute and is visiting, or has visited the University in an official capacity
 - or*
 - b Any other person approved for the purpose after consultation with Education Committee on behalf of Senate.
 - 7.2 The University Honours Committee may recommend to the Council, for the conferment of an Honorary Masters degree:
 - a any member of the general staff who has given long and distinguished service to the University
 - or*
 - b any member of the academic staff who does not hold a degree
 - or*
 - c any other person approved for the purpose after consultation with Education Committee on behalf of Senate.
 - 7.3 The University Honours Committee may recommend to the Council, for the conferment of a Fellowship, a person who:
 - a has made a unique and valuable contribution to the University
 - and*
 - b is not a permanent member of staff.
 - 8 A nomination for the conferment of an honorary degree or a fellowship may be made by any three persons each of whom is a member of the Council or of Senate or of both these bodies; and shall be made confidentially to the Vice-Chancellor in accordance with the relevant provisions of the guidelines in force under clause 5 of this Statute.
 - 9 The Honorary Degrees Regulations 1978 and The Fellow of The University of Auckland Statute 1992 are both hereby repealed.

Guidelines for the Award of Honorary Degrees and Fellowships

- 1 A nomination for an honorary degree or for the award of a fellowship shall be made confidentially in writing to the Vice-Chancellor and signed by three persons each of whom shall be a member of the Council or of Senate or of both these bodies.
- 2 Each nomination shall be accompanied by a statement outlining in sufficient detail the career, standing and qualifications of the nominee and the grounds under clauses 7.1, 7.2 or 7.3 for conferring the degree or awarding the fellowship.
- 3 The Vice-Chancellor shall refer each nomination and the accompanying statement to the University Honours Committee of Council.
- 4 If Council approves a recommendation that an honorary degree be conferred or a fellowship be awarded the Vice-Chancellor shall invite the nominee to accept the award.
- 5 The conferring of honorary doctorate degrees shall not be confined to a graduation ceremony but shall be arranged at the discretion of the Council.
- 6 The conferring of an honorary Masters degree will, except in very exceptional circumstances, take place at a graduation ceremony.
- 7 The award of a Fellowship shall be arranged at the discretion of the Council.

IT Services

IT Services (ITS) delivers Information and Communications Technology (ICT) services and infrastructure that support the research, teaching, learning and administrative services at the University.

ITS develops and manages foundation ICT services such as the data and telephone networks, the high-speed research and education network supporting collaboration with the national and international tertiary community, enterprise data centres, centralised data storage networks and automated

data backup. It provides computer systems and facilities for use by both staff and students, including help desk services.

Core services supported are the Cecil online learning system, the University Library enterprise systems and Information Commons computers, Lecture Theatre Management, the student management system (nDeva), Finance, Property Services and Human Resources functions, Research Information Management, e-research and Decision Support Systems.

Information and Communications Technology (ICT) Statute 2007

Pursuant to section 194 of the Education Act 1989 the Council of the University makes the following Statute:

- 1 This Statute may be cited as the ICT Statute 2007. The Statute comes into force on 1st January 2007.

- 2 In this Statute, unless the context otherwise requires:

'ICT' means all information and communications technology hardware and software, data and associated methodologies, infrastructure and devices that are:

- a controlled or operated by the University
- b connected to the University network
- c used at or for University activities
- d brought onto a University site.

ICT includes but is not limited to; computers (such as desktops, laptops, PDAs), computer systems, storage devices (such as USB and flash memory devices, CDs, DVDs, floppy disks, iPods, MP3 players), cameras (such as video, digital, webcams), all types of mobile phones, video and audio players/receivers (such as portable CD and DVD players), telecommunication equipment, networks, databases and any other similar technologies as they come into use.

'Director' means the Director Information

Technology Services, or Chief Technology Officer, or Faculty IT Managers, or Departmental IT Managers acting as delegated representatives of the Director.

'Authorised Person' means a member of the University staff.

'User' means anyone who operates or interfaces with ICT. It includes University staff, officers and students (whether permanent, temporary or part-time), honorary staff, contractors, sub-contractors, consultants, business partners or official visitors or any other member of the University.

'IT Policy' means a rule as defined in the Disciplinary Statute 1998.

- 3 University ICT is provided for educational purposes. Consistent with this purpose, the University has the right to inspect and monitor ICT, including;

- where there are reasonable grounds to suspect there may be violation of any University policy or statute or New Zealand law;
- for systems maintenance, problem resolution and capacity planning purposes or for similar reasons related to security, performance or availability.

The University may be required to disclose information and data held on University ICT

- in accordance with University policies and procedures or legislative requirements.
- 4 A User shall use ICT subject to the terms and conditions as described in this statute, the ICT Acceptable Use Policy and all other relevant IT Policy.
 - 5 A User shall not intentionally impede the activities of the University nor without authority of the Director or the consent of an Authorised Person:
 - a gain access or attempt to gain access to ICT
or
 - b make unreasonable use of ICT for their personal purposes
or
 - c use ICT in a way that is inconsistent with their conditions of enrolment or conditions of employment
or
 - d obtain or attempt to obtain from ICT any information which they have not been authorised to access
or
 - e use ICT to make unauthorised use of any other system, whether in the University or outside it
or
 - f wilfully prevent or interfere with the operation or activity of any other authorised user of ICT or of any other system, whether in the University or outside it
or
 - g use or attempt to use ICT so as to cause costs to be incurred;
 - (i) by the University
or
 - (ii) by any person or organisation other than the University, without the consent of that other person or organisation.
 - h communicate information purporting to represent the views of the University.
 - 6 A User shall not use ICT in contravention of New Zealand law, including using ICT to store, display or communicate through computer networks, any work or publication, including files containing any text, image, sound or multimedia, that;
 - a is defined as “objectionable” in the Films, Videos and Publications Classification Act 1993
 - b is deceptive or misleading
 - c is abusive or defamatory; threatens the safety of any person, or causes racial disharmony, sexual harassment or racial harassment in terms of the Human Rights Act 1993
 - d contravenes the rights of any person under the Privacy Act 1993
 - e reproduces all or part of any work in breach of the Copyright Act 1994 or the Trade Marks Act 2002
 - f has been composed knowingly so as to appear to have been produced and/or communicated by another person or entity
 - g knowingly misquotes, abridges or alters the publication of any other person so as to alter the meaning of that publication without either the prior approval of that person or a clear statement as to the identity of the author of the altered publication
 - h copies or closely paraphrases someone else’s writings (including textbooks and assignments written by other students) without an explicit indication of the source of the material.
 - 7 A breach of clause 4, 5 or 6 of this Statute shall constitute a breach of the Disciplinary Statute 1998. If such a breach is harmful to the safety of a User, or poses a significant threat to the University, it may be referred to a law enforcement agency.
 - 8 Where in the opinion of the Director the continued use of ICT by a User is likely to expose the University to significant risk, or contravenes this statute or threatens the health or safety of another individual or organisation, the Director may exclude the User believed to be in breach of a provision of clause 4, 5 or 6 from the use of ICT for a specified period. The Director shall, as soon as reasonably possible, report the exclusion and the reasons for the exclusion to the Vice-Chancellor or to any person the Vice-Chancellor has nominated to receive such a report. On receiving such a report the Vice-Chancellor (or the nominee of the Vice-Chancellor) will deal with the breach;
 - a in the case of a User who is a student, under the provisions of University Statutes and Regulations
 - b in the case of a User who is a member of staff, according to the provisions of employment law and the relevant employment agreement
 - c in the case of a contractor engaged by the University to undertake specified tasks, in accordance with the provisions of the relevant contract
 - d in the case of a User who may fall into more than one of the above categories, by a process determined by the Vice-Chancellor, or the nominee of the Vice-Chancellor, and which takes into account the circumstances of the particular breach.
 - 9 In addition to the penalties that may be imposed on a student under the Disciplinary Statute 1998[#] the Discipline Committee may:
 - (i) impose conditions on access to ICT by a student User found to have breached a provision of clauses 4, 5 or 6
and
 - (ii) require any such student User to make restitution for any loss or damage for improper use of ICT.

A student subject to a penalty may appeal the penalty or the decision or both as set out in the provisions of Clause 11 of the Disciplinary Statute. Such an appeal must be made in writing to the Registrar within 14 days of the penalty having been imposed. The appeal will be heard by the Council’s Appeals Committee.

#Note that minor student infringements of IT Policy may be dealt with under the provisions of the “Guidelines for dealing with minor student infringements of IT policies, regulations and statutes”.
 - 10 The Computer System Statute 2000 is hereby repealed.

Library Statute 2007

The name of the Library is The University of Auckland Library. It may also be known by its Maori name: Te Tumu Herenga. Variants of this name may be used to describe the individual libraries or information commons in the Library system.

1 Title and Commencement

This Statute may be cited as the Library Statute 2007 and comes into force on 1 January 2007, and replaces the former Library Regulations 1971.

2 Interpretation/Definition

Authorised Librarian A library staff member acting under delegation from the University Librarian.

Borrowed Item Means any Library Material borrowed from the Library.

Borrower Means any Member who is entitled to borrow Library Material.

Due Date The date by which a Borrowed Item must be returned by the Borrower.

ID Card Means the University identity card.

Library Refers to all parts of The University of Auckland Library including information commons and such other areas as may be under the management of the University Librarian.

Library Material Includes all types of printed, written, photographic, audiovisual and machine-readable material held by the Library.

Library Resource Includes all Library Material, facilities and services (including electronic resources and software) available in, from or through the Library to some or all Users.

Library Staff Means a member of staff of the Library.

Member Means all persons permitted to use the Library under clause 5 of this Statute.

Staff Means any person who is a member of the staff of The University of Auckland.

Student Means a person who is enrolled as a student at The University of Auckland.

University Librarian Means the person appointed by the Vice-Chancellor who is responsible for the management of all parts of the Library.

User Means any person who uses the Library.

3 General

- a All Members must comply with the provisions of this Statute at all times.
- b Admission to the Library is conditional on observance of the provisions of this Statute and of such directions as may from time to time be given by the University Librarian.
- c All Users must comply with the directions of Authorised Librarians.
- d Any infringement of this Statute by a User may lead to the suspension of their use of

the Library at the discretion of the University Librarian.

- (i) Students who infringe this Statute may also be subject to disciplinary action under The Disciplinary Statute 1998.
- (ii) Staff who infringe this Statute may also be subject to disciplinary action in accordance with their conditions of employment.

4 Hours of Opening

- a The opening hours of the Library are determined by the University Librarian.
- b The hours of opening are posted in each library and information commons and are to be found on the Library's website at: <http://www.library.auckland.ac.nz/contacts/hours.asp>
- c These hours may be varied at the discretion of the University Librarian and any variation will be appropriately notified.

5 Membership

- a All members of the University Council, all current and retired University Staff and all enrolled Students are entitled to be Members of the Library.
- b By special permission of the University Librarian, approved persons who meet the criteria in the Membership of and Conditions of Access to The University of Auckland Library and who are not included under clause 5a of this Statute may be Members and accorded full or partial use of Library Resources. The Membership of and Conditions of Access to The University of Auckland Library are to be found on the Library's website at: <http://www.library.auckland.ac.nz/about/membership/>
- c Persons or classes of persons admitted as Members under clause 5b of this Statute will be charged fees according to the fees schedule of the Membership of and Conditions of Access to The University of Auckland Library which will be determined from time to time by Council on the recommendation of Library Committee. The University Librarian may in exceptional circumstances waive the membership fee, although an administration fee will normally be charged.

6 Borrowing

- 6.1 General (includes conditions of borrowing)
 - a Borrowers must familiarise themselves with all borrowing information and comply with loan periods and conditions. Borrowing information is to be found on the Library website at: http://www.library.auckland.ac.nz/about/genlib/lending_1.htm
 - b Any Library Material may be borrowed by a Member who is entitled to do

- so, unless that Library Material is restricted for use in the Library only.
 - c Borrowing ceases 15 minutes before closing.
 - d The hours during which Library Material may be borrowed may be varied at the discretion of the University Librarian.
 - e Borrowers must present any Library Material that they wish to borrow, with their current ID Card, for issuing at a lending desk or self check facility.
 - f The Due Date is set at the time of issue, and reset when a Borrowed Item is renewed or when it is recalled.
 - g The University Librarian is under no obligation to notify Borrowers when a Borrowed Item is overdue; a fine is charged when a Borrowed Item is returned after the Due Date, even though no overdue notice may have been received by the Borrower.
 - h A Borrower may only take Library Material out of New Zealand with the prior permission of the University Librarian.
 - i A Borrower remains personally responsible for:
 - (i) keeping each Borrowed Item reasonably safe and secure and in their possession;
 - (ii) notifying the Library immediately if a Borrowed Item becomes lost, stolen, damaged or destroyed;
 - (iii) returning each Borrowed Item on or before the Due Date or any earlier date specified in a recall notice;
 - (iv) returning each Borrowed Item in the same condition and repair as when it was borrowed (subject to reasonable wear and tear);
 - (v) notifying the Library immediately if their ID Card becomes lost, stolen or destroyed.
 - j A Member is not permitted to allow their ID Card to be used by any other person to borrow Library Material.
 - k A Member is not permitted to use the ID Card of any other person to borrow Library Material.
 - l Where the ID Card of a Borrower is lost, stolen, or destroyed, the Borrower shall be responsible for returning or replacing any Library Material borrowed before the loss, theft, or destruction of the card was reported.
- 6.2 Renewals**
- a Borrowed Items may be renewed at the expiry of a loan period at lending desks or by using the renewal facility available via the catalogue.
 - b Renewal will be refused if the Borrowed Item has been recalled by another Borrower.

- 6.3 Recalls**
- a Members may normally recall any Borrowed Item.
 - b The length of the loan period will be adjusted if the Borrowed Item has been requested by another Borrower.
 - c Each Borrowed Item is subject to recall at any time during the year, including study breaks and summer vacation.
 - d Borrowers who fail to return any recalled Borrowed Item by the recall Due Date will incur a fine for each 24 hours that it is overdue.
- 6.4 High Demand Library Material**
- a Library Material that is in high demand will usually be available from short loan collections.
 - b High demand Library Material will be issued for a restricted period and normally may not be removed from the Library except in the case of overnight or three day loans.
 - c Failure to return Library Material from short loan collections on time will incur a fine.
 - d Additional fines may be charged for overdue items that have a reservation queue.
- 6.5 Interlibrary Loans**
- a Members may apply to borrow Library Material from the library of another institution through the Interlibrary Loan and Document Delivery Service.
 - b The access to and use of such Library Material is subject to the conditions imposed by the owning library.

7 Conduct of Users

- a A Borrowed Item may not be passed to another Member without being reissued in that Member's name. Where this Statute is breached the Member in whose name the Borrowed Item is issued remains liable for all fines and fees payable by reason of failure to return the Borrowed Item that is overdue, recalled, or lost.
- b The unauthorised borrowing, removal, damage, or defacement of Library Material is regarded as a serious disciplinary offence.
- c Every Member must report any change of address as soon as possible either by updating the information held in the central University database through the web self-service facility or by notifying the Library.
- d Seats in the Library may not be reserved and items left unattended on chairs or tables may be removed by Library Staff.
- e The Library accepts no responsibility for personal belongings brought into the Library.
- f There is to be no noisy or disruptive behaviour in the Library. Such behaviour includes conversation that disturbs other Users and the audible use of equipment, including cell phones.
- g In accordance with the University's "Smoke

- Free" policy published in the current Calendar, smoking is not permitted in any part of the Library.
- h Unless specifically approved, food or drink, other than water in approved non-spillable containers, may not be consumed in any part of the Library.
 - i An Authorised Librarian may confiscate food or drink not specifically approved that is brought into the Library in a consumable state.
 - j All Users must identify themselves if requested, and must comply with such directions as may reasonably be given by any Authorised Librarian in order to maintain good order and discipline.
 - k All Users must present all Library Material and personal property for inspection if requested.
 - l All Users must vacate the Library by closing time; a reminder will be given 15 minutes before the notified closing time.
- 8 Fines and Sanctions**
- a Failure to return Borrowed Items by the Due Date will incur a fine.
See schedule of fines at:
http://www.library.auckland.ac.nz/about/genlib/lending_1.htm
 - b Members are responsible for, and are to make good any loss of, or damage to, any Borrowed Item, or any Library Resource they use in the Library.
 - c Members are normally charged an administration fee in addition to the cost of replacement or repair, whether or not the Borrowed Item, if lost, is subsequently found and returned in good order.
 - d A Borrowed Item remains the property of the Library, notwithstanding payment of the bill for its replacement, and must be returned if found. A refund will be made, in whole or part, according to the condition of the item on return. The administration fee will normally be retained.
 - e The University Librarian, in consultation with Library Committee, may set a limit on Library fees or fines which may be outstanding ("outstanding fees limit"). Any Borrower with fees or fines outstanding in excess of the outstanding fees limit will not be allowed to borrow until the outstanding fees or fines have been paid, or until arrangements, approved by the University Librarian, to pay the outstanding fees or fines are in place.
 - f Where a fine or charge in excess of the outstanding fees limit is not paid within 14 days of becoming due:
 - (i) the Member's library privileges may be withdrawn or restricted for such period as the University Librarian thinks fit
 - (ii) the University Librarian may recommend to the Director, Academic Services, that in addition the following penalties may be imposed on a Student: withhold the formal notification of the results of any examination of the Student; decline to re-enrol the Student; decline to release the Student's academic record; withhold any Degree or Diploma certificate from that Student.
 - g In the case of any User who acts or behaves in the Library in a disorderly or improper manner or is otherwise in breach of this Statute,
 - (i) an Authorised Librarian may require that person to withdraw from the Library and may impose a fine, not exceeding \$20, on that person;
 - (ii) The User's library privileges may be withdrawn or restricted for such period as the University Librarian thinks fit.
 - h Where a penalty is imposed on any Member under this Statute, the Member may apply to the Library Review Committee of Council to review the imposition of that penalty.
- 9 Use of Library Computers and Electronic Resources**
- a Library computers are provided for Users to access the Library catalogue and for Members to access Library Resources.
 - b Electronic resources provided by the Library are normally subject to licence agreements and to copyright restrictions. Members are responsible for ensuring that their use of these resources complies with these licence agreements and the relevant copyright legislation.
 - c Every User of Library computers must comply with the following University-wide policies and conditions of use:
 - (i) Information and Communications Technology (ICT) Statute 2007
 - (ii) ICT Acceptable Use Policy
 - (iii) Email Usage Policy.
- 10 Copyright**
- a Every user of copying facilities in the Library must comply with the laws on copyright.
 - (i) The provisions of the Copyright Act 1994
 - (ii) Licensing agreements
 - (iii) University policies and instructions, eg, notices on photocopiers, online instructions, and written forms.
 - b While a User may be entitled to make one copy for their private study, the making of multiple copies is not permitted.
- The Library Regulations 1971 are hereby repealed with effect from 31 December 2006.

The Degree of Doctor of Fine Arts – DocFA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble

- 1
 - a A candidate for the Degree of Doctor of Fine Arts is required to pursue an approved programme of advanced study and research as an enrolled student of the University.
 - b It is expected that this programme will normally be completed within four years of equivalent full time study but in no less than three years.
 - c The Degree of Doctor of Fine Arts is awarded for a formal and systematic exposition of a coherent programme of advanced creative work supported by a written submission and carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
 - (i) to be an original and substantial creative work
 - and
 - (ii) to meet internationally recognised standards for such work
 - and
 - (iii) whose supporting documentation is an original contribution to professional practice in the field of Fine Art and demonstrates a knowledge of the artistic practices and literature relevant to the subject of the work and the ability to exercise critical and analytical judgment of it.

- d The 'thesis' is taken as being the exposition of creative work and supporting documentation referred to above. The format for exposition of the creative work will normally be an exhibition, performance or publication.
- e All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

Eligibility

- 2 A candidate for the Degree of Doctor of Fine Arts is required to have:
 - a (i) completed the requirements for the award of either the Degree of Master of Fine Arts with First Class or Second Class Honours First Division at The University of Auckland
 - or
 - (ii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent
- and
- b demonstrated an ability to pursue doctoral level research in the field of Fine Arts.
- c A candidate for the Degree of Doctor of Fine Arts must have applied for admission and been admitted to The University of Auckland.

Duration

- 3 A candidate must complete the requirements for this degree within not less than three full-time years and not more than four full-time years, or their part-time equivalent, from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8 of these regulations.

Registration

- 4 a The Board of Graduate Studies, on the recommendation of the Head of Elam School of Fine Arts, is to determine whether the candidate may be registered and the date of registration.
- b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates.

Structure and Content

- 5 A student enrolled for this degree must pass FINEARTS 894 Studio (360 points).

Reviews of Progress

- 6 Reviews of progress and continuation of registration will be made according to Regulation 2 of the General Regulations for Named Doctorates.

Enrolment and Fees

- 7 Enrolment and fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration

- 8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Submission

- 9 a A candidate must apply to be examined, at the Graduate Centre, at least three months prior to the date on which the creative work will be available for examination. The application requires the approval of the Head of School and must include:
 - (i) a brief statement describing the creative work to be examined
 - and
 - (ii) a statement as to the availability of the work for examination.
 If a candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit to the Graduate Centre at this time the name of this person and a statement in writing as to the nature of the conflict of interest.
- b At least one month prior to the date of the oral examination, the candidate must submit three copies of the written documentation to the Graduate Centre. With the written permission of the main supervisor, this may be supported by other media such as photographic, audio and video recordings. The submission is to be accompanied by a statutory declaration, signed by the candidate, stating that the submission is the candidate's own work and that no part of the thesis has been submitted or accepted for any other degree or diploma.
- c The written documentation is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration.

Examination

- 10 The oral examination will take place during the period in which the creative work is being examined and on the site of that creative work. The examination process will otherwise follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2008, except that clauses 9g, 9h, 9k(ii), 9m, 9n, 9o(i) and 9q of the Statute for the Degree of Doctor of Philosophy 2008 will not apply, and:
- a Both of the examiners appointed under clause 9d of the Statute for the Degree of Doctor of Philosophy 2008 must be able to attend the examination.
 - b Each examiner will be provided with a copy of the written submission, and is to independently examine the creative work prior to the oral examination.
 - c The following procedure will apply to the oral examination, and replaces that of clause 9m of the Statute for the Degree of Doctor of Philosophy 2008:
 - (i) The Head of School (or nominee) will arrange this examination, to take place after the examiners have completed their independent examinations but during the period in which the creative work is available for examination and on or near the site of that work.
 - (ii) The Board of Graduate Studies, on the recommendation of the Head of School, will appoint a person to act as an independent chair of the oral examination. The chair must be a member of the academic staff of the University, but will not normally be a member of the faculty in which the candidate is registered.
 - (iii) The examination must be attended by the candidate, both examiners, the chair and the Head of School nominee on the Examination Committee.
 - d Acting independently, each examiner will provide the Graduate Centre, within two months of the date of the oral examination, with a written report in English on the quality of the thesis according to the criteria outlined in clause 1c above. The examiners will include with their reports one of the following recommendations:
 - (i) to award the degree
 - or
 - (ii) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only
 - or
 - (iii) not to award the degree.
 - e On successful completion of the examination the candidate must provide a substantial documentation of the thesis, approved by the Examination Committee. Three hardbound copies of the documentation must be deposited with the Graduate Centre. The degree will not be conferred until this requirement has been complied with.

Variations

- 11 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform with these regulations.

Appeals

- 12 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures

- 13 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

- 14 a These regulations came into force on 1 January 2006. The 2005 regulations for the Degree of Doctor of Fine Arts were thereby repealed.

The Degree of Doctor of Music – DMus

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including Academic Statutes and Regulations.

Admission

- 1 A candidate for this degree needs to apply through the Head of School of Music for registration and to:
 - a have completed the requirements for the Degree of Master of Music at The University of Auckland or an equivalent qualification approved by Senate or its representative
 - and*
 - b demonstrate adequate training and ability to follow a course of advanced study in musical composition.
- 2
 - a Senate or its representative, having received a recommendation from the Head of School of Music, is to determine whether the candidate is to be registered and the date and the conditions of registration.
 - b A recommendation is to include:
 - (i) the proposed date of the registration
 - (ii) the name of the supervisor or supervisors from the members of the academic staff
 - (iii) satisfactory evidence of the candidate's training and ability to follow the proposed programme.

Duration and Total Points Value

- 3
 - a A candidate for this degree must normally follow a programme of two full-time years from the date of registration and pass a course of advanced study in musical composition.
 - b After completing the initial two years of full-time study, a candidate may apply to Senate or its representative for permission to continue as a part-time student.
 - c In exceptional circumstances, Senate or its representative may permit a student who has held the accepted prerequisite qualification for over five years, to proceed directly to apply to be examined.

Structure and Content

- 4
 - a Each candidate is to complete a course of advanced study – MUSIC 894 Composition (360 points) – to the satisfaction of the supervisor or supervisors and the Head of School of Music.
 - b The supervisor is to submit a brief report to Senate or its representative on the progress of each candidate at the end of each year of study.
 - c Should such a report be unfavourable, Senate or its representative may terminate a candidate's enrolment in this degree.

Content of Examination

- 5
 - a A candidate is to submit for examination original and substantial work, consisting of not more than three pieces, each of which may be within any of the following classes:
 - (i) orchestral work
 - (ii) opera
 - (iii) work using vocal, keyboard or ensemble resources
 - (iv) presentation of Music Theatre
 - (v) electronic music.
 - b Electronic resources may be included in work within classes (i), (ii), (iii), or (iv) in Regulation 5a.
- 6 With the application to be examined, each candidate is also to submit:
 - a three copies of the work or works to be examined
 - and*
 - b a statutory declaration which:
 - (i) states the extent to which the work is the candidate's own and, in the case of joint work, identifies as clearly as possible which parts are the candidate's own
 - and*
 - (ii) states what portion, if any, of the work submitted has been previously presented for a degree or diploma of this or any other tertiary institution
 - and*
 - (iii) declares that the work, in substantially its present form, has not been previously accepted

for the award of a degree or diploma in this or any other tertiary institution and is not being submitted for a degree or diploma in any other tertiary institution.

Examination

- 7 A candidate is to apply in writing to the Graduate Centre to be examined for the degree within five years of initial enrolment. In exceptional circumstances, Senate or its representative may extend this period.
- 8 After the candidate's application to be examined has been accepted, Senate, on the recommendation of the Head of School of Music, is to appoint as examiners:
 - a the supervisor or supervisors
 - and
 - b one person who is to be a member of staff of another university in New Zealand
 - and
 - c one person who is resident outside New Zealand provided that Senate may, on the recommendation of the Head of School, appoint a further examiner and, in exceptional circumstances, two further examiners.
- 9 Each examiner is to:
 - a assess the submitted work
 - and
 - b report independently to Senate on the quality of the work
 - and
 - c recommend to Senate whether the Degree of Doctor of Music should be awarded.
- 10 Where the recommendation is that the degree should not be awarded, the Examiners may recommend that the candidate be permitted to resubmit the work at a later date.

Direct Examination

- 11 For a candidate who is eligible under Regulation 3c to apply to be examined directly, Senate, as soon as possible after the application is lodged, is to appoint a Moderator who is to:
 - a consider the work and submit to Senate, through the Registrar, a preliminary report, which is to indicate whether, in their opinion, the examination should proceed or whether the candidate should be advised to withdraw the application
 - and
 - b state the names of not fewer than two persons recommended as suitable examiners.
- 12 Senate is to consider the Moderator's report and decide whether to proceed with the examination.
- 13 Where it is agreed that the examination is to proceed:
 - a Senate is to appoint two independent external examiners of whom at least one is normally resident outside New Zealand, without being restricted to the persons recommended under Regulation 11b.
 - b Senate may appoint an additional examiner who may be a member of the teaching staff of The University of Auckland.
 - c the contents of the Moderator's report are not to be communicated to the examiners.
- 14 The duties of each examiner appointed under Regulation 13 are:
 - a to report independently on the quality of the work and its value as a significant contribution to learning
 - and
 - b to recommend whether or not the degree is to be awarded provided that, where the recommendation is that the degree is not to be awarded, the examiner may recommend that the candidate be permitted to resubmit the work with further published work at a later date. A resubmission has to be accompanied by a further full examination fee.
- 15 The reports are to be sent to the Graduate Centre who is to refer them to the Moderator.
- 16 The Moderator is to consider the reports of the Examiners and prepare a final report which, together with the reports of the Examiners, is to be placed before Senate which is to determine whether the Degree may be awarded.
- 17 If Senate has determined that the examination should not proceed or that the degree should not be awarded (under Regulation 14b), the student may not lodge a further application to be examined for a higher degree before five years or more has elapsed from the date of Senate's decision. If the examination is not to proceed the candidate is entitled to a refund of half of the fees paid.

Conflicting Examiners' Reports

- 18 Where only two Examiners have been appointed and their recommendations are conflicting, the

Moderator or the Head of School of Music, as appropriate, is to submit to Senate the name of a further person qualified to act as an Examiner. Senate is then to appoint the person so named or some other suitable person to be an additional Examiner who is to furnish an independent report in accordance with the provisions of Regulation 9 or Regulation 14. This report is to be considered by Senate together with the other reports.

Commencement

- 19 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Doctor of Music were thereby repealed.

The Degree of Doctor of Musical Arts – DMA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Preamble

- 1 A candidate for the degree of Doctor of Musical Arts is required to pursue an approved programme of advanced study and research as an enrolled student of the University.
- 2 The degree of Doctor of Musical Arts is awarded for the successful pursuit of a coherent programme of advanced performance work that is firmly supported by a written submission (the “Exegesis”) and carried out over the period of registration for the Degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies both the following criteria:
 - a the consistent exhibition of performance skills at the highest professional levels
 - and
 - b the provision of supporting documentation (the “Exegesis”) that makes an original contribution to the field of knowledge relating to Music Performance, and shows an ability to articulate critical judgment and performance theory, while demonstrating a knowledge of the literature relevant to the history and performing practice of the music contained in the candidate’s examinable programmes.
- 3 All research for the Exegesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

Eligibility

- 4 A candidate for the Degree of Doctor of Musical Arts is required to have:
 - a completed the requirements for the Degree of Master of Music of this University with First Class Honours or Second Class Honours First Division, unless an equivalent qualification is approved by Senate under the Admission Regulations
 - and
 - b demonstrated, to the satisfaction of the Head of the School of Music, in consultation with the School of Music Postgraduate Committee, the level of training and ability that is necessary for the pursuit of a programme of advanced study in music performance and research.

Admission

- 5 **Admission Essential**
Every candidate for the Degree of Doctor of Musical Arts must have applied for admission and have been admitted to The University of Auckland.

Duration and Total Points Value

- 6 A candidate enrolled for this degree must normally follow a programme of 36 full-time months (or the part-time equivalent) and pass an approved three-part programme of advanced study in music performance and research with a total value of 360 points.

Registration

- 7
 - a The Board of Graduate Studies, on the recommendation of the Dean of the Faculty of Creative Arts and Industries, is to determine whether the candidate may be registered and the date of registration.
 - b Conditions of registration will be determined in accordance with Clause 1 of the General Regulations for Named Doctorates.

Reviews of Progress

- 8 Reviews of progress and continuation of registration will be made according to Clause 2 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration

- 9 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Clause 4 of the General Regulations for Named Doctorates.

Structure and Content

- 10 a During the period of Registration a candidate will undertake a three-part programme of academic and practical research in performance, repertoire and pedagogy relating to the candidate's instrument or performance medium, and present a total of five public recitals each of approximately 90 minutes' duration, including, in Part III, the Final Recital.
- b The candidate's recitals must provide a balanced programme comprising solo and ensemble repertoire which must include music of historical significance, recognised virtuoso pieces, and works of a demanding contemporary nature. In every case except for the Final Recital, the candidate's proposed programme is to be approved by the performance supervisor and the Head of the School of Music at least three months before the recital date. The proposed programme for the Final Recital must be included in the candidate's Annual Report at the end of Part II. The proposed Final Recital programme may be changed with the approval of the performance supervisor and the Head of the School of Music six months before the recital date.

Part I

- c During Part I of the degree (normally comprising one year, or two years part-time) the candidate will present a minimum of one and a maximum of two recitals, as prescribed in 10b above.
- d Towards the end of Part I, the candidate will propose a topic for the Exegesis, which will relate to the candidate's performance interests or specialisation, and be approved by the supervisor and Head of Department of the School of Music.
- e The candidate's registration will be confirmed upon completion of Part I, in accordance with Clause 2 of the General Regulations for Named Doctorates.

Part II

- 11 a During Part II of the degree (normally comprising one year, or two years part-time) the candidate will continue to undertake supervised research in performance, and on the approved Exegesis topic.
- b To complete Part II, the candidate must present:
 - (i) a minimum of two and a maximum of three recitals, so that a total of four recitals has been presented for Parts I and II together
 - (ii) a seminar presentation on the Exegesis research, in consultation with the appropriate supervisor or supervisors.

Part III

- 12 During Part III of the degree, (normally comprising one year, or two years part-time) the candidate will complete and submit the Exegesis, and will present a Final Recital, with a programme that is linked to the Exegesis topic in such a way that the candidate's theoretical and aesthetic ideals are clearly articulated through both the musical performance and the written submission.
- 13 All performances except the Final Recital will be assessed by panels appointed by the Head of School of Music. The panels will consist of the Head of School of Music or nominee, an internal moderator and one external examiner of international expertise and distinction.

Submission

- 14 a Three months prior to the date of the Final Recital a candidate must apply in writing to be examined, through the Graduate Centre.
- b The application is to include details of the programme, as approved by the Head of School of Music, in accordance with Clause 10b. If a candidate has reason to believe that any person would be unsuitable to serve as an examiner on the grounds of conflict of interest, he or she may also submit to the Graduate Centre at this time the name of this person or persons and a statement in writing as to the nature of the conflict of interest.
- c Two months prior to the date of the Final Recital, the candidate must submit to the Graduate Centre three bound copies of the Exegesis, and a signed, statutory declaration, stating that the submission is the candidate's own work and that no part of the Exegesis has been submitted or accepted for any other degree or diploma. The Exegesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration.

Examination

- 15 a The final examination will take the Exegesis and the Final Recital into joint consideration, and will include an Oral Examination, which will normally be held on the day following the Final Recital.
- b The Exegesis will be examined by two external examiners of international expertise and distinction, both of whom will be appointed by the Board of Graduate Studies on the

- recommendation of the Head of the School of Music and one of whom will usually be resident overseas.
- c Each examiner will be provided with a copy of the Exegesis which is to be examined independently and reported on to the Board of Graduate Studies prior to the Final Recital, which both examiners must attend.
 - d In their assessment of the Exegesis, the examiners will indicate whether it is of an acceptable standard, either as it stands or subject to minor corrections; examiners may also indicate a provisional assessment, to be confirmed or otherwise at the time of the Final Recital and Oral Examination.
 - e The Final Recital will be examined by a panel that includes the two external examiners and an internal moderator, who must not have taken any role in any part of the supervision of the DMA, and is to be nominated by the Head of the School of Music. The recital is to be recorded in both sound (CD) and vision (DVD or video).
 - f The Board of Graduate Studies, on the recommendation of the Head of School of Music, will appoint a person to act as an independent chair of the Oral Examination. The chair must be a member of the academic staff of the University, but will not normally be a member of the faculty in which the candidate is registered.
 - g The Oral Examination must be attended by the candidate, both external examiners, the chair, and the internal moderator. This Examination, but not the examiners' discussion, must also be recorded in sound.

Examiners' Reports

- 16 a Within one month of the date of the Oral Examination, each examiner will submit to the Graduate Centre a written report in English on the quality of the whole examination performance, covering the Final Recital, Exegesis and the Oral Examination. The examiners will include with their reports one of the following recommendations:
 - (i) to award the degree
 - or
 - (ii) to permit the candidate to revise the Exegesis and resubmit it for examination on one further occasion only
 - and/or
 - (iii) to permit the candidate to repeat the Final Recital within a period of not less than six months and not more than 12 months
 - or
 - (iv) not to award the degree.
- b On completion of the examination the candidate must deposit three hardbound copies of the Exegesis and the audio and video recordings of the Final Recital with the Graduate Centre. The degree will not be conferred until this requirement has been complied with.

Dispute Resolution Procedures

- 17 Where there is a dispute among the examiners, the Head of the School of Music is to submit to the Board of Graduate Studies the name of a further person qualified to act as an examiner. The Board of Graduate Studies is then to appoint the person so named or some other suitable person to be an additional examiner who is to furnish an independent report based on the recording of the recital and/or on the Exegesis in accordance with the provisions of Regulation 15e. This report is to be considered by the Board of Graduate Studies together with the other reports. All other matters of dispute are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Appeals

- 18 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Clause 5 of the General Regulations for Named Doctorates.

Transitional Arrangements

- 19 a This statute came into force on 1 January 2007 and revokes the previous regulations for the Degree of Doctor of Musical Arts.
- b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this Statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled.

- 10 a If the behaviour of a student in a learning or practice environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.
- b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any practice placement pending the outcome of the inquiry.
- c A student whose enrolment is terminated under Regulation 10a may appeal from that decision to the Council or its duly appointed delegate.

Variations

- 11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 12 These regulations came into force on 1 January 2007 for all students enrolling for this degree for the first time. The 2001 regulations for the Degree of Bachelor of Social Work offered by the former Auckland College of Education were thereby repealed except for those former students of the Auckland College of Education who have been studying continuously for this degree for whom the regulations will be repealed on 1 December 2011.

The Degree of Doctor of Education – EdD

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble

- 1
 - a A candidate for the degree of Doctor of Education is required to pursue an approved programme of advanced study and research as an enrolled student of the University.
 - b It is expected that this programme will usually be completed within four to six years from the date of registration.
 - c The Degree of Doctor of Education is awarded for a formal and systematic exposition of a coherent programme of advanced research work carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
 - (i) to be an original contribution to scholarship relating to professional practice in the field of Education
 - and*
 - (ii) to meet internationally recognised standards for such work
 - and*
 - (iii) to demonstrate a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it
 - and*
 - (iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.
 - d All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.
 - e Doctor of Education theses may not exceed 100,000 words or 250 pages in total without the permission of the Board of Graduate Studies.

Eligibility

- 2 A candidate for the Degree of Doctor of Education is required to have:
 - a
 - (i) completed the requirements for the award of either the Degree of Master of Education or the Degree of Master of Arts in Education with First Class or Second Class (First Division) Honours at The University of Auckland
 - or*
 - (ii) completed the requirements for the award of either the Degree of Bachelor of Education (Teaching) (Honours) or the Degree of Bachelor of Arts (Honours) in Education with First Class or Second Class (First Division) Honours at The University of Auckland
 - or*
 - (iii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to one of the prerequisite qualifications specified in Clause 2a(i) and (ii)
 - and*
 - b demonstrated an ability to pursue doctoral level research in the field of Education

and

- c had at least five years' experience in education or in an area considered comparable by the Board of Graduate Studies.

Admission

3 Admission Essential

Every candidate for the degree of Doctor of Education must have applied for admission and been admitted to The University of Auckland.

Duration and Total Points Value

- 4 a A candidate enrolled for this degree must follow an approved two-part programme with a total value of 360 points.
- b Candidates must complete the requirements for Part I within two successive part-time years, unless permitted to do otherwise by the Board of Graduate Studies under Clause 9.
- c After completing Part I candidates must complete the requirements for Part II within two full-time or four part-time years, unless permitted to do otherwise by the Board of Graduate Studies under Clause 9.

Registration

- 5 a The Board of Graduate Studies, on the recommendation of the Dean of Faculty of Education, is to determine whether the candidate may be registered and the date of registration.
- b Conditions of registration will be determined in accordance with Clause 1 of the General Regulations for Named Doctorates.

Structure and Content

- 6 a A candidate enrolled for this degree must pass Parts I and II as follows:
 - (i) Part I: 120 points from EDPROFST 844 Research Portfolio
 - (ii) Part II: 240 points from EDPROFST 897 Thesis.
- b A candidate must complete the requirements of Part I before commencing Part II.

Reviews of Progress

- 7 a At the end of Part I the Dean of Faculty of Education will submit, through the Associate Dean (Postgraduate) of the Faculty, a report to the Board of Graduate Studies on the candidate's progress and containing a recommendation as to whether or not the candidate should be permitted to proceed to Part II.
- b During Part II, reviews of progress and continuation of registration will be made in accordance with Clause 2 of the General Regulations for Named Doctorates.

Enrolment and Fees

- 8 Enrolment and payment of fees will be determined according to Clause 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration

- 9 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Clause 4 of the General Regulations for Named Doctorates.

Submissions

- 10 a **Copies of Thesis**
All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.
- b **Notification of Submission**
One month prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.
- c **Declaration as to Originality**
The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate's own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma.
- d **Language of Thesis**
The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examinations

- 11 The examination process will follow that of Clause 9 of the Statute for the Degree of Doctor of Philosophy, except that:
 - a examiners will be requested to assess the thesis according to the criteria of Clause 1(c) of these regulations
 - and
 - b the Board of Graduate Studies will normally appoint the Doctor of Education Advisor as the Head of Department nominee on the Examination Committee (and who will participate in the Oral Examination), as described in the Degree of Doctor of Philosophy Statute, for all Doctor of Education examinations.

Variations

- 12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform with these regulations.

Appeals

- 13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Clause 5 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures

- 14 a Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

- 15 a These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Doctor of Education were thereby repealed.
- b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

Diploma of Teaching (Early Childhood Education) – DipTchg(ECE)

The regulations for this diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

In order to satisfy the requirements of this diploma, students are required to be in various teaching environments which will bring them into contact with children. Only persons able to meet the criteria for provisional registration of the New Zealand Teachers Council will be permitted to enrol in this diploma.

Admission

- 1 To be admitted to this programme a student must:
 - a meet University entry criteria
 - and
 - b have demonstrated the potential to meet the New Zealand Teachers Council criteria for provisional registration. Personal references and an interview will normally be required.
- 2 Students holding a qualification gained at an overseas institution may be required to provide evidence of language proficiency prior to admission into this programme.
Note: The applicant will be required to consent to disclosure of criminal convictions as part of the application process consistent with the requirements for provisional registration of the New Zealand Teachers Council.
- 3 Admission to this programme is at the discretion of Senate or its representative.

Duration and Total Points Value

- 4 A student enrolled for this diploma must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

- 5 Of the 360 points required for this diploma, a student must pass:
 - either
 - a (i) at least 345 points from the Core Courses listed in the Diploma of Teaching (Early Childhood Education) Schedule
 - and
 - (ii) 15 points from courses offered in the General Education Schedule approved for this diploma

or

- b (i) at least 345 points from the specialisation listed in the Diploma of Teaching (Early Childhood Education) Schedule

and

- (ii) 15 points from courses offered in the General Education Schedule approved for this diploma.

General Education Exemptions

- 6 a A student is exempted from the requirement to pass courses offered in the General Education Schedule who has:
either
 - (i) completed an undergraduate diploma at a tertiary institution
 - or
 - (ii) commenced study for this diploma at a tertiary institution before 1 January 2006
 - or

Note 1: A student wishing to enrol in a thesis or research portfolio for the Master of Education following the award of this postgraduate diploma should note that passing of 30 points of approved research methodology courses will be required.

Note 2: A student wishing to enrol in the Master of Educational Management is advised to include EDPFST 738 and 757 in the postgraduate diploma.

Postgraduate Diploma in Education (Teaching) – PGDipEd(Tchg)

The regulations for this postgraduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have completed the requirements for:
either
 - a the Degree of Bachelor of Education (Teaching)
 - or*
 - b an equivalent qualification recognised for teacher registration in New Zealand as approved by Senate or its representative.
- 2 A student who has not completed the requirements for the Degree of Bachelor of Education (Teaching) but who has:
 - a passed courses with a total value of at least 345 points for that degree
 - and*
 - b passed the prerequisites for the required courses
 may, with the approval of the Dean of Faculty of Education, enrol for this postgraduate diploma. The remaining points for the Degree of Bachelor of Education (Teaching) must be passed within the first semester of enrolment for the Postgraduate Diploma in Education (Teaching). The Postgraduate Diploma in Education (Teaching) will not be awarded until the requirements for the Degree of Bachelor of Education (Teaching) have been completed.
- 3 Admission to the programme requires the approval of Senate or its representative.
Note: Admission to and completion of this programme does not meet New Zealand teacher registration requirements and does not constitute a pre-service teaching qualification.

Duration and Total Points Value

- 4 A student enrolled for this postgraduate diploma must:
 - a pass courses with a total value of 120 points
 - and*
 - b complete within the time limit specified in the General Regulations – Postgraduate Diplomas.
- 5 The total enrolment for this postgraduate diploma must not exceed 160 points.

Structure and Content

- 6 A student enrolled for this postgraduate diploma must pass 120 points from courses listed in the Postgraduate Diploma in Education (Teaching) Schedule.
- 7 With the approval of all Heads of Departments concerned, up to 30 points may be selected from other 700 level courses offered at this University.
- 8 The programme for each student requires the approval of the Dean of Faculty of Education prior to enrolment.

Distinction

- 9 This postgraduate diploma may be awarded with Distinction or Merit as specified in the General Regulations – Postgraduate Diplomas.

Variations

- 10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 11 These regulations came into force on 1 January 2006.

Postgraduate Diploma in Education (Teaching) (PGDipEd(Tchg)) Schedule

Requirement:

- 120 points from EDPFST 704–708, 710, 711, 714, 715, 717–727, 729–731, 737, 751–756, 760, 761, 763–765, 767, 769, 773, 775–777, 779, 782, EDUC 702

Postgraduate Diploma in Professional Supervision – PGDipProfSup

The regulations for this postgraduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to:
 - a have completed the requirements for a Bachelors degree approved by Senate or its representative
and
 - b be currently employed in health, counselling, social or human services or other appropriate professional context
and
 - c have at least three years relevant professional experience.
- 2 A student who has completed the requirements for the Postgraduate Certificate in Professional Supervision, or its equivalent, may on the recommendation of the relevant Head of Programme, and with the approval of Senate or its representative, credit to this Postgraduate Diploma in Professional Supervision, the courses passed for the Postgraduate Certificate in Professional Supervision.
- 3 Admission to this programme requires the approval of the Dean of Faculty of Education.

Duration and Total Points Value

- 4 A student enrolled for this postgraduate diploma must:
 - a pass courses with a total value of 120 points
and
 - b complete within the time limit specified in the General Regulations – Postgraduate Diplomas.
- 5 The total enrolment for this postgraduate diploma must not exceed 160 points.

Structure and Content

- 6 A student enrolled for this postgraduate diploma must pass:
 - a at least 120 points from courses listed in the Postgraduate Diploma in Professional Supervision Schedule
or
 - b (i) at least 90 points from courses listed in the Postgraduate Diploma in Professional Supervision Schedule
and
(ii) up to 30 points from other postgraduate courses as approved by Senate or its representative.
- 7 The programme for each student requires the approval of Senate or its representative.

Distinction

- 8 This postgraduate diploma may be awarded with Distinction or Merit as specified in the General Regulations – Postgraduate Diplomas.

Variations

- 9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 10 These regulations came into force on 1 January 2008.

REGULATIONS – ENGINEERING

The Degree of Bachelor of Engineering – BE

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Degree Requirements

- 1 Students who enrol for the degree of Bachelor of Engineering (Honours) may be awarded the degree of Bachelor of Engineering if, having passed all courses and completed all other requirements for a BE(Hons), their performance in the courses is deemed by the Dean of Engineering to be not of Honours standard.

Note: Honours standard will normally imply completion of all courses in the minimum time and with a weighted grade point average exceeding a minimum set by the University.

The Degree of Bachelor of Engineering (Honours) – BE(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

- 1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.
- 2 Students with high Grade Point Equivalent scores may be invited to complete the full requirements of the Degree of Bachelor of Engineering (Honours) over three years. Students will complete all courses in all Parts of the chosen specialisation except that some courses from Part I may be replaced by approved alternative courses.

Structure and Content

- 3 Of the 480 points required for this degree, a student must pass:
 - a 120 points: Part I as listed in the Bachelor of Engineering (Honours) Schedule including 15 points from courses offered in the General Education Schedule approved for the degree.
 - b 360 points from Parts II, III and IV for one of the areas of specialisation listed in the Bachelor of Engineering (Honours) Schedule.
- 4
 - a A student will not normally be permitted to enrol for Part II unless Part I has been completed, or to enrol for Part III unless Part II has been completed, or to enrol for Part IV unless Part III has been completed.
 - b However, a student who has failed to pass one of those Parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.
 - c Only in exceptional circumstances will a student be permitted to enrol for Part III unless Part I has been completed, or to enrol for Part IV unless Part II has been completed.

General Education Exemptions

- 5
 - a A student is exempted from the requirement to pass courses offered in the General Education Schedule who has:

either

 - (i) completed an undergraduate degree at a tertiary institution
 - or*
 - (ii) commenced study for this degree at a tertiary institution before 1 January 2006
 - or*
 - (iii) been admitted to this degree with credit from another tertiary institution of 120 points or more
 - or*
 - (iv) been admitted to this degree with credit from another tertiary institution for the entire Part I of this degree.

Conjoint Degrees

- 6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this *Calendar*.

Practical Requirements

- 7 a A student enrolled for this degree must carry out satisfactorily such practical work in ENGGEN 299 and ENGGEN 499, field trips and laboratory requirements, as prescribed by the Faculty of Engineering.
- b A student will not be considered to have completed the requirements for this degree unless Academic Services has received from the Dean of Faculty of Engineering confirmation that the student has complied with the requirements of Regulation 7a.

English Language Requirements

- 8 a A student enrolled for this degree must demonstrate competence in the English language, in ENGGEN 199, as prescribed by the Faculty of Engineering.
- b A student will not be considered to have completed the requirements for this degree unless Academic Services has received from the Dean of Faculty of Engineering confirmation that the student has complied with the requirements of Regulation 8a.

Honours

- 9 The Bachelor of Engineering (Honours) may be awarded with First Class Honours or with Second Class Honours in either First Division or Second Division. The class of honours shall be determined by the student's weighted average grade over Parts III and IV. Students who have passed all courses and completed all other requirements for a BE(Hons) but whose performance in the courses is deemed by the Dean of Engineering to be not of Honours standard will be awarded the degree of Bachelor of Engineering.

Variations

- 10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 11 These regulations came into force on 1 January 2008. The 2000 regulations for the Degree of Bachelor of Engineering were thereby repealed.

The Degree of Master of Engineering – ME

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - either
 - a completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) at a level deemed satisfactory by the Dean of Faculty of Engineering
 - or
 - b (i) completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours)
 - and
 - (ii) at the completion of one semester, passed 60 points in courses above Part III, of which at least 30 points must be above Part IV and have an average grade of B or higher, in either the Degree of Master of Engineering Studies, Graduate Diploma in Engineering or the Graduate Diploma in Engineering (Transportation)
 - or
 - c (i) completed the requirements for an equivalent degree qualification as approved by Senate or its representative at a level deemed satisfactory by the Dean of Faculty of Engineering
 - and
 - (ii) demonstrated competency in the English language to the satisfaction of the Dean of Faculty of Engineering.

- 2 In exceptional circumstances Senate or its representative may approve admission of a student whose average grade is less than B, or waive any other prerequisites.

Duration and Total Points Value

- 3 A student enrolled for this degree must:
- a pass a thesis with a total value of 120 points
 - and
 - b complete within the time limit specified in the General Regulations – Masters Degrees.

Structure and Content

4 Research Masters

A student enrolled for this degree must complete a 120 point thesis, based on research in one of the areas listed in the Master of Engineering Schedule.

Thesis

- 5
- a The thesis is to be carried out under the guidance of a supervisor appointed by Senate or its representative.
 - b The thesis is to embody the results obtained by the student in an investigation on a topic approved by the Head of Department prior to enrolment.
 - c The investigation is to be carried out by the student at the University under the direct supervision of a member of the academic staff, provided that:
 - (i) laboratory work may be carried out in an approved institution outside the University for such limited period or periods as Senate or its representative may determine
 - (ii) field work may be carried out at such places and for such periods as Senate or its representative may determine.
 - d The supervisor is to be the principal examiner.
 - e At the discretion of the Head of Department the candidate may be required to attend an oral examination.
 - f The thesis is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Variations

- 6 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

- 7 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement

- 8 These regulations came into force on 1 January 2006. The 2002 regulations for the Degree of Master of Engineering were thereby repealed.

Master of Engineering (ME) Schedule

The Degree of Master of Engineering Management – MEMgt

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
- either
 - a completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours)
 - or

- b completed the requirements for an equivalent degree qualification as approved by Senate or its representative
- and
- c achieved grades deemed satisfactory by the Dean of Faculty of Engineering.

Duration and Total Points Value

- 2 A student enrolled for this degree must:
 - a pass courses with a total value of 120 points
 - and
 - b complete within the time limit specified in the General Regulations – Masters Degrees.
- 3 The total enrolment for this degree must not exceed 160 points.

Structure and Content

- 4 Of the 120 points required for this degree, a student must pass:
 - a 30 points from the Master of Engineering Management Core Courses Schedule
 - and
 - b at least 30 points and up to 60 points from the Elective A Courses listed in the Master of Engineering Management Schedule
 - and
 - c at least 30 points and up to 60 points from the Elective B Courses listed in the Master of Engineering Management Schedule.

Project Work

- 5 a A full-time student must submit a research paper for ENGGEN 763 and a report for ENGGEN 764 no later than two semesters after the initial enrolment in the Master of Engineering Management degree.
- b In exceptional circumstances Senate or its representative may extend this period.

Variations

- 6 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

- 7 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement

- 8 These regulations came into force on 1 January 2006. The 1997 regulations for the Degree of Master of Engineering Management were thereby repealed.

Master of Engineering Management (MEMgt) Schedule

Core Courses:

- 30 points: ENGGEN 763, 764

Elective A Courses:

- at least 30 points and up to 60 points from CIVIL 703, 704, 765, MECHENG 751–761

Elective B Courses:

- at least 30 points and up to 60 points from BUSADMIN 761, 762, 764, 766

The Degree of Master of Engineering Studies – MEngSt

The regulations for this degree are to be read in conjunction with all other relevant regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - either
 - a completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) at a level deemed satisfactory by the Dean of Faculty of Engineering
 - or
 - b (i) completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours)
 - and
 - (ii) at the completion of one semester, passed 60 points in courses above Stage III, of which at least 15 points must be above Part IV, for the Graduate Diploma in Engineering or for the Graduate Diploma in Engineering (Transportation) with an average grade of B or higher

or

- c for admission to one of the specialisations
- (i) completed the requirements for an approved Bachelors degree at a level deemed satisfactory by the Dean of Faculty of Engineering
- and
- (ii) have at least three years' relevant work experience.

- 2 For entry to the Geotechnical Engineering specialisation a student must have passed CIVIL 324 or its equivalent.
- 3 In exceptional circumstances Senate or its representative may approve admission of a student whose average grade is less than B, or waive any other prerequisites.

Duration and Total Points Value

- 4 A student enrolled for this degree must:
 - a pass courses with a total value of 120 points
 and
 - b complete within the time limit specified in the General Regulations – Masters Degrees.
- 5 The total enrolment for this degree must not exceed 160 points.

Structure and Content

- 6 A student enrolled for this degree must pass at least 120 points from either the General Option or one of the Specialisations listed in the Master of Engineering Studies Schedule.
- 7 The programme for each student requires the approval of the relevant Head of Department prior to enrolment.

Transfer from Postgraduate Certificate in Light Metals Reduction Technology

- 8 A student who has passed for a Postgraduate Certificate in Light Metals Reduction Technology courses that are available for the Light Metals Reduction Technology specialisation and is admitted to that specialisation for this degree, may reassign those courses to the degree provided that the Postgraduate Certificate in Light Metals Reduction Technology has not been awarded.

Transfer from Postgraduate Certificate in Engineering

- 9 A student who has passed courses for a specialisation in a Postgraduate Certificate in Engineering, and is admitted to that specialisation for the degree of Master of Engineering Studies, may reassign those courses to this degree provided that the Postgraduate Certificate in Engineering has not been awarded.

Variations

- 10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

- 11 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement

- 12 These regulations came into force on 1 January 2010. The 2006 regulations for the Degree of Master of Engineering Studies were thereby repealed.

Graduate Diploma in Engineering – GradDipEng

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - a *either*
 - (i) completed the requirements for any Bachelors degree approved by Senate or its representative
 - or*
 - (ii) received a professional qualification in Engineering approved by Senate or its representative
 - or*
 - (iii) attained an equivalent level of practical experience in the engineering profession as approved by Senate or its representative
 - or*
 - b attained a level of technical competence in Engineering equivalent to at least Parts I and II of the Degree of Bachelor of Engineering (Honours), as may be approved by the Dean of Faculty of Engineering.

Duration and Total Points Value

- 2 A student enrolled for this graduate diploma must follow a programme equivalent to two full-time semesters and pass courses with a total value of 120 points.

Structure and Content

- 3 Of the 120 points required for this graduate diploma, a student must pass:
 - a at least 45 points from courses, excluding Project courses, listed in the Master of Engineering Studies Schedule.
 - b up to 75 points from:

- (i) courses, excluding Project courses, listed for Parts III and IV in the Bachelor of Engineering (Honours) Schedule
- (ii) courses listed in the Graduate Diploma in Engineering Schedule
- (iii) up to 30 points from courses listed for Parts I and II in the Bachelor of Engineering (Honours) Schedule, with the specific approval of the Dean of Faculty of Engineering.

4 The programme for each student requires the approval of the Dean of Faculty of Engineering.

Variations

- 5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 6 These regulations came into force on 1 January 2006. The 2004 regulations for the Graduate Diploma in Engineering were thereby repealed.

- at least 15 points from CIVIL 770, 771
- at least 30 points from CIVIL 760–769, 772–775

- up to 15 points undertaking case studies from ENGGEN 601, 602
- With the approval of the Dean of Faculty of Engineering, up to 45 points may be taken from appropriate 600 or 700 level courses offered at this or another university
-

Postgraduate Certificate in Engineering – PGCertEng

The regulations for this postgraduate certificate are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - either*
 - a completed the requirements for the Degree of Bachelor of Engineering or Degree of Bachelor of Engineering (Honours) at a level deemed satisfactory by the Dean of Faculty of Engineering
 - or*
 - b completed the requirements for an equivalent degree qualification in Engineering, as approved by Senate or its representative
 - or*
 - c completed the requirements for an approved Bachelors degree relevant to the chosen specialisation at a level deemed satisfactory by the Dean of Faculty of Engineering
 - or*
 - d completed the requirements for an equivalent degree qualification as approved by Senate or its representative.
- 2 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirement, but who has attained an equivalent qualification or professional experience in the engineering profession.

Duration and Total Points Value

- 3 A student enrolled for this postgraduate certificate must:
 - a pass courses with a total value of 60 points
 - and*
 - b complete within the time limit specified in the General Regulations – Postgraduate Certificates.
- 4 The total enrolment for this postgraduate certificate must not exceed 80 points.

Structure and Content

- 5 A student enrolled for this postgraduate certificate must pass 60 points from one of the specialisations listed in the Postgraduate Certificate in Engineering Schedule.

Variations

Duration and Total Points Value

- 1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

- 2 Of the 480 points required for this degree, a student must pass:
 - a 465 points: Part I, including LAW 121G, and Parts, II, III and IV as listed in the Bachelor of Laws Schedule
 - and*
 - b 15 points from courses listed in the General Education Schedules approved for this degree.
- 3
 - a Except as permitted under Regulation 7, a student may not enrol for Part II unless Part I has been completed.
 - b Each student must pass Parts II, III and IV in the order set out in the Bachelor of Laws Schedule unless approval to vary the order is given by the Dean of Faculty of Law.

General Education Exemptions

- 4 A student is exempted from the requirement to pass courses offered in the General Education Schedule who has:

either

 - a completed an undergraduate degree at a tertiary institution
 - or*
 - b commenced study for this degree at a tertiary institution before 1 January 2006
 - or*
 - c been admitted to this degree with credit from another tertiary institution of 120 points or more.

Written Work and Practical Requirements

- 5 In order to complete the requirements of LAW 400 under Regulation 2 above, a student must carry out such legal research assignments and practical application of the law as the Faculty of Law may require.

Conjoint Degrees

- 6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this *Calendar*.

Graduate Admission

- 7 A student who is a graduate or graduand of any university in New Zealand, or who is granted admission *ad eundem statum* with graduate status under the Admission Regulations, may be granted credit of up to 90 points towards LLB Part I. Such a student will normally be required to pass satisfactorily LAW 121G and 131 before applying for admission to LLB Part II.

Note:

- (i) Admission to Part II will be subject to selection, according to the approved selection criteria.
- (ii) In exceptional circumstances the Dean of Faculty of Law may permit a graduate or graduand to be admitted directly to LLB Part II without having passed LAW 121G and 131, provided that the applicant has demonstrated to the satisfaction of the Dean an aptitude for legal studies, and provided that LAW 121G and 131 are taken concurrently with the Part II course(s).

Courses in Other Faculties

- 8
 - a In place of elective Law courses totalling not more than 45 points for this degree, a student may take courses at Stage II or above offered for other programmes at this University, if they are related to the student's Law studies and approved by the Dean of Faculty of Law.
 - b While approval of such courses is normally given before enrolment, the Dean of Faculty of Law may in special cases apply this provision to courses previously passed for another programme. Where the Dean approves such courses, they are to be reassigned from that other programme to this degree.

Research Papers

- 9 a With the prior approval of the Dean of Faculty of Law, a student enrolled for this degree may elect to present a research paper in lieu of the examination in not more than one elective course for the degree, if the teacher in that course has certified that the research paper is relevant to the subject matter of the elective course.
- b This regulation applies also to a student taking any elective Law course or courses for any degree other than this, or for any diploma or for a Certificate or Certificates of Proficiency.

Variations

- 10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 11 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Laws were thereby repealed.

Bachelor of Laws (LLB) Schedule

Requirement:

Part I

120 points including:

- 15 points: LAW 121G
- 15 points: LAW 131

and either

- 90 points from courses prescribed for one other undergraduate degree programme at this University
- or
- 75 points from courses prescribed for one other undergraduate degree programme at this University
- and
- 15 points from courses listed in the General Education Schedules available for the non-Law degree or the conjoint degree

Notes:

- (i) a student enrolling in LLB Part I will, in respect of the courses other than LAW 121G and 131, be required to enrol in the degree of The University of Auckland for which such courses are prescribed or available.
- (ii) a student who is required to take 15 points from courses in General Education (other than LAW 121G) and who does not take these points

in Part I, will need to fulfil this requirement concurrently with Parts II–IV. In this case the points will be additional to the requirements of Parts II–IV.

Part II

- 120 points: LAW 201, 211, 231, 241, 299

Part III

- 65 points: LAW 301, 306, 316, 399
- at least 55 points from elective law courses chosen from LAW 401–456, 458–498, COMLAW 303, 304

Part IV

- 10 points: LAW 400 Legal Research 3
- at least 110 points from elective law courses chosen from LAW 401–456, 458–498, COMLAW 303, 304

or

- LAW 499 Legal Practice
- at least 120 points from elective law courses chosen from LAW 401–456, 458–498, COMLAW 303, 304

Note: Only students admitted to LLB Part II before 2009 have the option of taking LAW 499, and must complete this course before 31/12/2011. Thereafter, all students must include LAW 400.

The Degree of Bachelor of Laws (Honours) – LLB(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 a No student on whom the Degree of Bachelor of Laws has already been conferred may enrol for this degree.
- b At the discretion of the Dean of Faculty of Law, a student who has completed Parts I and II for the Degree of Bachelor of Laws may be permitted to enrol for this degree.
- c Where the Faculty of Law approves enrolment for the Degree of Bachelor of Laws (Honours) the courses previously passed for the Degree of Bachelor of Laws will be reassigned to the Degree of Bachelor of Laws (Honours).

Duration and Total Points Value

- 2 A student enrolled for this degree must pass courses with a total value of 540 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

- 3 Of the 540 points required for this degree, a student must pass:
 - a 480 points from the Degree of Bachelor of Laws Schedule
 - and
 - b 60 points from courses listed in the Bachelor of Laws (Honours) Schedule.
- 4 All the provisions and requirements of the Degree of Bachelor of Laws apply also to a student enrolled

for this degree, including the provisions concerning written work and practical requirements, courses in other faculties and research papers, and the General Education requirements.

Conjoint Degrees

- 5 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination for which the specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this *Calendar*.

Dissertation

- 6
- a The dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the Dean of Faculty of Law.
 - b The dissertation topic must be approved by the Dean of Faculty of Law prior to enrolment.
 - c A student must enrol for the dissertation in the semester following completion of Part IV of the schedule for the Degree of Bachelor of Laws.
 - d The dissertation must be completed and submitted by the last day of lectures in the semester of enrolment.
 - e In exceptional circumstances beyond the student's control, Senate or its representative may approve a limited extension of time, not exceeding two months, for the completion of the dissertation. Where an extension of time is approved, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student's current enrolment period in the course has ended.

Award of Honours

- 7 This degree will be awarded only where a student's work throughout the entire programme, inclusive of the courses required for the Degree of Bachelor of Laws, is of a sufficiently high standard, as determined by the Faculty of Law. In assessing the standard of a student's work in this programme, the courses taught by other faculties that are taken as part of Part I will not be taken into account.

Withdrawal from Honours

- 8 A student whose work does not satisfy the standard specified in Regulation 7, or who at any time chooses to withdraw from Honours, may transfer from the Degree of Bachelor of Laws (Honours) to the Degree of Bachelor of Laws. In that case the courses already passed for, or credited to, the Degree of Bachelor of Laws (Honours) may be reassigned to the Degree of Bachelor of Laws, except for any dissertation taken under Regulation 3b.

Variations

- 9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 10 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Laws (Honours) were thereby repealed.

The Degree of Doctor of Medicine – MD

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble

- 1
 - a A candidate for the Degree of Doctor of Medicine is required to pursue an approved programme of advanced study and research as an enrolled student of the University.
 - b It is expected that this programme will usually be completed within three to four years of equivalent full-time candidature. Part-time candidature may also be permitted.
 - c The Degree of Doctor of Medicine is awarded for a formal and systematic exposition of a coherent programme of advanced research work in any branch of medicine or medical science presented in a thesis which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
 - (i) to be an original contribution to any branch of medicine or medical science
and
 - (ii) to meet internationally recognised standards for such work
and
 - (iii) to demonstrate a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it
and
 - (iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.
 - d A Doctor of Medicine thesis may not exceed 100,000 words in total without the permission of the Board of Graduate Studies.
 - e A candidate may include within the thesis, accounts of original studies (which may have been published) carried out by them prior to registration. In such cases these studies and any associated publications must be fully integrated into the text of the thesis. Any previously published or unpublished research outputs referred to in the thesis must be listed in the bibliography.
 - f All material which is not the original work of the author of the thesis must
 - (i) be fully and appropriately attributed
or
 - (ii) if a substantial part of another work, only be reproduced with the written permission of the copyright owner of the other work.
 - g All research for the thesis is to be conducted in a manner consistent with The University of Auckland Guidelines for the Conduct of Research.

Eligibility

- 2 A candidate for the Degree of Doctor of Medicine is required to have:
 - a
 - (i) completed the requirements for the award of the Degree of Bachelor of Medicine and Bachelor of Surgery at The University of Auckland
or
 - (ii) completed the requirements for the award of a medical qualification that the Board of Graduate Studies considers to be equivalent to the prerequisite qualification specified in clause a(i) of this regulation
 - and
 - b demonstrated an ability to pursue doctoral level research in the field of medicine or medical science
and
 - c following the completion of their medical qualification, normally had at least five years of experience in medical practice or in an area considered comparable by the Board of Graduate Studies
and
 - d applied for admission and been admitted to The University of Auckland.

Duration

- 3
 - a A candidate will normally be required to complete the requirements for the degree within not less than three full-time years and not more than four full-time years, or the part-time equivalent, from the date of registration unless permitted to do otherwise by the Board of Graduate Studies.
 - b A candidate who draws upon original studies completed prior to registration may, with the permission of the Board of Graduate Studies, complete the requirements for the degree in less

than three years. The minimum time for completion will be confirmed at the time at which the candidate is registered for the degree and will not be less than one year.

Registration

- 4 a The Board of Graduate Studies, on the recommendation of the Head of Department in the discipline in which the candidate is to be primarily registered, is to determine whether the candidate may be registered and the date of registration.
- b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates.

Structure and Content

- 5 A candidate enrolled for this degree must pass MEDSCI 896 Thesis.

Reviews of Progress

- 6 Reviews of progress and continuation of registration will be made according to Regulation 2 of the General Regulations for Named Doctorates (2004).

Enrolment and Fees

- 7 Enrolment and payment of fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates (2004).

Changes to the Conditions of Registration

- 8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates (2004).

Submission

- 9 a A candidate is initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.
- b Three months prior to the expected date of submission, a candidate should notify the School of Graduate Studies in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the School of Graduate Studies.
- c The thesis is to be accompanied by a statutory declaration, signed by the candidate, which:
 - (i) states the extent to which the work is the candidate's own and, in the case of joint work, identifies as clearly as possible which parts are the candidate's own;
 - (ii) states what portion, if any, of the work submitted has been previously presented for a degree or diploma of this or any other tertiary institution;
 - (iii) declares that the work, in substantially its present form, has not been previously accepted for the award of a degree or diploma in this or any other tertiary institution and is not being submitted for a degree or diploma in any other tertiary institution.
- e The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

- 10 The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy (2008), except that:
 - a examiners will be requested to assess the thesis according to the criteria of clause 1(c) of these regulations
 and
 - b an Oral Examination will be held only on the recommendation of the Doctor of Medicine Examination Committee
 and
 - c the Board of Graduate Studies will appoint a Doctor of Medicine Examination Committee consisting of the Associate Dean (Postgraduate) of the Faculty of Medical and Health Sciences as Chair, the Head of Department, the Dean of the Faculty of Medical and Health Sciences, or nominee, and the Head of the School of Medicine, or nominee, for all Doctor of Medicine examinations.
 - d
 - (i) On successful completion of the examination, candidates who first registered in a Doctor of Medicine programme prior to 1 January 2009 will be required to deposit either, three hardbound copies of the thesis or, two hardbound copies and one digital copy of the thesis, corrected as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.
 - (ii) On successful completion of the examination, candidates who first registered in a Doctor of Medicine programme on or after 1 January 2009 will be required to deposit two hardbound copies of the thesis and one digital copy, corrected as may be required, with the Graduate

Centre. The degree will not be conferred until the candidate has complied with this requirement.

- (iii) When two hardbound copies and a digital copy of the thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.
- e (i) The digital thesis deposited shall be formatted as specified in the Guidelines on Formatting and Submitting a Digital Thesis at The University of Auckland.
- (ii) A thesis, which is deposited in digital form, will be accessible through the University's digital repository, unless embargoed under clause 24 of the Examination Regulations.

Variations

- 11 In exceptional circumstances the Board of Graduate Studies may approve a programme which does not conform to these regulations.

Appeals

- 12 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates (2004).

Dispute Resolution Procedures

- 13 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

- 14 a These regulations came into force on 1 January 2009. The 1996 regulations for the Degree of Doctor of Medicine were thereby repealed.
- b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

The Degree of Doctor of Pharmacy – DPharm

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble

- 1 a Candidates for the Degree of Doctor of Pharmacy are required to pursue an approved programme of advanced study and research as enrolled students of the University.
- b It is expected that this programme will normally be completed within four years.
- c The Degree of Doctor of Pharmacy is awarded for a formal and systematic exposition of a coherent programme of advanced research work carried out over the period of registration for the degree which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
 - (i) to be an original contribution to professional practice in the field of Pharmacy
 - and
 - (ii) to meet internationally recognised standards for such work
 - and
 - (iii) to demonstrate a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it
 - and
 - (iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.
- d All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.
- e Doctor of Pharmacy theses may not exceed 75,000 words or 160 pages in total without the permission of the Board of Graduate Studies.

Eligibility

- 2 Candidates for the Degree of Doctor of Pharmacy are required to have:
 - a (i) completed the requirements for the award of either the Degree of Master of Pharmacy Practice with First Class or Second Class Honours First Division at The University of Auckland
 - or
 - (ii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to the prerequisite qualification specified in clause a(i) of this regulation
 - and
 - b demonstrated an ability to pursue doctoral level research in the field of Pharmacy

and

- c following the completion of a first degree, had at least five years of experience in pharmacy practice or in an area considered comparable by the Board of Graduate Studies

and

- d have current registration as a pharmacist in New Zealand or as a pharmacist in the country of domicile.
- e Every candidate for the Degree of Doctor of Pharmacy must have applied for admission and been admitted to The University of Auckland.

Duration and Total Points Value

- 3 a A student for this degree has to follow a 2-part programme, Part I being taken in one full-time year or two consecutive part-time years and Part II being taken in two full-time years or four consecutive part-time years, and pass an approved programme with a total value of 360 points.
- b Candidates must complete the requirements for this degree within not less than three years and not more than four years from the date of registration for full-time students, and not less than six years and not more than eight years from the date of registration for part-time students, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 9. In the case of candidates who have been permitted to change between full-time and part-time the time requirements will be calculated on a pro rata basis.

Registration

- 4 a The Board of Graduate Studies, on the recommendation of the Head of the School of Pharmacy, is to determine whether the student may be registered and the date of registration.
- b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates (2004).

Structure and Content

- 5 Of the 360 points required for this degree, a student must pass Parts I and II as listed in the Doctor of Pharmacy Schedule.
- 6 Candidates must complete Part I with at least a B+ average grade before commencing Part II.

Reviews of Progress

- 7 a At the end of Part I the Head of School of Pharmacy will submit, through the Associate Dean (Postgraduate) of the Faculty, a report to the Board of Graduate Studies on the candidate's progress and containing a recommendation as to whether or not the candidate should be permitted to proceed to Part II.
- b During Part II, reviews of progress and continuation of registration will be made according to Regulation 2 of the General Regulations for Named Doctorates (2004).

Enrolment and Fees

- 8 Enrolment and payment of fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates (2004).

Changes to the Conditions of Registration

- 9 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates (2004).

Submission

- 10 a All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.
- b One month prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.
- c The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate's own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma.
- d The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

- 11 The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy (2008), except that:
 - a examiners will be requested to assess the thesis according to the criteria of clause 1(c) of these regulations

and

- b the Board of Graduate Studies will appoint a Doctor of Pharmacy Advisor who will take the part of the Head of Department Nominee, as described in the Statute for the Degree of Doctor of Philosophy (2008), for all Doctor of Pharmacy examinations.

Variations

- 12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals

- 13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates (2004).

Dispute Resolution Procedures

- 14 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

- 15
 - a These regulations came into force on 1 January 2006. The 2005 regulations for the Degree of Doctor of Pharmacy were thereby repealed.
 - b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

Structure and Content

- 3 A student enrolled for this certificate must pass courses with a total value of at least 120 points from one of the options listed in the Certificate in Health Sciences Schedule.
- 4 The programme for each student must be approved by the Director of the Certificate in Health Sciences prior to enrolment.

Variations

- 5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 6 These regulations came into force on 1 January 2006. The 2001 regulations for the Certificate in Health Sciences were thereby repealed.

REGULATIONS – SCIENCE

The Degree of Bachelor of Science – BSc

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

- 1 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

- 2 Of the 360 points required for this degree, a student must pass:
 - a at least 300 points from courses listed in the Bachelor of Science Schedule, including
 - (i) at least 180 points above Stage I, including at least 75 points above Stage II
 - (ii) courses in a minimum of three subjects listed in the Bachelor of Science Schedule *and either*
 - (iii) a major or specialisation listed in the Bachelor of Science Schedule, including at least 60 points above Stage II
 - or*
 - (iv) two or more majors or specialisations listed in the Bachelor of Science Schedule, of which at least one major or specialisation must include at least 60 points above Stage II and any further majors or specialisations must each include at least 45 points above Stage II.
 - b 30 points from courses offered in the General Education Schedule approved for this degree.
- 3 Up to 30 points may be taken from courses available for other programmes offered at this University.

General Education Exemptions

- 4 a A student is exempted from the requirement to pass courses offered in the General Education Schedule who has:
 - either*
 - (i) completed an undergraduate degree at a tertiary institution
 - or*
 - (ii) commenced study for this degree at a tertiary institution before 1 January 2006
 - or*
 - (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.
- b A student who has been exempted from the requirement to pass courses offered in the General Education Schedule must substitute 30 points from courses available for this degree.
- c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
 - (i) 15 points from courses offered in the General Education Schedule
 - and*
 - (ii) a further 15 points from courses available for this degree.

Practical Requirements

- 5 In any course that includes practical work as well as written work, a student must obtain passes in both the practical and written work in order to pass that course as a whole. A student who passes the practical work but who fails the written work may, at the discretion of the Head of Department, have the result for the practical work carried forward when the course is retaken.

Conjoint Degrees

- 6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this *Calendar*.

Special Cases

- 7 a In exceptional circumstances Senate or its representative may permit a suitably qualified student to enrol directly in a Stage II course(s). If the student fails the Stage II course(s) but is certified by the examiner as having reached a pass in an equivalent Stage I course(s), the student may be credited with the appropriate Stage I course(s).

- b If a student who is enrolled in and fails the advanced or accelerated Stage I course but is certified by the examiner as having reached a pass in a Stage I course in the same subject having a lower entry requirement, the student may be credited with the latter course. The relevant Head(s) of Department shall certify to Senate or its representative that the failed course is an advanced or accelerated course.

Variations

- 8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 9 These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Bachelor of Science were thereby repealed.

Bachelor of Science (BSc) Schedule

Courses available for the BSc:

Anthropology

Stage I courses: ANTHRO 101, 102
 Stage II courses: ANTHRO 201, 222
 Stage III course: ANTHRO 328
 For major in Anthropological Science only:
 Stage II courses: ANTHRO 200, 206, 207, 221, 245, 249
 Stage III course: ANTHRO 300, 303, 306, 307, 309, 311, 316–318, 324, 335, 337, 340, 348, 349, 352, 353

Applied Mathematics

Stage I course: MATHS 162
 Stage II courses: MATHS 260, 267, 270, STATS 210
 Stage III courses: MATHS 340, 361–372, 386–389, STATS 310, 325, 370, ENGSCI 391

Biological Sciences

Stage I courses: BIOSCI 100–107
 Stage II courses: BIOSCI 200–210
 Stage III courses: BIOSCI 320–396

Chemistry

Stage I courses: CHEM 100–150
 Stage II courses: CHEM 210–240, 270
 Stage III courses: CHEM 310–392

Civil and Environmental Engineering

Stage II courses: CIVIL 220, 221
 Stage III courses: CIVIL 322, ENVENG 333

Computer Science

Stage I courses: COMPSCI 101–111
 Stage II courses: COMPSCI 210–280
 Stage III courses: COMPSCI 313–393

Education Curriculum Secondary

Diploma level course: EDCURSEC 683

Environmental Science

Stage I course: ENVSCI 101
 Stage II course: ENVSCI 201
 Stage III courses: ENVSCI 301, 310, 311

Food Science

Stage II course: FOODSCI 201
 Stage III courses: FOODSCI 301–305

General Science

Stage I course: SCIGEN 101
 Stage II course: SCIGEN 201
 Stage III course: SCIGEN 301

Geography

Stage I courses: GEOG 101–105
 Stage II courses: GEOG 201–250
 Stage III courses: GEOG 302–352

Geology

Stage I courses: GEOLOGY 103, 104
 Stage II courses: GEOLOGY 201–205
 Stage III courses: GEOLOGY 301–382, GEOPHYS 330

Geophysics

Stage III courses: GEOPHYS 330–333

History

Stage II course: HISTORY 253

Information Systems

Stage II courses: INFOSYS 220–226
 Stage III courses: INFOSYS 320–330, 338–342
Note that INFOSYS 330 may count towards a major in Computer Science

Law

Stage IV course: LAW 457

Linguistics

Stage I courses: LINGUIST 100, 101, 103
 Stage II courses: LINGUIST 200, 201
 Stage III courses: LINGUIST 300–302, 305

Logic and Computation

Stage I courses: COMPSCI 101, 105, LINGUIST 100, 103, MATHS 150, PHIL 101, 105
 Stage II courses: COMPSCI 220, 225, LINGUIST 200, LOGICOMP 201, MATHS 250, 253, 255, PHIL 216, 222
 Stage III courses: COMPSCI 320, 350, 367, LINGUIST 300, 302, 320, LOGICOMP 301, 302, MATHS 315, 326, 328, PHIL 305, 315, 323

Marine Science

Stage II course: MARINE 202
 Stage III course: MARINE 302

Mathematics

Stage I courses: MATHS 101–162, 190

Stage II courses: MATHS 202–270, COMPSCI 225, STATS 210

Stage III courses: MATHS 302–384, PHIL 305, STATS 310, 325, 370, ENGSCI 391

Medical Science

Stage I course: MEDSCI 142

Stage II courses: MEDSCI 201–206

Stage III courses: MEDSCI 301–315

Optometry and Vision Science

Part I courses: OPTOM 161, 165, 170

Pacific Studies

Stage I course: PACIFIC 100

Philosophy

Stage I courses: PHIL 101, 102, 152

Stage II courses: PHIL 200, 210, 216, 222, 250, 260, 261, 263

Stage III courses: PHIL 305, 315

Physics

Stage I courses: PHYSICS 102–160

Stage II courses: PHYSICS 211–280

Stage III courses: PHYSICS 315–391, GEOPHYS 330–333

Psychology

Stage I courses: PSYCH 108, 109

Stage II courses: PSYCH 201–208

Stage III courses: PSYCH 303–364, SPORTSCI 304

Science Education

Stage II course: EDUC 201

Stage III course: EDUC 382

Sport and Exercise Science

Stage I courses: SPORTSCI 101–105

Stage II courses: SPORTSCI 201–206

Stage III courses: SPORTSCI 301–309

Statistics

Stage I courses: STATS 101–150, MATHS 162

Stage II courses: STATS 201–255

Stage III courses: STATS 301–390, ENGSCI 391

BSc Majors:

Anthropological Science

Single or First Major must include

- 30 points: ANTHRO 101, 102
- at least 15 points from ANTHRO 200, 201
- at least 15 points from ANTHRO 206, 207, 221, 222, 245, 249
- at least 60 points from ANTHRO 300, 303, 306, 307, 309, 311, 316–318, 324, 328, 335, 337, 340, 348, 349, 352, 353
- at least 90 points from a subject listed for a BSc Major including at least 15 points at Stage III

Second major must include

- 30 points: ANTHRO 101, 102
- at least 15 points from ANTHRO 200, 201
- at least 15 points from ANTHRO 206, 207, 221, 222, 245, 249
- at least 45 points from ANTHRO 300, 303, 306, 307, 309, 311, 316–318, 324, 328, 335, 337, 340, 348, 349, 352, 353
- at least 90 points including at least 15 points at Stage III from courses available in the following subjects: Biological Sciences, Chemistry, Environmental Science, Geography, Geology

Biological Sciences

Single or First Major must include

- 15 points: BIOSCI 101
- at least 45 points from BIOSCI 100, 102–107
- at least 30 points including at least 15 points from each of two of the following groups: BIOSCI 201–203; BIOSCI 204, 205, 208; BIOSCI 206, 207, 210
- at least 60 points from BIOSCI 320–396

Second major must include

- 15 points: BIOSCI 101
- at least 45 points from BIOSCI 100, 102–107
- at least 30 points including courses from each of two of the following groups: BIOSCI 201–203; 204, 205, 208; 206, 207, 210
- at least 45 points from BIOSCI 320–396

Chemistry

Single or First Major must include

- 30 points: CHEM 110, 120
- at least 45 points from CHEM 210–240

- 30 points from CHEM 310–340
- at least 30 further points from CHEM 310–392

Second major must include

- 30 points: CHEM 110, 120
- at least 45 points from CHEM 210–240
- 30 points from CHEM 310–340
- at least 15 further points from CHEM 310–392

Computer Science

Single or First Major must include

- 60 points from COMPSCI 210–280
- 60 points from COMPSCI 313–393, INFOSYS 330

Second major must include

- 45 points from COMPSCI 210–280
- 45 points from COMPSCI 313–393, INFOSYS 330

Food Science

Single or First Major must include

- 120 points: BIOSCI 101, 106, 107, CHEM 110, 120, ENGSCI 111, PHYSICS 160, STATS 101
- 75 points: BIOSCI 203, 204, CHEM 230, CHEMMAT 211, FOODSCI 201
- 60 points: BIOSCI 348 or 352, CHEMMAT 463, FOODSCI 301, 302
- 60 points from BIOSCI 358, CHEM 240, FOODSCI 303, 304, SCIGEN 201

Geography

Single or First Major must include

- at least 45 points from GEOG 101, 102, 201, 202
- 15 points: GEOG 250
- 15 points from GEOG 315, 330
- at least 45 further points from GEOG 302–352

Second major must include

- at least 45 points from GEOG 101, 102, 201, 202
- 15 points: GEOG 250
- 15 points from GEOG 315, 330
- at least 30 further points from GEOG 302–352

Geology

Single or First Major must include

- 30 points: GEOLOGY 201, 301
- at least 30 points from GEOLOGY 202–204
- at least 30 points from GEOLOGY 302–305
- a further 15 points from Stage III Geology

Second major must include

- 30 points: GEOLOGY 201, 301
- at least 30 points from GEOLOGY 202–204
- at least 30 points from GEOLOGY 302–305

Mathematics

(i) Applied Mathematics

Single or First Major must include

- 45 points: MATHS 253, 260, 270
- 30 points: MATHS 340, 361
- at least 15 points from MATHS 362, 363
- at least 15 points from MATHS 332, 362, 363, 386–389, STATS 310, 325, 370, ENGSCI 343, 391 and any other courses approved by the Head of Department

Second major must include

- at least 30 points from MATHS 253, 260, 270
- 30 points: MATHS 340, 361
- at least 15 points from MATHS 362, 363

(ii) Mathematics

Single or First Major must include

- 30 points from MATHS 253, 255, 260
- up to 30 points from MATHS 361–372, STATS 310, 325, 370, ENGSCI 391, PHIL 305
- at least 30 points from MATHS 302–360, 373–384

Second major must include

- 30 points from MATHS 253, 255, 260
- up to 15 points from MATHS 361–372, STATS 310, 325, 370, ENGSCI 391, PHIL 305
- at least 30 points from MATHS 302–360, 373–384

Pharmacology

Single or First Major must include

- at least 60 points from MEDSCI 303–307

Second major must include

- at least 45 points from MEDSCI 303–307

Physics

Single or First Major must include

- at least 45 points from PHYSICS 315–355, GEOPHYS 330–333
- at least 15 points from PHYSICS 390, 391

Second major must include

- at least 30 points from PHYSICS 315–356, GEOPHYS 330–333
- at least 15 points from PHYSICS 390, 391

Physiology

Single or First Major must include

- at least 60 points from MEDSCI 308–312

Second major must include

- at least 45 points from MEDSCI 308–312

Psychology

Single or First Major must include

- at least 60 points from PSYCH 303–364, SPORTSCI 304

Second major must include

- at least 45 points from PSYCH 303–364, SPORTSCI 304

Sport and Exercise Science

Single or First Major must include

Electronics and Computing**First or single Specialisation must include**

- 45 points at Stage II in Computer Science or Mathematics
- 30 points: PHYSICS 340, 390
- 15 other points from PHYSICS 315–391, GEOPHYSICS 330–331
- 15 points at Stage III in Computer Science

Second Specialisation must include

- 45 points at Stage II in Computer Science or Mathematics
- 30 points: PHYSICS 340, 390
- 15 points at Stage III in Computer Science

Environmental Science

The Environmental Science specialisation must be taken in conjunction with a BSc major, including 60 points from Stage III courses in the majoring subject.

All Specialisations must include

- 75 points: ENVSCI 101, 201, 301, 310, GEOG 205
- 15 points from STATS 201, BIOSCI 209, GEOG 250, or approved equivalent
- 15 points from a Stage III Bachelor of Science course

Geophysics**First or single Specialisation must include**

- at least 15 points from GEOLOGY 103, 104
- 30 points: PHYSICS 213, 230
- 15 points from MATHS 253, PHYSICS 211
- 30 points from GEOLOGY 201, 204, MATHS 260, PHYSICS 220, 240

- 45 points: INFOSYS 220, 222, 224
- at least 30 points from COMPSCI 313–379
- at least 30 points from INFOSYS 320–341

Second Specialisation must include

- 15 points from ACCTG 101, MGMT 101
- 45 points from COMPSCI 210–280
- 45 points: INFOSYS 220, 222, 224
- at least 30 points from COMPSCI 313–379
- at least 15 points from INFOSYS 320–341

Logic and Computation**All Specialisations must include**

- 60 points: COMPSCI 101, 225, PHIL 101, 222
- 60 points from COMPSCI 320, 350, 367, LINGUIST 300, 302, 320, LOGICOMP 301, 302, MATHS 315, 326, 328, PHIL 305, 315, 323
- 15 further points from COMPSCI 105, 220, 320, 350, 367, LINGUIST 100, 103, 200, 300, 302, 320, LOGICOMP 201, 301, 302, MATHS 150, 250, 253, 255, 315, 326, 328, PHIL 105, 216, 222, 305, 315, 323

Marine Science**All Specialisations must include**

- 30 points: MARINE 202, 302
- 15 points from STATS 201, BIOSCI 209, GEOG 250
- 45 further points from approved Stage III Bachelor of Science courses

Medicinal Chemistry**All Specialisations must include****Part I**

- 90 points: BIOSCI 101, 106, 107, CHEM 110, 120, MEDSCI 142
- at least 15 points from COMPSCI 111, STATS 101, PHYSICS 120, 160

Part II

- 90 points: BIOSCI 201, 203, CHEM 230, 240, MEDSCI 204, 205
- at least 15 points from BIOSCI 202, 204, CHEM 210, 220, MEDSCI 202, 203, PHARMACY 202

Part III

- 60 points: CHEM 330, 390, 392, MEDSCI 303
- at least 30 points from CHEM 320, 340, 350, BIOSCI 349, 350, 351, 353–356, MEDSCI 206, 305, 306

Operations Research**First or Single Specialisation must include**

- 45 points: STATS 255, 320, ENGSCI 391
- at least 15 points from STATS 301, 310, 325, 326, 370, 380, COMPSCI 320
- at least 15 points from STATS 301–390, MATHS 326, 328, 361, OPSMG 370, 371

Second Specialisation must include

- 45 points: STATS 255, 320, ENGSCI 391
- at least 15 points from STATS 301, 310, 325, 326, 370, 380, COMPSCI 320

The Degree of Bachelor of Science (Honours) – BSc(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - a completed the requirements for the Degree of Bachelor of Science or attained an equivalent qualification as approved by Senate or its representative
 - and
 - b attained at least a B average in 90 points above Stage II, including at least 45 points in the relevant subject major or specialisation as specified in the Bachelor of Science regulations
 - and
 - c approval from the relevant Head of Department, Director of School, or equivalent.
- 2 A student who has not completed the requirements of the Degree of Bachelor of Science but who has passed:
 - a courses with a total value of at least 345 points towards that degree including the requirements of the major or specialisation as specified in the regulations for the Bachelor of Science
 - and
 - b the Stage III entry requirements for this degree
 may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this degree. The requirements for the Bachelor of Science degree must be completed within 12 months of initial enrolment for the Bachelor of Science (Honours). The Bachelor of Science (Honours) will not be awarded until the requirements for the Bachelor of Science have been completed.

Duration and Total Points Value

- 3 A student enrolled for this degree must:
 - a pass courses with a total value of 120 points
 - and
 - b complete within the time limit specified in the General Regulations – Bachelors Honours Postgraduate Degrees.
- 4 The total enrolment for this degree must not exceed 160 points.

Structure and Content

- 5 A student enrolled for this degree must pass 120 points in one of the subjects listed in the Bachelor of Science (Honours) Schedule.
- 6 A project or dissertation of up to 60 points, in the same subject, must be included. The combined point value of the dissertation and a research preparation course (such as a dissertation preparation or research methods course) in the same subject must not exceed 60 points.
- 7 The programme for each student must be approved by the relevant Head of Department, Director of School or equivalent.

Project / Dissertation

- 8
 - a The project or dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the relevant Head of Department.
 - b The dissertation topic must be approved by the relevant Head of Department prior to enrolment.
 - c The dissertation is to be completed and submitted in accordance with the General Regulations – Bachelors Honours Postgraduate Degrees.

Variations

- 9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

- 10
 - a This degree may be awarded only where a student's overall grade for the Degree of Bachelor of Science (Honours) is sufficiently high to deserve Honours.
 - b Should a student fail to qualify for the award of the Degree of Bachelor of Science (Honours), Senate or its representative may approve the reassignment of points towards the Postgraduate Diploma in Science.
- 11 Where the standard specified in Regulation 10a is achieved, Honours will be awarded as specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

Commencement

- 12 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Science (Honours) were thereby repealed.

Bachelor of Science (Honours) (BSc(Hons) Schedule

Applied Geology

Prerequisite: A major in Geology and at least 90 points at Stage III

Requirement:

- 15 points: ENVSCI 701
- 45 points from GEOG 746, GEOLOGY 701, 703, 705, 713, 754, 771 GEOPHYS 761–763, 780
- 30 points from approved courses within Part IV of the Bachelor of Engineering (Honours) Schedule or the Master of Engineering Studies Schedule
- 30 points from GEOLOGY 789

Applied Mathematics

Prerequisite: A major in Applied Mathematics and at least 90 points at Stage III

Requirement:

- at least 45 points from MATHS 761, 762, 763, 764, 769, 770, PHYSICS 701, 707
- 30 points: MATHS 776 Dissertation in Mathematics or Applied Mathematics
- up to 45 points from approved 700 level courses in Mathematics or related subjects with approval of the Head of Department

Bioinformatics

Prerequisite: A specialisation in Bioinformatics and at least 90 points at Stage III

Requirement:

- 30 points: BIOSCI 743, 744
- 45 points: BIOINF 789 Project
- 45 points from BIOSCI 733, 737, 752, 755–758, COMPSCI 715, 720, 732, 760, 767, MATHS 764, STATS 720, 721, 730, 731, 761, 783, 784

Biological Sciences

Prerequisite: At least 90 points at Stage III including at least 60 points from Stage III Biological Sciences. With the permission of the Director, up to 15 points at Stage III in related courses may be substituted.

Requirement:

- 15 points: BIOSCI 762
- 45 points: BIOSCI 788 Dissertation

and

- 60 points from BIOSCI 724–745, 749–759

or

- 45 points from BIOSCI 724–745, 749–759 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Biomedical Science

Prerequisite: A specialisation in Biomedical Science and at least 90 points at Stage III

Requirement:

- 90 points: BIOMED 791 Research Portfolio
- 30 points from BIOSCI 736, 737, 741, 742, 755–759, HLTHPSYC 716, MEDSCI 701–723, 725–734, 737

Chemistry

Prerequisite: A major in Chemistry and at least 90 points at Stage III

Requirement:

- 60 points: CHEM 793 Dissertation

and

- 60 points from CHEM 710–780

or

45 points from CHEM 710–780 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Computer Science

Prerequisite: A major in Computer Science and at least 90 points at Stage III

Requirement:

- at least 60 points from COMPSCI 701–777, 790
- up to 30 points from 700 level courses in a related subject with approval of the Head of Department
- 30 points: COMPSCI 789 Dissertation

Food Science

Prerequisite: A major in Food Science and at least 90 points at Stage III

Requirement:

- at least 30 points from FOODSCI 704, 706–710
- up to 30 points from MEDSCI 709, 710, BIOSCI 741 or other courses approved by Programme Director
- 60 points: FOODSCI 788 Dissertation

Geography

Prerequisite: A major in Geography and at least 90 points at Stage III

Requirement:

- 15 points: ENVSCI 701
- at least 60 points from GEOG 711–779, ENVMGT 741, 743, 744, 746, ENVSCI 704, 713, 737, 738, GEOLOGY 705, 713
- 30 points: GEOG 789
- up to 15 further points, subject to approval by the Programme Coordinator

Geology

Prerequisite: A major in Geology and at least 90 points at Stage III

Requirement:

- 15 points: ENVSCI 701
- 30 points: GEOLOGY 789
- at least 45 points from GEOLOGY 701–772, GEOPHYS 761–763, 780
- up to 30 points from 700 level courses as approved by the Programme Coordinator

Geophysics

Prerequisite: At least 90 points at Stage III including at least 45 points from GEOLOGY 361, GEOPHYS 330–333

Requirement:

- 15 points from PHYSICS 731, 732
- 30 points: GEOPHYS 789 Dissertation
- 75 points from approved 700 level courses in Applied Mathematics, Geology, Geophysics or Physics

Logic and Computation

Prerequisite: A specialisation in Logic and Computation and at least 90 points at Stage III

Requirement:

- 15 points from COMPSCI 720, 750, 760, 767
- 15 points from PHIL 736–738
- 60 points from COMPSCI 720, 750, 760, 767, LINGUIST 721, 724, LOGICOMP 701–705, MATHS 713, 715, PHIL 736–738
- 30 points: LOGICOMP 782 Dissertation

Mathematics

Prerequisite: A major in Mathematics including (either MATHS 320 or MATHS 328) and MATHS 332 and at least 90 points at Stage III

Note: Mathematics Education students may substitute MATHS 302 for one of these prerequisite courses

Requirement:

- 30 points: MATHS 776 Dissertation in Mathematics or Applied Mathematics
- and either
- 90 points in 700 level Mathematics courses
- or
- at least 45 points in 700 level Mathematics courses and up to 45 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Medicinal Chemistry

Prerequisite: A specialisation in Medicinal Chemistry and at least 90 points at Stage III

Requirement:

- 15 points: CHEM 735
- 45 points from CHEM 710–780, BIOSCI 756, 757, 759, MEDSCI 708, 715, 716, 721, 722
- 60 points: CHEM 793 Dissertation

Pharmacology

Prerequisite: A BSc degree with at least 60 points from MEDSCI 303–307 and at least 90 points at Stage III

Requirement:

- 45 points: PHARMCOL 788 Dissertation
- and
- 75 points from MEDSCI 701 or 702, MEDSCI 715–723
- or
- 60 points from MEDSCI 701 or 702, MEDSCI 715–723 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Physics

Prerequisite: A major in Physics and at least 90 points at Stage III

Requirement:

- 30 points: PHYSICS 789 Dissertation
- 45 points from PHYSICS 701–788, 791, 792
- and
- 45 additional points from PHYSICS 701–788, 791, 792, MATHS 761–763, GEOPHYS 761–780
- or
- 30 additional points from PHYSICS 701–788, 791, 792, MATHS

761–763, GEOPHYS 761–780 and a further 15 points from 700 level courses in a related subject, subject to approval by the Head of Department

Physiology

Prerequisite: A major in Physiology and at least 90 points at Stage III

Requirement:

- up to 75 points from MEDSCI 701 or 702, MEDSCI 703, 717, 725–730
- 45 points: PHYSIOL 788 Dissertation

Psychology

Prerequisite: A major in Psychology and at least 90 points at Stage III including PSYCH 306

Requirement:

- 45 points: PSYCH 788 Dissertation
- and
- 75 points from PSYCH 701–762
- or
- at least 60 points from PSYCH 701–762
- 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Sport and Exercise Science

Prerequisite: A major in Sport and Exercise Science, or equivalent as approved by the Head of Department and at least 90 points at Stage III

Requirement:

- 15 points: SPORTSCI 705
- 45 points: SPORTSCI 788 Dissertation
- and
- 60 points from SPORTSCI 702–704, 706–714
- or
- 45 points from SPORTSCI 702–704, 706–714 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Statistics

Prerequisite: A major in Statistics and at least 90 points at Stage III and including STATS 210

Requirement:

- 30 points: STATS 781 Project
- and
- 90 points from STATS 701–787, BIOSCI 744
- or
- 75 points from STATS 701–787, BIOSCI 744 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

The Degree of Bachelor of Optometry – BOptom

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

- 1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

- 2 Of the 480 points required for this degree, a student must pass:
 - a 450 points: Parts I, II, III and IV as listed in the Bachelor of Optometry Schedule.
 - b 30 points from courses listed in the General Education Schedule approved for this degree.
- 3 Each Part must normally be completed before the next Part may be taken. However, a student who has failed to pass one of those Parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.

- 4 Study for this degree must be pursued in consecutive semesters. Interrupted study may be resumed only with the approval of, and on conditions set by, Senate or its representative.

General Education Exemptions

- 5 a A student is exempted from the requirement to pass courses offered in the General Education Schedule who has
either
(i) completed an undergraduate degree at a tertiary institution
or
(ii) commenced study for this degree at a tertiary institution before 1 January 2006
or
(iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.
- b A student who has been exempted from the requirement to pass courses offered in the General Education Schedule must substitute 30 points from courses listed in the Bachelor of Science Schedule.
- c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
(i) 15 points from the courses offered in the General Education Schedule
and
(ii) a further 15 points from other courses listed in the Bachelor of Science Schedule.

Enrolment for Two Programmes

- 6 A student may not be enrolled in this degree at the same time as in another programme, unless special permission is given by Senate or its representative.

Practical Requirements

- 7 a A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Faculty of Science may require.
- b In any course that includes both a final written examination and practical or clinical work, a student must pass both the final written examination and the practical or clinical work to pass that course as a whole. However, a student who passes the practical or clinical work but fails the final written examination may, at the discretion of the Head of Department, have the result for the practical or clinical work for that failed course carried forward when the course is repeated.
- c A student who repeats any course may also be required to undertake such additional practical or clinical work as the Head of Department of Optometry and Vision Science determines.

Variations

- 8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

- 9 a This degree may be awarded with Honours where a student's overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.
- b Honours may normally be awarded only if the requirements for this degree are completed within eight semesters of initial enrolment for the degree. In exceptional circumstances however, Senate or its representative may approve an extension of this period for not more than two further semesters.

Commencement

- 10 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Optometry were thereby repealed.

Bachelor of Optometry (BOptom) Schedule

Requirement:

Part I

- 90 points: OPTOM 110, 161, 165, 171, MEDSCI 203

Part II

- 105 points: OPTOM 211, 245, 251, 260, 270, MEDSCI 202
- 15 points from courses listed in the Bachelor of Science Schedule

Part III

- 120 points: OPTOM 312, 330, 341, 352, 372

Part IV

- 120 points: OPTOM 410, 420, 462, 475
- as required under Regulation 7c, and with permission of the Head of Department, OPTOM 291, 391, 491

General Education Requirement:

Part I

- 30 points from courses listed in the General Education Schedule approved for this degree
-

The Degree of Master of Science – MSc

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - a completed the requirements for
 - either*
 - (i) the Degree of Bachelor of Science (Honours)
 - or*
 - (ii) the Postgraduate Diploma in Science
 - or*
 - (iii) any other equivalent qualification approved by Senate or its representative
 - and*
 - b *either*
 - (i) attained a B– average in at least 90 points taken for the BSc(Hons) or PGDipSci. At least 75 of these points must be in 700 level courses or a dissertation, if the proposed Masters degree programme includes a thesis
 - or*
 - (ii) if admitted under Regulation 1a(iii), attained a B– average in 90 points or equivalent in the most advanced courses taken towards the entry qualification
 - and*
 - c approval from the relevant Head of Department, Director of School, or equivalent.
- 2 A student who has not completed all the requirements of the Degree of Bachelor of Science (Honours) or the Postgraduate Diploma in Science but who has:
 - a passed 105 points towards the Degree of Bachelor of Science (Honours) or the Postgraduate Diploma in Science
 - and*
 - b met all other entry and prerequisite requirements

may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this degree. The requirements for the Degree of Bachelor of Science (Honours) or Postgraduate Diploma in Science must be completed within 12 months of initial enrolment for the Master of Science. Should these requirements not be completed within these 12 months, enrolment for the Master of Science will be suspended until they have been completed.

Duration and Total Points Value

- 3 A student enrolled for this degree must:
 - a pass courses with a total value of 120 points
 - and*
 - b complete within the time limit specified in the General Regulations – Masters Degrees.
- 4 The total enrolment for this degree must not exceed 160 points.

Structure and Content

- 5 Of the 120 points required for this degree, a student must complete:
 - a **Research Masters**
 - either*
 - (i) 120 point Thesis from one of the Research Masters options listed in the Master of Science Schedule
 - or*
 - (ii) 90 point Thesis and 30 points courses from one of the Research Masters options listed in the Master of Science Schedule
 - or*
 - (iii) 90 point Research Portfolio and 30 points courses from one of the Research Masters options listed in the Master of Science Schedule.
 - or*
 - b **Taught Masters**
 - 120 points from courses in one subject from one of the Taught Masters options in the Master of Science Schedule.
- 6 The programme for each student must be approved by the relevant Head of Department, Director of School or equivalent before enrolment for this degree.

Thesis / Dissertation

- 7 a A thesis or dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

- b The thesis or dissertation topic must be approved by the relevant Head of Department or Programme Coordinator prior to enrolment.
- c The thesis or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Variations

- 8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

- 9 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement

- 10 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Master of Science were thereby repealed.

Master of Science (MSc) Schedule

Applied Geology

Prerequisite: A BSc(Hons) or PGDipSci in Applied Geology
Requirement:
Research Masters
 • 120 points: GEOLOGY 795 MSc Thesis in Applied Geology

Applied Mathematics

Prerequisite: A BSc(Hons) or PGDipSci in Applied Mathematics
Requirement:
Research Masters
 • 120 points: MATHS 795 MSc Thesis in Applied Mathematics

Bioinformatics

Prerequisite: A BSc(Hons) in Bioinformatics, including BIOINF 761, or an equivalent qualification as approved by the Programme Director
Requirement:
Research Masters
 • 120 points: BIOINF 796 MSc Thesis in Bioinformatics

Biological Sciences

Prerequisite: Either a BSc(Hons) in Biological Sciences, a PGDipSci in Biological Sciences including BIOSCI 761, or an equivalent qualification as approved by the Director
Requirement:
Research Masters
 • 120 points: BIOSCI 796 MSc Thesis in Biological Sciences

Biomedical Science

Prerequisite: A BSc(Hons) in Biomedical Science, or PGDipSci in Biomedical Science, or PGDipSci in Medical Science, or equivalent as approved by the Board of Studies (Biomedical Science)
Requirement:
Research Masters
 • 120 points: BIOMED 796 MSc Thesis in Biomedical Science

Biosecurity

Prerequisite: PGDipSci in Biosecurity or equivalent qualification as approved by the Director, School of Biological Sciences, or the Director, School of Environment
Requirement:
Research Masters
 • 120 points: BIOSEC 796 Thesis in Biosecurity

Cardiac Rehabilitation

Prerequisite: A PGDipSci in Cardiac Rehabilitation or equivalent
Requirement:
Research Masters
 • 120 points: SPORTSCI 798 MSc Thesis in Cardiac Rehabilitation

Chemistry

Prerequisite: A BSc(Hons) or PGDipSci in Chemistry
Requirement:
Research Masters
 • 120 points: CHEM 796 MSc Thesis in Chemistry

Computer Science

Prerequisite: A BSc(Hons) or PGDipSci in Computer Science
Requirement:
Research Masters
 • 120 points: COMPSCI 796 MSc Thesis in Computer Science

Environmental Management

Prerequisite: A PGDipSci in Environmental Management
Requirement:
Research Masters
 • 120 points: ENVGMT 796 MSc Thesis in Environmental Management

Environmental Science

Prerequisite: A PGDipSci in Environmental Science or equivalent including ENVSCI 701
Requirement:
Research Masters
 • 120 points: ENVSCI 796 MSc Thesis in Environmental Science

Exercise Rehabilitation

Prerequisite: A BSc(Hons) in Sport and Exercise Science or PGDipSci in Exercise Rehabilitation, and SPORTSCI 302
Requirement:
Research Masters
 • 120 points: SPORTSCI 797 MSc Thesis in Exercise Rehabilitation

Food Science

Prerequisite: A BSc(Hons) or PGDipSci in Food Science, or equivalent
Requirement:
Research Masters
 • 120 points: FOODSCI 796 MSc Thesis in Food Science

Forensic Science

Prerequisite: A Bachelors degree in science, technology, medicine, engineering or other relevant areas as approved by the Programme Director and a Postgraduate Diploma in Forensic Science with an average of B– or higher or other relevant qualifications as approved by the Programme Director
Requirement:
Research Masters
 • 120 points: FORENSIC 796 MSc Thesis in Forensic Science

Geography

Prerequisite: A BSc(Hons) or PGDipSci in Geography

Requirement:

Research Masters

- 120 points: GEOG 796 Thesis in Geography

Geology

Prerequisite: A BSc(Hons) or PGDipSci in Geology

Requirement:

Research Masters

- 120 points: GEOLOGY 796 MSc Thesis in Geology

Geophysics

Prerequisite: A BSc(Hons) or PGDipSci in Geophysics

Requirement:

Research Masters

- 120 points: GEOPHYS 796 MSc Thesis in Geophysics

Health Psychology

Prerequisite: A PGDipSci in Health Psychology

Requirement:

Research Masters

- 120 points: HLTHPSYC 796 MSc Thesis in Health Psychology

Logic and Computation

Prerequisite: A BSc(Hons) or PGDipSci in Logic and Computation

Requirement:

Research Masters

- 120 points: LOGICOMP 796 Thesis

Marine Science

Prerequisite: A PGDipSci in Marine Science or equivalent

Requirement:

Research Masters

- 120 points: MARINE 796 MSc Thesis in Marine Science

Mathematics

Prerequisite: A BSc(Hons) or PGDipSci in Mathematics

Requirement:

Research Masters

- 120 points: MATHS 796 Thesis in Mathematics
- or
- 90 points: MATHS 798 Research Portfolio in Mathematics
- 30 points from MATHS 701–775, 777, 781–789, 792–794 or approved 700 level courses in related subjects with the approval of the Head of Department

Medical Statistics

Prerequisite: A PGDipSci in Medical Statistics and STATS 210

Requirement:

Taught Masters

- 45 points: STATS 732, 761 and 780
- 30 points from STATS 701–731, 740–787, BIOSCI 744, POPLHLTH 702, 707–709, 711
- 45 points: STATS 788 Dissertation in Medical Statistics

Optometry

Prerequisite: A BOptom or a PGDipSci in Optometry

Requirement:

Research Masters

- 120 points: OPTOM 796 MSc Thesis in Optometry

Pharmacology

Prerequisite: A BSc(Hons) or PGDipSci in Pharmacology

Requirement:

Research Masters

- 120 points: PHARMCOL 796 MSc Thesis in Pharmacology

Physics

Prerequisite: A BSc(Hons) or PGDipSci in Physics

Requirement:

Research Masters

- 120 points: PHYSICS 796 MSc Thesis in Physics

Physiology

Prerequisite: A BSc(Hons) or PGDipSci in Physiology

Requirement:

Research Masters

- 120 points: PHYSIOL 796 MSc Thesis in Physiology

Polymers and Coatings Science

Prerequisite: A PGDipSci in Polymers and Coatings Science

Requirement:

Research Masters

- 120 points: POLYMER 796 MSc Thesis in Polymers and Coatings Science

The Degree of Master of Speech Language Therapy Practice – MSLTPrac

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - a completed the requirements for any Bachelors or Masters degree of this University other than a degree specialising in speech language therapy, or gained an equivalent qualification, provided that Senate or its representative is satisfied that the prior degree or other equivalent qualification is indicative of the ability to undertake advanced study in Speech Language Therapy Practice
and
 - b passed at least 75 points at Stage III or 700 level in approved subject areas (Education, Psychology, Linguistics, Health Sciences) and achieved in these an average grade of B- or higher.
- 2 On the recommendation of the Dean of Science, Senate or its representative may require a student with insufficient background in Psychology and Education to take additional courses as a condition of enrolment for Part I of this degree, as under Regulation 7c below.
- 3 Admission to the programme is at the discretion of Senate or its representative, on the recommendation of the Director of the programme.

Duration and Total Points Value

- 4 A student enrolled for this degree must:
 - a pass courses with a total value of 240 points
and
 - b complete within the time limit specified in the General Regulations – Masters Degrees.
- 5 The total enrolment for this degree must not exceed 280 points.

Structure and Content

- 6 **Taught Masters**
A student enrolled for this degree must pass courses to the value of 240 points from Parts I and II as listed in the Master of Speech Language Therapy Practice Schedule.
- 7
 - a A student may not enrol for Part II until Part I has been completed, unless special approval is given by the Dean of Science or representative.
 - b A student who has previously passed courses from another programme that are substantially similar to any one of the courses required under Regulation 6 above may, with the approval of the Dean of Science or representative, be required to take alternative 700 level courses from the subject Speech Science or other approved 700 level courses.
 - c Where a student is required to take additional courses as a condition of enrolment for Part I, under Regulation 2 above, those courses:
 - (i) are to be taken for Certificates of Proficiency
and
 - (ii) are to be passed within 12 months of initial enrolment for this degree.

Practical and Clinical Requirements

- 8 A student is required to pass the clinical and practical requirements of the Speech Language Therapy Practice courses to the satisfaction of Senate or its representative.

Variations

- 9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Termination of Enrolment

- 10
 - a If the behaviour of a student in a clinical environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.
 - b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes, clinics and any teaching placement pending the outcome of the inquiry.
 - c A student whose enrolment is terminated under Regulation 10a may appeal that decision to the Council or its duly appointed delegate.

Honours

- 11 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement

- 12 These regulations came into force on 1 January 2006. The 2002 regulations for the Degree of Master of Speech Language Therapy Practice were thereby repealed.

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

- 1 In order to be admitted to this programme, a student needs to have:
 - either*
 - a (i) completed the requirements for the Degree of Bachelor of Science
 - or*
 - (ii) attained an equivalent level of professional practical experience as approved by Senate or its representative
 - or*
 - (iii) completed the requirement for a professional qualification in Science, as approved by Senate or its representative
 - and*
 - b (i) passed the prerequisites for the courses in the selected subject major or area of specialisation for the Graduate Diploma in Science
 - or*
 - (ii) attained a level of competence equivalent to the prerequisites for the courses in the selected subject major or area of specialisation for the Graduate Diploma in Science as approved by Senate or its representative.
- 2 A student may, if Senate or its representative gives approval, enrol for this graduate diploma without having fulfilled the prerequisite requirements, provided that the relevant Head of Department, Director of School or Coordinator of the Programme may require any such student to enrol for any or all of the unfulfilled prerequisite courses in addition to the normal requirements of this programme.
- 3 A student who has not completed all the requirements for the Degree of Bachelor of Science but who has passed courses with a total value of at least 330 points for that degree, may, with the approval of the relevant Head of Department, Director of School or Coordinator of the Programme enrol for this graduate diploma. The remaining courses for the Bachelor of Science must be taken and passed within 12 months of initial enrolment for this graduate diploma. Should the requirements for the Bachelor of Science not be completed within these 12 months, enrolment for the Graduate Diploma in Science will be suspended until the requirements for the Bachelors degree are completed.

Duration and Total Points Value

- 4 A student enrolled for this graduate diploma must follow a programme equivalent of two full-time semesters and pass courses with a total value of 120 points.

Structure and Content

- 5 Of the 120 points required for this graduate diploma, a student must pass:
 - a 120 points above Stage I, including at least 75 points above Stage II, selected from the Bachelor of Science, Bachelor of Science (Honours) or Master of Science Schedules, including:
 - (i) at least 45 points in a subject major as listed in the Bachelor of Science Schedule
 - or*
 - (ii) at least 45 points from one of the following Bachelor of Science specialisations: Electronics and Computing, Environmental Science, Geophysics, Marine Science.
- 6 A project or dissertation of up to 30 points may be included.
- 7 The programme for each student requires the approval of the relevant Head of Department, Director of School or equivalent prior to enrolment.

Dissertation / Project

- 8
 - a A dissertation or project, when included in this programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative on the recommendation of the relevant Head of Department.
 - b The dissertation or project topic must be approved by the relevant Head of Department prior to enrolment.
 - c The dissertation or project is to be completed and submitted in accordance with the General Regulations – Postgraduate Diplomas.

Variations

- 9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Award of Diploma

- 10 The graduate diploma is awarded with an endorsement in the relevant subject major or specialisation.

Commencement

The Degree of Doctor of Clinical Psychology – DClinPsy

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble

- 1 a Candidates for the Degree of Doctor of Clinical Psychology are required to pursue an approved programme of advanced study, research and clinical practice as enrolled students of the University.
- b It is expected that this programme will normally be completed within three years of full-time candidature.
- c The Degree of Doctor of Clinical Psychology is awarded for a formal and systematic exposition of a coherent programme of advanced research work and supervised practice, carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
 - (i) that the research thesis is an original contribution to knowledge, and is of direct relevance to the field of clinical psychology
 - and
 - (ii) that the research components of the degree (thesis and clinical research projects) meet internationally recognised standards for such work
 - and
 - (iii) that the candidate has demonstrated both the knowledge of the relevant literature, in both research and clinical practice, and the ability to exercise analytical and professional judgement.
- d All research is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.
- e Doctor of Clinical Psychology theses may not exceed 60,000 words or 150 pages in total without the permission of the Board of Graduate Studies.

Eligibility

- 2 Candidates for the Degree of Doctor of Clinical Psychology are required to have:
- a (i) completed the requirements for the award of a Bachelors Honours Postgraduate Degree in Psychology with at least B+ average at The University of Auckland
 - or*
 - (ii) completed the requirements for the award of a Masters Degree in Psychology with at least a B+ average at The University of Auckland
 - or*
 - (iii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to one of the prerequisite qualifications specified in clauses a(i) and a(ii) of this regulation
 - and*
 - b passed PSYCH 708, 718, 747, 788 or their equivalents with a B+ average or better
 - and*
 - c demonstrated to a Selection Panel the ability and personal qualities necessary to pursue a doctoral level research-oriented clinical programme in the field of psychology.
 - d Every candidate for the Degree of Doctor of Clinical Psychology must have applied for admission and been admitted to The University of Auckland.

Duration and Total Points Value

- 3 a A student for this degree must follow a three-part programme consisting of three full-time years, and pass an approved programme with a total value of 360 points.
- b Candidates must pass each part and must normally complete the requirements for this degree within three years from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8.

Registration

- 4 a The Board of Graduate Studies, on the recommendation of the Head of Psychology, is to determine whether the student may be registered and the date of registration.
- b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates.

Structure and Content

- 5 a Of the 360 points required for this degree, a student must pass Parts I, II and III as listed in the Doctor of Clinical Psychology Schedule.
- Note that PSYCH 897 and 899 are awarded only on completion of the whole course.*
- b A student who fails any course or part of a course of the programme may be required to repeat that part or course or to sit a special examination before proceeding into the next part of the programme. A student who fails any part of the programme may be declined permission to enrol again in that part of the programme or, under Regulation 4e of the General Regulations for Named Doctorates, be declined permission to enrol in the programme as a whole.

Reviews of Progress

- 6 During the programme, reviews of progress and continuation of registration will be made in each year according to Regulation 2 of the General Regulations for Named Doctorates.

Enrolment and Fees

- 7 Enrolment and fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates, except that clause 3c applies only to the thesis component of the Doctor of Clinical Psychology.

Changes to the Conditions of Registration

- 8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Submission

- 9 a All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the *Guide to Theses and Dissertations*.
- b All candidates are also required to submit with the thesis three copies of the Portfolio of Clinical Research.
- c One month prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any

- person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.
- d The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate's own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma.
 - e The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

- 10 a The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2008 except that:
 - (i) examiners will be requested to examine the thesis according to the criteria of clause 1(c) of these regulations, and to provide an assessment of the grades assigned to the Portfolio of Clinical Research
 - (ii) the Board of Graduate Studies will appoint one DClinPsy Advisor who will take the part of the Head of Department nominee, as described in the Statute for the Degree of Doctor of Philosophy 2008, for all Doctor of Clinical Psychology examinations, except where that person is a research supervisor of the student concerned in which case a different staff member will be appointed DClinPsy Advisor
 - (iii) candidates may be asked to make specified minor corrections to or resubmit all or part of the Portfolio of Clinical Research.
- b In the event that a candidate is asked to resubmit all or part of the Portfolio of Clinical Research the same process of examination will be followed for the resubmitted work.

Variations

- 11 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals

- 12 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures

- 13 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

- 14 a These regulations came into force on 1 January 2009. The 2006 regulations for the Degree of Doctor of Clinical Psychology were thereby repealed.
- b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

REGULATIONS – CONJOINT DEGREES

Conjoint Degrees

The regulations for these conjoint degrees combinations are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

General Provisions

- 1 A student whose academic record is of a sufficiently high standard may, with the permission of Senate or its representative, be admitted to conjoint enrolment in any of the following combinations of degrees:

BA/BCom	BCom/LLB(Hons)
BA/BE(Hons)	BE(Hons)/BProp
BA/BE(Tchg)	BE(Hons)/BSc
BA/BFA	BE(Hons)/LLB
BA/BFA(Hons)	BE(Hons)/LLB(Hons)

BCom/BMus	BSc/BTheol
BCom/BProp	BSc/LLB
BCom/BSc	BSc/LLB(Hons)
BCom/LLB	
- 2 Except as otherwise specified in these regulations, each student's programme is to be governed by the regulations for each of the component degrees.
- 3 Only when all the requirements for both component degrees have been satisfied may the two degrees be conferred upon the student.

Admission

- 4 Admission to a conjoint degrees combination may be at initial enrolment, or after the student has passed or been credited with not more than 270 points for either component degree, but the student must not have graduated in either of the component degrees.
- 5
 - a A student for a conjoint degrees combination must gain admission to each of the component degrees
 - and
 - b achieve a standard equivalent to a Grade Point Equivalent (GPE) of at least 3.7, except for the Bachelor of Engineering (Honours) which requires a GPE of at least 5.5, in the last year of full-time study.

Continuation

- 6 In order to continue in a conjoint degrees combination, a student needs to achieve a Grade Point Average (GPA) of at least 3.5 each year, except for the Bachelor of Engineering (Honours) which requires a GPA of 4.0 each year.

Approval

- 7 As a condition of approval, Senate or its representative may require that a student include in a conjoint programme:
 - a a specified major subject or specialisation
 - b specified elective courses.

Duration and Total Points Requirements

- 8 The duration of a conjoint degrees combination is determined by the sum of the points required for each of the component degrees as set out in the Schedule of Requirements in these regulations.

General Education

- 9
 - a A student is exempted from the requirement to pass a course offered in the General Education Schedule who has:
 - either
 - (i) completed an undergraduate degree at a tertiary institution

- or
(ii) commenced study for this degree at a tertiary institution before 1 January 2006
- b A student who has been admitted to a component degree of a conjoint degree combination with credit from another tertiary institution of 120 points or more is exempted from the General Education requirement for that component degree.
 - c A student who has been exempted from the requirement to pass a course offered in the General Education Schedule for a degree component must substitute 15 points from courses available for that degree.

Suspension

- 10 A student may in any year totally suspend study for both component degrees of a conjoint degrees combination.

Additional Component Degrees/Diplomas

- 11 a If a student has satisfied the requirements of one (but not both) of the component degrees and would be eligible to have that degree conferred, the relevant Dean may approve the suspension of enrolment for the conjoint degree to allow the student to enrol for a relevant honours or Masters degree or diploma. In that case the total number of points passed must satisfy the regulations specified for that programme.
- b With the approval of the relevant Deans, a student who suspends conjoint study to pursue a graduate programme may complete the conjoint degrees combination provided they have not graduated with the completed component degree in the meantime.

Graduation

- 12 A student must graduate in all components of the conjoint degrees combination in one or more ceremonies in the same graduation period.

Note: Graduation in one component of the conjoint degrees combination constitutes a discontinuation of the conjoint degrees.

Variations

- 13 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

- 14 These regulations came into force on 1 January 2006. The 2004 regulations for the Conjoint Degrees were thereby repealed.

New Start for Adults

New Start provides University preparation and bridging courses for anyone over the age of 20 who needs to gain the skills and confidence to undertake University study. No previous academic qualifications are required. Students must be Australian or New Zealand citizens or New Zealand permanent residents, and must have a good standard of English.

New Start for Business and Economics

A 12-week modular, evening programme for adults, providing a comprehensive introduction to Mathematics, Accounting, and Economics. A grade of B+ or above achieved in Mathematics Preparation for University (compulsory) and Accounting or Economics guarantees adults entry into the Bachelor of Business and Information Management, Bachelor of Commerce and Bachelor of Property degrees. This course is offered on the City Campus only.

New Start

A 13-week part-time programme providing a realistic introduction to first-year degree study. All work is set and graded at The University of Auckland Stage I level.

New Start includes study skills and 10 subject lectures (such as Political Studies, Sociology, Psychology, Philosophy), assignments with realistic feedback and a final exam. Students gain information on the structure of university degrees, and an insight into the standard of work expected.

New Start is a university preparation course for degrees in Arts, Education, Law, and Science. A B+ grade will guarantee a place for students at The University of Auckland. Educational guidance is an integral part of New Start and students are offered assistance in planning their ongoing programmes.

New Start is offered at four venues: The University of Auckland City Campus, Manukau Institute of Technology, West Auckland and Far North (Tai Tokerau Campus).

Introduction to Postgraduate Study

A two-day workshop designed for those considering returning to University as a postgraduate student. The workshop will give participants an introduction to postgraduate study, information and resources on entry requirements, postgraduate advisers, campus services and facilities, career development and practical support during study.

Further Information

Further information on New Start programmes can be obtained from the New Start Office, Level 6, 1-11 Short Street, Auckland. Phone: +64 9 373 7599 ext 87831. Email: newstart@auckland.ac.nz, or website: www.auckland.ac.nz/newstart

- b Students must complete all required class work and written examinations which will be similar in standard and content to NCEA Level 3.
- c Each student's personal programme must be approved by the Academic Board.

Admission to University

- 4 a Students who satisfactorily complete the Certificate in Foundation Studies will satisfy the minimum requirements for entry to the University.
- b Students who complete up to 30 points in University courses may apply to have those points credited towards a degree or diploma at the University.

English as a Second Language

The Department of Applied Language Studies and Linguistics offers credit courses for International students and New Zealand residents whose first language is not English, and who are studying at The University of Auckland.

A range of courses is offered designed to improve academic English skills and increase proficiency in listening, speaking, reading and writing for academic purposes. In addition, most students can gain credit points for successfully passing these courses.

ESOL 100 develops skill in English grammar for academic reading and writing. ESOL 101 focuses on academic writing, and the skills needed for basic academic essays. ESOL 102 prepares students for listening and reading in academic contexts. At Stage II level, ESOL 200 develops students' ability to make academic presentations and participate in seminar discussions. ESOL 211 focuses on academic seminars and discussions in detail. ESOL 201 is a more advanced writing course that develops skill in essay writing and writing using sources. ESOL 210 is an academic writing course for students who need to write different kinds of research reports.

Further information may be obtained from the Department of Applied Language Studies and Linguistics, Faculty of Arts. Phone: +64 9 373 7599 ext 86588.

CONTINUING EDUCATION – TE ARA PUKENGA

The Centre for Continuing Education (CCE) offers lifelong learning opportunities to regional community and professional bodies by delivering courses, workshops and conferences that draw upon the expertise of The University of Auckland.

The Centre offers over 450 courses each year in a wide variety of subject areas. The courses are open to all adults and are taught in various formats including day and evening lectures, day and weekend seminars, and summer and winter workshops. University Lecture Courses also allow CCE students to join undergraduate students in selected courses.

An Academic and Professional Conference Management service is available to arrange and administer local, national and international conferences and seminars.

The Professional Development programme delivers high-impact, affordable courses that focus on growing participants' business skills and expertise. The Centre also has the capability to develop specialised courses to suit the needs of a business.

International Short Courses offer groups of students from around the world the opportunity to take part in customised courses designed to provide a great learning experience in New Zealand. The English Language programme presents groups with a range of flexible English language courses that aim to meet their specific needs. There are study tour options for New Zealanders as well.

The New Start programme provides University preparation and bridging courses for those needing to gain skills and confidence before undertaking University study.

GENERAL EDUCATION REGULATIONS AND SCHEDULES

General Education Regulations

- 1 Students required to include General Education in their programme must pass 30 points of General Education courses unless indicated otherwise in the schedule.
- 2 A student may not take a General Education course in a subject in which they have previously passed a course, or are already enrolled or intend to enrol.
- 3 A student may not take both of their General Education courses in the same subject.
- 4 Language courses do not satisfy the General Education requirement for a student who has prior knowledge of the language (for example, as a native speaker, through formal or informal study, or through living with others who speak the language). Enrolment requires submission of a language competency form and a student with prior knowledge of the language may be declined enrolment or the enrolment may be deleted at the discretion of the Head of Department.
- 5 Some courses available for General Education are also available as part of regular degree requirements. The content and assessment for both occurrences of the course are the same. A student must enrol in the General Education offering of a course in order to meet the General Education requirements of their programme.
- 6 Additional restrictions are attached to some courses, depending on the programme and courses for which a student is enrolled.

Note: Some General Education courses have limits on the number of students who can enrol. Places in these courses will be allocated on a first-come-first-served basis.

Regulations – Doctor of Philosophy and Higher Degrees

- 313 Statute for the Degree of Doctor of Philosophy – PhD
- 323 The Degree of Doctor of Literature – LittD
- 324 The Degree of Doctor of Science – DSc
- 324 The Degree of Doctor of Laws – LLD
- 325 The Degree of Doctor of Engineering – DEng
- 325 Procedure for the Examination of Higher Degrees

DOCTOR OF PHILOSOPHY AND HIGHER DEGREES

In addition to the degree of Doctor of Philosophy, the University offers higher doctorates in Literature, Science, Laws, and Engineering. As at other universities, these are primarily designed for graduates of the University who have subsequently published original work that has over a period given them authoritative international standing in their field. The higher doctorate is thus to be seen as a recognition of real distinction in one of these areas of study. It will be awarded rarely and after rigorous examination of a substantial and significant corpus of material. Candidates intending to submit for examination of higher degrees are advised to obtain the notes *Guidance for Candidates* from the Graduate Centre, The University of Auckland, before submitting.

REGULATIONS

Statute for the Degree of Doctor of Philosophy – PhD

Preamble

- 1
 - a Candidates for the degree of Doctor of Philosophy are required to pursue an approved programme of advanced study and research as enrolled students of the University. The demands of PhD research require a significant commitment by candidates in terms of time and resources, and candidates are normally expected to be working full-time on their doctoral research.
 - b It is expected that this programme will usually be completed within three to four years of full-time candidature. Part-time candidature may also be permitted.
 - c Upon completion of an approved programme of research, the PhD will be awarded to a candidate:
 - (i) whose submitted thesis meets the requirements set out in Clause 1d
 - and
 - (ii) who has satisfied the examiners in an oral examination and any other examination that may be required on the subject of the thesis and on relevant matters in the field or fields to which the subject belongs.
 - d The PhD degree is awarded for a formal and systematic exposition of a coherent programme of advanced research work carried out over the period of registration for the Degree which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
 - (i) to be an original contribution to knowledge or understanding in its field
 - and
 - (ii) to meet internationally recognised standards for such work
 - and
 - (iii) to demonstrate a knowledge of the literature relevant to the subject and the field or fields to which the subject belongs, and the ability to exercise critical and analytical judgement of it
 - and
 - (iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.
 - e PhD theses may not exceed 100,000 words in total without the prior permission of the Board of Graduate Studies.
 - f Where a thesis includes published research papers and/or case studies, published or unpublished, these must be fully integrated into the subject matter and text of the thesis and be listed in the bibliography.
 - g All material which is not the original work of the author of the thesis must
 - (i) be fully and appropriately attributed
 - or
 - (ii) if a substantial part of another work, only be reproduced with the written permission of the copyright owner of that other work.
 - h All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

Eligibility

- 2 Candidates for the degree of Doctor of Philosophy are required to have:
 - a
 - (i) completed the requirements for the award of a masters degree with First Class or Second Class (Division I) Honours at The University of Auckland

- or*
 - (ii) completed the requirements for the award of a Bachelors degree with First Class or Second Class (Division I) Honours at The University of Auckland
 - or*
 - (iii) completed all the taught course work requirements (if any) for a Masters degree of The University of Auckland at the equivalent of First Class or Second Class (Division I) Honours level, and have made substantial progress towards completion of the Masters research thesis
 - or*
 - (iv) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to a Masters degree with First Class or Second Class (Division I) Honours or a Bachelors degree with First Class or Second Class (Division I) Honours from The University of Auckland
- and*
- b demonstrated an ability to pursue doctoral-level research.
 - c In exceptional circumstances, the Board of Graduate Studies may consider for registration a person whose qualifications do not meet the requirements of Clause 2a, if it is satisfied that the person's experience in research and the results of that experience are so outstanding that the person is likely to have the ability to complete the degree successfully.

Admission

3 Admission Essential

- a Every candidate for the degree of Doctor of Philosophy must have applied for admission and been admitted to The University of Auckland.

Registration

4 a Registration Essential

- Every candidate for the degree of Doctor of Philosophy must be registered by the Board of Graduate Studies in accordance with this Clause 4.

b Provisional Registration

Registration is provisional for all candidates for the first 12 months following the Date of Registration as defined in Clause 4k of this Statute.

c Application for Registration

Application for registration must be made to the Head of Department, Division, School, Chair of a Board of Studies or Director of the Research Centre or Institute ('the Head of Department') in the discipline in which the candidate is to be primarily registered.

d Part-time Registration

Candidates who are in full-time employment in a research supportive environment at the time of first registration, and who expect to continue in that employment situation, may apply to register as part-time students.

- e An applicant with demanding family responsibilities which prevent attending the University and participating in research activities on a full-time basis may apply to be registered as a part-time student.

f Non-resident Candidature

Where an intending candidate is not resident in Auckland, the Head of Department must provide the Board of Graduate Studies with evidence that the candidate will be provided with research resources and supervisory support at the location in which the research is to be carried out.

g Concurrent Registration

In exceptional cases a candidate may be permitted to enrol concurrently in a second degree in order to complete that degree, provided it is not the qualifying degree for entry into the PhD programme.

h Role of the Head of Department

The Head of Department will make a recommendation in writing to the Faculty Associate Dean (Postgraduate) as to

- (i) whether the candidate:

- (a) meets the eligibility requirements

and

- (b) has a preliminary thesis proposal capable of meeting the requirements of Clause 1d of this Statute

and

- (c) has an appropriate set of goals for the provisional year of registration, agreed to by both the candidate and main supervisor

and

if the Head of Department is of that opinion, then:

- (ii) whether their Department (in conjunction with any other Department where the field of study is interdisciplinary, or other university in the case of jointly awarded degrees) accepts the responsibility for:

- (a) making satisfactory supervision arrangements over the whole course of the PhD

and

- (b) providing adequate research resources and facilities

and

- (iii) whether the field of study is interdisciplinary, and if so, which other Departments will be involved. In these cases, the Heads of any other Departments involved are required to endorse the recommendation

and

- (iv) nominate suitably qualified supervisors and, where appropriate, advisers

and

- (v) in the case of a candidate in a Department of Languages and Literatures, or a candidate for whom joint registration with another university in a non-English speaking country is proposed, a recommendation as to the language in which the thesis is to be submitted and examined.

i Role of the Associate Dean (Postgraduate)

On receipt of the recommendation of the Head of Department, the Faculty Associate Dean (Postgraduate) will make a recommendation in writing to the Board of Graduate Studies as to the matters set out in Clause 4h.

j Role of the Board of Graduate Studies

On receipt of the recommendation of the Faculty Associate Dean (Postgraduate), the Board of Graduate Studies will decide whether or not to register the candidate and, if so, the conditions which will apply to the registration. The Board of Graduate Studies may call for any further information it considers relevant before making its decision.

k Date of Registration

Registration takes effect on the date (the 'Date of Registration') approved by the Board of Graduate Studies. Where a candidate has already started supervised research on the PhD topic the Date of Registration may be backdated by not more than six months, except for a candidate transferring from a masters degree under Clause 2a(iii), when the Date of Registration may be backdated not earlier than the date on which the course work component (if any) of the masters degree was completed.

l Supervision

The Board of Graduate Studies will appoint the supervisors for each candidate. The supervisors must be actively involved in research in the candidate's general field, and must either hold a doctoral degree or be appropriately qualified and experienced. Persons who are themselves candidates for the degree of PhD may not be appointed as supervisors, although they may be appointed as advisers.

- m For each candidate the Board of Graduate Studies will appoint a suitably qualified main supervisor who takes overall responsibility for the supervision of the candidate and for assistance in the provision of research resources. The main supervisor must be a staff member of The University of Auckland.

- n In addition, the Board of Graduate Studies will appoint for each candidate:

- (i) at least one suitably qualified co-supervisor

and/or

- (ii) an advisory committee or adviser/s.

o Course Work

The Board of Graduate Studies may require the candidate to undertake coursework that is considered to be necessary for the successful completion of the programme of research. Such coursework must be completed as part of the provisional registration requirements, will not normally exceed 60 points in total and should either be at the postgraduate level or, in special cases, at Stage III level. Candidates must normally pass any such coursework at the grade of at least B+ or its equivalent.

p Presentation in Te Reo Māori

Candidates wishing to present and defend a thesis in Māori must, before applying to the Head of Department to be registered, obtain the permission of the Pro Vice-Chancellor (Māori). When such permission is granted, the Pro Vice-Chancellor (Māori) will make a recommendation in writing to the Board of Graduate Studies as to;

- (i) whether the candidate has adequate fluency and literacy in te reo Māori in the subject area of the thesis
- and
- (ii) the likelihood of being able to find appropriately qualified examiners for the thesis.

Reviews of Registration

5 a **Provisional Goals**

During provisional registration, a candidate must:

- (i) achieve the goals prescribed by the Board of Graduate Studies at the commencement of the registration
- and
- (ii) complete a full thesis proposal, including a provisional title, a schedule of research, an outline of the thesis structure and a statement of the resources required to complete the research. The thesis proposal should be submitted for approval to the appropriate postgraduate committee of the Department, Institute and/or Faculty in which the candidate is registered. The committee may accept the proposal, or indicate changes needed to the candidate and supervisor/s and request a resubmission, or it may decline to accept the proposal. It will inform the Head of Department of its decision.

b **Provisional Review**

At the end of the 12 months of provisional registration, the supervisor/s and the Head of Department are to submit a formal report to the Board of Graduate Studies on the progress of the candidate. The report should clearly state whether or not the progress of the candidate has been satisfactory, the goals laid down for the provisional year have been achieved and the candidate's research proposal has been approved according to Clause 5a(ii). The report should include a recommendation that the candidate's registration be:

- (i) confirmed
- or
- (ii) terminated
- or
- (iii) continued on a provisional basis for a period of three to six months.

The candidate shall be given an opportunity to make written submissions to the Board of Graduate Studies on the above provisional report.

- c Where the recommendation is to confirm the candidate's registration, the report to the Board of Graduate Studies must include a copy of the candidate's full thesis proposal and provisional title.

d **Annual Review of Registration**

In each year of registration each candidate must pursue a programme of advanced study and research to the satisfaction of the Head of Department and the main supervisor. At the end of each year of registration following the provisional period, the main supervisor, the candidate and the Head of Department are to submit, through the Associate Dean (Postgraduate) of the Faculty, a joint report to the Board of Graduate Studies on the candidate's progress. As part of this report the main supervisor and the Head of Department are to make one of the following recommendations:

- (i) that the candidate's registration be continued
- or
- (ii) that the candidate's registration be continued subject to specified conditions
- or
- (iii) that the candidate's registration be terminated.

The candidate shall be given an opportunity to make written submissions to the Board of Graduate Studies on the above annual report.

e **Specified Conditions for Registration**

Where a recommendation is made under Clauses 5b(iii) or 5d(ii), the Head of Department will also recommend to the Board of Graduate Studies the specific goals and/or conditions to be met by the candidate and the time in which these are to be completed. At the end of this period the Head of Department and main supervisor will advise the Board of Graduate Studies whether or not these requirements have been met. Registration will terminate if the specified conditions have not been fulfilled to the satisfaction of the Board of Graduate Studies.

f **Recommendation to Terminate**

No decision to terminate registration may be made by the Board of Graduate Studies unless the candidate has been notified in writing and given reasonable opportunity to respond.

Enrolment and Fees

6 a **Enrolment**

Candidates for the PhD Degree must be enrolled and pay fees in each academic year for which

they are registered. Candidates need not pay tuition fees for any period during which their registration is suspended under Clause 7f.

- b On enrolment in each academic year every candidate must pay the fee prescribed for that academic year.
- c **Refunds**
A candidate who submits a thesis or terminates their registration will receive a refund of one-twelfth of the tuition fee paid for each complete month of the period between the date of submission of the thesis or termination of registration and the end of the academic year for which fees have been paid.
- d **Fees Other than Tuition Fees**
Unless otherwise exempted under the relevant regulations, all candidates must pay the prescribed Building Levy and Student Services fees and any other fees as may be prescribed from time to time. There is no refund of these fees.
- e **Fees to be Paid before Thesis is Accepted**
No thesis will be accepted for examination unless outstanding fees have been paid for the academic year in which a candidate is registered.
- f **Other Fees Payable**
Candidates who enrol for courses other than those required as part of their programme for the PhD Degree must pay the fees prescribed for those courses on enrolment.

Changes to the Conditions of Registration

- 7 a The Head of Department may, after consultation with the candidate, make a written recommendation to the Board of Graduate Studies for changes in the conditions of registration for the candidate. The candidate may express his or her written views on the recommendation to the Board of Graduate Studies if he or she wishes. After considering a recommendation from the Head of Department, the Board of Graduate Studies may, after considering any submissions made by the candidate, change the conditions of registration for that candidate.
- b **Absence from the University**
Where a resident candidate intends to be absent from the University in pursuit of their research for more than two months, supervisors are to submit for approval by the Board of Graduate Studies, through the Head of Department and before the candidate's departure, suitable plans for the supervision of the candidate during their absence.
- c **Changes in Supervision**
When necessary, the Head of Department is to recommend changes to the supervision of the candidate for approval by the Board of Graduate Studies. This will normally be required when a supervisor is granted leave, resigns or retires.
- d **Change to Part-time Registration**
Candidates who have been registered full-time for a period of two years may apply to be registered part-time.
- e **Extension of Time for Submission**
When the Board of Graduate Studies is satisfied that there is sufficient reason, it may extend a candidate's submission date. Before approving an extension of submission time the Board of Graduate Studies will require the candidate, the supervisor/s and Head of Department to agree on the programme of supervision and schedule of research considered necessary for submission by the new date proposed.
- f **Suspension of Registration**
Where a candidate is unable to continue with their research programme because of circumstances beyond their control, the Board of Graduate Studies may suspend their registration for a specified period of time. The following conditions apply:
 - (i) The length of time for which a candidate's registration may be suspended will be in multiples of whole calendar months.
 - (ii) The Board of Graduate Studies must be satisfied that any period of suspension will not adversely affect the viability of the candidate's research.
 - (iii) Any period of suspension will be excluded from the calculation of the final submission date.
 - (iv) While registration is suspended, a candidate is exempt from fees and enrolment, and is not entitled to any tuition or supervision, or to the use of any other research resources of the University.

g **Termination of Registration**

The Board of Graduate Studies may terminate the registration of any candidate who:

- (i) fails to enrol for any academic year corresponding to a year of registration
or
 - (ii) fails to make payment of any Tuition and Research fees related to the PhD registration
or
 - (iii) applies to cease being registered
or
 - (iv) has not made satisfactory progress while under provisional registration
or
 - (v) has received an unsatisfactory annual report
or
 - (vi) has not met any conditions specified under Clause 5e
or
 - (vii) has not submitted or re-submitted the thesis in time
or
 - (viii) has had the termination of their registration recommended by a decision of a Disputes Committee constituted pursuant to Clause 11 of this Statute
or
 - (ix) is prohibited under the Disciplinary Statute of the University from enrolling.
- Before making a decision to terminate a candidate's registration pursuant to this clause or otherwise, the Board of Graduate Studies will allow the candidate a reasonable opportunity to respond.

Submission8 a **Copies of Thesis**

All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.

b **Time for Submission**

Unless permitted to do otherwise by the Board of Graduate Studies under Clause 7e, a candidate must normally submit the thesis in not less than three and not more than four years from the Date of Registration if they are full-time students, or not less than six and not more than eight years in the case of candidates who have been registered as part-time students for the whole period of their registration. In the case of candidates who have been permitted to change between full-time and part-time, the submission times will be calculated on a pro rata basis.

c **Notification of Submission**

Three months prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.

d **Declaration as to Originality**

The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate's own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma and that written permission has been obtained for any third-party copyright material reproduced in the thesis that represents a 'substantial part' of the other work.

e

Where the thesis contains jointly authored research papers, case studies and/or any other work, published or unpublished, the declaration is to state the extent to which the jointly authored material is the candidate's own work. Evidence that all co-authors have approved the inclusion of the joint work must be supplied.

f **Statement from Supervisors**

When the thesis is submitted, the Graduate Centre will invite a statement from the supervisor/s regarding the context or outcome of the thesis research. This statement must be endorsed by the Head of Department and the candidate. The Graduate Centre will forward a copy of the statement to the Chair of the Examination Committee for its consideration.

g **Language of Thesis**

The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination9 a **General Provisions**

The Head of Department and/or the Associate Dean (Postgraduate) of the Faculty may nominate another person to the Board of Graduate Studies to be authorised to act in his or her place in all of the provisions of this Clause 9. If either the Head of Department or the Associate Dean (Postgraduate) is a supervisor of the candidate, an alternate must be nominated and appointed.

- b Neither the supervisors nor the candidate may communicate with the examiners regarding the examination at any stage of the examination process, except as specified in this Clause 9.

c **Nomination of Examiners**

On notification of submission or intent to submit under Clause 8c, the Head of Department will nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study which is the subject of the thesis. At least one nominee should be from outside New Zealand. The examiners may not be staff members of the University or have been involved in either the thesis research or the preparation of the thesis.

d **Appointment of Examiners**

The Board of Graduate Studies will consider the nominations provided by the Head of Department and any submissions made by the candidate under the provisions of Clause 8c and will appoint two suitably qualified persons who are available to act as examiners. One examiner (the Oral Examiner) must be able to attend the oral examination and will normally be resident in New Zealand or Australia.

e **Appointment of Examination Committee**

The Board of Graduate Studies will also appoint an Examination Committee which will normally be composed of:

- (i) the Head of Department

and

- (ii) an Associate Dean (Postgraduate), who will Chair the Examination Committee

and

- (iii) one other person ('the Head of Department Nominee') nominated by the Head of Department. This person will have thorough knowledge of the general field of the thesis, but not necessarily of the thesis topic, and will normally be a staff member of the University.

No member of the Examination Committee may be a supervisor or have been involved in either the thesis research or the preparation of the thesis. The Associate Dean will normally be from the same Faculty as the candidate, but if that person is in the same Department as the candidate then an Associate Dean from another Faculty should be substituted.

f **Examiners' Reports**

As suppliers of evaluative material in terms of the Privacy Act 1993, all examiners will be informed that the information and reports they supply as such will be held in confidence to supervisors and to persons involved in the formal examination process. Candidates will not be informed of the names, or other identifying information, of their examiners, except that of the Oral Examiner.

- g Each examiner will be provided with a copy of the thesis and, acting independently, is required to provide the Graduate Centre, within two months of receipt of the thesis, with a written report in English on the quality of the thesis according to the criteria outlined in Clause 1d. One copy of the thesis will be provided to the Examination Committee.

- h The examiners will include with their reports one of the following recommendations:

- (i) to award the degree.

The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material.

or

- (ii) to award the degree after specified minor corrections have been made to the thesis to the satisfaction of the Oral Examiner or Nominee, who may be the Main Supervisor, by a specified date.

This recommendation can be made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. When these are corrected, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

- (iii) (a) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Oral Examiner or Nominee, who will be the Head of Department, by a specified date.

This recommendation is made when the Examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. The nature of the revisions must be such that, when the Head of Department acts as the nominee of the Oral Examiner, he or she can certify that compliance has been achieved. In such cases, the Head of Department may discuss the revisions with the Head of Department nominee on the Examination Committee and/or Main Supervisor. These changes can normally be made within a 3-6 month period.

or

- (b) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Examiner by a specified date.

This recommendation is made when the Examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. The nature of the revisions must be such that subject-specific knowledge is required and the Examiner wishes to see and approve the changes. These changes can normally be made within a 3-6 month period.

or

- (iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only.

This recommendation is made when the Examiner concludes that the thesis is not yet of PhD standard. It will require either further research, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required PhD standard. The candidate will be permitted to resubmit, normally within a 12 month period.

or

- (v) not to award the degree.

This recommendation is made when the Examiner is of the opinion that the thesis has substantive flaws incompatible with the requirements of a PhD.

i **Replacement of Examiners**

If a report has not been received within two months, the Graduate Centre will send a reminder to the examiner and advise him or her that unless the report is received within two further months the appointment as examiner will lapse. If the report has not been received within two months of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner.

j **Consideration of Examiners' Reports**

Upon receipt of both of the examiners' reports, the Graduate Centre will provide copies for consideration by the Examination Committee. The examiners' reports will also be made available to the supervisor/s on a confidential basis. Supervisor/s may comment on the reports in writing to the Examination Committee on a confidential basis. The Examination Committee may also request clarification of issues raised in examiners' reports from the examiners and, if necessary, from supervisors. If the recommendations of the examiners are in conflict and the Examination Committee considers that the conflict may be resolved, the Chair may invite the two examiners to consult and to provide a written report or reports on the outcome of their consultations.

k **Recommendation of the Examination Committee**

The Examination Committee will then make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Clause 9j and which recommends one of the following:

- (i) to appoint one or more further independent Examiners to report on any areas of conflict

or

- (ii) to proceed to the Oral Examination

or

- (iii) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only

or

- (iv) not to award the degree.

l **Further Examiners**

In the event that the examiners' reports are in serious conflict the Board of Graduate Studies may appoint further independent external examiners to report on any matters which it may specify. In this event the candidate will be kept informed, and Clauses 9f to 9i will apply for the reports of the further examiners.

m Oral Examination

In the event that the Board of Graduate Studies accepts a recommendation to proceed to an oral examination, the following procedures will apply:

- (i) The Head of Department will arrange this examination.
- (ii) The Board of Graduate Studies, on the recommendation of the Head of Department, will appoint a person to act as an independent Chair of the oral examination. The Chair must be a member of the academic staff of the University, but will not normally be a member of a faculty in which the candidate is registered.
- (iii) The examination must be attended by the candidate, the Oral Examiner, the Chair and the Head of Department nominee on the Examination Committee.
- (iv) The Graduate Centre will forward copies of the examiners' reports to the supervisor/s. The main supervisor may attend the oral examination, but will not act as an examiner and may only participate to the extent requested by the Chair.
- (v) During the oral examination, the Oral Examiner and Head of Department nominee will discuss with the candidate the subject of the thesis and relevant matters in the field or fields to which the subject belongs. The Oral Examiner will discuss with the candidate issues raised in the examiners' reports and ask questions of the candidate on behalf of the other examiner.

n Recommendation of the Oral Examination

On completion of the oral examination, the Chair will provide a written report and recommendation, endorsed by the Head of Department nominee and the Oral Examiner, to the Board of Graduate Studies. The report will include one of the following recommendations:

either

- (i) to award the degree

or

- (ii) to award the degree after specified minor corrections have been made to the thesis to the satisfaction of the Oral Examiner or nominee, who may be the Main Supervisor, and by a specified date

or

- (iii) (a) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Oral Examiner or Nominee, who will be the Head of Department, by a specified date

or

- (b) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Examiner or Examiners by a specified date

or

- (iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit under Clause 9k (iii)

or

- (v) not to award the degree.

In the case of recommendations (iii) and (iv), the report must also state clearly the nature of the revisions recommended.

o When Revision and Resubmission are Permitted

In the event that the Board of Graduate Studies requires the candidate to revise the thesis for resubmission, either prior to or following an oral examination, the following provisions apply:

- (i) If an oral examination has already been held, a copy of the report of the oral examination will be sent to the Examination Committee.
- (ii) The Examination Committee will agree on the date by which the thesis is to be resubmitted and the nature of the revisions recommended, and will convene a meeting with the candidate and supervisors to discuss these revisions. Both the revisions and the date are then to be reported in writing by the Chair of the Examination Committee to the Graduate Centre for approval by the Board of Graduate Studies and formal communication to the candidate. The date of resubmission may not be more than 12 months from the date of the oral examination or, in the case of a recommendation under Clause 9k(iii), not more than 12 months from the date the examiners' reports were forwarded to the Examination Committee by the Graduate Centre.
- (iii) The candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month by which the thesis is to be resubmitted. The registration of the candidate is to continue under the conditions applying at the first date of submission.
- (iv) If the thesis is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated.
- (v) Upon resubmission, the revised thesis is to be examined as a whole by the same examiners

in accordance with the provisions of this Clause, excepting that a further resubmission may not be recommended and that the Examination Committee may recommend that a second oral examination not be held. If one or both of the original examiners is unavailable to re-examine the thesis the Board of Graduate Studies will appoint alternative examiners.

- (vi) Upon receipt of both of the examiners' reports, the Graduate Centre will provide copies of the new examiners' reports, the original examiners' reports and the oral examination (if held) to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Clause 9j. Following consideration of all examiners' reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Clause 9j. In the case where an oral examination has not already been held the Examination Committee report must recommend that either an oral examination be held or the degree not be awarded. In the case where an oral examination has previously been held the Examination Committee report must recommend one of the following:
 - (a) to proceed to a second oral examination
 - or
 - (b) to award the degree
 - or
 - (c) to award the degree after specified minor corrections have been made to the thesis to the satisfaction of the Oral Examiner or Nominee, who may be the Main Supervisor, by a specified date
 - or
 - (d) not to award the degree.
- p **Final Decision**
After considering all of the reports of the examiners and the Examination Committee the Board of Graduate Studies will make the final decision as to the award of the degree.
- q **Copies for Deposit**
- (i) On successful completion of the examination, candidates who first registered in a PhD programme **prior to 1 January 2007** will be required to deposit either, three hardbound copies of the thesis or, two hardbound copies and one digital copy of the thesis, corrected as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.
 - (ii) On successful completion of the examination, candidates who first registered in a PhD programme **on or after 1 January 2007** will be required to deposit two hardbound copies of the thesis and one digital copy, corrected as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.
 - (iii) When two hardbound copies and a digital copy of the PhD thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.
- r
- (i) The digital thesis deposited shall be formatted as specified in the *Guidelines on Formatting and Submitting a Digital Thesis at The University of Auckland*.
 - (ii) A thesis which is deposited in digital form will be accessible through the University's digital repository, unless embargoed under Clause 24 of the Examination Regulations.

Appeals

10 As to Registration

- a Candidates, Supervisors or Heads of Department may appeal against any decision of the Board of Graduate Studies made under Clauses 4, 5, 7 or 8 of this statute, normally within three months of the making of the decision, on the grounds that:
 - (i) relevant information which was not available to the Board of Graduate Studies at the time of its making the decision has since become available
 - and/or
 - (ii) the procedure adopted in arriving at the decision was unfair. The appeal must state clearly all grounds relied on by the appellant and attach all relevant documentation.
- b Any appeal made under Clause 10a will be considered by the Chair of the Board of Graduate Studies, or their nominee, who may seek further information relating to the grounds of the appeal and shall notify the candidate of such information before making any decision. The Chair shall give a written decision outlining the reason(s) for the decision. A decision:
 - (i) grounded on the lack of relevant information shall be final
 - or
 - (ii) grounded on procedural unfairness, may be further appealed within six months after the decision is made, to the Vice-Chancellor (or nominee) whose decision shall be final.

As to Examination

- c If a PhD candidate believes that he or she has been significantly disadvantaged by the examination process, or by any part of the examination process, then a written appeal may be made to the Board of Graduate Studies, setting out the grounds of the appeal. All relevant documents relied upon must be submitted with the appeal.
- d Any appeal as to examination process must be lodged within three months of the result of the examination being officially communicated to the candidate. The appeal document must state clearly all grounds relied on and include all relevant documents.
- e In the case of appeals as to examination process:
 - (i) The Chair of the Board of Graduate Studies will undertake a preliminary investigation and determine if there are grounds for the appeal to be taken to a further stage.
 - (ii) If there are grounds for further consideration of an appeal, this will be undertaken by two members of the Board of Graduate Studies who have not been involved in the examination process who will make a recommendation to the Vice-Chancellor.
 - (iii) The candidate will be provided with a copy of the recommendation to the Vice-Chancellor and will have the opportunity to respond to the recommendation.
 - (iv) The decision of the Vice-Chancellor will be final and may involve a re-examination of the work.

Dispute Resolution Procedures

- 11 a Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

- 12 a This statute came into force on 1 January 2008 and revoked the previous Statute for the Degree of Doctor of Philosophy.
- b For candidates initially registered under a previous statute, the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled, where it is satisfied that the candidate would otherwise be at a disadvantage.

 - and*
 - (ii) state what portion (if any) of work submitted has been previously presented for a degree or diploma of The University of Auckland or any other university
 - and*
 - (iii) declare that the work in substantially its present form has not been previously accepted for the award of a degree or diploma in this or any other university and is not being concurrently submitted for a degree or diploma in any other university.
- 7 The examination shall be carried out in accordance with the Procedure for the Examination of Higher Degrees, as determined by Council from time to time after considering any recommendations from Senate and published as a supplement to this Statute.

Procedure for the Examination of Higher Degrees

- 1 This procedure applies to the examination of the Degrees of Doctor of Literature, Doctor of Laws, Doctor of Science and Doctor of Engineering.
- 2 As soon as possible after an application to be examined has been lodged, Senate or its delegate shall appoint a subcommittee consisting of the Dean of the relevant Faculty (or nominee), one Professor from a Department appropriate to the application, and another Professor from the Faculty concerned to make recommendations as to not fewer than five persons in the field covered by the work, who are not members of staff of The University of Auckland, and who might be suitable as either the moderator or examiners for the work.
- 3 Senate or its delegate shall appoint a Moderator from the persons recommended by the subcommittee constituted under Regulation 2 who will:
 - a consider the work and submit, through the Registrar, a preliminary report, which shall indicate whether, in his or her opinion, the examination should proceed and, if so,
 - either*
 - b state which of the other persons recommended by the subcommittee are suitable examiners in the field covered by the work
 - or*
 - c if other persons are more appropriate, provide their names to the Registrar.
- 4 Upon receipt of the report of the Moderator Senate shall decide whether to proceed with the examination. If Senate determines that the examination shall not proceed or that the Degree shall not be awarded (Regulation 8) the candidate may not lodge a further application to be examined for a higher degree until a period of five years or more has elapsed from the date of Senate's decision. If

the examination is not to proceed the candidate shall be entitled to a refund of one half of the fees paid.

- 5
 - a If the examination is to proceed Senate shall appoint two independent External Examiners of whom at least one shall be resident outside New Zealand, provided that Senate may in its discretion appoint an additional Examiner who may be a member of the teaching staff of The University of Auckland.
 - b The contents of the Moderator's report shall not be communicated to the Examiners.
- 6 The duties of each Examiner shall be:
 - a to report independently on the quality of the work and its value as a significant contribution to learning
 - and*
 - b to recommend whether or not the Degree shall be awarded. Where the recommendation is that the Degree shall not be awarded, the examiner may recommend that the candidate be permitted to resubmit the work with further published work at a later date. A resubmission shall be accompanied by a further full examination fee.
- 7 All reports and other communications shall be sent to the Registrar who shall refer them to the Moderator.
- 8 The Moderator shall consider the reports of the Examiners and prepare a final report based upon them which, together with the reports of the Examiners, shall be placed before Senate and Senate shall determine whether or not the Degree shall be awarded.
- 9 Notwithstanding anything in Regulation 8 of these Regulations the Moderator shall, where only two examiners have been appointed and their recommendations are conflicting, submit to Senate the name of a further person qualified to act as an Examiner and in such case Senate shall appoint the person so named or some other suitable person to be an additional Examiner to furnish an independent report in accordance with the provisions of Regulation 6 of these Regulations, which shall be considered by Senate together with other reports.

COURSE PRESCRIPTIONS

The Course Prescriptions contain the full list of approved University of Auckland courses. Before selecting courses from this Calendar, students and potential students are advised to ascertain which courses are expected to be offered in 2010 and in which semester they are scheduled by referring to the Class Schedule on The University of Auckland website at www.auckland.ac.nz/ndeva or contacting the Student Information Centre in The ClockTower. Course availability details (correct at the time of print) are also on page 678.

Where courses in the following Course Prescriptions are listed with an 'A' and a 'B' option, this means that, if they are offered, they will be taught over two semesters and students must enrol in both Part A and Part B to complete the course. In order to be credited with such a course, students must complete both Part A and Part B. Courses with no 'A' or 'B' designation are taught over one semester.

The Prescriptions are listed by faculty, in alpha-numeric order and should be read in conjunction with the relevant regulations.

ANTHRO 203 (15 Points)
Theoretical Approaches to Society and Culture
 A survey of some of the key anthropological theories used to analyse human social life, discussed by reference to cross-cultural studies. Also considers current debates/issues within the discipline.
Prerequisite: ANTHRO 100, and 101 or 102 or 103 or 104, or 60 points passed

ANTHRO 204 (15 Points)**Ethnography of Island Polynesia**

What is distinctive about Polynesian culture and society? How and why are Polynesian cultures alike? How are they different? In what ways are Fiji, Samoa, Tikopia, Tokelau and Tonga different or similar to other Oceanic cultures? Anthropological studies of these questions will be explored through indigenous Polynesian, anthropological and historical accounts.

Prerequisite: ANTHRO 100 or 104, or 60 points passed

ANTHRO 206 (15 Points)**Origins of Civilisation**

The shift from a hunter-gatherer way of life to one based on village life and agriculture is foundational for the development of complex society. The course considers what socio-cultural changes were involved as Holocene societies developed in different parts of the world and how the relationship between humans and the environment changed.

Prerequisite: ANTHRO 101 or 60 points passed

ANTHRO 207 (15 Points)**Coming of the Māori**

An introduction to New Zealand's archaeological history, from early Māori origins to the initial period of Western contact. Tropical Polynesian adaptations to New Zealand's temperate climate, Māori's rich material culture and arts, resource use and environmental change, development of classic Māori society, and the emerging field of historic archaeology are covered.

Prerequisite: ANTHRO 101 or 30 points at Stage I in Museums and Cultural Heritage or 60 points passed

ANTHRO 210 (15 Points)**Ethnographies of the Contemporary Māori**

The history of ethnographic and other accounts of contemporary Māori society, examining the derivation of various social theories and their application to the Māori under changing political and economic circumstances in New Zealand since industrialisation.

Prerequisite: ANTHRO 100 or MĀORI 130 or 60 points passed

ANTHRO 211 (15 Points)**Anthropological Perspectives on Gender**

Gender as a cultural construction has been a dynamic field of anthropological inquiry for the past three decades. How do various peoples exhibit and conceptualise gender differences? How have anthropologists studied them?

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104, or 60 points passed

ANTHRO 215 (15 Points)**Human Sexuality**

Human sexuality and sexual behaviour explored from a variety of perspectives within anthropology. Topics include: the evolution of sex, cross-cultural variation in sexual behaviour, sex and the brain, sex through the life course, and the impact of sexually transmitted diseases.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104, or 30 points passed in Social Science for Public Health or 60 points passed

ANTHRO 216 (15 Points)**Race, Ethnicity and Identity in Popular Music**

The reflection of identity explorations and negotiations in various mainstream popular musics, especially in regard to race and ethnicity. Musical styles, albums and artists from genres such as Punk, Hip Hop, Country and Soul will be explored, showing popular music's

usefulness as a tool for exploring and documenting social phenomena and power structures.

Restriction: POPMUS 205

ANTHRO 217 (15 Points)**Rhythm, Blues and Rock**

African-American popular music and culture from the mid-1930s through the early 1960s, including styles such as blues, R 'n' B, and early Rock 'n' Roll. Considers issues of racial and gendered representation, creativity, the popular music industry, the place of music in the development of "youth culture" and stylistic trends. Individual performers, recordings and performances, are also examined.

Prerequisite: ANTHRO 103 or 106 or 60 points passed

Restriction: POPMUS 206

ANTHRO 219 (15 Points)**Contemporary Perspectives on Music and Culture**

Examines the multiple roles and meanings of music in human culture through consideration of specific musical instances and music-culture case studies. Views music as an independent creative art form and as a symbolic component of cultural expression, as well as a paradigm for cultural structures and behaviours. Considers the field of ethnomusicology from the perspectives of anthropology and musicology, among other disciplines.

Prerequisite: ANTHRO 103 or 104 or 60 points passed

ANTHRO 221 (15 Points)**European Prehistory: From Cave Art to the Celts**

An overview of major developments in the prehistory of Europe, including the British Isles, from Palaeolithic art to the Iron Age ending with the Vikings. Emphasis will be on significant, well-studied sites, archaeological treasures, population movements and interactions which help us to understand European heritage.

Prerequisite: ANTHRO 101 or 60 points passed

ANTHRO 222 (15 Points)**Human Biodiversity**

The study of modern human biology focusing on variation and adaptability at the molecular, individual and population levels. Topics include: nutrition, growth and development, environmental effects on human biology and concepts of genetic variation including race.

Prerequisite: ANTHRO 102 or 30 points passed at Stage I in Social Science for Public Health or 60 points passed

ANTHRO 225 (15 Points)**Anthropology of Art and Performance**

Explores art, material culture, music and performance within diverse socio-cultural contexts. Introduces analytic methods that can be used to deepen appreciation and understanding of different art forms, their aesthetic systems, and the ways that they are encoded with meaning.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 60 points passed

Restriction: ANTHRO 315

ANTHRO 232 (15 Points)**The Music of Japan**

The study of the traditional narrative and dramatic music traditions in the context of their related theatre genres (Noh, Bunraku, Kabuki etc). Attention will also be paid to associated lyric musical styles.

Prerequisite: ANTHRO 103 or 60 points passed

Restriction: ANTHRO 332

ANTHRO 233 (15 Points)**The Music of India**

The study of selected musics from the Indian sub-continent, including traditional, religious, and street musics, classical vocal and instrumental styles and the popular musics of the commercial cinema and music industries.

Prerequisite: ANTHRO 103 or 60 points passed

Restriction: ANTHRO 333

ANTHRO 234 (15 Points)**Popular Musics of the Pacific**

From hip hop to reggae to pop, this course explores Pacific popular music genre, artists and songs as well as relevant musical techniques, modes of distribution and processes of fusion and change. It probes the positions and possibilities of Pasifika pop musics by discussing critical questions about culture, authenticity, modernisation, consumerism, identity and musical (ex)change.

Prerequisite: ANTHRO 103, 104, MUSIC 145 or POPMUS 106, or 60 points passed

ANTHRO 238 (15 Points)**Musics of the Pacific**

The study of traditional and popular musics in Oceania, with particular reference to Polynesia: Samoa, Tonga, Niue, Tokelau, Hawaii, Tahiti, Marquesas, Cook Islands and Aotearoa.

Prerequisite: ANTHRO 103 or 104 or 60 points passed

Restriction: ANTHRO 308

ANTHRO 239 (15 Points)**The Music of Aboriginal Australia**

A survey of traditional and popular musics of Aboriginal Australia, with particular reference to Central Desert and North Australian regions.

Prerequisite: ANTHRO 103 or 60 points passed

Restriction: ANTHRO 344

ANTHRO 240 (15 Points)**Directed Studies in Anthropology**

A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of anthropology under supervision of appropriate staff.

Prerequisite: Approval of Head of Department

ANTHRO 241 (15 Points)**Anthropology of the Body**

Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender, and religious ritual will be considered. Explores the cultural construction and social experience of the human body in a diverse range of settings.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Restriction: ANTHRO 354

ANTHRO 242 (15 Points)**Cross-cultural Economics**

Examines ways in which people throughout the world make a living, organise their productive activities, obtain goods and services from others through exchange, and appropriate and consume objects. Covers division of labour, similarities and differences between gifts and commodities, concepts of property, types of money and exchange, spheres of exchange, and connections between power and material conditions of life.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Restriction: ANTHRO 313

ANTHRO 243 (15 Points)**Special Topic**

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 244 (15 Points)**The Politics of Culture**

A critical exploration of contemporary debates on and around the idea of 'culture'. Focuses particularly on controversies at the interface between anthropology and politics, from problems of cultural translation and the appropriation of culture, to the politicisation of culture, multiculturalism and the rise of the 'consumer culture'.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Restriction: ANTHRO 330

ANTHRO 245 (15 Points)**Special Topic in Biological Anthropology**

Prerequisite: ANTHRO 102 or 60 points passed

ANTHRO 246 (15 Points)**Tradition and History in New Zealand Archaeology**

This course will examine Māori traditions and history as a guide to processes in the New Zealand archaeology. Case studies will include Māori canoe traditions, the expeditions of Hongi Hika and Te Rauparaha, and the Ngai Tahu settlement of the South Island.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Restriction: ANTHRO 346

ANTHRO 247 (15 Points)**Anthropology Today: Debates in Culture**

The primary aim is to provide students with an introduction to some of the more topical and controversial themes that social anthropologists are currently engaged with. Topics include: the culture of terrorism, anthropology and cyberculture, the anthropological study of prisons, race and racism, and the politics of representation.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Restriction: ANTHRO 331

ANTHRO 248 (15 Points)**Special Topic**

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 249 (15 Points)**Archaeology and Identity in Palestine/Israel**

Examines the history of archaeology in Palestine/Israel, recent archaeological findings and how new interpretations are changing our understandings of the past and conflicts over the use of archaeology in contemporary identity politics.

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Restriction: ANTHRO 359

ANTHRO 250 (15 Points)**Special Topic**

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 251 (15 Points)**Special Topic**

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 252 (15 Points)**Special Topic**

Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Stage III**ANTHRO 300 (15 Points)**
History of Anthropology

A historically contextualised perspective on anthropology as an integrated discipline from its origins to the mid-twentieth century. Organised thematically around ongoing debates, important figures and events and changing research modes in the various subdisciplines in anthropology.

Prerequisite: 105.202 or ANTHRO 200 or 201 or 203, or 30 points at Stage II in History and Philosophy of Science and Technology, or 120 points passed

ANTHRO 303 (15 Points)
Evolution of Human Behaviour

A critical look at evolutionary models for various human and non-human primate behaviours. Is there evidence of a biological basis for cooperation? How about dominance, infanticide, warfare, racism or sexism?

Prerequisite: ANTHRO 201 or 120 points passed

ANTHRO 304 (15 Points)
Contemporary Oceania

Critical issues in the islands of the Pacific: political, economic, social, environmental and ideological.

Prerequisite: ANTHRO 203 or PACIFIC 201 and ANTHRO 204, or 120 points passed

ANTHRO 306 (15 Points)
Pacific Archaeology

Archaeology, migration, navigation, trade, settlement patterns, emergence of complex society and ethnohistory of the region. This course does not include New Zealand which is covered by a separate course.

Prerequisite: ANTHRO 200 or 120 points passed

Restriction: ANTHRO 706

ANTHRO 307 (15 Points)
Australian Aboriginal Archaeology

Understanding the past and present of Aboriginal Australia through the study of archaeology, including the origins of the Australians, colonisation and adaptations to arid, temperate and tropical environments.

Prerequisite: ANTHRO 200 or 203 or 120 points passed

Restriction: ANTHRO 707

ANTHRO 308 (15 Points)
Advanced Studies in the Musics of the Pacific

The study of selected musics from Oceania, highlighting issues of indigenous systems, colonisation, nationalism, forms of authority and contemporary practice.

Prerequisite: ANTHRO 219 or 120 points passed

Restriction: ANTHRO 238

ANTHRO 309 (15 Points)
Quantitative Methods in Anthropology

Introduction to analytical approaches to anthropological data, providing professional skills of particular interest to students considering post-graduate work. Topics include: quantitative research design, basic statistical concepts and methods, as well as use of statistical software. This course assumes only a limited mathematical background.

Prerequisite: ANTHRO 200 or 201 or 203 or 120 points passed

ANTHRO 310 (15 Points)
Reading Ethnography

Ethnographic texts are the major outcome of research in social and cultural anthropology. This seminar-

based course compares different ethnographies and approaches to ethnographic research and writing.

Prerequisite: ANTHRO 203

ANTHRO 311 (15 Points)
New Zealand Archaeology

Case studies in the archaeology of New Zealand, from its beginnings to the present day.

Prerequisite: ANTHRO 200 or 120 points passed

ANTHRO 314 (15 Points)
Issues in New Zealand Ethnography

Discusses contemporary anthropological theory and ethnography in relation to topics such as: culture, community, identity, inequality, gender, multiculturalism and biculturalism in Aotearoa New Zealand.

Prerequisite: ANTHRO 203 or 120 points passed

ANTHRO 315 (15 Points)
Anthropology of Art and Performance

Explores art, material culture, music and performance within diverse socio-cultural contexts. Introduces analytic methods that can be used to deepen appreciation and understanding of different art forms, their aesthetic systems, and the ways that they are encoded with meaning.

Prerequisite: ANTHRO 201 or 203 or HERITAGE 200 or MUSEUMS 200 or 120 points passed

Restriction: ANTHRO 225

ANTHRO 316 (15 Points)
Biological Anthropology in the Pacific

Where did Pacific people come from? How did they adapt to their new environment? How did European contact affect their health and lives? What have been the impacts of urbanisation and westernisation? The current theory and methods of biological anthropology as applied to the Pacific are discussed.

Prerequisite: ANTHRO 201 or HLTHSOC 200 or SOCSCIPH 200 or 120 points passed

ANTHRO 317 (15 Points)
Field Methods in Archaeology

Participation in a field school involving an intensive introduction to all aspects of excavation and subsequent laboratory analysis and report preparation.

Prerequisite: ANTHRO 200 or 120 points passed

Restriction: ANTHRO 737

ANTHRO 318 (15 Points)
Approaches to Archaeological Science

An introduction to the application of scientific techniques in archaeology. Topics covered will include: site location, dating, sourcing archaeological material, investigation of artefact manufacture and use, and study of archaeological sediments. Coursework will include a series of practical laboratories.

Prerequisite: ANTHRO 200 or 120 points passed

ANTHRO 319 (15 Points)
World-view and Religion

Anthropological approaches to religion and world-view. Includes cross-cultural approaches to meaning, belief, religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.

Prerequisite: ANTHRO 203 or 120 points passed

ANTHRO 320 (15 Points)
Ethnographic Film and Photography

Explores the uses of photography and film in the production and dissemination of anthropological knowledge. A goal of this course is to increase students'

awareness of the choices that are made at all stages in the production of anthropological images. The course will also use ethnographic film and photography to consider issues of ethnographic representation more generally.

Prerequisite: ANTHRO 200 or 201 or 203 or 219 or 15 points from FTVMS 200–214, 216–219 or 120 points passed

ANTHRO 321 (15 Points)

Equality and Inequality

Examines conceptualisations, realities and consequences of equality and inequality cross-culturally. Considers whether there are egalitarian societies and whether inequality is inevitable. Covers types and systems of inequality such as slavery, gender inequality, caste and class, as well as differences between economic and political inequality, and between equality of opportunity and equality of results.

Prerequisite: ANTHRO 200 or 201 or 203 or 120 points passed

ANTHRO 322 (15 Points)

Special Topic in Anthropology

Prerequisite: ANTHRO 200 or 201 or 203 or 120 points passed

ANTHRO 323 (15 Points)

Special Topic in Ethnomusicology

Prerequisite: ANTHRO 219 or 120 points passed

ANTHRO 324 (15 Points)

Medical Anthropology

Biological and social anthropological approaches to health, employing cross-cultural perspectives and critical analysis of health, illness and disease, health systems and health policy.

Prerequisite: ANTHRO 201 or 203 or HLTHSOC 200 or SOCSCIPH 200 or 120 points passed

ANTHRO 328 (15 Points)

Bioarchaeology

A practical introduction to the archaeological analysis and interpretation of biological remains, emphasising faunal materials but also including macrobotanical remains and pollen.

Prerequisite: ANTHRO 200 or 120 points passed

ANTHRO 330 (15 Points)

The Politics of Culture

A critical exploration of contemporary debates on and around the idea of 'culture'. Focuses particularly on controversies at the interface between anthropology and politics, from problems of cultural translation and the appropriation of culture, to the politicisation of culture, multiculturalism and the rise of the 'consumer culture'.

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 203

Restriction: ANTHRO 244

ANTHRO 331 (15 Points)

Anthropology Today: Debates in Culture

The primary aim is to provide students with an introduction to some of the more topical and controversial themes that social anthropologists are currently engaged with. Topics include: the culture of terrorism, anthropology and cyberculture, the anthropological study of prisons, race and racism, and the politics of representation.

Prerequisite: ANTHRO 203 or 120 points passed

Restriction: ANTHRO 247

ANTHRO 332 (15 Points)

Advanced Studies in the Music of Japan

The study of Japanese narrative and dramatic music

traditions in the context of their related theatre genres (Noh, Bunraku, Kabuki etc). Special emphasis is given to musical procedures, music-text relationships and the social and narrative contexts of production. Attention will also be paid to associated lyric musical styles.

Prerequisite: ANTHRO 219 or 120 points passed

Restriction: ANTHRO 232

ANTHRO 333 (15 Points)

Advanced Studies in the Music of India

The study of selected musics from the Indian sub-continent, including traditional, religious and street musics, classical, vocal and instrumental styles, and the popular musics of the commercial cinema and music industries. The relationship between Indian cultural practice in India and in New Zealand will be considered.

Prerequisite: ANTHRO 219 or 120 points passed

Restriction: ANTHRO 233

ANTHRO 335 (15 Points)

Evolution of Human Physiology

Discusses the evidence for interactions between human ecology, physiology, behaviour, health and reproduction. The evolutionary function of physiological responses to our physical and social ecology is addressed, as are the health risks encountered by people living at the extremes of natural or modern environments. The human evidence is complemented by studies of other extant primate species.

Prerequisite: ANTHRO 201 or 120 points passed

ANTHRO 336 (15 Points)

Race and Ethnicity

Ideas and debates about racial and ethnic differences. How real are these differences? How are these cultural constructions related to economic, political and ideological forces? What are the relationships between race, ethnicity and identity?

Prerequisite: ANTHRO 203 or 120 points passed

ANTHRO 337 (15 Points)

Birth, Death and Sex: Evolutionary Life History

How do biology and culture affect our reproduction? What factors underlie the patterns of death and ageing and how is personal survival balanced against future reproduction? Using evolutionary theory and demographic anthropology, critical questions about individual development, reproductive ecology, parental investment and population growth and decline are explored.

Prerequisite: ANTHRO 201 or 120 points passed

ANTHRO 339 (15 Points)

Anthropology and Development

Anthropology of development and anthropology in development; anthropological critiques of the notion of 'development'; debates about anthropological praxis and ethics in development; case-based anthropological analyses of development interventions and methods and the applications of anthropological expertise.

Prerequisite: ANTHRO 203 or 120 points passed

ANTHRO 340 (15 Points)

Heritage Conservation in Aotearoa

Addresses the main principles of heritage conservation focusing on the rationale rather than treatment methods. Special emphasis is given to the fields of: conservation of place, archaeological, architectural, ethnographic and fine art conservation. Provides students with a cultural orientation to conservation where issues are examined through several contexts,

including anthropological studies and conservation science.

Prerequisite: ANTHRO 100 and 101, and 200 or 201 or 203 or HERITAGE 200 or MUSEUMS 200, or 120 points passed

ANTHRO 342 (15 Points)

Special Topic in Anthropology

Prerequisite: ANTHRO 200, 201, 203 or 219 or 120 points passed

ANTHRO 343 (15 Points)

Global Interactions in Popular Music

Studies selected examples and genres within the range of musics labelled 'world beat' or 'world musics'. Focuses on popular music fusions of distinct musical traditions with trans-national marketing practices and 'mainstream' popular music styles. Theorises these musical styles and trends in relation to constructions of local and global cultures, as well as questions of tradition and authenticity, commodification and control.

Prerequisite: ANTHRO 219 or 120 points passed

ANTHRO 344 (15 Points)

Advanced Studies in the Music of Aboriginal Australia

The study of selected musics from Aboriginal Australia, highlighting issues of indigenous systems, religious belief and practice, music and land rights, forms of authority, and contemporary practice.

Prerequisite: ANTHRO 219

Restriction: ANTHRO 239

ANTHRO 345 (15 Points)

Directed Studies in Anthropology

A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of Anthropology under supervision of appropriate staff.

Prerequisite: ANTHRO 200 or 201 or 219 or 203 and approval of Head of Department

ANTHRO 346 (15 Points)

Tradition and History in New Zealand Archaeology

This course will examine Māori traditions and history as a guide to processes in the New Zealand archaeology. Case studies will include Māori canoe traditions, the expeditions of Hongi Hika and Te Rauparaha, and the Ngai Tahu settlement of the South Island.

Prerequisite: ANTHRO 200 or 201 or 203 or 219 or 120 points passed

Restriction: ANTHRO 246

ANTHRO 347 (15 Points)

Special Topic in Anthropology

Prerequisite: 30 points at Stage II in Anthropology including either ANTHRO 200 or 201

ANTHRO 348 (15 Points)

Perspectives on Human Growth

Adopts evolutionary and biocultural perspectives in examining patterns of human growth and maturation. Human developmental patterns are placed within an evolutionary framework using evidence from non-human primates and earlier hominid remains. Variability within and among human populations in growth and developmental timing is considered in terms of genetics interacting with physical, biotic and social factors.

Prerequisite: ANTHRO 201 or 120 points passed

ANTHRO 349 (15 Points)

Primate Behaviour, Ecology and Conservation

Primates are a diverse group of mammals, varying in diet, group sizes, range sizes, geographical distribution

and abundances. Due to habitat destruction, one fourth of this diversity (26%) is in immediate danger of extinction. This course will explore the diversity of the order Primates and will examine patterns of abundance, distribution and diversity of living species, and the threats to their survival today.

Prerequisite: ANTHRO 201 or 120 points passed

ANTHRO 350 (15 Points)

Environmental Anthropology

An exploration of human-environmental relationships in a variety of cultural contexts. From an anthropological perspective, it considers how people imagine, explain, experience and interact with a range of different socio-cultural and physical environments, and how they encode and respond to meaning in their material surroundings. Key themes include cognition, the construction of worldviews, concepts of nature, cultural landscapes, environmental management, colonisation and development.

Prerequisite: ANTHRO 203 or 120 points passed

ANTHRO 351 (15 Points)

Special Topic

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 203

ANTHRO 352 (15 Points)

Special Topic in Biological Anthropology

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 201

ANTHRO 353 (15 Points)

Archaeology in Practice

Contemporary approaches to archaeological practice: materials, analysis and interpretation.

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 200

ANTHRO 354 (15 Points)

Anthropology of the Body

Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender and religious ritual will be considered. Explores the cultural construction and social experience of the human body in a diverse range of settings.

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 203

Restriction: ANTHRO 241

ANTHRO 355 (15 Points)

Anthropology and Public Policy

Examines the way 'policy' has become an increasingly central organising principle in contemporary societies, shaping the way we live, act and think. Drawing on anthropological and sociological theories of power, governance and subjectivity, it explores how policy creates new categories of individuals such as 'citizens', 'nationals', 'criminals' and 'deviants', and the influence policy plays in the way individuals construct themselves as subjects.

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 203

Restriction: ANTHRO 755

ANTHRO 356 (15 Points)

Anthropology and Intellectual Property

Examines recent anthropological contributions to debates about intellectual property. These include concepts of ownership, the objectification and appropriation of indigenous knowledge, creativity, bioprospecting, the protection of intangible cultural

property, and the effects of global flows of information on persons, privacy and the ownership of ideas.

Prerequisite: 30 points at Stage II in Anthropology including ANTHRO 203

Restriction: ANTHRO 756

ANTHRO 357 (15 Points)

Gender, Sexuality and Popular Music

Explores the ways in which gender and sexual identities are both reflected in and modified by mainstream popular music: from 'girl power' to boy bands; from outwardly gay and lesbian artists to the gay appropriation of heterosexual female divas; from the camp masculinity of heavy metal to lesbian rock and riot grrrls; from women-hating gangster rappers to powerful women in the recording industry.

Prerequisite: 135 points passed

Restriction: POPMUS 306

ANTHRO 359 (15 Points)

Archaeology and Identity in Palestine/Israel

Examines the history of archaeology in Palestine/Israel, recent archaeological findings and how new interpretations are changing our understandings of the past and conflicts over the use of archaeology in contemporary identity politics.

Prerequisite: ANTHRO 200 or 120 points passed

Restriction: ANTHRO 249

ANTHRO 360 (15 Points)

Postgraduate Courses

ANTHRO 700 (30 Points)

ANTHRO 700A (15 Points)

ANTHRO 700B (15 Points)

Method and Theory in Archaeology

A critical review of current themes and issues in archaeological method and theory.

To complete this course students must enrol in ANTHRO 700 A and B, or ANTHRO 700

ANTHRO 701A (15 Points)

ANTHRO 701B (15 Points)

Human Palaeoecology

Critical survey of methods, theories and problems in human palaeoecology, including issues of resource use, landscape change, island colonisation and anthropogenic extinctions.

To complete this course students must enrol in ANTHRO 701 A and B

ANTHRO 703 (30 Points)

ANTHRO 703A (15 Points)

ANTHRO 703B (15 Points)

Landscape Archaeology

Uses geographic information systems (GIS) and other computer programmes to examine the spatial organisation of data, and the relationship of archaeological features both to other features, and the environment. The social processes underlying these spatial configurations will be a particular focus.

To complete this course students must enrol in ANTHRO 703 A and B, or ANTHRO 703

ANTHRO 704A (15 Points)

ANTHRO 704B (15 Points)

Material Culture

The study of material culture using museum, ethnographic, archaeological and experimental approaches, including the information provided by material culture studies on human agency and the structuring of societies.

To complete this course students must enrol in ANTHRO 704 A and B

ANTHRO 708A (15 Points)

ANTHRO 708B (15 Points)

Cultural Resource Management in Archaeology

Covers all aspects of cultural resource management as it relates to archaeological sites and heritage with a particular focus on New Zealand archaeology and Māori heritage. There is an emphasis on site identification, recording and interpretation in the field. Legal aspects and the roles of archaeologists and iwi in cultural resource management are also covered.

To complete this course students must enrol in ANTHRO 708 A and B

ANTHRO 709 (15 Points)

Applying Anthropology

Considers the diverse fields in which Anthropology may be applied to peoples and cultures in the contemporary world, including, for example: environmental and development issues; land and resource conflicts; mediation and advocacy; human rights; cultural heritage; social policy; business and industry; communications; marketing; medical investigations; museums and other representational activities. Addresses practical and ethical issues that arise in these areas.

Restriction: HISTORY 135

ASIAN 101 (15 Points)
Faith and Festival in Asia
 A broad-based introduction to religious life in East and South-East Asia with special focus on ritual life and ceremony rather than canonical texts and theology. Religion at the personal, family, community and state level are all considered, with examples from 'animism', shamanism, Daoism, Buddhism, Shinto, Islam, Hinduism, Asian Christianity and their myriad combinations.

ASIAN 140 (15 Points)

ASIAN 140G (15 Points)
New Zealand and Asia
 Asia and its interrelationship with New Zealand, including Asia's growing presence in New Zealand in all its manifestations, and the evolving political, social, economic, cultural, and strategic relations between this country and Asia. Topics will include historical and contemporary ties with Asia, Asian migration, literature, media and films. The course will focus especially on South-East and East Asia.

Stage II

ASIAN 200 (15 Points)
Asian Identities
 Students explore the changing and contested nature of Asian identities through readings of seminal scholarly and theoretical texts on each theme, combined with analysis of the ways these themes are reflected in film, fiction and other popular cultural texts. The five themes (nationalism; violence and conflict; gender; minorities; and indigenous rights) and a concentration on post-1945 East and South-East Asia provide the focus.
Prerequisite: ASIAN 100

ASIAN 201 (15 Points)
Islam: An Introduction
 A survey of Islamic belief, practice and thought. Introduces basic tenets of Islam in historical context, then looks at Islam and politics in the twentieth century, including imperialism, nationalist movements in Arab and Muslim states, Zionism and Israel, the impact of the Cold War on Islamist thinking and organisations. Reflections on "war on terror" discourse and media constructions of Islam are central.

English

ENGLISH 91F (15 Points)

Foundation English 1

Written and spoken English, and the study of New Zealand English as one variety among many will be developed through the study of literature. Short stories and novels by New Zealand and other authors will be studied. Work by Albert Wendt, Patricia Grace, Maurice Gee, Fiona Kidman, Witi Ihimaera and Janet Frame will be offered as well as work by writers from other countries around the world.

Restriction: ENGLISH 91W

ENGLISH 92F (15 Points)

Foundation English 2

New Zealand and other poets will introduce students to poetry. Students will learn how to unpack language and discover the essence of what a poet wishes to express. Students are encouraged to view a production together before producing a scene from a play. Two films are reviewed for filming technique and the film as literature is considered.

Restriction: ENGLISH 92W

Stage I

ENGLISH 100 (15 Points)

Early Texts: Pilgrims to Players

An introduction to the pleasures of early literature through study of works by the foremost writers of the medieval to Renaissance period, especially works by Chaucer and Shakespeare. Explores relations both between works and between writers of a past age and readers of the present.

ENGLISH 101 (15 Points)

Literature and the Contemporary

Investigates the responses to our world that literature makes possible through an exploration of such themes as love, war, memory, terror, God, myth, murder, dreams in contemporary novels, poetry, drama and fiction on film.

ENGLISH 107 (15 Points)

Fundamental Questions: Desire

The significance of the idea of desire is at the forefront of recent critical thought. What is desire? How does the idea of desire have currency in our creative texts; how does it function in familiar genres such as poetry, prose, drama and film? Critical thinking about desire provides a unifying device for the texts and resources studied.

ENGLISH 109 (15 Points)

Drama on Stage and Screen

An introduction to conventions of dramatic practice and to the dimension of performance, both on stage and screen. Discussion of performance will extend to broader issues such as self-representation and gender. The texts studied will represent different types of dramatic styles, primarily from the twentieth century, and will include some pairings of play texts and screen productions.

ENGLISH 111 (15 Points)

Literature From Sonnets to Comics

An introduction to masterpieces of literature from Shakespeare to the present, to a wide range of genres, and to literary terms, contexts, theory and approaches.

ENGLISH 112 (15 Points)**Global Literatures: Contested Spaces**

Covers central issues in international postcolonial, settler and indigenous writing by examining a small selection of texts from the late nineteenth century (Kipling and Stevenson) and a larger selection of contemporary texts from several geographically diverse regions: India, the Pacific, Africa, the Caribbean, Canada, Ireland, New Zealand and the United States.

ENGLISH 121 (15 Points)**ENGLISH 121G (15 Points)**
Reading/Writing/Text

A course developing University-wide skills of reading, writing and analysis. Addresses the needs of students in both English and other disciplines where both writing and reading have an important role in learning. The course fosters personal writing skills and also introduces writing as a subject of study in itself.

Stage II**ENGLISH 200 (15 Points)****Middle English: Chaucer and Romance**

An introduction to medieval narrative centred on the tales of Geoffrey Chaucer, the greatest English poet of the fourteenth century and one of the finest narrative poets in the language. Along with the Chaucer tales, we study a number of contemporary short romances, mostly anonymous, that display the narrative possibilities of the genre, the typical interest in adventure and passion, as well as the textual practices employed by poets in a manuscript or performance culture.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 359

ENGLISH 203 (15 Points)**English Language to 1900**

Introduction to the history of the English language from its origins to 1900, with an emphasis on the development of sound changes, grammar, words and meanings in sociocultural and historical contexts.

Prerequisite: 30 points in English and/or Linguistics

ENGLISH 210 (15 Points)**Age of Shakespeare: Poetry**

A study of one of the greatest periods of English poetry, beginning with the sonnets of Shakespeare and ending with the splendour of Milton's *Paradise Lost*. Included are the sonnets of Spenser and Sidney, Donne's profane and religious poetry, Herbert's intricate and Marvell's witty verse and finally the poetry of Katherine Phillips and Aphra Behn.

Prerequisite: Any 30 points at Stage I in English

ENGLISH 213 (15 Points)**Age of Shakespeare: Tragedy**

An introduction to the golden age of English theatre, involving detailed study of a selection of tragedies by Shakespeare and his contemporaries. The theatrical emphasis of the course is intended to help students respond to the plays as theatrical artefacts and not merely as literary texts.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 353

ENGLISH 219 (15 Points)**Nineteenth Century Literature**

Considers a range of literature from the nineteenth century – poetry, fiction and drama – as regards its

treatment of growing up in the period. Issues covered include the recognition of childhood as a special state, the establishment of an individual's gender and sexual identity and the opportunities and constraints afforded by the changing social hierarchy and religious belief systems.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 104

ENGLISH 220 (15 Points)**Novels Since 1900**

A study of fiction. The prescribed works vary widely in their country of origin, formal elements and themes. Some are recognised as classics, while others show the new directions taken by the writers of their time. The texts are given detailed consideration as well as being placed within social and critical contexts.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 356

ENGLISH 221 (15 Points)**New Zealand Literature**

Offers an historical survey of major writers and key issues in New Zealand literature. Students will not only read some of the best writing our country has to offer but will develop, through the literature studied, a richly detailed overview of New Zealand experience from the period of first contact until now.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 355

ENGLISH 222 (15 Points)**Modern Poetry**

Demonstrates how writers undertook to rethink the creative text and how their efforts to define 'the contemporary' mark a vital shift in Western cultural practice. Studies twentieth-century poetry at a time of immense social upheaval and experimentation in which definitions of art, culture and 'the human' shifted as familiar values were contested.

Prerequisite: Any 30 points at Stage I in English

ENGLISH 230 (15 Points)**Critical Theory and Cultural Studies**

Introduces the concerns and methods of contemporary criticism through an examination of a number of key concepts central to the study of literature, film and other media. The history of these concepts is explored, as are the theoretical issues they raise and the reading strategies they permit. Emphasises theory as an activity that enriches our reading and writing.

Prerequisite: 30 points at Stage I in English or FTVMS 100 and 101

ENGLISH 240 (15 Points)**Children's Literature: Words and Pictures**

Introduces critical reading of the twentieth century's achievements in combining verbal text and visual image in children's literature. Texts studied cover a range of reading ages, offering opportunities to compare local and overseas texts. Attention is especially drawn to the socialisation of the child through reading and to the interpretation of visual materials.

Prerequisite: Any 30 points at Stage I in English

ENGLISH 241 (15 Points)**ENGLISH 241G (15 Points)****Literature and Science**

Explores the relations between literature and science past and present, including science fiction, science in fiction, creativity and criticism in science and in literature, narrative and metaphor as ways of understanding in science and in literature, literature

about science, science writing (science as literature), science on literature and science and literature on human nature.

Prerequisite: 90 points passed

ENGLISH 252 (15 Points)

Creative Writing: Introduction

Introduces ways of writing and thinking about poetry, short prose fiction, multimedia and drama and screenplay. Lectures on genres and creative composition are combined with smaller tutorials that give students time to practice the techniques and engage the ideas they are learning.

Prerequisite: 45 points passed

Restriction: ENGLISH 255

ENGLISH 256 (15 Points)

Tolkien and his Worlds

Study of the *Lord of the Rings* with particular reference to Tolkien's use of Celtic, Germanic and Christian myths; an introduction to some of the most formative and influential mythologies of European culture.

Prerequisite: 60 points passed

ENGLISH 257 (15 Points)

Writing and Culture

Students use selected materials of public and popular culture to practise and develop skills in creative thinking, critical analysis, argument and writing with reference to issues of public concern in the domain of global culture.

Prerequisite: 30 points including ENGLISH 121 or ENGWRIT 101, or any 30 points in English, or any 45 points

Restriction: ENGLISH 363

ENGLISH 258 (15 Points)

Prerequisite: 30 points at Stage I in English

ENGLISH 263 (15 Points)

Special Topic in Writing Studies: Writing Selves

Extends student skills in critical reading and composition while critically exploring changing concepts of the self. Considers the nationalist and historicising functions traditionally assigned to biographies and autobiographies, issues of authorship, genre, form, and convention, sexual and gender politics in life writing,

and the controversial borderline between fiction and auto/biography.

Prerequisite: 30 points at Stage I in English or Writing Studies

Restriction: ENGLISH 354

ENGLISH 264 (15 Points)

Middle English Popular Literature

Studies popular works in lyric, dramatic and narrative genres. Lyrics are often amorous, sometimes political, frequently devotional; narrative includes comic tale, fable, romance and outlaw tale; drama comprises the major theatrical traditions of morality and biblical history cycle plays. Covers texts written for religious purposes, as well as secular, but socially embedded and often with pleasure among their aims.

Prerequisite: 30 points at Stage I in English

Restriction: ENGLISH 302

ENGLISH 265 (15 Points)

Shakespeare: Comedies and Tragicomedies

A study of selected comedies and tragicomedies of Shakespeare and his contemporaries. Works of Shakespeare may include the romantic comedies of his first decade and a half as a playwright, the so-called 'problem plays', the darker comedies of his middle years, and the tragicomedies of his final years, sometimes called 'romances'. The nature of comedy and its relationship to tragedy is also explored.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 310

ENGLISH 266 (15 Points)

Reinventing Ireland

Combines historical and theoretical frameworks to explore contemporary reinventions of Ireland and 'Irishness' through a range of novels, plays, short stories and poetry. The focus is the retrospective negotiations of Irish history and identity that characterise Irish literature of the 1990s and the treatment of the 'New Ireland' in literature since 2000.

Prerequisite: 30 points at Stage I in English

Restriction: ENGLISH 361

ENGLISH 267 (15 Points)

Hollywood: The Book

Considers the effect of cinema on the literary imagination. Commencing with early cinema's influence on modernist writing and the thematic centrality of Hollywood novels in the American literary tradition, this course will introduce students to a wide range of Hollywood literatures including pulp fictions and the literature of celebrity scandal, recent literary experiments in cinematic forms and the Hollywood counter-tradition of filmic representations of writing.

Prerequisite: 30 points at Stage I in ENGLISH

The sonnet sequences of Shakespeare and of his contemporaries, Spenser and Sidney, are studied in considerable depth and detail.

Prerequisite: 30 points at Stage II in English

ENGLISH 320 (15 Points)**Victorian Literature**

Focuses on Victorian narrative practices. One module, concentrating on novels by Dickens, Thackeray and James, examines them in the context of the Victorian reading public and publishing practices. The other module deals with the narrative possibilities open to and deployed by women writers and features novels by Charlotte Brontë, George Eliot and Olive Schreiner.

Prerequisite: 30 points at Stage II in English

ENGLISH 321 (15 Points)**Theory and the Gothic**

Advances the understanding of contemporary theory and cultural studies through the study of a selection of classic Gothic writing from the nineteenth century and films from the twentieth, together with influential psychoanalytical, new historical and queer studies treatments of Gothic material.

Prerequisite: 30 points at Stage II in English, or 30 points from FTVMS 200-214, 216-219

ENGLISH 323 (15 Points)**Contemporary Poetry**

An introduction to the work of a dozen influential poets, this course emphasises new developments. The focus is on the still controversial L=A=N=G=U=A=G=E poetry that emerged in the late 1970s and developments concurrent with it. This shift is seen against a background of changes in technology, politics and in popular and intellectual culture.

Prerequisite: 30 points at Stage II in English

ENGLISH 332 (15 Points)**Contemporary Drama**

A study of drama since the 1970s. Addressing the plays primarily as theatre texts, it emphasises the theatrical strategies and conventions deployed in the texts, some of which self-consciously celebrate theatricality. Teaching combines lectures, discussions, play-readings and viewing theatrical videos.

Prerequisite: 30 points at Stage II in English

ENGLISH 336 (15 Points)**Victorian Poetry**

A study of a range of Victorian poets, ranging from canonical figures to women poets who have received sustained critical attention only in recent years. Focal points of the course are the religious and spiritual issues raised by social change, the discourse of love and sexuality and the practice of the dramatic monologue.

Prerequisite: 30 points at Stage II in English

ENGLISH 340 (15 Points)**Arthurian Literature**

The Arthurian story, from its first passage into French in the twelfth century. The English writings are studied in comparison with their French sources and counterparts (in translation).

Prerequisite: 60 points passed and English Department approval required

Restriction: ENGLISH 328. Note: Enrolment limited to 35 students

ENGLISH 344 (15 Points)**Writing the Short Story**

Conceived as a writing workshop, this course guides students through the theory and practice of writing the short story. It involves one lecture per week and a two-hour workshop taken by professional writers. Workshops focus on teaching students the skills that will help them in writing their own short stories.

Prerequisite: 60 points passed and English Department approval required

Restriction: ENGLISH 328. Note: Enrolment limited to 35 students

ENGLISH 345 (15 Points)**Adolescent Fiction**

Adolescence is a problematic category and a peculiarly modern one; necessarily, the same holds true for adolescent fiction. The aim of this course is to examine this phase of development that is neither childhood nor adulthood but lies between, and recent literary and filmic responses to the characteristic interests and demands of readers at this stage of their lives. Course reading will include film and television, as well as written texts.

Prerequisite: 30 points at Stage II in English

ENGLISH 346 (15 Points)**African and Caribbean Literature**

The Caribbean, by virtue of its geography and history, embraces cultural elements of Africa, India, Europe and North America. The focus, however, will primarily be on Caribbean and African societies in order to address a range of issues connected to these variously

hybrid cultures: slavery, black identity and sexuality, nation/narration, home and location/dislocation.

Prerequisite: 30 points at Stage II

ENGLISH 347 (15 Points)
Poetry Off the Page

The most recent technologies for performing and preserving poetry are in the process of coalescing with the oral roots of the art form. This shift in transmission and retrieval and its implications for reading communities is examined in three areas: poetry reading (live performance and audiovisual record); the poetry archive (physical and electronic); and digital poetry (virtual communities, real readers).

Prerequisite: Any 30 points in English

ENGLISH 350 (15 Points)
From Rhetorics to Writing

Explores writing through discussion of theories of language use, especially issues raised by theorists of rhetoric and composition: cognitive process theory, discourse analysis, language as a social semiotic, literary studies, race and gender, writing for new technologies. The course centres on writing theory but there is a practical dimension: students investigate their present writing practices and consider possible future challenges.

Prerequisite: 30 points at Stage II in English, or Departmental approval

Love and its Literature

A study of the state of being in love as it is represented in literature. The course ranges widely in history and world cultures to consider the kinds of writing generated by the experience of love and the modes of reading such writing encourages. The role of the literature of love in sustaining the complex enjoyments love causes will be considered.

Prerequisite: 30 points at Stage II in English

ENGLISH 353 (15 Points)
Age of Shakespeare: Tragedy

An introduction to the golden age of English theatre, involving detailed study of a selection of tragedies by Shakespeare and his contemporaries. The theatrical emphasis of the course is intended to help students respond to the plays as theatrical artefacts and not merely as literary texts.

Prerequisite: 30 points at Stage II in English

Restriction: ENGLISH 213

ENGLISH 354 (15 Points)
Special Topic in Writing: Writing Selves

Extends student skills in critical reading and composition while critically exploring changing concepts of the self. Prerequisite: 30 points at Stage II in English

Restriction: ENGLISH 260

ENGLISH 358 (15 Points)
Te Torino: Pasifika Literature

Pasifika literature (defined as Maori and New Zealand-based Pacific writing in English) is characterised by multiple crossings of cultural, social, political, gendered and geographical borders. Contemporary texts in English across three genres (poetry, short story, drama) will be examined in light of recent theories of indigenous writing, diaspora and identity.

Prerequisite: 30 points at Stage II in English, or 15 points at Stage II in English and WOMEN 205 or PACIFIC 201

ENGLISH 359 (15 Points)
Middle English: Chaucer and Romance

An introduction to medieval narrative centred on the tales of Geoffrey Chaucer, the greatest English poet of the fourteenth century and one of the finest narrative poets in the language. Along with the Chaucer tales, we study a number of contemporary short romances, mostly anonymous, that display the narrative possibilities of the genre, the typical interest in adventure and passion, as well as the textual practices employed by poets in a manuscript or performance culture.

ENGLISH 707 (30 Points)**Writing World War II**

Takes the terror wrought by bombing as its theme with particular focus on the literature of the Second World War and the Cold War that followed it. Also addresses contemporary literary reimaginings of the Second World War, which incorporate elements of military, architectural and postcolonial history, and asks what these later versions imply about the war's historicity.

ENGLISH 708 (15 Points)**Post-Theory**

After the theory wars and the global dissemination of the work of acknowledged theory 'masters', this course asks: "What does theory matter now?" Taking as given the legacy of literary and cultural theory, the course considers the variety of theoretical writing, its objects and concerns, which may be characterised as post-theory.

ENGLISH 710 (15 Points)**Interpreting Janet Frame**

An exploration of the fiction of renowned writer Janet Frame. Using interpretative theory and reader-response strategies, the course addresses the challenge of developing enabling critical contexts for Frame's novels. Conversely, Frame's novels are used as a means of exploring the reading process and the dynamics involved in the act of interpretation.

Stage I

FTVMS 100 (15 Points)

Media Studies

An introduction to the study of communication media in terms of the interplay between economics, politics, technology and culture. An examination of media industries, media texts and media audiences. The media examined include: film, recorded sound, radio, television and the Internet. The course introduces students to the basic concepts and analytical tools of media studies.

FTVMS 101 (15 Points)

Film Studies

An introduction to the feature film, and the main traditions of film criticism. A series of significant films, from 1915 to the present, are explored in detail. The aim is to develop an historical perspective, an awareness of film-making as an art and an interest in the relationship between films and society, including debates about race, gender, censorship.

FTVMS 110 (15 Points)

FTVMS 110G (15 Points)

Advertising and Society

A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.

Stage II

FTVMS 201 (15 Points)

TV Studio Production: The Interview

An introduction to the technical skills required to produce the interview, a core television form, as well as providing a critical framework within which to access and critique industry practice. Combines formal lectures and practical exercises in exploring the function and construction of the interview, interspersed with presentations from a variety of industry practitioners.

Prerequisite: FTVMS 100 and 101

FTVMS 202 (15 Points)

Hollywood and its Others

An investigation of Hollywood with a particular focus on its industrial, aesthetic and cultural aspects. Students will gain a historical understanding of classical Hollywood cinema, which will serve as the basis for comparison to other national cinemas and/or American independent productions of recent decades.

Prerequisite: FTVMS 100 and 101

Restriction: FTVMS 307

FTVMS 203 (15 Points)

Techno-culture and New Media

Theory and analysis of media technologies. An introduction to the major debates about technology, multimedia and the digital age. Examines the academic and popular discourse on techno-culture in modernity, focusing on the exchange of bodies and commodities as bits, bytes and loops within transnational capitalism,

and the increasingly mediated 'technologisation' of everyday life.

Prerequisite: FTVMS 100 and 101

Restriction: FTVMS 314

FTVMS 204 (15 Points)

Media Analysis

In workshops and lectures, students will develop and practice the skills required to analyse, contextualise, and critique media texts. Language Study Abroad

The Language Study Abroad courses are intended to permit students to take advantage of opportunities for formal language study in an approved overseas institution where instruction is in a language other than English. Supplementary study at The University of Auckland may be required as part of these courses.

Students taking one of these courses should enrol prior to undertaking the overseas study, and enrolment is subject to approval of the planned overseas study by the Head of Department or School for the language subject concerned. A final grade for any of the courses will be based on formal assessment of achievement in the language concerned, together with any other work required by the Head of Department or School.

The courses available for Language Study Abroad are listed under the following subjects: Arts – General, Chinese, French, German, Italian, Japanese, Korean, Russian, Spanish.

Language Teaching and Learning

Stage I

LANGTCHG 100 (15 Points)

Linguistics for the Language Teacher

An introduction to linguistics and its applications for language teachers. Provides basic understanding about the nature and function of language, including phonology, morphology and syntax, as well as semantics. This understanding will underpin the pedagogical principles developed in other units of the programme; and will enable students to translate their understanding of language into effective classroom practice.

Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 101 (15 Points)

Introduction to ELT

An introduction to a range of approaches to second language teaching and the theories of language and learning which underpin them. Students will explore the basic concepts related to current approaches to ELT in their home country and the social context of learning.

LANGTCHG 102 (15 Points)

Classroom Management and School Experience

Introduces students to the organisation of learning in the classroom and specifically to the role and behaviour of the teacher in secondary classrooms and in the school. The integrated school experience provides students with an initial orientation to the school environment in their home country and the opportunity to apply their growing knowledge and skills in a supportive classroom context.

Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 103 (15 Points)

Competency in the Mother Tongue

Extends the students' command and control over their mother tongue to enable them to operate efficiently and effectively in schools in their home country where the medium of instruction is the mother tongue. To further enrich their communication skills they will be exposed to the literature in their mother tongue.

Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 104 (15 Points)

Ethics and Civilisation

The role and the influence of local culture/religion (eg, Islam or Confucianism) on world civilisation in general,

and local culture in particular, will be examined. Offers opportunities for students to examine Asian civilisation and will examine the challenges facing contemporary Asian civilisations.

Prerequisite: Student must be enrolled in BEd(TESOL)

Stage II

LANGTCHG 202 (15 Points)

Introductory English Language Analysis for TEFL

Introduces key concepts of phonology, grammar and vocabulary of English and develops an understanding of how they function as systems in written and spoken English. Develops the skills needed to formally analyse the phonological, lexical and grammatical systems of English. Illustrates how linguistic descriptions can be applied in language teaching.

Prerequisite: At least 30 points passed or approval of Programme Coordinator

LANGTCHG 205 (15 Points)

Developing Literacy in a Second Language

Examines the theory and practice related to the development of both initial and advanced literacy in a second language: how reading and writing skills are developed in a second language; the interdependency of first and second language literacy skills; effective instructional methods and the role played by second language literacy in the development of academic skills where English is the medium of instruction.

Prerequisite: At least 30 points passed or approval of the BEd(TESOL) Coordinator

LANGTCHG 206 (15 Points)

Special Topic

Stage III

LANGTCHG 300 (15 Points)

Teaching English in the Second/Foreign Language Classroom

A general introduction to English language teaching. This course requires students to undertake a study of current theory and practice relating to the teaching of the knowledge systems of English and of language skills. It also familiarises students with current language teaching resources.

Prerequisite: Any 30 points at Stage II or above or Departmental approval required

LANGTCHG 301 (15 Points)

Introduction to TEFL Curriculum

Introduces principles and procedures used in course design and to evaluate TEFL courses, coursebooks and materials. Develops a practical understanding of how to set about planning an EFL curriculum.

Prerequisite: LANGTCHG 202 or approval of Programme Coordinator

LANGTCHG 302 (15 Points)

Practical Language Teaching

Develops an understanding of the procedures and options used in teaching language lessons; introduces participants to a range of lesson types for the teaching of grammar, vocabulary and language skills, and to the use of classroom observation as a means of learning about language teaching and classroom interaction.

Prerequisite: LANGTCHG 202, 300 and approval of Programme Coordinator, or enrolment in BEd(TESOL)

LANGTCHG 303 (15 Points)

Instructed Language Learning

Introduces the study of characteristics of the acquisition-rich classroom by considering how a second

language is learned, and explores different aspects of language pedagogy from the perspective of second language learning and factors responsible for individual differences in L2 learning in a classroom context. Students will consider research that has examined instructed language learning and have the opportunity to design their own action research project.

Prerequisite: LANGTCHG 202 and 300, or enrolment in BEd(TESOL), or approval of the Programme Coordinator

LANGTCHG 304 (15 Points)

The Young Second Language Learner

Examines the experience of children aged 6-12 years in learning a second language. Gives particular attention to the social, cognitive and psychological characteristics of children; examines the particular needs of young learners of a second language, and how languages are learned in different contexts.

Prerequisite: 30 points from LINGUIST 200-203, 205, LANGTCHG 202, 205, or 120 points passed from Part I of the BEd(TESOL), or approval of the BEd(TESOL) Coordinator

LANGTCHG 305 (15 Points) **Special Topic**

LANGTCHG 306 (15 Points) **Task-based Language Teaching in Primary School**

Based on current research as a theoretical rationale, this course examines the design of task-based courses for younger ESL learners by investigating how tasks can be constructed and sequenced. Considers the methodology of task-based lessons by exploring the options for the pre-, main-, and post-task phases to provide for a focus on meaning and form, and the use of tasks in classroom assessment.

Prerequisite: 30 points from LINGUIST 200-203, 205, LANGTCHG 200, 202 or 120 points passed from Part I of the BEd(TESOL), or approval of the BEd(TESOL) Coordinator

LANGTCHG 310 (15 Points) **Literature in Second Language Learning**

Familiarises students with the principles and techniques of the stylistic analysis of literary texts. Also illustrates how stylistic analysis can serve as a basis for the development of materials for teaching literature and English language to second language learners.

Prerequisite: 30 points from LINGUIST 200-203, 205, LANGTCHG 202, 205, or 120 points passed from Part I of the BEd(TESOL), or approval of the BEd(TESOL) Coordinator

LANGTCHG 311 (15 Points) **Special Topic**

LANGTCHG 312 (15 Points) **Special Topic**

Stage IV

LANGTCHG 400 (15 Points) **Language Curriculum Studies**

Examines the meaning of curriculum in relation to the school, state, national contexts, and the broader socio-political context. Of central importance is the idea of curriculum as an interactive process. The idea of curriculum as process and the dynamic interplay between curriculum context, theory and practice are emphasised.

Prerequisite: Student must be enrolled in BEd(TESOL)

Restriction: LANGTCHG 724

LANGTCHG 401 (15 Points) **Language Assessment in Schools**

Aims to develop understanding of second language

learning assessment. Starting with broader considerations and techniques, the focus is on different forms of assessment used in secondary English teaching contexts in the home country.

Prerequisite: Student must be enrolled in BEd(TESOL)

Restriction: LANGTCHG 704

LANGTCHG 402 (15 Points) **Linking Theory and Practice in the Language Classroom**

Examines the pedagogical frameworks underpinning classroom methodology. Focuses on linking theory and practice and on preparing students for forthcoming classroom teaching. Includes the practical preparation and implementation of lessons, drawing on and bringing into focus relevant aspects of the programme.

Prerequisite: Student must be enrolled in BEd(TESOL)

Restriction: LANGTCHG 710

LANGTCHG 403 (60 Points) **Teaching Practice**

A 12-week period of teaching practice in a school in the country of the student's origin. The practice will focus mainly on the teaching of English, although the student may have an opportunity to teach a second subject.

Prerequisite: Student must be enrolled in BEd(TESOL)

Postgraduate Courses

LANGTCHG 704 (15 Points) **Language Assessment**

Introduces students to some fundamental issues and debates in the field of second language testing and assessment to familiarise them with different assessment options and to develop skills in devising their own assessment procedures.

Restriction: LANGTCHG 401

LANGTCHG 706 (15 Points) **Pedagogical Grammar**

Examines how different ways of looking at grammar can be exploited in second language teaching and considers the strengths and weaknesses of contemporary approaches to language teaching for the learning of grammar (including corpus-based approaches), with the emphasis on the practical implications of these ideas for materials design and teaching procedures.

LANGTCHG 709 (15 Points) **Bilingualism and Bilingual Education**

Develops an understanding of important aspects of both individual and societal bilingualism which is used to analyse issues in education, assessment and policy contexts.

LANGTCHG 710 (15 Points) **Task-based Language Teaching**

Examines research that has investigated task-based second language learning and the theoretical rationale for task-based language teaching. Also considers factors in the design of task-based syllabuses and methodological options for lessons based on tasks, and problems in implementation.

Restriction: LANGTCHG 402

LANGTCHG 711 (15 Points) **Individual Differences in Second Language Acquisition**

An examination of research investigating individual differences in second language acquisition, familiarising students with instruments for collecting data on factors contributing to individual differences and enabling them to design an empirical study of individual learner differences.

LANGTCHG 713 (15 Points)**Corpus Linguistics and Language Teaching**

Covers the theoretical and practical aspects of using corpora to promote language learning. A major part of the course will focus on using corpora and text analysis tools to provide a description of language as it is used by different people for different purposes. Once we have a good description of language usage, we can move on to consider the role of corpus studies in language teaching.

LANGTCHG 714 (15 Points)**Sociolinguistics and Language Teaching**

An introduction to concepts and issues in sociolinguistics that are relevant to prospective or practising language teachers. Focuses on language contact situations, particularly in immigrant communities, language-in-education planning and policy, and sociolinguistic research methodology.

LANGTCHG 715 (15 Points)**Developing Academic Literacy**

Aims to help participants understand and develop their academic literacies. Focuses on texts involved in the research process, such as review articles, research paper proposals, dissertations and conference abstracts; makes extensive reference to findings from genre and corpus-based analyses; and includes conducting mini-analyses on the discourse in participants' own disciplines.

LANGTCHG 716 (15 Points)**Vocabulary Learning and Teaching**

Explores the role of vocabulary learning within a language teaching programme. It reviews research evidence on the nature of vocabulary and the processes involved in vocabulary learning, and considers how to facilitate the acquisition of vocabulary by second language learners both inside and outside the classroom.

LANGTCHG 717 (15 Points)**Special Topic: Narrative Inquiry in Language Education**

Explores definitions of narrative and story as used in the field of applied linguistics, specifically in language teaching and learning, and includes methods of data collection and analytical approaches which take into account the form of narratives, their content and contexts of construction. Participants will examine examples of narrative research and produce and analyse their own written and spoken data.

LANGTCHG 718 (15 Points)**Language Teaching Management**

Considers the administrative management of language teaching organisations, examining such topics as management styles, issues in human resources, and time management; and covers the pedagogic management of language teaching, focusing on issues in second language teacher development.

LANGTCHG 719 (15 Points)**Computer Assisted Language Learning**

The theoretical and practical aspects of CALL will be investigated, along with an assessment of the advantages and drawbacks of using technology in language courses. Topics include: using technology to aid the teaching of speaking, listening, writing and reading skills; using the web to teach culture; different models of technology use; evaluating software; evaluating CALL; and online testing.

LANGTCHG 720 (15 Points)**Language Analysis for Teachers**

A study of fundamental concepts of phonology, morphology, syntax and vocabulary, including methods of analysis and procedures for selecting features to teach.

LANGTCHG 721 (15 Points)**Discourse Analysis for Teachers**

A study of the concepts in discourse analysis and introduction to a range of approaches for analysis of spoken and written texts; and the application of discourse analysis to language teaching.

LANGTCHG 722 (15 Points)**Learner Language**

A study of learner language, including an introduction to the methods used to analyse both the content and linguistic form of learner language, a review of empirical research that has used these methods, and its pedagogical relevance.

LANGTCHG 723 (15 Points)**Theories of Language Learning**

A critical examination of theories of second language learning grounded in linguistics, psycholinguistics, sociolinguistics and education. The course focuses on cognitive and social theories of second language acquisition, identifying commonalities and differences in the theories, and considering their pedagogical implications.

LANGTCHG 724 (15 Points)**Curriculum Development for Language Teaching**

An overview of the key concepts in the language curriculum, syllabus design and methodology, followed by a critical assessment of the effects of learners' different cultural backgrounds and social histories.

Restriction: LANGTCHG 400

LANGTCHG 726 (15 Points)**Materials Development and Evaluation**

A critical examination of current language teaching materials in the light of research into second language learning and teaching, a focus on the process of developing materials, and the study of methods for carrying out prospective and retrospective evaluations of materials and courses. Students will also have the opportunity to develop their own materials for a specific teaching context.

LANGTCHG 728 (15 Points)**Second Language Classroom Research**

A review of second language classroom research that examines such topics as teacher-talk, classroom interaction, learner participation, and form-focused instruction. The focus is on the ability to evaluate the published research and to design and carry out a small-scale classroom study.

LANGTCHG 729 (15 Points)**Practicum in Second/Foreign Language Learning**

An opportunity for students to obtain practical experience of language teaching by carrying out a series of guided observation tasks in a second/foreign language classroom and by planning, teaching and evaluating a number of lessons in the same classroom.

LANGTCHG 731 (15 Points)**Special Topic: Second Language Reading and Writing**

Explores the role of reading and writing in second language acquisition by giving an overview of theories

about learning to read and write in a new language as well as important concepts related to acquiring second language literacy. Various strategies and other considerations associated with teaching reading and writing in a second language are considered and analysed.

LANGTCHG 732 (15 Points)
Applied Linguistics Research

Aims to prepare students for their dissertation or thesis by providing an introduction to the basic ideas and concepts in applied linguistics research design. It also covers aspects of writing a proposal, ethical issues in research, and managing the research process.

Note: The following courses, LANGTCHG 741–753, are available only for distance learning.

LANGTCHG 741 (15 Points)
Second Language Course Design and Methodology

The study of the theoretical bases of language course design and methodology. Examines how to carry out a needs analysis, different types of syllabus, theories of language teaching and the historic development of teaching methods including communicative language teaching.

LANGTCHG 742 (15 Points)
Language Assessment and Evaluation

A critical examination of the principles of language assessment and evaluation and their applications to both teaching practice and research.

LANGTCHG 743 (15 Points)
Second Language Acquisition

A study of different theories of second language acquisition and research that has investigated both natural and instructed acquisition. The applications of theory and research to language pedagogy will be considered.

LANGTCHG 744 (15 Points)
Discourse Analysis

Different approaches to discourse analysis, for the analysis of language as text and for the incorporation of discourse analysis into language teaching.

LANGTCHG 745 (15 Points)
Second Language Classroom Research

The findings of second language classroom research and the methods used in this research.

LANGTCHG 746 (15 Points)
Materials Development and Evaluation

The principles and processes of designing and evaluating language teaching materials.

LANGTCHG 747 (15 Points)
Individual Learner Differences and Second Language Learning

The findings of research into individual learner differences and their role in language learning; the quantitative and qualitative methods used in this research.

LANGTCHG 748 (15 Points)
Bilingualism and Bilingual Education

Aspects of both individual and societal bilingualism especially for the analysis of issues in education, assessment and policy.

LANGTCHG 749 (15 Points)
Sociolinguistics and Language Teaching

An examination of concepts and issues in sociolinguistics which are relevant to language teaching in practice, and of sociolinguistic research methods.

LANGTCHG 750 (15 Points)
Language Planning and Policy

An examination of a number of approaches to the study of literacy and of the implications of these approaches for second language teaching and learning.

LANGTCHG 751 (15 Points)
Corpus Linguistics and Language Teaching

Covers the theoretical and practical aspects of using corpora to promote language learning. A major part of the course will focus on using corpora and text analysis tools to provide a description of language as it is used by different people for different purposes. Once we have a good description of language usage, we can move on to consider the role of corpus studies in language teaching.

Latin

Stage I

LATIN 100 (15 Points)
Introduction to Latin Language 1

An introduction to the vocabulary and the grammar of simple sentences in Latin.
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

LATIN 101 (15 Points)**Introduction to Latin Language 2**

An advancing beginner's course in the vocabulary and the grammar of complex sentences in Latin.

Prerequisite: LATIN 100 or Departmental approval required

Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

Stage II**LATIN 200 (15 Points)****Latin Language Acquisition: Intermediate**

The analysis and description of Latin grammar, practice in the translation of Latin to and from English, vocabulary acquisition.

Prerequisite: LATIN 101 or 201 or 202 or Departmental approval

Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

LATIN 201 (15 Points)**Latin Literary Texts 2A**

Detailed study of prescribed texts with reference to their language and meaning, and critical appreciation of their literary, historical and/or philosophical qualities.

Prerequisite: LATIN 101 or 200 or 202 or Departmental approval

LATIN 202 (15 Points)**Latin Literary Texts 2B**

Detailed study of prescribed texts with reference to their language and meaning, and critical appreciation of their literary, historical and/or philosophical qualities.

Prerequisite: LATIN 101 or 200 or 201 or Departmental approval

LATIN 203 (15 Points)**Latin Literary Texts 2C**

Detailed study of prescribed texts with reference to their language and meaning, and critical appreciation of their literary, historical and/or philosophical qualities.

Prerequisite: LATIN 201

LATIN 204 (15 Points)**Latin Literary Texts 2D**

Detailed study of prescribed texts with reference to their language and meaning, and critical appreciation of their literary, historical and/or philosophical qualities.

Prerequisite: LATIN 202

LATIN 205 (15 Points)**Special Topic: Latin Texts**

Study of literary texts in Latin.

Prerequisite: LATIN 101 or Departmental approval required

Stage III**LATIN 300 (15 Points)****Advanced Language Study Part 1**

The structure and use of the Latin language including the use of non-classical Latin.

Prerequisite: LATIN 200 and either LATIN 201 or 202

LATIN 301 (15 Points)**Latin Literary Texts 3A**

Detailed study of prescribed texts with reference to

their language and meaning, and critical appreciation of their literary, historical and/or philosophical qualities.

Prerequisite: LATIN 200 and either LATIN 201 or 202

LATIN 302 (15 Points)**Latin Literary Texts 3B**

Detailed study of prescribed texts with reference to their language and meaning, and critical appreciation of their literary, historical and/or philosophical qualities.

Prerequisite: LATIN 200 and either LATIN 201 or 202

LATIN 305 (15 Points)**Latin Special Topic**

Prerequisite: LATIN 200 and either LATIN 201 or 202

LATIN 310 (15 Points)**Advanced Language Study Part 2**

An advanced analytical study of Latin; translation.

Prerequisite: LATIN 200, and either LATIN 201 or 202

Postgraduate Courses**LATIN 702 (30 Points)****LATIN 702A (15 Points)****LATIN 702B (15 Points)****Latin Poetry 1**

Latin American Studies

Note: Spanish language competence (to the level of either SPANISH 105 or SPANISH 201) is a prerequisite for some Spanish courses in the Latin American Studies major and minor.

Stage I

LATINAM 101 (15 Points)**Introductory Portuguese Language**

An introduction to spoken and written language, for students with no prior background in the language or limited fluency.

Stage II

LATINAM 200 (15 Points)**Special Topic**

Prerequisite: SPANISH 103

LATINAM 201 (15 Points)**Latin American History and Culture Through Film**

A journey through five moments of Latin American history and culture, from its creation as a region imagined through the gaze of colonialism, through the development of an independent, revolutionary Third Cinema, to the present when globalisation is critiqued from the periphery.

Prerequisite: SPANISH 103 or 105 or 107 or FTVMS 100 or 101 or 112

LATINAM 216 (15 Points)**Music, Politics and Social Change**

A theorised study of the history of twentieth-century social movements in Latin America through its poetry and music, largely as expressed in popular forms. The major focus is on the political and cultural manifestations of these expressions as they respond to and instigate social change.

Prerequisite: SPANISH 103 or 105

Restriction: LATINAM 301, SPANISH 216

Stage III

LATINAM 301 (15 Points)**Music, Politics and Social Change**

A theorised study of the history of twentieth-century social movements in Latin America through its poetry and music, largely as expressed in popular forms. The major focus is on the political and cultural manifestations of these expressions as they respond to and instigate social change.

Prerequisite: 15 points from HISTORY 231, LATINAM 201, 211, POLITICS 234, 317, SPANISH 211, 213, 306

Restriction: LATINAM 216, SPANISH 216

LATINAM 302 (15 Points)**Special Topic**

Prerequisite: 15 points from HISTORY 231, LATINAM 201, 211, POLITICS 234, 317, SPANISH 211, 213, 306

LATINAM 306 (15 Points)**Latin American Icons: The Political Economy of Otherness**

An examination of the ways in which Latin America, as a place and a people, has served as a site of otherness and exoticism providing economic and symbolic capital for the consumption and pleasure

of colonial, neo-colonial and neo-liberal powers. Latin American cultural studies texts offer students a way to read against the grain established by this process.
Restriction: SPANISH 306, 729

LATINAM 325 (15 Points)

First Nations in Latin America

Analysis of the representation of first nations of Latin America in the context of struggles for self-determination under colonialism and in modern nation-states. Topics include: Latin American indigeneity, indigenous belief systems and mestizaje, nineteenth-century genocidal wars and foundational fictions celebrating modernisation, testimonials, written and visual texts of the last decade. Focuses on the study of self-representation and the role of mediators.

Prerequisite: 15 points from LATINAM 201, 216, SPANISH 201, 205, 211, 213, 216, HISTORY 231, POLITICS 234
Restriction: SPANISH 306, 729

Linguistics

Stage I

LINGUIST 100 (15 Points)

Introduction to Linguistics

An introduction to the main areas of linguistics: the production and function of sounds in language (phonetics and phonology), word structure and word formation (morphology), the principles of grammar through a study of sentence structure (syntax), and various aspects of meaning (semantics). The course is a self-contained introduction and assumes no prior knowledge of linguistics or language study.

Restriction: 175.106, LINGUIST 103

LINGUIST 101 (15 Points)

LINGUIST 101G (15 Points)

Language, Mind and Society

A study of the use of language in social contexts (sociolinguistics), of language as an element in human culture (anthropological linguistics), and of the acquisition of language, especially by children (psycholinguistics).

LINGUIST 102 (15 Points)

Languages of the Pacific

An introduction to the linguistics of the Pacific Islands (Melanesia, Micronesia and Polynesia), Australia and New Guinea. The topics covered include: principles of historical change, the social use of language, oral literature and the organisation of linguistic systems of sound, meaning and grammar. Pidgins and Creoles are explored, as is the interaction of language with cultural institutions and conceptual systems.

LINGUIST 103 (15 Points)

Introduction to English Linguistics

An introduction to the core areas of language study. Topics include: how sounds are produced, the basic structure of the English sound system, primary word formation processes in English, the rules for English sentence structure, and the fundamentals of word meaning. This course serves as an entry point into Stage II Linguistics, and provides an excellent background for students studying languages including English.

Restriction: 175.106, LINGUIST 100

Stage II

LINGUIST 200 (15 Points)

Syntax and Semantics

Continues on from LINGUIST 100 or 103 and consists of a formal and a functional part, providing problems and exercises in syntactic analysis, as well as an introduction to grammatical theories and types of grammatical systems.

Prerequisite: LINGUIST 100 or 103

LINGUIST 201 (15 Points)

Phonology and Morphology

Continues on from LINGUIST 100 or 103: the study of sound systems and the structure of words; problems of analysis in phonology and morphology.

Prerequisite: LINGUIST 100 or 103

LINGUIST 202 (15 Points)

Language Change

Introduces long-term historical trends, types of language change, language families and comparative reconstruction.

Prerequisite: LINGUIST 100 or 103

Restriction: LINGUIST 308

LINGUIST 203 (15 Points)

Applied English Grammar

Covers the different types of sentences in English, with special attention to the relationship between grammar and meaning, tense, aspect and voice; their roles in texts, such as foregrounding, backgrounding and highlighting information, and introducing new information. Students will be shown how to distinguish standard and non-standard varieties of written English, and how to judge if written sentences are effective, appropriate and grammatical.

Prerequisite: Any 15 points at Stage I

LINGUIST 205 (15 Points)

Language and Identities in New Zealand

Focuses on how New Zealanders use their language/s to reflect multiple aspects of their identities. Covers language use among Pakeha, Māori and Pasifika peoples, as well as language use of recent Asian immigrants and the New Zealand sign language community.

Prerequisite: Any 30 points at Stage I

Stage III

LINGUIST 300 (15 Points)

Syntactic Theory

A continuation of LINGUIST 200. Examination of syntactic topics from functional-typological and formal perspectives.

Prerequisite: LINGUIST 200

LINGUIST 301 (15 Points)

Advanced Phonology and Morphology

A continuation of LINGUIST 201, introducing a more theoretical approach to phonology, including distinctive feature theory, syllable theory, metrical phonology, autosegmental phonology, lexical phonology, and parallel morphology. Includes a practical component in which theories are applied to language data.

Prerequisite: LINGUIST 201

LINGUIST 302 (15 Points)

Semantics and Pragmatics

An examination of the key areas of semantics and pragmatics, including lexical and structural semantics, presupposition and conversational implicature.

Prerequisite: LINGUIST 100 or 103

LINGUIST 303 (15 Points)
Conversational Analysis

An introduction to the close and detailed observation of ordinary conversational interaction. Topics include the interactional nature of conversation, how turn taking and topic selection are organised, the role of narratives in conversation and how they are structured, how conversational repair is organised, how various expressive techniques are utilised, and the ways that conversation is used to accomplish social actions.

Prerequisite: Any 30 points in the BA at Stage II

LINGUIST 305 (15 Points)
Child Language Acquisition

Examines the patterns and mechanisms by which children acquire knowledge of their native language and assesses a number of current theories which have been developed to explain the process.

Prerequisite: LINGUIST 200 or 201

LINGUIST 306 (15 Points)
Polynesian Comparative Linguistics

Comparative and historical study of the sound systems, grammar, and vocabulary of the Polynesian languages.

Prerequisite: LINGUIST 202 or MĀORI 201 or SAMOAN 201 or 202

LINGUIST 307 (15 Points)
The English Language Worldwide

An overview of issues as they relate to the use of English in the world today. Topics include: the roles of American and British English, attitudes toward varieties of English, the development of new Englishes and English-based pidgins and creoles, and the notion of a 'standard' variety of English.

Prerequisite: Any 30 points at Stage II in Linguistics

Restriction: 175.208, LINGUIST 204

LINGUIST 308 (15 Points)
Language Change

Introduces long-term historical trends, types of language change, language families and comparative reconstruction.

Prerequisite: LINGUIST 200 and 201

Restriction: LINGUIST 202

LINGUIST 310 (15 Points)
Linguistics Essays Course

Students undertake supervised research.

Prerequisite: Permission of Head of Department

LINGUIST 320 (15 Points)
Topics in Pragmatics

Pragmatics is the systematic study of language in use and is a rapidly developing discipline in linguistics. This course will give a critical survey of the central topics and the latest developments of pragmatics. The domain of pragmatics, implicature, presupposition, speech act and deixis will be among the issues dealt with in individual lectures.

Prerequisite: LINGUIST 200

Postgraduate Courses
LINGUIST 707 (30 Points)
Field Methods

Description and analysis of an unfamiliar language, based on data collected by the students. The class meets with a speaker of that language, and data are collected through elicitation and texts. Students analyse the phonetics and phonology of the language and a selected area of the grammar.

LINGUIST 708A (15 Points)
LINGUIST 708B (15 Points)
Directed Study for MA

A directed reading and individual study course designed in consultation with appropriate staff according to the field of research. This course is not available for the BA(Hons).

To complete this course students must enrol in LINGUIST 708 A and B

LINGUIST 709 (15 Points)
Linguistic Research

An introduction to research methods and practices for graduate students in Linguistics. The course covers critical reading, referencing, argumentation, database searching, and presentation skills.

LINGUIST 710 (15 Points)
Fundamentals of Linguistics

A comprehensive survey of current theory in selected topics in Linguistics, especially phonetics/phonology, grammar, semantics, and pragmatics.

LINGUIST 711 (15 Points)
Literacy and Literacy Practices

The functions of written and spoken language in literate societies. How spoken and written language differ in grammar and discourse organisation. What constitutes a literate society and literacy in individuals. What is literacy? Does literacy have consequences for cognitive processes in individuals and for the organisation of societies?

LINGUIST 720 (15 Points)
Functional-typological Syntax

Cross-linguistic examination of selected topics, such as lexical categories, passives, transitivity, serial verb constructions, head-marking and dependent-marking, and iconicity. Consideration will be given both to differences among languages and to recurrent patterns.

LINGUIST 721 (15 Points)
Formal Syntax

Formal theories of syntax, generative grammar, and current topics of interest to students. This could include: LFG, Minimalism, the DP analysis, theories of argument structure, and/or formal models of language processing.

LINGUIST 722 (15 Points)
Phonology

A range of topics from the field of non-linear phonology, including autosegmental phonology, syllable theory, feature geometry and CV phonology.

Prerequisite: LINGUIST 301

LINGUIST 724 (15 Points)
Semantics and Pragmatics

An introduction to logic and an exploration of the interaction between semantics, pragmatics, and grammar. Topics include: event structure, aspect, tense, mood and modality, case and roles, transitivity and information packaging, and contrasts between English and other languages, especially Russian, French and Turkish.

Prerequisite: LINGUIST 302

LINGUIST 726 (15 Points)
Language Contact

The influences of languages upon each other through the historical interactions of their speakers. The main points of reference are the syntheses of Weinreich (1953) and Thomason and Kaufman (1988).

LINGUIST 727 (15 Points)
Mixed Languages

Language types (pidgins, creoles and 'mixed' or 'intertwined' languages) that are extreme results of language contact. Major topics will include: processes of formation, universalist and substratist theories, and the typology of such languages.

LINGUIST 728 (15 Points)
Sociolinguistics

Provides an overview of the major studies in the field. Focuses on the relationship between language and age, gender, ethnicity, social class and social networks.

LINGUIST 729 (15 Points)
Interactional Sociolinguistics

The analysis of small group interaction and the ways it is structured by sociocultural forces, social roles, and personal identity. Cross-cultural differences in conversational behaviour and the influence on language use of patterns of status and solidarity, and institutional demands are approached through an examination of the dynamic processes of talk itself.

LINGUIST 730 (15 Points)
Discourse and Grammar

The relationship between grammar and language use in naturally occurring written and spoken language, first in discourse-functional grammar, where analysis focuses on the discourse functions of particular grammatical structures; and secondly in interactional grammar, which investigates the syntax of conversational language, in order to develop a new understanding of the nature of syntax, as shaped by the pressures of interaction.

LINGUIST 731 (15 Points)
Historical Linguistics

Current topics in historical linguistics, such as: theories of change in sound systems; syntactic change and syntactic reconstruction; grammaticalisation; distant genetic relationships and comparative methods.

LINGUIST 739 (15 Points)
Directed Study

Directed reading and individual study course designed in consultation with appropriate staff according to the field of research.

LINGUIST 740 (15 Points)
Research Project

Independent supervised research.

LINGUIST 741 (15 Points)
Special Topic: History of Linguistics

History of modern linguistics, concentrating on Saussure and European structuralism, Bloomfield and American structuralism, and Chomsky and generative grammar.

LINGUIST 742 (30 Points)
Special Topic**LINGUIST 743 (15 Points)**
Special Topic: Pragmatics-syntax Interface

The interface between formal syntax and formal pragmatics. Topics may include binding, control and anaphora, the role of context in the description of syntactic constructions and in the formulation of constraints on syntactic processes, information structure, argument structure and the interaction between them, and 'syntactic' versus 'pragmatic' languages.

Māori Studies

Stage I

MĀORI 101 (15 Points)

MĀORI 101G (15 Points)

Introduction to Written Māori

An introduction to listening, reading, writing and translation techniques used in the composition, reading and understanding of basic Māori. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.

Restriction: 260.105. May not be taken if a more advanced language acquisition course in this subject has previously been passed

MĀORI 103 (15 Points)

Introduction to Spoken Māori

An introduction to spoken Māori for those with no previous knowledge of the language. Concentrates on the acquisition of aural and oral skills, developing the ability to understand and speak Māori. It is recommended that students also enrol in MĀORI 101.

Restriction: 260.102, MĀORI 106. May not be taken if a more advanced language acquisition course in this subject has previously been passed

MĀORI 130 (15 Points)

MĀORI 130G (15 Points)

Te Ao Māori: The Māori World

An introduction to Māori tradition, culture and history: origin and migration traditions, marae protocol, Ngāti Whātua and the settlement of Tāmaki Makaurau, Māori land ownership and use, the Treaty of Waitangi, the history of Māori-Pākehā contact, Māori religion, Māori leadership and the Waitangi Tribunal.

MĀORI 170 (15 Points)

Kaupapa Hōu: Special Topic

MĀORI 190 (15 Points)

Kapa Haka 1

An introductory course for beginners or others who have only a minimal knowledge of traditional and contemporary Māori performing arts. The course is strongly practical. It will stress the fundamentals of performance and the various social, cultural and political settings that give it meaning.

Pacific Studies

Stage I

PACIFIC 100 (15 Points)

Introduction to Pacific Studies

An introduction to the discipline of Pacific Studies, using the twin perspectives of language and indigenous knowledges as a framework for the expression and understanding of Pacific cultures. Topics covered include language, cultural identity, indigenous knowledge, visual and performing arts, and political economy.

Restriction: PACIFIC 101, 103

PACIFIC 102 (15 Points)

Topics in Pacific Arts

Provides an introduction to a wide range of Pacific art, both object and performance-based, their origins, histories, interconnections, and social functioning. Topics covered in the course are tapa, weaving, tivaevae, carving and sculpture, dance, tatau and other forms of body adornment.

Restriction: 271.102

PACIFIC 105 (15 Points)

Pacific Languages and World-Views

Explores the relationships between Pacific languages and cultures, focusing on the particular areas in which they influence and reinforce each other. Cultural concepts such as 'respect' will be examined in areas such as respectful vocabularies and ways of speaking and behaving.

PACIFIC 110 (15 Points)

Pacific Music and Dance

Practical and theoretical introduction to performing cultures of the Pacific with emphasis on Cook Islands, Samoan and Tongan cultures. Basic music and dance skills are taught in practical instruction. Consideration of commonalities and differences among Pacific cultures. Academic discussion of styles, instruments, performer categories and the place of the performing arts in Pacific cultures.

Stage II

PACIFIC 201 (15 Points)

Pacific Worlds

Critically examines the responses of Pacific peoples to the changes resulting from contact with outside influences up to the Second World War. It will take the view that Pacific Islanders were active participants rather than passive victims in their encounters with outsiders.

Prerequisite: 15 points from ANTHRO 104, LINGUIST 102, PACIFIC 100, 105 and 15 points from COOKIS 101, SAMOAN 101 or TONGAN 101

PACIFIC 203 (15 Points)

Pacific Language Lexicography

After giving an overview of lexicographical achievements in the Pacific, this course will teach the basic principles and practices of bilingual and monolingual dictionary-making in Pacific languages. Emphasis will be on monolingual lexicography in major Polynesian languages.

Prerequisite: 15 points from COOKIS 101, SAMOAN 102, TONGAN 102

PACIFIC 204 (15 Points)

Special Topic: Issues in Pacific Development

A critical examination of the notion of 'development' as it relates to political, economic, social and cultural change for the small states of the Pacific. A particular focus on the 'global' discourses promoted throughout the Pacific region through the activities of multilateral and bilateral development agencies, and local responses to them.

Prerequisite: Any 30 points in Pacific Studies

PACIFIC 205 (15 Points)

Special Topic

PACIFIC 210 (15 Points)

Pacific Music and Dance 2

Instruction in the intermediate music and dance forms of specific Pacific nations. Practical focus on acquisition of fundamental music and dance skills, for example songs, commands, gestures, posture, costumes, discussion of styles, instruments, performer categories and the place of the performing arts in the identified Pacific cultures. Two-four music and dance items will normally be taught during the semester.

Prerequisite: PACIFIC 110 and 15 points from COOKIS 101, 102, SAMOAN 101, TONGAN 101

Restriction: COOKIS 210, SAMOAN 210, TONGAN 210

PACIFIC 211 (15 Points)

Special Topic

Stage III

PACIFIC 300 (15 Points)

Growing Up 'Ethnic' in New Zealand

Growing up as a member of an ethnic minority culture, with reference also to concepts and theories of inter-

and intra-ethnic identity. The focus will be on ethnicity for New Zealand-born Pacific people, with case studies from other countries to provide comparative global perspectives.

Prerequisite: 30 points at Stage II in Pacific Studies
Restriction: PACIFIC 104

PACIFIC 301 (15 Points) **Pacific Music and Dance 3**

Practical instruction in specified Pacific Island performing arts requiring familiarity with fundamental performance skills. Concentration will be on the competent performance of more formal and traditional items of the repertoire. Detailed examination of relationships between music and dance forms and context.

Prerequisite: PACIFIC 210, and 15 points from COOKIS 201, 202, SAMOAN 201, TONGAN 201

Restriction: COOKIS 310, SAMOAN 310, TONGAN 310

PACIFIC 302 (15 Points) **Pacific Language Structures**

An introduction to comparative analysis of the sound systems and grammatical structures of Cook Islands Maori, Samoan and Tongan. The course will focus on basic concepts in sound and spelling systems, morphology and syntax of the three Pacific languages.

Prerequisite: 15 points from COOKIS 201, SAMOAN 201 or TONGAN 201

Restriction: PACIFIC 202

PACIFIC 303 (15 Points) **Special Topic: Conflict and Peace-building in the Pacific**

Critically examines selected theoretical discourses and applied approaches and their relevance in understanding socio-cultural and socio-political conflict and community peace-building in the Pacific Islands societies. The course explores internal and external dynamics which cause and sustain conflict and also examines formally institutionalised and culturally based peace-building mechanisms and how these can transform socio-cultural institutions and relationships within Pacific communities.

Prerequisite: 30 points at Stage II in Pacific Studies or Anthropology or Maori Studies or Sociology or Political Studies

PACIFIC 310 (15 Points) **Koneseti**

Under supervision of instructors, students plan, rehearse, publicise and present a public song and dance performance. Repertoire selection, costuming, and rehearsal skills will be taught.

Prerequisite: 45 points from PACIFIC 301, COOKIS 101, 201, 301 or SAMOAN 101, 201, 301, or TONGAN 101, 201, 301

Postgraduate Courses

PACIFIC 700 (30 Points)

PACIFIC 700A (15 Points)

PACIFIC 700B (15 Points)

The Pacific: Interdisciplinary Studies

An examination of the ways in which the Pacific has been and is studied in the humanities and social sciences; an analysis and evaluation of views and perspectives on the development of the region and its peoples.

To complete this course students must enrol in PACIFIC 700 A and B, or PACIFIC 700

PACIFIC 701 (30 Points) **Pacific Language Studies**

Students will research and discuss issues relating to Pacific language acquisition, such as the lack of standardisation of Pacific language orthographies, the lack of reading material in Pacific languages, and their low status following the introduction of English into the Pacific.

PACIFIC 702 (15 Points) **Topics in Pacific Research**

Critical approaches to Pacific research development and evaluation of research design in Pacific Studies, including application of theory to research questions and developing a proposal for research which will be drawn from a wide range of topics contained within: Pacific world views and epistemologies, Pacific research methodologies, quantitative and qualitative paradigms.

PACIFIC 703 (30 Points) **Pacific Language Teaching**

Prepares students to teach Pacific languages in New Zealand schools. Examines the school curriculum and theories of language teaching and learning. Considers the types of students learning Pacific languages and the implications of this for the teaching of Pacific languages.

PACIFIC 704 (15 Points) **The Pacific: Continuity and Change**

An examination of changing politics, economics, societies, histories, cultures and ideologies in the Pacific.

PACIFIC 705 (30 Points) **Special Topic**

PACIFIC 706 (15 Points) **Pacific Jurisprudence**

A close analysis of what has been described as 'Pacific customary law'. Through examinations of different Pacific constitutions and traditional customs the course explores the questions: What is Pacific customary law? What is its relevance to understanding Pacific jurisprudence today? Pacific constructions of customary principles of ownership, dispute resolution, political hierarchies, social and gender status, are a particular focus.

PACIFIC 707 (30 Points) **Special Topic**

PACIFIC 708 (30 Points) **Special Study**

An approved research topic.

Philosophy

Stage I

PHIL 100	(15 Points)
Introduction to Metaphysics and Theory of Knowledge	
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.	
Restriction: 280.150	

PHIL 101	(15 Points)
Introduction to Logic	
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.	
Restriction: 280.151	

PHIL 102	(15 Points)
Introduction to Ethics	
Ethics is the philosophical study of morality. This course examines several ethical theories, including Kantianism, Utilitarianism and Virtue Ethics, and provides an introduction to fundamental questions about the nature of morality such as whether moral values are objective, subjective or culturally relative. The course will include discussion of selected current moral controversies and/or an introduction to some non-Western approaches to ethics.	
Restriction: HLTHPSYC 102, PSYCHIAT 102	

PHIL 103	(15 Points)
Freedom, Rights and Justice	
Considers various questions concerning the relation	

between individuals and political communities such as: What principles of justice should communities adopt? What are rights? What limits can legitimately be placed on individual liberty? What is the source and nature of citizens' obligations to obey the law? What makes a decision procedure democratic and why does it matter? These questions are considered in relation to the New Zealand context.

PHIL 105	(15 Points)
-----------------	--------------------

PHIL 105G	(15 Points)
Critical Thinking	

Dialogue, argument and discussion are analysed. Distinctions are drawn between persuasive, logically good and materially good arguments. The focus is on well reasoned persuasive dialogue, and mistakes in persuasive reasoning. Topics include the point of an argument, strength of arguments, fallacious reasoning, relevance of reasons, and burden of proof.

PHIL 152	(15 Points)
Philosophy and Theories of Human Nature	

What is human nature? The course covers competing conceptions of human nature, found in religious, philosophical and political thought, alongside theories that deny the existence of a human nature. Philosophers discussed may include: Aristotle, Descartes, Nietzsche, Plato, Hobbes, Marx, Sartre and Christian thinkers.

Stage II

PHIL 200	(15 Points)
Philosophy of Mind	

There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories. Prerequisite: 30 points in Philosophy, or any 60 points Restriction: PHIL 320

PHIL 202	(15 Points)
Philosophy of Language	

The components of language and its use (expressions, utterances, speech acts etc); theories of language and its nature (including structuralism, Chomskyan psychologism and platonism); linguistic meaning and its connection with other sorts of meaning (Grice on meaning, sense and reference, truth-conditional theories of meaning etc); the connection between language, thought and reality. Prerequisite: 30 points in Philosophy or Linguistics Restriction: PHIL 322

PHIL 204	(15 Points)
Greek Philosophy	

An introduction to some of the important figures in ancient philosophy and the issues with which they were concerned. The work of the Presocratics, Plato, and Aristotle will be explored, with a detailed discussion of the philosophical system of either Plato or Aristotle and its importance in the history of philosophy. Prerequisite: 30 points in Philosophy, or CLASSICS 120

PHIL 205	(15 Points)
Community, Society and Rights	

Addresses a variety of topics in political philosophy such as: the political theories of Locke and Hobbes; the nature of rights and rights-holders; sovereignty;

strategies for securing stable and just societies between people with significantly different moral, political and cultural views; and the relationship between individuals and communities. Topics will be related to contemporary political issues in New Zealand and, in particular, to the Treaty of Waitangi.

Prerequisite: 30 points in Philosophy, or 30 points in Political Studies

PHIL 207 (15 Points)
Philosophy of Religion

A study of the relationship between reason and faith; is belief in the Judaeo-Christian God reasonable? Topics include: the problem of evil, the meaningfulness of religious language, alternative concepts of God, Hume on miracles, and Kierkegaard and William James on faith and reason.

Prerequisite: 30 points in Philosophy

Restriction: PHIL 327

PHIL 209 (15 Points)
Schopenhauer and Nietzsche

A study of the philosophies of Arthur Schopenhauer (1788 – 1860) and Friedrich Nietzsche (1844 – 1900), focusing on their respective attitudes towards the value of life and the meaning of suffering. Schopenhauer's emphasis upon transcendent modes of awareness will be compared with Nietzsche's more down-to-earth existentialism, in light of their views on the redeeming value of artistic and aesthetic experience.

Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy

Restriction: PHIL 329

PHIL 210 (15 Points)
Applied Ethics

Philosophical analysis and discussion of contemporary moral issues, such as abortion, euthanasia, reverse discrimination, the ethics of charity and our treatment of animals.

Prerequisite: PHIL 102 or PSYCHIAT 102 or HLTHPSYC 102 or 30 points in Philosophy, or 30 points passed at Stage I in Social Science for Public Health

Restriction: PHIL 313

PHIL 211 (15 Points)
Ethical Theory 2

Philosophical study of moral theory, in both normative ethics and meta-ethics. Topics covered include: theories of value, theories of right action, and the status and justification of such theories.

Prerequisite: 30 points in Philosophy

PHIL 212 (15 Points)
Philosophy of the Arts

Considers a range of issues debated by contemporary philosophers concerning the origins, function, definition, ontology, presentation, interpretation, appreciation, expressiveness, representational character, and value of art. Related and applied topics, such as the status of colourised movies, the status of artistic fakes, and the paradox of our enjoying tragedies are also discussed.

Prerequisite: 30 points in Philosophy, or any 90 points passed

Restriction: PHIL 332

PHIL 213 (15 Points)
Philosophy and Gender

A selection of philosophical issues which arise within feminist thinking, such as: the nature of sexual equality; the relation between gender and embodiment; feminist rejections of the traditional oppositions of mind to body, nature to culture, emotion to reason;

concepts of patriarchy, oppression and exploitation and their use in feminist analyses of women's social position. Texts will include works by de Beauvoir, Irigaray, Butler, as well as Foucault and Freud.

Prerequisite: 30 points from courses in Philosophy and/or Political Studies and/or Women's Studies

PHIL 214 (15 Points)
Classical Chinese Philosophy

An introduction to the philosophical thought of pre-imperial China, which forms the intellectual foundation for almost all subsequent developments in Chinese philosophy and much of Chinese culture in general. Texts studied, in translation, will include the *Analects* of Confucius, *Mozi*, Mencius, the *Daodejing* of Laozi, *Zhuangzi*, *Xunzi*, and *Hanfeizi*.

Prerequisite: 30 points in Philosophy or ASIAN 100

Restriction: PHIL 334

PHIL 215 (15 Points)
20th Century French Philosophy

An examination of the development of contemporary French philosophy through the intellectual movements of Existentialism, Phenomenology, Structuralism and Post-Structuralism.

Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy

Restriction: PHIL 335

PHIL 216 (15 Points)
Modal Logic

An introduction to modal logic, which is a variation of the system of predicate logic studied in PHIL 101. Modal logic is well-suited for studying philosophically important concepts such as necessity, time, knowledge, vagueness, action and obligation. It is also used in computer science for studying the behaviour of programs and is recommended as preparation for studying logic at Stage III.

Prerequisite: PHIL 101

PHIL 217 (15 Points)
Philosophy of Law

Themes in contemporary Western philosophy of law, relating to debates between liberal and non-liberal conceptions of law, including questions about the nature of legal rules, legal reasons and the relationship between law and morality. Major positions in legal theory will be covered, from legal positivism to critical legal studies.

Prerequisite: 30 points in Philosophy or 90 points passed

Restriction: PHIL 337

PHIL 218 (15 Points)
Problems in Epistemology

Epistemology is the study of knowledge, rationality, belief and related topics. This course will give an overview of epistemology but will focus on three main issues: foundationalism versus coherentism, internalism versus externalism and replies to scepticism.

Prerequisite: 30 points in Philosophy

Restriction: PHIL 338

PHIL 220 (15 Points)
Kant and Hegel

An examination of the development of German idealism from Kant to Hegel, focusing on Kant's *Critique of Pure Reason* (1781 – 1787) and Hegel's *Phenomenology of Spirit* (1807).

Prerequisite: 30 points in Philosophy

Restriction: 280.312, PHIL 340

PHIL 221 (15 Points)**20th Century German Philosophy**

An examination of the development of contemporary German philosophy through the intellectual movements of Phenomenology, Hermeneutics and Critical Theory and focussing on the work of Husserl, Heidegger, Gadamer and Habermas.

Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy

Restriction: PHIL 341

PHIL 222 (15 Points)**Intermediate Logic**

Natural deduction for propositional and predicate logic; introductory metalogic and related topics in formal logic.

Prerequisite: PHIL 101

Restriction: PHIL 201

PHIL 224 (15 Points)**Special Topic: Buddhist Philosophy**

An introduction to the Buddhist tradition of philosophy, from the teachings of the Buddha himself to Abhidharma, Madhyamaka, Yogācāra (in India, South East Asia and Tibet) and finally to Chan (China) and Zen (Japan).

Prerequisite: Any 30 points in Philosophy, or ASIAN 100 and 15 points in Philosophy

Restriction: PHIL 344

PHIL 225 (15 Points)**Special Topic: Power, Critique and Emancipation**

An examination of some attempts to support political struggles for freedom, justice and recognition through the philosophical critique of modern society. Topics to be discussed include science and technology, bureaucratisation, social control, social alienation, mass communication, the commodification of culture, and the idea of critique. Theorists to be discussed may include Horkheimer, Adorno, Marcuse, Benjamin, Arendt, Habermas and Honneth.

Prerequisite: Any 30 points in Philosophy

Restriction: PHIL 345

PHIL 227 (15 Points)**Ethical Issues in Biotechnology**

A discussion of ethical issues arising from developments in biotechnology, such as reproductive and genetic technologies. It will focus particularly on the perceived need for social control of individual choice and action in using these technologies, and the difficulties of justifying such restrictions, or agreeing on appropriate constraints, in a morally pluralist society.

Prerequisite: 30 points in Philosophy or any 60 points

Restriction: PHIL 317

PHIL 250 (15 Points)**Environmental Ethics**

Ethical questions relating to the environment and our use of it, including: Does nature have intrinsic value; do we have obligations to preserve species; is biodiversity desirable; what responsibilities do we have to animals; do we have obligations to future generations, especially concerning preservation of the environment; are population control policies ethically defensible.

Prerequisite: 30 points in Philosophy or any 60 points

PHIL 260 (15 Points)**Philosophy of Science**

What makes science a distinctive way of discovering knowledge about our world whether natural, biological or social? Ever since science started in Ancient Greece,

a number of different theories about the worldview, methods and rationality of science have been proposed that distinguish it from religion, pseudo-science and myth. The course examines some of these accounts of the nature of science.

Prerequisite: 30 points in Philosophy or any 60 points

Restriction: PHIL 360

PHIL 261 (15 Points)**Metaphysical Structures of the World**

Metaphysics attempts to give a quite general picture of the nature and structure of the world, and investigates philosophical problems which thereby arise. Science, commonsense, religions and cultures all presuppose metaphysical worldviews. Traditional metaphysical problems concern laws, causation, time, space, substance, identity, attributes and universals, free will, reality, existence etc. Course topics will be selected from such traditional problems.

Prerequisite: 30 points in Philosophy

Restriction: PHIL 361

PHIL 263 (15 Points)**Philosophy of Biology**

Topics may include: explanation, design and teleology, the status of evolutionary theory, creationism versus evolution, fitness and adaptation, species and the units of evolutionary selection, reduction and the DNA molecule, biological classification, altruism, sociobiology, evolution and ethics, selected topics in the history of biological sciences.

Prerequisite: 30 points in Philosophy or any 60 points

Restriction: PHIL 363

PHIL 266 (15 Points)**Special Topic**

Prerequisite: 30 points in Philosophy

PHIL 267 (15 Points)**Special Topic: Early Modern Philosophy**

Examines important developments in seventeenth and eighteenth-century philosophy. It will look at refinements in philosophical methodology during this period and their impact on metaphysics, epistemology, philosophy of mind, and ethics.

Prerequisite: Any 30 points in Philosophy

Restriction: PHIL 208, 309, 328

Stage III**PHIL 302 (15 Points)****Medieval Philosophy**

A detailed introduction to either the work of a leading medieval philosopher, for example Augustine, Abaelard, Scotus or Ockham, or to one or more of the topics which were of interest to medieval philosophers. The course aims to show how understanding medieval philosophy is essential for the history of Christian thought and philosophy up to modern times.

Prerequisite: Any 30 points at Stage II in Philosophy

PHIL 304 (15 Points)**Ethical Theory 3**

Advanced philosophical study of moral theory (in both normative and meta-ethics), especially virtue ethics, Aristotelian ethics and moral dilemmas.

Prerequisite: Either 30 points at Stage II in Philosophy including PHIL 205 or 210 or 211 or 250, or PHIL 102 and any 30 points at Stage II in Philosophy

PHIL 305 (15 Points)**Advanced Logic**

The techniques and philosophical significance of modern logical theory, including some model theory,

proof theory, set theory and recursion theory. The main objective is to provide a level of understanding of these topics sufficient for an appreciation of Godel's celebrated proof of the incompleteness of arithmetic.
Prerequisite: 30 points from PHIL 222, PHIL 216, COMPSCI 225, MATHS 255

PHIL 306 (15 Points)
Language, Truth and Meaning

The relationship between language, thought and reality. Topics include: the nature of existence; theories of reference, meaning and truth; and Quine's radical views of meaning and reference. Students are strongly urged to take PHIL 101 (Introduction to Logic) before taking this course.

Prerequisite: PHIL 101 and any 30 points at Stage II in Philosophy

Prerequisite: Any 30 points at Stage II in Philosophy

Restriction: PHIL 208, 267, 328

PHIL 310 (15 Points)
Political Philosophy 3

Advanced topics in Political Philosophy.

Prerequisite: Any 30 points at Stage II in Philosophy or Political Studies

PHIL 313 (15 Points)
Special Topic: Applied Ethics

Philosophical analysis and discussion of contemporary moral issues, such as abortion, euthanasia, reverse discrimination, the ethics of charity and human treatment of animals.

Prerequisite: 30 points at Stage II in Philosophy, or 30 points at Stage II in Social Science for Public Health

Restriction: PHIL 210

PHIL 315 (15 Points)
Topics in Applied Logic

A selection of topics in applied logic such as: modal logic (the logic of necessity and possibility), temporal logic (the logic of time), dynamic logic (the logic of change), and epistemic logic (the logic of knowledge and belief, including the logic of belief revision).

Prerequisite: PHIL 222 and either COMPSCI 225 or PHIL 216

PHIL 317 (15 Points)
Ethical Issues in Biotechnology

A discussion of ethical issues arising from developments in biotechnology, such as reproductive and genetic technologies. It will focus particularly on the perceived need for social control of individual choice and action in using these technologies, and the difficulties of justifying such restrictions, or agreeing on appropriate constraints, in a morally pluralist society.

Prerequisite: Any 30 points at Stage II in Philosophy, or SOCSCIPH 200 and 15 points in Philosophy at Stage II, or PHIL 260 and either HISTORY 240 or SCIGEN 201

Restriction: PHIL 227

PHIL 318 (15 Points)
Theory of Applied and Professional Ethics

The application of ethical theory to applied and professional ethics, including topics such as: the role of principles in applied and professional ethics, ethical expertise, role ethics, dialogue ethics, the ethics of care, ethical issues that arise in professional practice.

Prerequisite: Either 30 points at Stage II in Philosophy including PHIL 205 or 210 or 211 or 250, or PHIL 102 and any 30 points at Stage II in Philosophy

PHIL 320 (15 Points)
Philosophy of Mind

There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories.

Prerequisite: Any 30 points at Stage II in Philosophy or 30 points from HISTORY 240, PHIL 260, SCIGEN 201

Restriction: PHIL 200

PHIL 322 (15 Points)
Philosophy of Language

The components of language and its use (expressions, utterances, speech acts etc); theories of language and its nature (including structuralism, Chomskyan psychologism and platonism); linguistic meaning and its connection with other sorts of meaning (Grice on meaning, sense and reference, truth-conditional theories of meaning etc); the connection between language, thought and reality.

Prerequisite: 30 points at Stage II in Philosophy or 30 points at Stage II in Linguistics

Restriction: PHIL 202

PHIL 323 (15 Points)
Philosophy of Logic

An introduction to philosophical logic, covering at least three of the following topics: use and mention, language and logic, argumentation theory, propositions and sentences, conditionals, disjunctions, and existence and quantification.

Prerequisite: PHIL 222 and PHIL 216

Restriction: PHIL 223

PHIL 327 (15 Points)
Philosophy of Religion

A study of the relationship between reason and faith; is belief in the Judaeo-Christian God reasonable? Topics include: the problem of evil, the meaningfulness of religious language, alternative concepts of God, Hume on miracles and Kierkegaard and William James on faith and reason.

Prerequisite: Any 30 points at Stage II in Philosophy

Restriction: PHIL 207

PHIL 329 (15 Points)
Schopenhauer and Nietzsche

A study of the philosophies of Arthur Schopenhauer (1788 – 1860) and Friedrich Nietzsche (1844 – 1900), focusing on their respective attitudes towards the value of life and the meaning of suffering. Schopenhauer's emphasis upon transcendent modes of awareness will be compared with Nietzsche's more down-to-earth existentialism, in light of their views on the redeeming value of artistic and aesthetic experience.

Prerequisite: Any 30 points at Stage II in Philosophy or EUROPEAN 100 and 15 points at Stage II in Philosophy

Restriction: PHIL 209

PHIL 332 (15 Points)**Philosophy of the Arts**

Considers a range of issues debated by contemporary philosophers concerning the origins, function, definition, ontology, presentation, interpretation, appreciation, expressiveness, representational character, and value of art. Related and applied topics, such as the status of colourised movies, the status of artistic fakes, and the paradox of our enjoying tragedies are also discussed.

Prerequisite: Any 30 points at Stage II in Philosophy
Restriction: PHIL 212

PHIL 334 (15 Points)**Classical Chinese Philosophy**

An introduction to the philosophical thought of pre-imperial China, which forms the intellectual foundation for almost all subsequent developments in Chinese philosophy and much of Chinese culture in general. Texts studied, in translation, will include the *Analects* of Confucius, *Mozi*, Mencius, the *Daodejing* of Laozi, *Zhuangzi*, *Xunzi*, and *Hanfeizi*.

Polish

Stage I

POLISH 100 (15 Points)
Beginners' Polish 1

Introduction to elementary spoken and written Polish and the development of speaking, listening, comprehension, reading and writing skills, covering basic grammar and an introductory vocabulary.

Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

POLISH 101 (15 Points)

Introduction to Contemporary Poland

A survey of Poland in the twentieth century, from historical, economic and cultural perspectives, that reflects Polish aspirations during the Second Republic (1918-39), the eras of Nazism and Bolshevism (1939-45) and Sovietisation (1945-89); the emergence of Solidarity, the collapse of communism (1989) and subsequent moves towards democratic government and economic and political integration with the West.

POLISH 102 (15 Points)

Beginners' Polish 2

Continues the study of the language with further development of the skills introduced in POLISH 100. Students completing this two-semester programme should be able to read simple texts and write and speak in Polish about everyday matters. Students with some prior knowledge of Polish may apply to be admitted directly to this course.

Prerequisite: POLISH 100

Stage II

POLISH 210 (15 Points)

Poland, Heart of Europe

Poland's geographic position in Europe has been both

her vulnerability and strength. Surrounded by large and powerful nations vying for land and influence, Poland has often had a precarious existence, but her national spirit has remained indomitable. Through an examination of memoirs, major works of fiction and film, this course examines the nationalism that existed in pre-partitioned Poland and its significance to Poland's emerging role in the modern world.

Prerequisite: Any 15 points at Stage I in Polish or approval of the Head of Department

Political Studies

Stage I

POLITICS 106 (15 Points)

International Relations

An introduction to the study of international relations. The focus is on how international organisations, states and non-state actors raise and address global challenges such as security and human insecurity, humanitarian intervention, global trade and finance, development and poverty, environmental degradation, warfare, and respect for human rights. The course is informed by and introduces a range of international relations theories.

Restriction: 285.111

POLITICS 107 (15 Points)

POLITICS 107G (15 Points)

New Zealand Politics

An examination of who governs New Zealand and in whose interests. Topics include: government formation and functioning under MMP, political leadership, national identity, parties and elections, the role of the media in election campaigns, the place of Māori within the political system, and business and politics.

POLITICS 109 (15 Points)

Foundations of Western Politics and Law

An examination, via the works of selected major European thinkers from Ancient Greece to late nineteenth-century Britain, of ideas central to the western tradition of political thought: law, liberty, subjection, rights, justice, citizenship, authority, the rights of women, kingship, republicanism, and the right to resist governments. Thinkers studied include: Plato, Machiavelli, Hobbes, Locke, Rousseau, Wollstonecraft, Bentham, Mill and Marx.

POLITICS 113 (15 Points)

Politics and the Media

An examination of the political importance of media and communication. Introduces students to theories and research dealing with the role of mass-mediated messages, images, symbols and opinions in political life. Topics include: the role of media in democracy, media and power relationships, the telecommunications revolution and its political consequences, newspaper and television constructions of political events, leaders, election campaigns, scandals, crises, foreign enemies.

POLITICS 121 (15 Points)

The Making of Public Policy: Environmental Politics in New Zealand

Introduction to the building blocks of policymaking processes. Covers key policymaking institutions and actors through the exploration of specific policy case studies that provide the platform for introducing

concepts and questions about policymaking in general.

POLITICS 140G (15 Points)
Power, Order and Society in Europe

Politics today is shaped by a long history of ideas beginning with the ancient Greeks about the nature of human beings and their relationships with each other. This course examines the ways people in the west from the classical world to the present have imagined their place in nature and their social world, and some of the consequences of their thinking.

Stage II

POLITICS 209 (15 Points)
Modern Political Thought

A survey of contemporary paradigms in political thought that shape our ideas about politics and society. We will examine different varieties of liberalism, communitarianism, multiculturalism, feminism, socialism and utilitarianism, and the ways they influence our beliefs about justice, liberty, equality, the legitimacy of state regulation, and our duties as citizens towards each other and to the wider global community.

Prerequisite: 30 points at Stage I in Political Studies, or 15 points at Stage I in Political Studies and EUROPEAN 100, or 15 points at Stage I in Political Studies and 15 points in Philosophy

POLITICS 213 (15 Points)
Gender and International Relations

An overview of feminist perspectives in political science. New gendered theories have challenged the assumptions of mainstream political analysis. These theories are applied to issues such as democracy and democratisation, nationalism and identity politics, human rights, conflict and security, and globalisation, with reference to the emergence of transnational feminist networks and their potential to affect power shifts in local, national and international politics.

Prerequisite: Any 30 points at Stage I in Political Studies and/or Women's Studies or 60 points in BA, or Departmental approval required

Restriction: POLITICS 353

POLITICS 214 (15 Points)
Democracy in Theory and Practice

Examines current democratic theories at the nexus of philosophy and practice. Considers issues raised by both democratic and anti-democratic theorists. Specific topics include: referenda, deliberation, citizenship, and political representation (including the question of Māori representation).

Screen Production

Postgraduate Courses

SCREEN 701 (30 Points)

Introduction to Directing

Provides students with a practical overview of the drama and documentary production process from a director's point of view. Students are taken through pre-production, production and post-production on a series of group projects, as well as their own 2-minute short. Emphasises the importance of character and story alongside acquiring practical skills. Students are encouraged to critique their own work as well as the work of their classmates.

Restriction: FTVMS 750

SCREEN 702 (15 Points)

Production Management

Examines the multiple production roles that exist in film and television production from the producer to the production manager. Students will learn EP Scheduling, budgeting, safety management, casting and general production management skills to aid them in the production process and be introduced to the process of 'creative producing', including copyright purchasing, identifying appropriate and likely funding sources and market positioning.

Restriction: FTVMS 754

SCREEN 705 (15 Points)

Screenwriting

Considers the short film script with a focus on dramatic writing. Studies a range of short films as a way of understanding this aesthetic form. Designed as a high-intensity, immersion experience in the principles of scriptwriting. Students will write two short scripts beginning with a 2-minute script with minimal dialogue and complete the course with a fully developed 10-minute script for a short film.

Restriction: FTVMS 758

SCREEN 711 (15 Points)

Special Topic

SCREEN 712 (30 Points)

Advanced Drama Directing (Screen)

Focuses on the directing of actors for screen, and the relationship between this and blocking for camera. Students direct in front of the class and create a short piece of work as a group using improvisation. Students first focus on directing and presenting a 10-minute excerpt from a play and then direct and edit an original dramatic short film of 8-10 minutes. Crewing on fellow students' projects is a compulsory requirement.

Prerequisite: SCREEN 701

Restriction: FTVMS 752, SCREEN 703

SCREEN 713 (30 Points)

Advanced Documentary Directing

Students complete a major treatment/script, an interview exercise, an editing exercise, and a completed documentary of 7-10 minutes. For the latter project, the course convener functions like an executive producer, overseeing and critiquing the documentaries as they progress. Emphasis is placed on aesthetic and formal approaches to the documentary and the class will draw extensively on documentary history.

Prerequisite: SCREEN 701

Restriction: FTVMS 753, SCREEN 704

SCREEN 714 (30 Points)

Advanced Screenwriting: Drama

Focuses on screenplay writing for feature films. Through a combination of lectures and workshops, students will take individual feature-length projects from pitch to step outline. The course emphasises plot, structure, character, and dialogue. Students will also gain skills in analysing screenplays and writing treatments.

Prerequisite: SCREEN 705 or equivalent

Restriction: FTVMS 759, SCREEN 706

SCREEN 797A (60 Points)
SCREEN 797B (60 Points)
Production Project

The production of a substantial project in which the student specialises as director and/or writer, or producer completing either a documentary (under 30 minutes), a 10-15 minute short drama or a full-length screenplay. Students are required to attend a seminar series conducted by academic staff and industry practitioners in Semester One. Crewing on fellow students' projects is also required.

Prerequisite: Department approval

Restriction: FTVMS 776, SCREEN 720

To complete this course students must enrol in SCREEN 797 A and B

Social Science for Public Health

Stage II

SOCSCIPH 200 (15 Points)
Social Science for Health

Explores diversity in health knowledges, overviews current health trends and systems with special focus on New Zealand and the Pacific, examines the contributions of social science disciplines to analysis of health including key theoretical approaches, and applies interdisciplinary analytical models to health.

Prerequisite: 30 points at Stage I in Health Social Sciences or Social Science for Public Health, or 60 points passed

Restriction: HLTHSOC 200

Stage III

SOCSCIPH 300 (15 Points)
Current Debates in Health and Health Policy

Examines the recent histories of central intellectual debates in health and health policy and their relevance for and in the New Zealand and Pacific contexts. These would consist of the following: the 'medicalisation' of social issues, the 'socialisation' of medical issues, cross-national health policy analysis, the rationing of health resources (global and local perspectives), defining and measuring health outcomes (accountability and responsibility in health service delivery), health service management (medics or managers).

Prerequisite: HLTHSOC 200 or SOCSCIPH 200, or 120 points passed

Restriction: HLTHSOC 300

Sociology

Stage I

SOCIOL 100 (15 Points)
Issues and Themes in Sociology

Introduction to sociology as a discipline and a review of some of its internal debates. Topics include: social class, gender, globalisation, power, sexual identity and family. Draws on material from a range of societies.

SOCIOL 101 (15 Points)

SOCIOL 101G (15 Points)

Understanding Aotearoa New Zealand

Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.

Restriction: 315.104

SOCIOL 102 (15 Points)
Becoming Modern

Sociology is a modern discipline, born of the 'dual revolution'. French political experience between 1789 and 1871, and British industrialisation are studied to explore the nature of modernity. And hence, of course, why sociology takes its current intellectual shape.

SOCIOL 103 (15 Points)
Social Policy, Social Justice

Provides an overview of key contemporary social policy issues within the context of globalising economic processes and continuing gendered and racialised

divisions. Discusses the way in which debates around social policy are constructed and the implications this has for social justice. Case studies may include food and health, technology, indigeneity and children.

SOCIOL 105 (15 Points)
Cultural Studies and Society

A cultural studies approach to social life focuses on the way we experience the world, taking account of what we see, what we hear, what we consume and how we communicate. This course looks at how our lives are influenced by flows of images and objects around the world, and tracks the ways that global and local processes impact on each other.

SOCIOL 106 (15 Points)
Sociology for Auckland

Auckland is in New Zealand but not always of New Zealand. By studying differences in class, ethnicity, gender, sexual orientation and other social factors, what makes Auckland 'special' is explored; its own particular place(s) within New Zealand, a city suffering (and enjoying) an uneasy relationship with the rest of this country and beyond.

Stage II

SOCIOL 200 (15 Points)
Theory and Society

An introduction to the major themes of social theory. The focus is on the analyses of modern society to be found in the works of classical and contemporary social analysts.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 201 (15 Points)
Social Research: An Introduction

An introduction to social research through an examination of both qualitative and quantitative approaches.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points passed in Stage I courses listed for Social Science for Public Health, or 15 points at Stage I in Sociology and 15 points from MĀORI 130, PHIL 103, POLITICS 109

SOCIOL 208 (15 Points)
Work and Leisure

Examines the social aspects of work and leisure. Particular attention is paid to the phenomena of surveillance and simulation and their impact on work and leisure, including control and resistance. These developments are crucial to understanding the 'big issues' of globalisation, restructuring and new technologies. Course material is drawn from international literatures and is grounded in an understanding of contemporary New Zealand.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 210 (15 Points)
Colonisation, Globalisation and Development

From 1492 to Franz Fanon to the Zapatistas, we look at the 'West and the Rest' through the realities of colonialism and decolonisation; 'aid and development'; under/overdevelopment; globalisation; IMF/World Bank/World Trade Organization hegemony; the rise of the non-governmental organisations and the anti-capitalist upsurges of the new millennium.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass or LATINAM 100 or SPANISH 103

SOCIOL 211 (15 Points)
Sociology and Popular Culture

An interpretation of popular culture both as an indicator of social change and as a location of meaning and significance. Undertaken by the analysis of the industries which organise it, the texts which realise it, and the audiences which recognise it.

Prerequisite: 30 points at Stage I in Sociology, or 15 points at Stage I in Sociology with a minimum B+ pass, or FTVMS 100 and 101, or 30 points passed from courses listed in Comparative Literature

SOCIOL 212 (15 Points)
Race, Gender and Class in Australia and New Zealand

This course looks at the persistence of race, gender and class inequality in Australia and New Zealand, from white settlement to the 'celebrations' of 1988/1990 and onwards to the bicultural and multicultural settlements in the twenty-first century.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 213 (15 Points)
Ethnicity and Identity

Theories of ethnicity: ethnic socialisation and resocialisation, ethnocide and ethnogenesis, ethnicity and the individual, ethnic social movements, ethnicity in local, national and international affairs.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 214 (15 Points)
Sociology of Gender

Introduction to the sociology of gender. Preliminary examination of the topics of concern to sociologists and the major theoretical perspectives – psychoanalytic, functionalist, Marxist, socialisation, feminist, antifeminist, biological. Critical analysis of key sites such as the family, reproduction, mothering, sexuality and violence against women, drawing on both international and local literature.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points passed at Stage I from courses listed in Women's Studies

SOCIOL 215 (15 Points)
Law, Inequality and the State

Examines, in a comparative mode, how law as a set of social relations and categories can both create and remedy inequalities of gender, race, and class.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 15 points at Stage I in Sociology and 15 points from MĀORI 130, PHIL 103, POLITICS 109

SOCIOL 216 (15 Points)
Sociology and Crime: An Introduction

What is crime? What causes crime? What are the best ways of dealing with crime? Why are specific actions labelled 'criminal'? Are some people more likely to be judged criminal than others? This course examines such questions by introducing and critically analysing selected theories of crime.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 15 points at Stage I in Sociology and 15 points from MĀORI 130, PHIL 103, POLITICS 109

SOCIOL 220 (15 Points)

SOCIOL 220G (15 Points)

Examines the social location of death in modern life. It includes topics on perceptions of death from sociological, philosophical, religious, historical, secular

and medical approaches. It includes topics on death systems, medicalisation of death, death in popular culture, suicide and genocide.

Prerequisite: 30 points at Stage I in Sociology or 30 points at Stage I in Social Science for Public Health or 90 points passed

SOCIOL 221 (15 Points)
Pakeha Identity

A critical examination of the conception of national identity. Examines what is meant by national identity; how and why such identities come into being; what is meant by 'culture', and the relationship between 'culture and identity'. Focuses on the New Zealand Pakeha experience.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

Restriction: SOCIOL 304

SOCIOL 222 (15 Points)
Families, Labour and Love

The focus of this course is how and why family life is influenced by economic and labour force trends, laws and social values, as well as personal ideals and decisions. Partnering, childbearing, gendered labour and divorce, from both historical and cross-national perspectives, will be studied.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points passed at Stage I in courses listed in Women's Studies

SOCIOL 224 (15 Points)
Issues in Migration: the Pacific and the World

Examines international migration in the context of the modern world economy, its impact on global cultures and its relationship with ideologies such as nationalism and racism. The focus is on the Pacific region, but in the context of, and in comparison with, other parts of the world.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 225 (15 Points)
Outsiders – Youth and Adult Subcultures

Examines sociological understandings of a range of subcultures, music subcultures (eg, goth, neopunk, gansta/rap), (trans)gender subcultures, ethnic subcultures, urban subcultures (eg, alternative groups, political collectives, squatters etc), drug subcultures, virtual subcultures, religious subcultures and criminal subcultures. Examples are drawn from New Zealand and international contexts.

Prerequisite: 30 points at Stage I in Sociology, or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points from MAORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

SOCIOL 226 (15 Points)
Special Topic: Earning and Caring: Cross-national Comparisons

Discusses trends in work and employment policies in Western countries, focusing on gendered work, policies to balance work and family, and retirement programmes. Compares New Zealand with less regulated labour markets and those offering more social protection. Discusses why labour markets have changed, how welfare states have adapted, how theorists explain cross-national variations, and the connections between work, gender and class.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 227 (15 Points)
The Sociology of Mental Health

SOCIOL 320 (15 Points)
Qualitative Sociological Research

An introduction to non-numerical research methodologies in sociology. Topics drawn from a wide range: ethnography, interviews, life history methods, archival research, analysis of text. Not all topics will be included in any one year.

Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 321 (15 Points)
Quantitative Sociological Research

Principles and practice of the design, execution and analysis of the several forms of 'systematic social research' (including survey research, census and other social bookkeeping data, content analysis, systematic observation and unobtrusive methods) and their usefulness within sociological analyses. Not all topics will be included in any one year.

Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 323 (15 Points)
Consuming Interests: The Sociology of Food

Food is basic to human society. This course blends social history, political economy and hermeneutics to examine sociological aspects of food production, processing, distribution and consumption. Other issues raised will include hunger and famine, colonialism, gender differences and development.

Prerequisite: 30 points at Stage II in Sociology

SOCIOL 324 (15 Points)
Special Issues in Gender

Focuses on current and controversial issues in the sociology of gender, especially debates on the natural or social status of sex, gender and sexuality. Issues will be approached from contemporary feminist perspectives, including post-structuralist and other critical feminist theories. Various topics, including sex, sexualities, reproduction, transgender and cybersex,

will be critically examined in both theoretical and practical terms.

Prerequisite: 30 points at Stage II in Sociology

SOCIOL 325 (15 Points)
Sociology of Emotions

This course examines some of the emotions – including anger, revenge, shame, love, pity, resentment, empathy, disgust, and desire – that shape social processes and inflect the relationship between self and society.

Prerequisite: 30 points at Stage II in Sociology

SOCIOL 326 (15 Points)
Sociology of Violence

Drawing on writings from a variety of intellectual traditions, this course explores the contested nature of violence through an examination of a number of contemporary debates about the causes, agents, consequences, as well as responses to and interventions in, incidents of violence.

Prerequisite: 30 points at Stage II in Sociology, or 15 points at Stage II in Sociology and CRIM 201 or 202

Prerequisite: 30 points at Stage II in Sociology

SOCIOL 331 (15 Points)
Issues and Themes in Visual Culture

Considers the significance of vision in the societies and cultures of modernity based on the notion that perception is socially and historically constructed. Looks at the impact of technology on vision and the way visual practices travel the world.

Prerequisite: 30 points at Stage II in Sociology

SOCIOL 333 (15 Points)
Sociology of Health and Medicine

Examines the social construction of health, illness and medicine in New Zealand. A range of issues and sociological accounts will be addressed, including: competing conceptions of medicine and the sick role; the political economy of health; debates around professionalism and managerialism; the interface of medicalisation, risk and claims-making; medical ethics; the sociology of the body; lay-accounts and contested character of medical knowledge.

SOCIOL 700 (30 Points)

Advanced Problems in Sociological Theory

Addresses contemporary developments and debates in the field of social theory and explores the effect of a range of complex social, cultural, economic and political processes of transformation on human experience and conduct.

Restriction: SOCIOL 733

SOCIOL 701 (30 Points)

Advanced Skills in Research

Examination of sociological issues in research design, execution, analysis and interpretation. Particular attention is paid to technologically mediated research and benefits of employing multiple methods.

SOCIOL 703 (30 Points)

Sociology of Mental Health

Interrogates advanced sociological theories of medicine and psychiatry, investigating mental health interventions as social, economic, cultural and political projects. Key issues will include The Enlightenment and theories of the self, the rise of science and the 'psy' professionals, institutionalisation and community care, current sociological theories of mental health, the medicalisation of everyday life, and gender, race and mental illness.

SOCIOL 704 (30 Points)

Researching Islam in the West

Understanding and researching Islam from a Western base, which includes an analysis of Western representations of Islam, the diverse beliefs, practices and legal principles of Muslim societies, Muslim migration to the West, and the possible emergence of distinctively Western forms of Islam.

Restriction: SOCIOL 741

SOCIOL 708 (30 Points)

Complex Organisations

Reviews methods and recent approaches to organisational analysis within a sociology of knowledge framework. Emphasises cross-cultural and comparative inquiry, focusing on such topics as Japanisation and post-Fordism.

SOCIOL 712 (30 Points)

After Neoliberalism?

Through an analysis of the works of Polanyi, Foucault, Harvey and other major theorists, this course provides an historically grounded, theoretical examination of the development of neoliberalism to the present, and

of its current prospects. In addition to considering the international development of (neo)liberal approaches, we will look more closely at recent shifts in social policy in New Zealand, and to the approaches of international development agencies to state building, poverty reduction and livelihoods in South East Asia.

SOCIOL 713 (30 Points)

Sociology of Law: Human Rights

Examines recent developments in the sociology of human rights within the study of law and society. Sociological thinking can offer a critical examination of international rights thought and practice, addressing the place of rights discourse in law and literature, feminist issues, indigenous rights, the place of rights in critical race theory and for refugees.

SOCIOL 718 (30 Points)

Research Projects: Design and Practice

Involves the development of a research proposal, especially for students intending to write a thesis or research essay. Both 'empirical' and 'theoretical' projects will be encouraged. Students will work through problem definition, literature review, research design, preparation of an ethics application and a small supervised pilot project.

Restriction: SOCIOL 731, SOCSCRES 701

SOCIOL 722 (30 Points)

Remaking Aotearoa New Zealand

Aotearoa New Zealand has experienced several critical 're-makings', from: Māori society to white-settler colony; colony to nation; 30s depression to post-war boom; from the end of the 'golden weather' to deregulated player in the global economy. Despite these episodes, the gaps between Māori/Pakeha, men/women and employers/workers remain as the objects of future contested settlements within Aotearoa New Zealand as a nation, or nations.

SOCIOL 728 (30 Points)

Family, Women and the State

The influence of ideologies of mothering, family and work, as well as the political forces and pressure groups that promote them, on both the development and restructuring of social policies in several industrialised nations, including New Zealand.

SOCIOL 729 (30 Points)

Modernity and Consciousness

Operating on the boundary between sociologies of history and culture, this course employs the work of Walter Benjamin, Marshall Berman, Wolfgang Schivelbusch, Raymond Williams, and Talcott Parsons to explore creatively tangled relationships among three superficially similar terms – 'modernisation', 'modernity' and 'modernism' – in sundry nineteenth and twentieth century urban and rural settings.

SOCIOL 730 (30 Points)

Globalisation and Market Governance

Political sociology has traditionally focused on relationships between state and society. Recent theoretical and empirical changes challenge this approach. Post-structuralism, neo-Marxism and feminism have given rise to wider definitions of power, politics and social identities. Globalisation, the shift from government to governance and the rise of 'new social movements' have transformed the social terrain of political struggle. Examines contemporary debates in political sociology.

SOCIOL 732 (30 Points)
Tourism and Heritage

Tourism is one of the world's largest and fastest growing industries. This course examines tourism's intersection with 'heritage', considering the political economy of tourist development, the tourist gaze, commodified 'authenticity' and cultural conflicts in tourism.

SOCIOL 735 (30 Points)
Current Debates in Gender and Sexuality

Traces contemporary sociological debates in the analysis of gender and sexuality. This includes reference to feminist concerns with identities, differences, bodies, power and agency. These issues are taken up and explored through an examination of practices enacted on/or through sexed bodies.

Modern Times, Modern Crimes

Sociology sees itself as being centrally concerned with the question of modernity. However, until recently, it has avoided active scholarly engagement with modernity's underbelly: war, genocide and torture. This course argues that rather than appearing as peripheral aberrations they are central to the project of modernity. Special attention will be paid to the roles played by science and technology in the production of inhumanity.

THEOLOGY 105 (15 Points)

THEOLOGY 105G (15 Points)
Worlds and Cultures of the Bible

Selected biblical texts are situated within their historical and socio-cultural contexts. Students will study the cultures of the Ancient Near East and the Graeco-Roman world, and develop competencies in using historical and socio-cultural methodologies, and literary and artefactual data necessary for understanding and interpreting biblical texts. Attention will also be given to these texts and their contexts in contemporary politics and religion in the Middle East.

Restriction: BSTHEO 111

Stage III

THEOLOGY 301 (15 Points)
Māori Theology

An integration of biblical, theological, ethical and spiritual insights in a Māori theology for the contemporary context of Aotearoa New Zealand. It will do this by developing a theological framework drawn from Māori experience past and present and from Māori concepts and principles.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 302 (15 Points)
Theology of Place

An examination of the relationship of place to cultural identity with specific reference to the cultures of Aotearoa New Zealand and Oceania. Theologies of place and related themes in the Bible will be explored in dialogue with contemporary understandings of place and identity.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 303 (15 Points)
Feminist Theologies

An engagement with a variety of critical theologies developed by women in recent decades. Students will explore one or more of these approaches and use these in undertaking a major theological project from one of the critical perspectives explored and developed during the course.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 304 (15 Points)
Ecotheology

An examination of the relationship of scripture and theology to ecological issues facing contemporary society. Theories and perspectives from the biblical and theological traditions and environmental sciences will be critically examined and brought into dialogue with local ecological issues and their resolution.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 305 (15 Points)
Missiology

Missiology draws on biblical, historical and theological scholarship in order to reflect critically on the interaction between the theory and praxis of mission. It uses the tools of the social sciences to identify and critique different missiological dynamics, and encourages students to respect the multi-cultural and multi-religious reality of contemporary society.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 306 (15 Points)
Religious Themes in the Arts

Investigates how biblical and theological themes and spiritualities are interpreted and expressed in historical and contemporary art forms, such as literature, film, art, architecture, music and dance.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 307 (15 Points)
The Gendered Church

Scripture has been pivotal in passing on understandings of “normative” gender roles which have been reinforced by Christian theology. This course critically appraises biblical studies, Christian thought and history, and practical theology from the point of view of the construction of gender. It also investigates this construction in the symbols, signs and metaphors of the church, both past and present, as these reflect cultural and historical contexts.

Prerequisite: Any 30 points at Stage II courses from BTheol Schedule

THEOLOGY 308 (15 Points)
Special Topic in Theology

Women's Studies

Stage I**WOMEN 100 (15 Points)****Gender and the Culture of Everyday Life**

Gender is a significant marker in the understanding of contemporary life and experience. Focuses on four themes: home; work; consumption and leisure; and

public worlds to explore how gender shapes and is shaped by everyday actions and encounters. These themes are explored in terms of current issues and of how the future is being shaped by the trends of today.

WOMEN 101 (15 Points)

Gender and Representation

The proliferation of images and information through the mass media and other cultural forms is intrinsic to contemporary experience and shapes our understanding of gender. Considers a range of artistic and popular cultural representations, such as fashion, television, literary fiction, film and poetry, and asks what these might tell us about current understandings of gender and sexuality.

Stage II

WOMEN 200 (15 Points)

Introduction to Feminist Theory

A theoretical foundation for feminist studies which examines major traditions and key thinkers from modern second wave to contemporary feminism. Readings and discussions will be focused around a series of themes, issues and concepts such as power, sex, gender, work, home, nation, care, embodiment, identity, subjectivity, reproduction and consumption. Case studies will be used to enable students to critically reflect on issues in light of their own experiences.

Prerequisite: Any 30 points in BA courses or Certificate in Women's Studies

WOMEN 202 (15 Points)

Gender and Visual Culture in the Pacific

Issues of gender and migration in the contemporary Pacific. Considers the formation of Pacific Islands diaspora as well as the ways that visual culture, including popular film, media and a range of art forms, have developed and impacted on Pacific Islands cultures.

Prerequisite: Any 30 points in BA courses or Certificate in Women's Studies

WOMEN 205 (15 Points)

Women's Texts of Experience

Explores a variety of ways in which women create texts or stories based on the experience of their lives, and how these 'stories' help them reflect upon that experience. A range of poetry, fiction, theoretical writing, film, visual art, photography, and music from different cultures is studied.

Accounting

Stage I

ACCTG 101 (15 Points)
Accounting Information
 Business decisions require accounting information. Covers the role of accounting information and systems to support decision making, control, and monitoring in organisations. Examines general purpose financial statements and the analysis and interpretation of accounting information. Assesses investment opportunities using capital budgeting techniques and compares and evaluates alternative funding sources.
Restriction: 600.121, 600.171, ACCTG 191

ACCTG 102 (15 Points)
Accounting Concepts
 Basic principles and concepts of accounting that underlie the production of information for internal and external reporting. This course provides the technical platform for second year courses in financial and management accounting, finance, and accounting information systems.
Prerequisite: ACCTG 101 or 191
Restriction: 600.111, ACCTG 192

ACCTG 151G (15 Points)
Financial Literacy
 People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Developing an understanding of how to be in control of spending and savings; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; and recognise scams and considers whether money is the key to happiness.
Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

Stage II

ACCTG 211 (15 Points)
Financial Accounting
 The study of financial accounting principles within New Zealand, to enable students to: (i) understand how they are developed and influenced; (ii) understand and apply New Zealand Financial Reporting Standards; (iii) report the results of complex business structures involving multiple entities and segments. Completing students will understand the role financial statements play in investment, analysis and contracting decisions,

providing a base for advanced study and supporting other areas, particularly finance.
Prerequisite: ACCTG 102 or 192
Restriction: ACCTG 292

ACCTG 221 (15 Points)
Cost and Management Accounting
 Budgets and standards, costing systems, cost information for decision-making and control, performance appraisal, and contemporary related issues.
Prerequisite: ACCTG 102 or 192
Restriction: ACCTG 291

ACCTG 222 (15 Points)
Accounting Information Systems
 Encompasses the development and distribution of economic information about organisations for internal and external decision-making. Major themes include: objectives and procedures of internal control, the database approach to data management, data modelling, typical business documents and reports and proper system documentation through data flow diagrams and flowcharts.
Prerequisite: INFOSYS 110 or 120 or INFOMGMT 191, and ACCTG 102 or 192

Stage III

ACCTG 311 (15 Points)
Financial Accounting
 Explanatory and prescriptive theories of accounting provide the context for an examination of the determinants of financial reporting practice in New Zealand with special reference to accounting for pensions, foreign currency, deferred tax and financial instruments. Issues in international accounting and professional ethics are also addressed.
Prerequisite: ACCTG 211 or 292
Restriction: ACCTG 392

ACCTG 312 (15 Points)
Auditing
 An introduction to the audit of financial statements. The objective of an audit is to add credibility to the information contained in the financial statements. Emphasises the auditor's decision-making process in determining the nature and amount of evidence necessary to support management's assertions. The end result of a financial statement audit is a report that expresses the auditor's opinion on the fair presentation of the client's financial statements.
Prerequisite: ACCTG 211 and 222, or 292 and INFOMGMT 294

ACCTG 321 (15 Points)
Strategic Management Accounting
 A study of the design of revenue and cost management systems to facilitate strategic decisions. This includes activity-based costing and activity-based management. The learning environment is student-centred with the seminar leader's role being that of facilitator rather than lecturer. Students work not only as individuals but also in teams. The learning environment is a combination of lectures, case studies and related readings.
Prerequisite: ACCTG 221 or 291

ACCTG 323 (15 Points)
Performance Measurement and Management Control
 The design of planning and control systems in organisations. This includes issues from control theory,

strategic management and information systems, with an emphasis on performance evaluation, measurement and analysis. Pertinent areas from productivity theory and Data Envelopment Analysis support the performance analysis.

Prerequisite: ACCTG 221 or 291

ACCTG 331 (15 Points)

Revenue and Cost Management

Revenue management concepts and techniques and their support by cost management systems are studied with particular reference to service organisations. The range of services encompasses both private and public sector organisations. Components include: yield management, pricing, linear programming, project management, valuation principles and methodologies.

Prerequisite: ACCTG 221 or 291

ACCTG 371 (15 Points)

ACCTG 702 (15 Points)

Governance Issues in Accounting

An introduction to the economic literatures relating to property rights, transaction cost economics, and agency theory. Application of these notions to the way in which organisations are structured. Identification of why some transactions are internalised and some are undertaken through markets. The application of these ideas to financial and managerial accounting.

Restriction: FINANCE 702

ACCTG 711 (15 Points)

Financial Accounting Research

A study of the contracting-cost theories of accounting policy choice and the related empirical literature. It focuses on agency and efficient contracting explanations for accounting choice. In particular, the course explores the role of accounting in contracts between parties to the firm (eg, manager, shareholders, debtholders, customers etc). The political process is also analysed to determine the impact on accounting policy choice. Incentives for managers to manipulate earnings under various economic settings are examined and the implications of this behaviour for accounting policy makers are analysed.

ACCTG 712 (15 Points)

International Accounting

An examination of the international dimensions of accounting in an environment that is increasingly global. Examines the international influences on current New Zealand practice and the diversity in accounting practices among New Zealand's economic partners. International harmonisation issues are studied as well as issues generated by foreign trade, eg, accounting for foreign currency transactions and transnational business organisations.

ACCTG 713 (15 Points)

Accounting History

Issues in the methodology of historical research, and substantive topics including: ancient and medieval accounting systems, charge and discharge accounting, the invention of double entry book-keeping, cost and management accounting, corporate financial reporting, auditing, accounting standard setting, and a topic chosen from New Zealand's accounting history.

ACCTG 714 (15 Points)

Contemporary Auditing Research

An examination of the theoretical and empirical literature relating to the demand and supply of auditing, theoretical support for auditing activity, measures of audit quality and related topics.

ACCTG 721 (15 Points)

Research in Management Control

Provides an insight into the theoretical and empirical literature relating to management planning and control in private and public sector organisations. Explores the relationship between strategy, organisation design, performance measurement and evaluation, application of productivity analysis and Data Envelopment Analysis.

ACCTG 722 (15 Points)

Research in Revenue and Cost Management

An examination of revenue and cost management arising from changes in competitive environments. Includes recent research on the design of revenue and cost management systems including developments such as theory of constraints in manufacturing, service and public sector organisations.

Prerequisite: ACCTG 221 or equivalent

ACCTG 732 (15 Points)

Public Sector Management and Control

Critically reviews management accounting's decision-support role in public sector policy and service delivery. Theme-based seminars will focus on contemporary issues including health, transportation and local government.

ACCTG 771 (15 Points)

Accounting Information and Capital Markets

The study of issues in evaluating accounting information and the use of accounting information by investors and analysts. This includes the examination of the empirical relationship between accounting earnings and share prices and the relationship between financial statement analysis and market efficiency. Perceived market failures will be analysed.

Commercial Law**Stage I****COMLAW 101 (15 Points)****Law in a Business Environment**

Decision makers in commerce and industry require an understanding of legal structures, concepts and obligations. Provides an introduction to the New Zealand legal system and the legal environment in which businesses operate, and also introduces legal concepts of property and the law of obligations, including detailed study of various forms of legal liability relevant to business.

Restriction: COMLAW 191

COMLAW 151G (15 Points)**The (Un)Lawful World: Law in Contemporary Life**

An examination of and guide to the laws and legal institutions that shape contemporary life. The focus will be on the laws that people are most likely to brush up against in everyday life and current legal controversies. Topics may include crime and the criminal justice system, residential tenancies, employment disputes, consumer transactions, and the protection of creativity and innovation.

Stage II**COMLAW 201 (15 Points)****Commercial Contracts**

Every business transaction involves a contract. Commercial Contracts examines the general principles of the law of contract including the process of formation of a contract, the interpretation of contractual terms and the various obstacles which may impede the enforceability of a bargain. Introduces the special features of contracts in digitally networked environments and issues relating to breach of contract and consumer protection.

Prerequisite: COMLAW 101 or 191

COMLAW 202 (15 Points)**Finance and Property Law**

When lenders advance money to borrowers, they need to be aware of how they can protect themselves. Finance and Property Law examines the legal concepts of property and ownership that are central to secured lending. Major topics include the types of security available for personal and real property, statutory provisions regulating credit contracts and property rights, and the general principles of banking law relating to guarantees and negotiable instruments, especially cheques.

Prerequisite: COMLAW 101 or 191

COMLAW 203 (15 Points)**Company Law**

Companies are by far the most used vehicle for doing business and an understanding of the rules that govern them is essential for everyone involved in commerce and industry. Examines the nature of a company, incorporation and share capital, the concept of separate legal personality, how a company interacts with the world and the roles of the stakeholders in a company including directors and shareholders. A sound understanding will help decision makers to take the advantages of corporate structure while avoiding pitfalls and legal liability.

Prerequisite: COMLAW 101 or 191

COMLAW 209 (15 Points)**Special Topic**

Prerequisite: COMLAW 101 or 191

Stage III**COMLAW 301 (15 Points)**
Taxation

An introduction to the Income Tax Act and the Goods and Services Tax Act, with emphasis on developing an understanding of these types of tax as relevant to taxpayers. Specific topics include the nature of income, taxation of common types of income (such as wages, shares and land), the deduction and prohibition of various types of expenses, tax accounting issues (cash or accrual basis), provisional tax, rebates, PAYE system, tax returns and an introduction to GST.

Prerequisite: COMLAW 201 or 202 or 203

COMLAW 303 (15 Points)
Receiverships and Reconstructions

A business in difficulty may fail or it may be rehabilitated. Receiverships and Reconstructions looks at aspects of business failure and near failure including informal workouts, formal business rescue regimes, company receiverships and personal bankruptcy. Students will develop the skills and expertise to operate in these fields.

Prerequisite: COMLAW 203 or LAW 417

COMLAW 304 (15 Points)
Alternative Business Structures

Business advisors need to be familiar with a wide variety of business structures other than companies. Emphasis is on the most common of these including franchises, joint ventures, trading trusts, partnerships, unincorporated societies and State Owned Enterprises in order to ensure that advisors are familiar with their merits and legal consequences of utilising these structures.

Prerequisite: COMLAW 203

COMLAW 305 (15 Points)
Securities Markets and Investment Law

Businesses need investment to grow. Many raise finance from the securities markets, in particular by listing on the Stock Exchange. Topics include raising money from the public and the rules relating to insider trading, market manipulation, disclosure obligations, takeovers and listing on the Stock Exchange and will benefit investment advisors and anyone involved in the financial markets.

Prerequisite: COMLAW 202 or 203

COMLAW 306 (15 Points)
Marketing Law

Marketers are not free to say what they want. A variety of laws and codes govern the claims made about goods and services and the ways in which they are presented and sold. Marketing Law covers consumer legislation, product distribution, advertisement regulation, branding, privacy and competition law. It builds skills in problem solving, decision making and written communication.

Prerequisite: COMLAW 201 or 203; or COMLAW 101, MKTG 201; or COMLAW 191, MKTG 291

Restriction: COMLAW 205

COMLAW 307 (15 Points)
International Trade Law

An introduction to the private law relationships which exist between buyers, sellers, insurers and bankers concerned with international trade. Major topics include: the sale of goods contract, the Vienna Convention, CIF and FOB contracts, marine insurance, the bill of lading, the Warsaw Convention and regional trade agreements such as CER.

Prerequisite: COMLAW 201

COMLAW 311 (15 Points)
Advanced Taxation

An advanced study of Income Tax and Goods and Services Tax, with emphasis on the important tax regimes applicable to business taxpayers and high-wealth individuals. Specific topics include corporate taxation, dividends and imputation, company losses and grouping, qualifying companies, trusts, partnerships, financial accruals, international taxation, the disputes procedure and penalties regime, and evasion and avoidance.

Prerequisite: COMLAW 203 and 301, or LAW 429 and LLB Part II

Restriction: LAW 409

COMLAW 314 (15 Points)
Employment Law

The success of a business depends on the maintaining of a productive relationship with its employees. Employment Law covers the legal principles governing the employment relationship. Specific topics include bargaining, personal grievances, enforcement of employment contracts, strikes and lockouts, the rules regarding holidays, and health and safety obligations.

Prerequisite: COMLAW 201 or 203; or COMLAW 101 and MGMT 223; or COMLAW 191 and MGMT 292 or 293 or BUSINESS 292 or 293

Restriction: COMLAW 204

COMLAW 318 (15 Points)
Special Topic**COMLAW 320 (15 Points)**
Intellectual Property and Innovation

Managers and entrepreneurs need to understand the legal rules governing the protection and commercialisation of innovative ideas and information and their application in business. Topics covered include the role of copyright in a technological society, the importance of secrecy in protecting valuable ideas by way of patents and the common law, and the interaction of contract with elements of intellectual property.

Prerequisite: COMLAW 101 or 191 or LAW 101 and 15 points from Stage II COMLAW

COMLAW 321 (15 Points)
Special Topic**Postgraduate Courses****COMLAW 740A (15 Points)****COMLAW 740B (15 Points)****The Tax Base**

An advanced study of the breadth of the New Zealand income tax base, including the different concepts of income, its timing and recognition. Comparisons between the nature of capital and income, and the differing treatment of each, provides a deeper understanding of the policy behind the New Zealand income tax regime. Provides a theoretical background and detailed technical knowledge of the scope and application of the most significant regimes for income, deduction and timing in the Income Tax Act 2004.

To complete this course students must enrol in COMLAW 740 A and B

COMLAW 741A (15 Points)**COMLAW 741B (15 Points)****International Taxation**

Tests of residence for individuals and corporations. The wider tax base for off-shore income of New Zealand

residents. Income derived by overseas residents from New Zealand activities. The Double Tax Treaty System. Selecting the country of residence. Anti-avoidance measures directed at transnational activity. The use of tax havens. As well as New Zealand taxation law, the course also examines the municipal revenue law of some of our trading partners.

To complete this course students must enrol in COMLAW 741 A and B

COMLAW 746 (15 Points)

Taxation of Corporate and Other Entities

An advanced study of the tax liability of different business structures and their members, particularly the taxation issues affecting companies and their shareholders. Considers the different tax regimes applicable to companies, trusts, partnerships, charities and Māori authorities. Comparison between these entities is intended to provide a deeper understanding of the policy behind New Zealand's corporate tax regimes and the allocation of the tax burden between companies, shareholders and other investors.

COMLAW 747 (15 Points)

The Goods and Services Tax

An advanced study of Goods and Services Tax. Provides both a theoretical background and high level of technical knowledge of the GST Act 1985. Comparisons with other indirect taxes and overseas variations of GST (notably Australian GST and UK VAT) provide a deeper understanding of the policy behind the New Zealand GST regime. Major topics include taxable activities, input tax, output tax, registration, adjustments, taxable supplies, timing and the GST anti-avoidance provisions.

COMLAW 748 (15 Points)

Tax Disputes

An advanced study of the statutory disputes and challenge procedures in the Tax Administration Act 1994. Covers the power of the Commissioner to propose adjustments, conduct investigations and raise assessments. Reviews the administrative law obligations imposed on the Commissioner, taxpayer rights and the power of the Courts to supervise and review the assessment process.

COMLAW 749 (15 Points)

Avoidance Provisions

An advanced study of all aspects of the general anti-avoidance provision contained in the Income Tax Act 2004. Provides a detailed analysis of the structure, function and application of the general anti-avoidance provision and of its relationship to the "black-letter" tax law. Comparisons with the statutory and common law responses to tax avoidance in other jurisdictions, including Australia, Canada, the UK and US provide a deeper understanding of the policy behind New Zealand's general anti-avoidance provision.

COMLAW 750 (15 Points)

Tax Policy

An examination of the tax policy issues arising in New Zealand and all tax systems. Topics studied may include historical background, the objectives of taxation and various criteria for evaluating tax systems, basic economic concepts used to analyse tax systems, economic analysis of types of taxation, distinction between capital and income, theory of capital taxation, and the structure of indirect taxation.

COMLAW 751 (15 Points)

Taxation of Property Transactions

This course examines all of the tax consequences of

acquiring, holding, developing, building on, leasing or otherwise dealing with land and personal property.

COMLAW 752 (15 Points)

Taxation of Corporate Finance

An examination of the theory and practice of the taxation of corporate finance and financial institutions. Topics considered in the analysis of the taxation of corporate finance include the major activities carried on by banks and companies of all descriptions in order to raise capital, return value to shareholders, and acquire, reorganise and dispose of businesses.

Economics

Stage I

Note: Students intending to advance beyond Stage I should include MATHS 108 or 150 in their first year programme.

ECON 101 (15 Points)

Microeconomics

Offers an introduction to the workings of market systems. This course deals with the economic behaviour of consumers and firms, covering analysis of demand and supply of goods, services and resources within an economy. The framework developed is used to examine and evaluate the operation of the market mechanism for various market structures and government policies.

Restriction: ECON 191

ECON 111 (15 Points)

Macroeconomics

Analyses aggregate economic activity in the national economy and its interrelationships with the rest of the world. Emphasis is placed on basic principles involved in the determination of the level of national output, the aggregate price level, and the money

supply. Alternative explanations of key macroeconomic problems and relevant economic policies are compared. The theoretical concepts are illustrated from a range of New Zealand and international applications.

Prerequisite: ECON 101

ECON 151G (15 Points)

Understanding the Global Economy

Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work?

Restriction: May not be taken by students with a concurrent or prior enrolment in Economics courses

ECON 191 (15 Points)

Business Economics

Introduction to economic analysis, with an emphasis on firms and their operating environment. Pricing and output decisions and cost and profit determination in competitive, imperfectly competitive, and monopolistic markets. Macroeconomic factors and policies affecting business activity in a small open economy.

Restriction: ECON 101 and 111

Stage II

Note: Students intending to major in Economics must include ECON 201 and 211 in their programme.

ECON 201 (15 Points)

Microeconomics

Study of the allocation of scarce resources among competing end uses. Intermediate-level analysis of the economic behaviour of individual units, in particular consumers and firms. Although the focus is on perfectly competitive markets, attention is also given to other types of markets. Analysis also includes concepts of expected utility and uncertainty, and welfare economics.

Prerequisite: ECON 101 or 191, and 111 and MATHS 108 or 150

ECON 202 (15 Points)

Managerial Economics

An applied economics course which shows how various concepts and techniques drawn from economics, finance, mathematics and statistics can be used to develop and use computer-based models in decision-making, particularly in an uncertain environment.

Prerequisite: ECON 101 or 191, and 111

ECON 204 (15 Points)

The Economics of the Internet

An introduction to the economics of the Internet using microeconomic concepts, practical examples, and case studies. Topics to be covered include: the development of the Internet, access pricing, network effects and standardisation, business-to-consumer and business-to-business e-commerce, online auctions, open source software, and the law and economics of information goods such as software and music.

Prerequisite: ECON 101 or 191

ECON 211 (15 Points)

Macroeconomics

Provides an introduction to the dynamic microfoundations of macroeconomics, and demonstrates how we can utilise these foundations (i) to understand the trends and fluctuations of macroeconomic aggregates like national output,

unemployment, inflation and interest rates, and (ii) to predict the outcome of alternative government policies related to current economic problems of New Zealand and the rest of the world.

Prerequisite: ECON 101 or 191, and 111 and MATHS 108 or 150

ECON 212 (15 Points)

Game Theory and Economic Applications

Introduction to non-cooperative and cooperative game theory: n-person non-cooperative games and Nash equilibrium; examples and applications in economics, political science and other fields; the idea of backward induction and sub-game perfection; introduction to games in coalitional form; the core and (Shapley) value; models of power and voting; problems in fair division, and optimal and stable matching.

Prerequisite: ECON 101 or 191 or MATHS 108 or 150

ECON 221 (15 Points)

Introduction to Econometrics

An introduction to model building and empirical research methods in economics. Emphasises the use and interpretation of single equation regression techniques in formulating and testing microeconomic and macroeconomic hypotheses. Cross-section and time series modelling, as well as qualitative choice models will be covered. There will be examples of the uses of econometrics in a variety of areas through statistical analysis, problem solving and econometric estimation using a statistical computer package.

Prerequisite: ECON 101 or 191, and 111 and MATHS 108 or 150 and STATS 101 or 102 or 108 or 125 or 191

ECON 232 (15 Points)

Development of the International Economy

The development of the international economy and changing economic relationships that have taken place since the late nineteenth century. The causes and consequences of growing interdependency among nations are examined. Changing patterns of trade and migration of capital and labour are analysed, as are cyclical and secular trends in output, employment and investment. The focus is on the development of institutions as well as the economic and social conditions that induce and validate change.

Prerequisite: ECON 101 or 191, and 111

ECON 241 (15 Points)

International Economics

An introduction to issues in international trade and finance. Important issues for the international economy and the development of conceptual frameworks for understanding and analysing these issues will be discussed. Topics include: theories of international trade, exchange rate regimes, international capital flows and speculation, multilateral and regional trade agreements, issues in trade policy and the political economy of trade policy.

Prerequisite: ECON 101 or 191, and 111

ECON 271 (15 Points)

ECON 273 (15 Points)

Special Topic

Prerequisite: ECON 101 or 191, and 111

Stage III**ECON 301 (15 Points)****Advanced Microeconomics**

Advanced treatment of aspects of general equilibrium and game theory. Applications of this basic theory to the analysis of topics in uncertainty, contracts, auctions, oligopoly, and information economics.

Prerequisite: ECON 201

ECON 302 (15 Points)**Economics of Labour Markets**

The application of economics to issues that confront policy makers all over the world. Covers the workings of labour markets and teaches how to use economic frameworks to judge the appropriateness of education, training, employment, taxation, immigration and other labour market policies.

Prerequisite: ECON 201

ECON 303 (15 Points)**Law and Economics**

Economic analysis of law and organisation, and the application of economics to property rights, patents and natural resource management. Includes: contracts, transaction cost analysis, classical contracting, long-run contracts, enforcement, role of market forces, risk aversion, remedies for breach, economic theory for torts, negligence rules, strict liability, multiple torts, product liability. Special topics may include: crime, insider trading, and business law.

Prerequisite: COMLAW 101 or LAW 101, and ECON 201

ECON 304 (15 Points)**Firms and Markets**

An introduction to Industrial Organisation, the analysis of markets with imperfect competition. Industrial Organisation is concerned with the interdependence of market structure, firm behaviour and market outcome. Basic concepts of game theory will be systematically introduced and applied to study strategic firm behaviour in a variety of general and more industry-specific market settings. In each case, we will analyse the implications of the market behaviour for consumers and society and explore the potential role for public policy with instruments like regulation, competition policy and patent policy.

Prerequisite: ECON 201

ECON 311 (15 Points)**Macroeconomic Theory and Policy**

This course is designed to teach students modern macroeconomic analysis and focuses on the standard dynamic general equilibrium model, which is central to current macroeconomic research. Students are given a careful introduction to the overlapping generations version of this model and shown how this model can be adapted in different ways to address a wide variety of economic issues and policy questions.

Prerequisite: ECON 211

ECON 321 (15 Points)**Econometrics**

Development of the linear regression model, its basis, problems, applications and extensions. Attention is also given to techniques and problems of simultaneous equations modelling, time-series analysis and economic forecasting.

Prerequisite: ECON 201 or 211, and ECON 221 or STATS 207 or 208 or 210

ECON 322 (15 Points)**Applied Econometrics**

Provides a basic understanding of some of the

econometric methods and models. Applications of basic linear regression, including: demand systems, time-series analysis including unit roots and co-integration, simulation and resampling methods. Also includes practical computing classes.

Prerequisite: ECON 201 or 211, and ECON 221

ECON 341 (15 Points)**International Trade**

The main theories of international trade in goods and services, and of international movements of capital and labour. Partial equilibrium and general equilibrium analysis of the major instruments of trade policy, their economic effects, and the issues created by their use in practice. The economics of regional trading arrangements, such as free trade areas, customs unions and common markets.

Prerequisite: ECON 201

ECON 342 (15 Points)**International Economic Policy**

An analysis of current international economic policy issues, including their implications for New Zealand. A variety of approaches are used, including issue-based analysis of key international economic policy problems, comparative analysis of regional trading arrangements, and a case study that focuses on international economic policy issues related to a selected region.

Prerequisite: ECON 241 or 341 or 352

ECON 343 (15 Points)**East Asian Growth and Trade**

A study of the economic factors underlying the dynamic trade and growth performance of the major economies of contemporary East Asia, and of the impact of their development on New Zealand's international trading environment. Study of individual East Asian economies is strongly emphasised.

Prerequisite: ECON 201

ECON 351 (15 Points)**Financial Economics**

A study of the modern literature on corporate finance, investments and derivative securities. An analysis of consumption and investment decisions in the presence of time and risk, asset pricing models and market efficiency. The term structure of interest rates and various issues in debt and equity financing. The use of derivative securities, eg, forwards and/or options to manage exchange rate risk.

Prerequisite: ECON 201

ECON 352 (15 Points)**International Finance**

A study of the modern literature on exchange rate markets, exchange rate determination and the implications of exchange rate movements for various economic issues. Students will gain an understanding of why exchange rates change, of financial market arrangements, and of the reasons for, and implications of, recent events in international financial markets.

Prerequisite: ECON 201 and 211

ECON 361 (15 Points)**Public Economics**

A study of the role of the state in a modern mixed economy; its roles, measurement and accountability. Topics include: welfare theory, theory of public goods, cost-benefit analysis, budgetary issues, taxation theory and practice, insurance markets, and social insurance.

Prerequisite: ECON 201

ECON 372 (15 Points)
Energy and Resource Economics

Examines the economics of resource use with a particular emphasis on world oil markets and issues surrounding energy security. Energy markets are analysed with an emphasis on the electricity market. Issues surrounding energy economics and climate change, energy efficiency and policy measures to promote renewable energy sources are also discussed.

Prerequisite: ECON 201

ECON 373 (15 Points)
Environmental Economics

An overview of the theory and empirical practice of economic analysis as it is used in evaluating environmental problems. Topics include: static and dynamic efficiency; environmental policy (pollution and economic efficiency); analysis of economic instruments, such as tradable property rights and pollution taxes; the allocation of non-renewable and renewable resources; and contemporary issues of growth, trade and the environment, and sustainable development.

Prerequisite: ECON 201

ECON 374 (15 Points)
Special Topic**ECON 381 (15 Points)**
Foundations of Economic Analysis

A grounding in the quantitative methods of economic analysis with application to commonly used formal models in microeconomics, macroeconomics and econometrics. The emphasis will be on the unifying structure of the theory with a systematic treatment of the mathematical techniques involved. Preparation for continuing study in economic theory and econometrics.

Prerequisite: ECON 201

Postgraduate Courses**ECON 701 (15 Points)**
Microeconomic Theory 1

A variety of topics in traditional "core" microeconomics from an advanced perspective as well as a selection of issues arising from recent research directions.

ECON 702 (15 Points)
Industrial Organisation

Industrial Organisation (IO) is concerned with the interdependence of market structure, firm behaviour and market outcome. Concepts of game theory will be systematically introduced and applied to study strategic firm behaviour in a variety of general and more industry-specific market settings. In each case, we will analyse the implications of the market behaviour for consumers and society and explore the potential role for public policy with instruments like regulation, competition policy and patent policy.

ECON 703 (15 Points)
Labour Economics and Human Resources

An advanced survey with emphasis on microeconomic modelling, econometric analysis and policy applications. Topics include: labour force participation, investment in education, hiring and lay-offs, distribution of earnings, unemployment, evaluation of labour market policies, worker mobility and immigration issues.

ECON 711 (15 Points)
Macroeconomics 1

This is a core course in macroeconomic theory which addresses fundamental problems including output growth and business cycles, unemployment and inflation in the context of mainstream models of the economy, fiscal and monetary policies.

ECON 712 (15 Points)
Macroeconomics 2

This is an advanced course in dynamic macroeconomic modelling, with an emphasis on applications. Models of business cycles, growth, unemployment, and government policy are covered, drawing from papers at the current research frontier. Students will learn to apply these methods to analyse contemporary economic problems in New Zealand and other countries.

ECON 713 (15 Points)
Monetary Economics

Examines a number of advanced topics in monetary economics. Topics include: relations of money, prices and output, macroeconomic models with money, monetary policy, roles of central banks, and monetary business cycles.

ECON 721 (15 Points)
Econometrics 1

Core econometrics including theory and applications. The development of the classical linear regression model and extensions to the most general case. Applications to types of linear models involving cross-section and time-series data, and simultaneous equation models. The method of maximum likelihood, other extremum estimators and associated methods of testing.

ECON 723 (15 Points)
Econometrics 2

An overview of time series econometrics, designed to introduce a range of material in stationary and nonstationary time series including: modern model determination methods, unit root and cointegration theory, non-linear time series analysis and continuous time models. Students will be introduced to practical time series forecasting methods.

ECON 726 (15 Points)
Microeconometrics

Empirical analysis of microeconomic data, covering theoretical and practical issues. Model design, identification, estimation and hypothesis testing in a range of microeconomic contexts to provide a basis for the analysis of public policy and/or commercial decisions.

ECON 741 (15 Points)
Topics in International Trade

Advanced treatment of selected developments in international trade theory, current trade policy issues, and trade policy modelling.

ECON 742 (15 Points)
Trade Policy

Economic analysis of current trade policy issues, with an emphasis on the theoretical, empirical and policy dimensions of international trade negotiations in the WTO, and the spread of preferential trading arrangements such as free trade areas.

ECON 743 (15 Points)
Economic Integration in the Pacific Rim

Analysis of the developing economic relationships among the nations of the Pacific Rim, including both trade and investment flows and financial

market integration. The economics of regional trade liberalisation initiatives, including both established arrangements such as NAFTA, CER and AFTA, and the new initiatives that have emerged in increasing numbers in recent years. Implications of these initiatives for wider economic integration, for example, through APEC. Comparative analysis of factors underlying the economic performance of Pacific Rim economies.

ECON 747 (15 Points)
The European Economies

International trade and monetary issues involved in integration in Western Europe and transition in Eastern Europe. History of the facts, theory of preferential liberalisation and analysis of the Single Market programme, Common Agricultural Policy, regional policy and competition policy. An analysis of monetary issues: optimum currency areas, history of monetary integrations in Europe, analysis of the EMU, ECB and fiscal federalism.

ECON 751 (15 Points)
Advanced International Finance

A study of open-economy macroeconomic topics (theoretic, empirical and policy oriented), including models of exchange rate behaviour.

ECON 761 (15 Points)
Public Economics and Policy 1

Fundamental theorems of public economics, market failure, public choice theory, and distribution; the role of the economist in the making of public policy in a modern mixed economy, ideologies and critiques of the market model, the economics of the welfare state, welfare and tax reform in New Zealand, and applied poverty issues.

ECON 763 (15 Points)
Public Economics and Policy 2

Theoretical foundations of equity, taxation in partial and general equilibrium, limitations of private insurance markets, health insurance; interpreting the government's budget, social insurance, the economics of an ageing population, pensions, savings issues, annuities and old age care, intergenerational and intra-generational equity issues.

ECON 764 (15 Points)
Health Economics

Economic aspects of health and health services. Analysis of expenditure on healthcare. The structure and financing of health services and health reform. Cost benefit and cost-effectiveness and analysis in healthcare. Specific healthcare issues in the New Zealand health system.

ECON 771 (15 Points)
Economics of Development

Contemporary issues in development economics. Topics include: the way economists' approaches to "economic development" have evolved and changed from 1945 to the present, and looks at leading development issues in this perspective; sources of economic growth; the role of population and innovation; and strategies for sustainable economic development. There is emphasis on "Newly Industrialising Countries (NICs)" and other Third World 'developing' countries.

ECON 772 (15 Points)
Trade and Development

Focuses on the link between trade and development and contemporary issues relating to trade strategies and structural adjustment policies with particular emphasis on developing countries.

ECON 773 (15 Points)
The History of Economic Thought I

Covers a selection of topics in the history of economic ideas, including classical economics, post-classical microeconomics, topics in twentieth century economics and business cycle theory and twentieth century debates on international monetary reform.

ECON 774 (15 Points)
The History of Economic Thought II

A survey course covering a selection of topics in the history of economic ideas including: classical economics, post-classical microeconomics, Keynesian economics, monetarism, and developments in twentieth century macroeconomics, business cycle theory and international monetary economics.

ECON 775 (15 Points)
Economics of the Environment

Economics of natural resource use and policy. Externality, welfare economics, price theory. Sustainability, future generations and equity. Environmental macroeconomics, trade. Non-market valuation methods, species preservation. International issues.

ECON 776 (15 Points)
Experimental Economics

Experiments provide an important link between economic theory and observation. This course will (1) undertake a systematic evaluation of the existing experimental literature with emphasis on game theoretic experiments; (2) instruct students on how to design suitable experiments to test a theoretical conjecture; (3) teach students how to collect and analyse data in a controlled setting and (4) help students begin doing actual research.

ECON 781 (15 Points)
Microeconomic Theory 2

A variety of topics from theoretical microeconomics at the advanced level.

ECON 782 (15 Points)
Regulation and Competition Policy

This course discusses utility regulation linked to the economics of telecommunication, electricity, water and gas. It introduces the economic principles of competition policy and discusses them with the most recent regulation and competition policy cases in New Zealand and elsewhere.

ECON 783 (15 Points)
Special Topic: Energy Economics

Finance

Stage II

FINANCE 251 (15 Points)

Financial Management

Focuses on practical aspects of corporate finance. Topics covered include: concepts of value creation, risk and required rates of return, financial maths, capital budgeting, capital structure and dividend policies.

Prerequisite: ACCTG 102 or 192

FINANCE 261 (15 Points)

Introduction to Investments

Markets for shares, fixed income securities, options and futures. Methods of valuing shares, fixed income securities, options, and futures. Simple techniques of hedging risk. Portfolio diversification. Portfolio evaluation.

Prerequisite: FINANCE 251

Stage III

FINANCE 310 (15 Points)

Applied Financial Modelling

Develops technical skills in building models to solve problems in Finance. A series of case studies involving basic financial decisions are used to integrate financial modelling skills. Builds on material introduced in FINANCE 251/261 in an applied setting.

Prerequisite: FINANCE 251 and 261, or 251 and ACCTG 371

Restriction: FINANCE 383

FINANCE 351 (15 Points)

Advanced Financial Management

A rigorous study of advanced capital budgeting procedures, more difficult aspects associated with capital structure and dividend decisions, mergers and acquisitions. Case study applications of financial management are used. A continuation of the material introduced in FINANCE 261.

Prerequisite: FINANCE 251

FINANCE 361 (15 Points)

Modern Investment Theory and Management

Portfolio theory and equilibrium asset pricing models and empirical tests. Portfolio management (forecasting, construction, administration and evaluation) including issues relating to fixed interest and international equity investment. A continuation of the material introduced in FINANCE 261.

Prerequisite: FINANCE 261 and MATHS 208 or 250

FINANCE 362 (15 Points)

Risk Management

Examines theoretical and practical aspects of risk management with an emphasis on the effective use of futures, options and other financial derivatives to control market risk exposure. Reviews no-arbitrage methods used to value financial futures and options, including the Black-Scholes model and binomial tree numerical methods.

Prerequisite: FINANCE 261 and MATHS 208 or 250

FINANCE 383 (15 Points)

Special Topic

FINANCE 384 (15 Points)

Special Topic

Postgraduate Courses

FINANCE 701 (15 Points)

Research Methods in Finance

The theory and application of modern research methods in finance. The content will include the philosophy, process and design of scientific research. Prior knowledge of basic statistical techniques is assumed.

Restriction: ACCTG 701

FINANCE 702 (15 Points)

Governance Issues in Finance

An introduction to the economic literatures relating to property rights, transaction cost economics, and agency theory. Application of these notions to the way in which organisations are structured. Identification of why some transactions are internalised and some are undertaken through markets. The application of these ideas to finance.

Restriction: ACCTG 702

FINANCE 705 (15 Points)

Empirical Finance

Examines the theory and application of modern research methods in finance. Through exposure to a range of contemporary research issues students will develop a basic framework of how to conduct research, and an overview of some of the pitfalls. Students will get started in a research project.

FINANCE 706 (15 Points)

Financial Modelling

Concentrates on the theme of financial econometrics, a topic of fundamental and increasing importance in finance research. Students study finance research through training in various statistical procedures, techniques and models in financial econometrics, such as bootstrapping methods, autoregressive models, unit root tests, and ARCH and GARCH modelling and the examination of current issues. Students gain knowledge of major international databases, statistical packages and software essential for advanced research.

FINANCE 751 (15 Points)

Modern Corporate Finance

Examines fundamental principles of corporate financial theory and discusses current issues, seminal theoretical contributions and empirical evidence regarding those theories. Specific topics will be chosen from capital structure, dividend policy, security issuance, mergers and acquisitions, corporate control and initial public offerings.

FINANCE 761 (15 Points)

Portfolio Theory and Investment Analysis

Advanced coverage of contemporary issues in investments through readings of classic theoretical articles and recent empirical studies. Topics include: market efficiency and empirical anomalies, risk-return relationships and alternative investment vehicles and strategies. This course builds on material covered in FINANCE 261 and 361 and presumes the student has completed MATHS 208 or its equivalent.

FINANCE 762 (15 Points)

Risk Management

The theory and practice of financial risk management for portfolio managers with an emphasis on defining and measuring market risk. This course builds on material covered in FINANCE 362 and MATHS 208 with extensions to include the use of futures, options and other financial derivatives to manage market risk.

FINANCE 763 (15 Points) International Finance

An examination of theoretical and empirical perspectives on important issues in international finance. Topics will include: financial management of a multinational enterprise, macroeconomic effects, currency risk management and international capital budgeting. A portion of the course will also be devoted to international portfolio investments and diversification. This course builds on knowledge gained in FINANCE 251, 261 and 702.

Finance – Graduate Programmes

Postgraduate Courses

FINMGMT 704 (15 Points) Investments

An intensive study of the basic concepts and tools of investment analysis. Topics which are given particular emphasis include: efficiency of capital markets, role of diversification, risk assessment, relationship between risk and expected return, portfolio formation, financial statement analysis, derivative securities (options, futures etc) and international finance.

Prerequisite: 60 points from BUSADMIN 761–764, 765, 771–774, 775

Restriction: FINMGMT 702

FINMGMT 705 (15 Points) Case Studies in Finance

A study of corporate finance, investments and business management issues using case studies. Topics covered may include: capital expenditure decision making, capital structure choices, dividend policy, mergers and acquisitions, security pricing and selection, portfolio management, asset allocation and international pricing.

Prerequisite: 60 points from BUSADMIN 761–764, 765, 771–774, 775, FINMGMT 704

Restriction: FINMGMT 703

FINMGMT 713 (10 Points) Special Topic

FINMGMT 715 (10 Points) Special Topic

Human Resource Management

Postgraduate Courses

HRMGMT 702 (20 Points) Employment Law and Relations

Employer and employee rights and responsibilities. Interests, ideologies and equity issues in employment relationships. The structure, strategies and behaviour of trade unions. The dynamics of collective bargaining and mediation including the nature of position-based and interest-based bargaining strategies.

Prerequisite: HRMGMT 707 or EDPROFST 738

HRMGMT 704 (20 Points) Managing Change in Organisations

Conceptual, theoretical and practical perspectives on change management, examining the change agent role and issues associated with change management in the contemporary context. Individual, group and organisational strategies for change and the role of HRM in the effective management of change.

Prerequisite: HRMGMT 702 and 707, or BUSADMIN 761 and EDPROFST 738

HRMGMT 705 (20 Points) Strategic Human Resource Management

The role of HR strategy in underpinning organisational viability and its potential to contribute to competitive advantage. The importance of contextual factors in shaping HR strategy. HR strategy, SMEs and entrepreneurial growth. Typologies of HR systems and their links to performance outcomes.

Prerequisite: HRMGMT 702, 707, 708

HRMGMT 706 (20 Points) Personal and Professional Development

Professional competencies in HRM, including interpersonal skills, coaching and feedback skills, interviewing skills, negotiation skills, and career development skills.

Prerequisite: HRMGMT 707

HRMGMT 707 (20 Points) Staffing and Employee Development

The 'make versus buy' decision in HRM. Studies of job analysis, recruitment, selection, socialisation, employee development and labour turnover. Management selection and development. Equal employment opportunity (EEO) issues.

HRMGMT 708 (20 Points) Performance Management and Reward Systems

The sources of performance variation. Motivational theories underpinning performance management. Studies of work design, performance appraisal, pay policies and practice, promotion systems, stress and employee well-being.

Prerequisite: HRMGMT 707 or EDPROFST 738

HRMGMT 760 (20 Points) Special Topic: Learning and Development

HRMGMT 761 (20 Points) Special Topic: Leadership in the Workplace

Information Management

Stage I

INFOMGMT 192 (15 Points) Business Analysis and Applications

The rapid growth of the internet has had an enormous

impact on the ways that companies conduct their business. Covers the analysis, programming, and design requirements of internet-based applications, including multi-tiered client-server models. Builds applied skills in the development of web-based solutions to practical business problems.

Prerequisite: INFOMGMT 191

Restriction: INFOSYS 110, 120, COMPSCI 101, 105

Stage II

INFOMGMT 291 (15 Points)

Web Applications for Business

The rapid development of the internet has had an enormous impact on the ways that companies conduct their business. Covers the analysis and design requirements of web applications. Builds applied skills in developing web-based solutions to practical business problems.

Prerequisite: INFOMGMT 192

INFOMGMT 292 (15 Points)

Database Applications

Businesses need to develop effective mechanisms for storing and retrieving information. Examines different ways of understanding, storing, and viewing business data using the latest information technology tools. Builds skills in problem analysis, data modeling, and database design.

Prerequisite: INFOMGMT 192

Restriction: INFOSYS 222

INFOMGMT 296 (15 Points)

Information Systems for Business

Integrates the study of Information Technology tightly within a business context. Focuses on the practical design and maintenance of information systems, including issues of information security, internal controls, data analysis and modeling.

Prerequisite: MKTG 201 or 291 or ACCTG 102 or 192 or MGMT 294, and INFOMGMT 192

Restriction: INFOMGMT 293, 294, 295, ACCTG 222

Stage III

INFOMGMT 391 (15 Points)

Information Systems Management

To use information effectively, businesses need people who are able to leverage a strong set of skills in Information Technology while also interacting with others who may not have these same skills. Covers current issues and future trends in the use of information communication technology, and focuses on the challenges managers face in linking information systems with other functional business areas.

Prerequisite: INFOMGMT 291, 292

INFOMGMT 392 (15 Points)

Digital Media Production

Great ideas need to be communicated. Explores a range of technologies and media that can be used to present business information to different audiences. Develops practical skills in digital photography and videography, underpinned by an understanding of learning psychology, instructional design, and training systems.

Prerequisite: INFOMGMT 291, 292

INFOMGMT 393 (15 Points)

Data Mining and Decision Support

Successful businesses generate immense amounts of data. Focuses on how businesses use information technology to extract value by converting raw data

into useful business information. Develops applied skills in managing information to support effective business decision making.

Prerequisite: INFOMGMT 292

Information Systems

Stage I

INFOSYS 110 (15 Points)

Business Computing

Information systems are an essential part of the business world. Students examine how information technology is leveraged in organisations, aspects of information systems as they are used in organisations, gain an insight into how operations management concepts can contribute to the efficient running of a business, use of information systems for competitive advantage, computer hardware and software, IT infrastructures, business intelligence, electronic commerce, computer crime and forensics.

Restriction: INFOMGMT 191, INFOSYS 120

Stage II

INFOSYS 220 (15 Points)

Business Systems Analysis

An Information Technology (IT) professional must understand how IT systems are constructed and tested and how quality is assessed, in order to manage, develop or provide innovative business solutions. Business Systems Analysis introduces systems development process concepts and activities, with a strong focus on understanding the problem and solution through modelling.

Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 or COMPSCI 105

INFOSYS 222 (15 Points)

Database Systems

Managers and other knowledge workers find that many of their duties revolve around accessing, organising, and presenting organisational and external information. The ability to develop and use computer databases is becoming a critical skill that is required in many disciplines. These skills are developed through an introduction to data modelling, relational theory, database design, and the management of databases.

Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 or COMPSCI 105

INFOSYS 224 (15 Points)

Data Communications and the Internet

The Internet is a network of networks that is revolutionising business, work and play. It provides access to email, voice services, video on demand and distributed games. This course explores the operation of the Internet, from the representation and transmission of information to network architectures, to applications and network security protocols. Other topics include: wide area networking devices, technologies, and standards, Internet addressing, TCP/IP protocols, router components and configurations, routing protocols and network troubleshooting.

Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 or COMPSCI 101

Restriction: 636.324

INFOSYS 280 (15 Points)

Web Development

Web developers require solid technical skills to make the most of the opportunities provided by the

internet as a platform. Students learn to design, build and maintain interactive, feature-rich, database-driven websites. Students gain practical skills in using industry standard client-side and server-side technologies to solve business problems.

Prerequisite: INFOSYS 110 or 120 or COMPSCI 101 or INFOMGMT 191

Restriction: COMPSCI 280, INFOMGMT 192

Stage III

Note: With the permission of the Head of Department, BSc and BTech students may substitute COMPSCI 220 and 230 for INFOSYS 280 or COMPSCI 280 as a prerequisite, provided they have passed these courses with a B Grade or higher.

Note: Enrolment in INFOSYS 338, OPSMGT 383 and OPSRES 393 is subject to approval of Head of Department.

INFOSYS 320 (15 Points) Information Systems Design

Explores issues of information and process modelling, user interface design and the selection of tools and components in designing systems in a very practical and interactive way. Advanced techniques in user interface design, object and architecture modelling and further analysis and design methods are explored in depth using state of the art modelling and development environments.

Prerequisite: INFOSYS 220, 222, 280, or INFOSYS 220, 222, COMPSCI 280, or equivalent

INFOSYS 321 (15 Points) Enterprise Systems

Examines cross-functional integrated computer-based information systems, known as Enterprise Resource Planning (ERP) systems, designed to support an organisation's information needs and operations. Considers issues associated with the selection, analysis, design, implementation and configuration of such systems. Investigates transaction processing, management information and decision support across an organisation's business processes. Explores the characterisation of problems, in terms of process and information models.

Prerequisite: Any 15 points at Stage II in Accounting, Computer Science, Engineering Science, Information Systems, Marketing, Operations Management, Software Engineering

Restriction: OPSMGT 333

INFOSYS 323 (15 Points) Management of Information Systems

Business operations depend critically on the effective and efficient operation of information technology and telecommunication systems. A disciplined management approach to routine business system operations is a key success factor for IT managers. To deal with the numerous operational issues and potential problems effectively, systematic techniques are required in complex environments.

Prerequisite: Any 15 points at Stage II in ACCTG, COMPSCI, ENGSCI, INFOSYS, MKTG, OPSMGT, SOFTENG

Restriction: INFOSYS 223

INFOSYS 327 (15 Points) Decision Systems

Develops an understanding of different decision levels and practical problems organisations face and technological trends and through the study of decision theory, decision systems development and enabling technologies. The study is complemented by the application and critical evaluation of methods and

technologies in the decision-making path in current business scenarios.

Prerequisite: Any 15 points at Stage II in ACCTG, COMPSCI, ENGSCI, INFOSYS, MKTG, OPSMGT, SOFTENG

INFOSYS 329 (15 Points) Advanced Data Communications

To deepen students' understanding of how digital networks operate. Exposes students to a range of different networking technologies. Topics include wide area networking devices, technologies, and standards, Internet addressing, TCP/IP protocols, router components and configurations, routing protocols and network troubleshooting.

Prerequisite: INFOSYS 224 or COMPSCI 314

INFOSYS 330 (15 Points) Advanced Database Systems

An in-depth study of the managerial and technical aspects of database systems giving an essential foundation for a career in information systems. Database programming is taught so that students have a well grounded appreciation of database as the core of such systems. The most recent and emerging database technologies are studied to provide solutions in industrial and commercial settings.

Prerequisite: INFOSYS 220, 222, 280, or INFOSYS 220, 222, COMPSCI 280, or equivalent

INFOSYS 338 (15 Points) Contemporary Issues in Information Systems

Information Systems (IS) research improves the process and the product of software development through the application of systematic, disciplined, and quantifiable engineering principles, techniques, and tools. Students to undertake a rigorous examination of a specific IS topic, with an emphasis on the management, analysis and design and evolution of information systems.

Prerequisite: INFOSYS 220 or 222

INFOSYS 339 (15 Points) Computer Networks

A detailed exploration of how digital networks operate. Provides exposure to a range of different networking technologies. Topics include LAN switching, VLANs and Spanning Tree Protocols, Wireless networks and security, IP Telephony, congestion control, quality of service issues for Internet protocols and improving network protocols.

Prerequisite: INFOSYS 224 or COMPSCI 314

INFOSYS 341 (15 Points) Management of Information Security

An overview of activities, methods, methodologies, and procedures related to establishing sound information security policies. Topics include: defining security requirements; security management models and practices; risk management; identification and authentication; access control; information security technologies and encryption techniques. Some key legal and ethical issues associated with the management of information security will be discussed.

Prerequisite: 15 points from INFOSYS 220 or 222 or 223 or 224 or ACCTG 222

INFOSYS 342A (30 Points) INFOSYS 342B (30 Points) Information Systems Project

Industry sponsored internship. Through on-site development of an information system meeting the sponsor's requirements the course emulates activities of real world information systems designers. In the process of completing the projects, students will gain

practical skills in group dynamics, oral communication, project management, and business behaviour.

Prerequisite: INFOSYS 220, 222, and 280 or COMPSCI 280 or equivalent, and a GPA of 4 or higher

Restriction: INFOSYS 340

To complete this course students must enrol in INFOSYS 342 A and B

INFOSYS 343 (15 Points)
Special Topic

INFOSYS 344 (15 Points)
Special Topic: Enterprise Service Oriented Architectures

Postgraduate Courses

INFOSYS 720 (15 Points)
Information Systems Research

A substantive review of research in the discipline of information systems. Behavioural, strategic and social issues relating to the design, implementation and impact of information technology applications will be studied.

INFOSYS 722 (15 Points)
Decision Support Systems

A review of the literature in the area of decision support systems (DSS) and DSS frameworks. Understanding the process of decision-making and issues involved in the design, implementation and evaluation of DSS. Additional topics include data mining, user interfaces, knowledge-based DSS, and research directions in DSS. Knowledge gained will be applied through the design and implementation of a DSS prototype.

INFOSYS 725 (15 Points)
New Perspectives on Organisations and Information Systems

Investigates major issues facing organisations in adopting, implementing and using information systems for competitive advantage. Explores a set of critical issues from both an academic and practical perspectives. Topics include: Strategic Information Systems, Ecommerce, Knowledge Management, the Emergence of the Business Process, ERP Implementation, Virtual Teams and Global IT, IS and Developing Countries.

INFOSYS 726 (15 Points)
Information Modelling

A study of various approaches to modelling information systems. Complex decision support problems are viewed as abstractions made up of diverse objects such as data, models and interfaces. Focuses on the representation of the semantics of complex problems and their manipulation. Prominent approaches such as semantic, object-oriented, structured and unified modelling are studied. An organisational problem, modelled and implemented, forms the project section.

INFOSYS 727 (15 Points)
Advanced Information Security

Focuses on technical security issues of the end systems used in today's information technology applications. Presentation of the practical issues like identification and authentication, security of operating systems, cryptography, disaster recovery and contingency planning, is accompanied by discussion of theoretical models supporting these issues. Managerial aspects of information security issues as well as legal and ethical issues arising from protecting computer files both from a New Zealand and world perspective will be addressed.

INFOSYS 730 (15 Points)
Telecommunications Management

Through the use of case studies, the course seeks to expose students to current issues in telecommunications and computer networking as the involved industries move towards networks and services convergence. Cases include: Ethernet and its prevalence in network backbones, ATM and evolution towards MPLS, wireless communications, congestion control, VoIP vs. traditional voice service, cloud computing, and emerging trends in Telecommunications.

INFOSYS 732 (15 Points)
Readings in Information Systems

An independent study of the research literature in a particular area of information systems. An opportunity to investigate a topic in depth, and gain valuable research skills. The particular area of research must be jointly agreed upon by the lecturer and students, and approved by the Head of Department.

INFOSYS 734 (15 Points)
Electronic Commerce

Focuses on major research issues covering the design of information systems architectures for business-to-business, business-to-consumer and cross-national processes. Application development and design strategies specific to electronic commerce are formulated and evaluated.

INFOSYS 735 (15 Points)
Special Topic in Information Systems

INFOSYS 737 (15 Points)
Enterprise Resource Planning Systems

Examines the cross-functional integrated computer-based information systems, commonly referred to as Enterprise Resource Planning (ERP) systems. Systems, common business processes, re-engineering/change management, and enterprise reference models are introduced with a holistic and research-oriented perspective. Considers issues associated with the analysis, design, implementation, and configuration of such enterprise systems and investigates topics such as: supply chain, planning and control systems, optimisation, scheduling systems, electronic commerce and business information warehousing.

INFOSYS 740 (15 Points)
Systems Dynamics for Complex Modelling

The concepts, theories and modelling tools of system dynamics are used to deal with the dynamic complexities arising from interdependencies and interactions amongst various parts and functions within organisations and societies alike. Qualitative and computer modelling are used to gain insight and to foresee the intended outcomes as well as unintended consequences of policies and strategic decisions. All aspects of organisations including HR, IT, operations, marketing and strategy are considered and their interdependencies explored.

Restriction: OPSMGT 765

INFOSYS 750 (15 Points)
Research Methods – Quantitative

A comprehensive review of the methodological issues in systems research, including detailed coverage of univariate and multivariate data analysis.

INFOSYS 751 (15 Points)
Research Methods – Qualitative

Focus is on the conduct and evaluation of qualitative research. Reviews various qualitative research methods

and ways of analysing qualitative data and the challenges of writing up qualitative research work for conferences and peer-reviewed academic journals.

INFOSYS 788 (30 Points)

Dissertation in Information Systems for BCom(Hons)

Information Systems – Graduate Programmes

Postgraduate Courses

INFORM 703 (20 Points)

Information Systems Management

Examines the managerial practices required for the quick and effective development and deployment of information systems. Guidelines for both technical and managerial personnel are described within the context of various system development life cycles. Common problems are identified and the practices which best reduce the risk of failure are presented.

INFORM 705 (15 Points)

Enterprise Systems

Examines the cross-functional, integrated computer-based information systems, commonly referred to as Enterprise Resource Planning (ERP) systems, designed to support an organisation's information needs. Management systems, common business processes, re-engineering/change management, and enterprise reference models are introduced with a holistic perspective. Considers issues associated with the analysis, design, implementation and configuration of such enterprise systems.

Postgraduate Courses
MKTG 701 (15 Points)
Advanced Marketing 1

A core course providing an introduction to marketing philosophy, theory, current debate and advancements in the field. Emphasis is on developing the critical thinking and analytical skills necessary to undertake postgraduate research.

MKTG 702 (15 Points)
Advanced Marketing 2

An advanced study of marketing theory relating to contemporary issues. Emphasis is on providing students with an in-depth knowledge of key topics in marketing, based on critical evaluation of the field. Examples of topics covered included marketing strategy, retailing, branding, services marketing.

MKTG 703 (15 Points)
Research Methods in Marketing 1

A core course for all postgraduate students. An overview of the research process, and examination of different types of research philosophies used in the discovery of theory. An introduction to both qualitative and quantitative research techniques is provided to assist students to think critically when designing a research study.

MKTG 704 (15 Points)
Research Methods in Marketing 2

A continuation of MKTG 703, with the aim of providing students with a more in-depth knowledge of data analysis using multivariate methods. The aim is to gain an appreciation of the appropriate types of quantitative methods of analysis and research designs suitable for different types of research problems.

Prerequisite: MKTG 703

MKTG 705 (15 Points)
Advanced Buyer Behaviour 1

A core course in the postgraduate programme, providing a foundation for a deeper understanding of buyers. This is an advanced study of fundamental

theories in buyer behaviour, where both classical and contemporary theories are evaluated.

MKTG 710 (15 Points)
Advanced Communications Research

An examination of current and emerging research in communications. Examines relevant research into consumer behaviour as it relates to the receiving and processing of advertising messages. By examining various points of view, students should have a better understanding of the theoretical issues involving the use of advertising, media selection and creative execution of advertising programmes.

MKTG 716 (15 Points)
Special Topic: Electronic Commerce

An integrative course jointly taught by Marketing and ISOM. Reviews the major elements and applications of electronic commerce and inspects the ways in which integrated systems for electronic commerce might be realised. Emphasis is on synthesising the many strands of developments in the field of electronic commerce.

Operations Management

Stage II

OPSMGT 255 (15 Points)

Introduction to Operations and Supply Chain Management

An introduction to a subset of important decision areas in operations and supply chain management, eg, quality management, capacity and aggregate planning, inventory and transportation networks. Modeling and analytical skills will be developed and supporting techniques/tools will be introduced including forecasting and linear programming. Common qualitative and quantitative aspects of supply chain management will be discussed.

Prerequisite: INFOSYS 110 or 120 and STATS 108, or INFOMGMT 192 and STATS 191

Restriction: 636.251, 636.252

OPSMGT 258 (15 Points)

Business Process Design

Business process modelling using visual maps or diagrams underpins all electronic commerce initiatives. Introduces the elements of business process modelling through mapping and design. Emphasis is on the analysis of how organisational processes need to be redefined in the electronic commerce context.

Includes event-driven process chain (EPC) diagrams which are used to model process, data, organisation and interaction. Other topics include: basic flows and processes, business process management and supply chain and organisational performance metrics.

Prerequisite: INFOSYS 110 or 120 and STATS 108, or INFOMGMT 192 and STATS 191

Stage III

OPSMGT 357 (15 Points)

Project Management

An introduction to the management of projects in organisations, with a particular emphasis placed on the interdisciplinary nature and broad applications of projects. Topics covered include: project selection and initiation, external issues, human resources, planning, financing, ethics, scheduling and resource allocation, information systems control, evaluation and termination.

Prerequisite: INFOSYS 110 or 120 and 30 points at Stage II, or INFOMGMT 192

Restriction: 636.380, OPSMGT 257, BUSINESS 292, MGMT 291

OPSMGT 370 (15 Points)

Operations and Supply Chain Strategy

Understanding and resolving complex and dynamic issues associated with the design, execution, and improvement of supply chain and operating processes. Exploits an applied, integrated, and systems/network approach – considering strategy and interactions with other business areas such as information technology, human factors, and performance measurement. Theories/frameworks supported with business cases.

Prerequisite: OPSMGT 255 or ENGEN 302

OPSMGT 371 (15 Points)

Business Logistics

Covers current issues in business logistics. Focuses on logistics at company level as well as at the level of the entire supply chain. Topic coverage has a modelling emphasis and includes forecasting and inventory control models suitable for use in a distribution and supply-chain context.

Prerequisite: OPSMGT 255

OPSMGT 372 (15 Points)

Systems Thinking for Quality Management

The principles for delivering quality products and services that have value for both external and internal customers, while reducing waste throughout the system.

Prerequisite: INFOSYS 110 or 120, and 30 points at Stage II

Restriction: OPSMGT 256

OPSMGT 373 (15 Points)

e-Business and Supply Chains

Studies the role of information technology in the management of supply chains in the business environment. Examines the use of exchanges and Internet-enabled collaboration in planning and product/process design. Topics include enterprise resource planning systems, decision support systems, electronic data interchange, and the internet.

Prerequisite: OPSMGT 258

OPSMGT 376 (15 Points)

Strategic Procurement

Strategic issues in procurement and supply management, covering analysis, planning, and

management of domestic and international procurement and supply activities within the supply chain context. Topics include purchasing process, procurement cycle, purchasing research, relationships with suppliers, negotiation, and commodity planning; cost, price, and value analysis; and the role of E-procurement and business-to-business Web-based marketplaces.

Prerequisite: INFOSYS 110 or 120 and 30 points at Stage II

OPSMGT 383 (15 Points)

OPSMGT 732 (15 Points)

Readings in Operations Management

A comprehensive review of the research literature in a particular area of operations management. The particular area of research must be jointly agreed upon by the lecturer and student(s) and approved by the Head of Department.

OPSMGT 760 (15 Points)

Advanced Operations Systems

An important opportunity for students to gain knowledge regarding ways in which they can efficiently improve the internal and external service aspects of business. Production and operations decisions can provide major competitive advantage. The focus is on the methods of building a comprehensive enterprise system.

OPSMGT 762 (15 Points)

Quality Management

An investigation of the key concepts and theories of total quality management and its links between systems theory and learning organisation. Topics will include: theoretical underpinning of quality management, Denning's theory of profound knowledge, links between systems theory and learning organisation, continuous improvement models and planning as learning.

OPSMGT 763 (15 Points)

Integrated Performance Frameworks

Addresses both intra and inter-organisational performance at multiple levels. Views on organisational performance are changing rapidly, inline with the critical mass of accessible Information and Communication Technologies (ICTs). The information age brings a whole new set of frameworks that are likely to be key to future organisational success. Examines both 'information age' models, largely based on organisational networks, which have complexity theory as the underlying paradigm, as well as industrial age models such as the Balanced Scorecard and Hoshin planning. The course is cross-functional; studying material which has been developed from a broad range of disciplines including operations, accounting and human resources.

OPSMGT 764 (15 Points)

Systems Analysis for Operations Management

Business operations are becoming increasingly integrated and multifaceted, demanding novel approaches to managing their complexity. For example, the management of supply chains and of projects is

particularly demanding, typically involving interrelated mission-critical activities that organisations must plan and control if they are to maximise their business opportunities and utilise their resources effectively. Develops some of the key concepts of stochastic and dynamic control and shows how they are applied in different circumstances.

Operations Management – Graduate Programmes

Postgraduate Courses

OPSMAN 703 (20 Points)

Operations Management

An understanding of the importance of the operations management function for organisations, the strategic issues involved and the tools and techniques used to solve operations management issues. Topics include: decision analysis, resource planning, capacity planning and scheduling, supply and demand issues, location and layout and other issues considered core to the operations of an organisation.

OPSMAN 705 (20 Points)

Project Management

An exploration of the methods and issues inherent in planning programmes and projects. Topics include: the role of project management in new business thinking, the dynamics of project management, project organisation planning and scheduling, using computerised project management tools, politics and leadership in projects, building and managing a team and handling conflict.

OPSMAN 710 (15 Points)

Project Management

An exploration of the methods and issues inherent in planning programmes and projects. Topics include: the role of project management in new business thinking, the dynamics of project management, project organisation planning and scheduling, using computerised project management tools, politics and leadership in projects, building and managing a team and handling conflict.

Prerequisite: 60 points from BUSADMIN 761–764, 771–774, 775

Restriction: OPSMAN 705

Operations Research

Stage III

OPSRES 385 (15 Points)

Simulation Modeling

Uncertainty exists in all management decisions and simulation is used for analysing systems in industry. This course focuses on modeling real-world problems using a commercial simulation tool. Industrial case studies will motivate the content of

the course. Topics include the simulation process, general queue modeling, modeling networks (computer or transportation networks) and simulating operations (machine scheduling or assembly line modeling). The emphasis is on “learning by doing”.

Prerequisite: STATS 255 or ENGSCI 255

OPSRES 392 (15 Points)

Supply-Chain Optimisation Modeling

Practical optimisation for supply-chain managers extending the modeling skills developed in STATS 255 (or elsewhere) to build mathematical programming models in AMPL, a commercial optimisation package. Designed to develop the modeling themes of the SAP Advanced Planner and Optimiser (APO). Uses case studies to develop the skills to build AMPL models for the standard APO functions, “populate” these models with data, solve problems, analyse and summarise the results.

Prerequisite: STATS 255 or ENGSCI 255

Property

Stage I

PROPERTY 102 (15 Points)

Introduction to Property

Knowledge of how property markets work and how properties are valued, managed and financed are critical for property professionals and in understanding modern life. Key terms and definitions surrounding the property profession and introductory analyses of supply and demand characteristics unique to property markets will be key learning outcomes. Students will also learn key concepts surrounding residential property valuation.

PROPERTY 141 (15 Points)

Building Construction

Knowledge of construction is vital in understanding property valuation, property management and property development. Building materials, structural options, and building services have a strong influence on how a property performs both financially and functionally. Provides general construction knowledge and an understanding of the construction process.

PROPERTY 151 (15 Points)

PROPERTY 151G (15 Points)

Property Market Dynamics

The dynamics of property markets (housing, retail, office, industrial) help shape our daily lives and can have profound impacts for wealth creation. Property Market Dynamics is designed to introduce students to key economic and property concepts that help understand urban development. National and international property trends, property development and investment processes, tenure and property rights, and mortgage issues are examined.

Restriction: PROPERTY 102

Stage II

PROPERTY 211 (15 Points)

Property Valuation

As every property is unique, the valuation of property presents many challenges and has a strong influence on the financial viability of both existing buildings and

the development process. General models for valuing commercial property, industrial property, and land will be introduced.

Prerequisite: PROPERTY 102 and 141

Corequisite: PROPERTY 251

PROPERTY 221 (15 Points)

Property Marketing

Effective marketing is at the core of successful property management, development and investment. Covers buyer behaviour, marketing research, segmentation and targeting, the marketing plan, the listing process and selling techniques all in the context of the property industry. Develops essential skills for independent thinking, strategic problem solving, effective teamwork and business report writing.

Prerequisite: PROPERTY 102 and 141

PROPERTY 231 (15 Points)

Property Management

Achieving optimum performance from property assets is a multi-faceted process involving leases, financial structures, marketing, and occupier demand. Budgeting, operational expenditures, and capital expenditures will be introduced within the property context. An understanding of health and safety issues as well as leases will be provided.

Prerequisite: PROPERTY 102 and 141

PROPERTY 241 (15 Points)

Land-Use Planning and Controls

Provides an understanding of the Resource Management Act and regional and district plans and how these affect land use and subdivision as well as resource consent applications and other processes.

Prerequisite: PROPERTY 102 and 141

PROPERTY 251 (15 Points)

Property Finance and Investment

Finance represents a fundamental part of how properties are purchased, developed and managed. The application of general theories of property investment, discounted cash flow, risk and return, and financial mathematics is vital for property professionals. Debt and equity financing options are discussed for residential property, income-producing property, and development projects.

Prerequisite: PROPERTY 102 and 141

PROPERTY 261 (15 Points)

Property Economics

The supply and demand characteristics of urban developments have impacts on not only the price and availability of property, but on how we live and work. An understanding of development economics, urban policy, and land-use economics will provide students with knowledge of how the decisions of property professionals, policy makers, occupiers shape the built environment.

Prerequisite: ECON 101, PROPERTY 102 and 141

PROPERTY 271 (15 Points)

Property Law

Legal foundations of land and property ownership underpin value. A general understanding of the wide range of laws governing property will be provided, including leasing, transfer, and valuation.

Prerequisite: PROPERTY 102 and 141

Stage III

PROPERTY 311 (15 Points)

Advanced Valuation

The theory and practice of valuing special categories of urban property. Topics include: valuation of CBD

land and office buildings, shopping centres, hotels and leasehold land. Also covered are: statutory valuations (compulsory purchase), going-concern valuations, litigation, arbitration, and professional ethics and practice.

Prerequisite: PROPERTY 211

PROPERTY 312 (15 Points)
Plant and Machinery Valuation

Principles and practice of plant and machinery valuation, with case studies of insurance, market, existing use and infrastructural asset valuations.

Prerequisite: PROPERTY 211 and 251

PROPERTY 321 (15 Points)
Advanced Property Marketing

An understanding of how to market complex properties and real estate services is essential in creating a competitive advantage for property professionals. Covers review of current related academic literature, preparation of marketing strategies, marketing plans and market analysis relevant to the property market. Develops skills in analysing academic literature and advanced skills for independent and creative thinking, strategic problem solving, effective teamwork and business report writing.

Prerequisite: PROPERTY 221

PROPERTY 331 (15 Points)
Advanced Property Management

Advanced property management theory through the study of its practical application in the strategic and estate management of property portfolios held in public and private ownership. The management of commercial and specialised property.

Prerequisite: PROPERTY 231 and 251

PROPERTY 333 (15 Points)
Facilities Management

An introduction to facilities management.

Prerequisite: PROPERTY 231

PROPERTY 342 (15 Points)
Property Development

An introduction to the process of property development, including application of analytical methods to case studies.

Prerequisite: PROPERTY 241, 251, 261

PROPERTY 344 (15 Points)
Advanced Construction

Advanced topics in commercial and high-rise construction related to construction documentation, project delivery, project management, cost planning, commercial building surveying and 'green building' design and systems.

Prerequisite: PROPERTY Part II

PROPERTY 351 (15 Points)
Advanced Property Finance and Investment

Advanced capital budgeting issues and application of investment appraisal techniques to property. Topics include: asset pricing models, capital structure decision, weighted average cost of capital and adjusted present value, property as an asset class, and financing and investment strategies.

Prerequisite: PROPERTY 251

PROPERTY 363 (15 Points)
Property Research Methods

Introduction to a range of quantitative and qualitative methods employed in property research.

Prerequisite: STATS 108 and PROPERTY Part II

PROPERTY 371 (15 Points)
Property Project

A research project on an approved topic.

Prerequisite: PROPERTY Part II

PROPERTY 372 (15 Points)
Applied Valuation Project

The completion of a range of practical valuation reports in conjunction with industry mentors.

Prerequisite: PROPERTY Part II

Corequisite: PROPERTY 311

PROPERTY 373 (15 Points)
Advanced Property Law

Advanced study of law of particular relevance to the real estate, valuation and property management professions.

Prerequisite: PROPERTY 241 and 271

PROPERTY 381 (15 Points)
Building Economics

An introduction to building economics.

Prerequisite: ECON 101 and PROPERTY 251

PROPERTY 382 (15 Points)
Māori Land Issues

History of land conflicts in New Zealand, Waitangi Tribunal process, and development of portfolio management strategies.

Prerequisite: PROPERTY 241 and 271

PROPERTY 383 (15 Points)
Special Topic

A seminar or individual course of study on a specialised aspect of property.

Prerequisite: PROPERTY Part II

PROPERTY 384 (15 Points)

Restriction: ARCHDES 210, 750.200

ARCHDES 201 (30 Points) **Design 4**

The Constructed: An introduction to full-scale fabrication. Offers the opportunity to work directly with various materials, fabrication processes, and detailing. Requires students to understand the full range of drawings required to move from design concept to actual construction.

Prerequisite: Any two of ARCHDES 100, 101, 110, 111, 750.100, 750.101

Restriction: ARCHDES 211, 750.201

Stage III

ARCHDES 300 (30 Points) **Design 5**

The Collected: An introduction to a complex building program that demands the gathering together of small objects/units combined with large-scale public functions. Examines both repeatable units and exceptional spaces and develops an understanding of the corresponding appropriate structural systems.

Prerequisite: ARCHDES 200 or 210 or 750.200

Restriction: ARCHDES 310, 750.300

ARCHDES 301 (30 Points) **Design 6**

The Systemic: The culmination of all aspects – conceptual, formal, material, tectonic, structural – of architectural design within the context of a larger network of infrastructural services. Also requires an understanding of the full range of drawings describing the workings of the building as both an active “machine” and place for human comfort.

Prerequisite: ARCHDES 200 or 210 or 750.200

Restriction: ARCHDES 311, 750.301

ARCHDES 374 (10 Points) **Elective Study**

Topics approved by the Head of School of Architecture and Planning.

ARCHDES 375 (10 Points) **Elective Study**

Topics approved by the Head of School of Architecture and Planning.

Stage IV

ARCHDES 400 (30 Points) **Design 7**

Advanced design studies in which social, cultural, environmental and technological issues are investigated and synthesised in the context of an architectural project and setting of moderate complexity.

Prerequisite: Any two of ARCHDES 300, 301, 310, 311, or 750.300 and 750.301

Restriction: ARCHDES 410, 750.400

ARCHDES 401 (30 Points) **Design 8**

Advanced design studies in which social, cultural, environmental and technological issues are investigated and synthesised in the context of an architectural project and setting of moderate complexity.

Prerequisite: ARCHDES 301 or 311 or 750.301

Restriction: ARCHDES 411, 750.401

Stage V

ARCHDES 502 (30 Points) **Design 9**

Culminating studies in which students are expected to address a challenging and conceptually complex architectural design project, together with developed design studies sufficient to explain the building's construction, structure, materials and environmental performance. A report is required to elucidate the design.

Prerequisite: ARCHDES 400 or 410 or 750.400

Restriction: ARCHDES 500, 512, 750.500

ARCHDES 503 (30 Points) **Design 10**

Culminating studies in which students are expected to engage with complex architectural design issues, with an opportunity to explore areas of specific personal interest, leading to an architectural design. Documentation is required to elucidate the design.

Prerequisite: ARCHDES 400 or 410 or 750.400

Restriction: ARCHDES 501, 513, 750.501

ARCHDES 512 (34.28 Points) **Design 9**

Culminating studies in which students are expected to address a challenging and conceptually complex architectural design project, together with developed design studies sufficient to explain the building's construction, structure, materials and environmental performance. A report is required to elucidate the design.

Available to transition students only.

Prerequisite: ARCHDES 400 or 750.400

Restriction: ARCHDES 500, 502, 750.500

ARCHDES 513 (34.28 Points) **Design 10**

Culminating studies in which students are expected to engage with complex architectural design issues, with an opportunity to explore areas of specific personal interest, leading to an architectural design. Documentation is required to elucidate the design.

Available to transition students only.

Prerequisite: ARCHDES 400 or 750.400

Restriction: ARCHDES 501, 503, 750.501

Postgraduate Courses

ARCHDES 700 (30 Points) **Advanced Design 1**

A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student's own interest and aligned with the School's research clusters, sharing workshops, discussions, pin-ups and tutorials.

ARCHDES 701 (30 Points) **Advanced Design 2**

A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student's own interest and aligned with the School's research clusters, sharing workshops, discussions, presentations and tutorials.

ARCHDES 770	(30 Points)
ARCHDES 770A	(15 Points)
ARCHDES 770B	(15 Points)
Elective Study	

Topics approved by the Head of School of Architecture and Planning.
To complete this course, students must enrol in ARCHDES 770 A and B, or ARCHDES 770

ARCHDES 771	(10 Points)
Design Elective 1	

An advanced study in architectural design on a topic approved by the Head of School of Architecture and Planning.

ARCHDES 772	(10 Points)
Design Elective 2	

An advanced study in architectural design on a topic approved by the Head of School of Architecture and Planning.

ARCHDES 773	(10 Points)
Design Elective 3	

An advanced study in architectural design on a topic approved by the Head of School of Architecture and Planning.

ARCHDES 796A	(60 Points)
ARCHDES 796B	(60 Points)
Thesis	

A thesis involving a design-based discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture (Professional) under the guidance of an appointed supervisor.
Prerequisite: ARCHDES 700, 701 and ARCHPRM 700, 701

To complete this course students must enrol in ARCHDES 796 A and B

Architectural History, Theory and Criticism

General Note: Stage I, II and III Architectural History, Theory and Criticism courses may be available to both Architecture and non-Architecture students.

Stage I

ARCHHTC 102	(15 Points)
--------------------	--------------------

ARCHHTC 102G	(15 Points)
Modern Architecture and Urbanism	

Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment during the twentieth century. Emphasis is placed on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity, and cultural self-expression, amongst other things.

Restriction: ARCHHTC 100

Stage II

ARCHHTC 235	(10 Points)
History and Theory of Architecture and Urbanism 1	

Examines late modern, postmodern and contemporary architecture and urbanism. Emphasis is placed on the analysis of buildings, projects and developments that have the potential to inform contemporary architectural

design, and on the reading and writing of architectural criticism.

Prerequisite: ARCHHTC 102 or 102G, or ARCHHTC 100 and 101

ARCHHTC 236	(10 Points)
History and Theory of Architecture and Urbanism 2	

An introduction to architectural and urban theory with emphasis on significant developments in the modern and postmodern periods. Introduction to the contribution of architectural theory to an understanding of the phenomenon of architecture, of architectural design practice and of the problems that architecture and urbanism must solve in the early twenty-first century.

Prerequisite: ARCHHTC 102 or 102G, or ARCHHTC 100 and 101

Stage III

ARCHHTC 335	(10 Points)
History and Theory of Architecture and Urbanism 3	

Examines through case studies architectural landscapes, buildings, ensembles and urban projects, ornamental and iconographic programmes, and architectural texts from pre-history to the end of the fourteenth century. In considering the broad range of cultural and building traditions across the Old World, distinctions to be drawn between them with respect to: conceptual preoccupations, structural and spatial ideas and their use.

Prerequisite: ARCHHTC 235 and 236, or 202 and 230

Restriction: ARCHHTC 233

ARCHHTC 336	(10 Points)
History and Theory of Architecture and Urbanism 4	

Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment from the fifteenth to the eighteenth century. Emphasis on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity and cultural expression, amongst other things.

Prerequisite: ARCHHTC 235 and 236, or 202 and 230

Restriction: ARCHHTC 234

ARCHHTC 337	(10 Points)
History and Theory of Architecture and Urbanism 5	

Examines the development of architecture, urban design, landscape and the environment in historical, geographical and cultural contexts.

Prerequisite: ARCHHTC 235 and 236, or 202 and 230

Restriction: ARCHHTC 333

ARCHHTC 338	(10 Points)
History and Theory of Architecture and Urbanism 6	

Examines the development of architecture, urban design, landscape and the environment in historical and theoretical contexts.

Prerequisite: ARCHHTC 235 and 236, or 202 and 230

Restriction: ARCHHTC 334

ARCHHTC 374	(10 Points)
Elective Study	

Topics approved by the Head of School of Architecture and Planning.

ARCHHTC 375	(10 Points)
Elective Study	

Topics approved by the Head of School of Architecture and Planning.

Stage IV

ARCHHTC 470 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

ARCHHTC 471 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

Postgraduate Courses

ARCHHTC 770 (30 Points)

ARCHHTC 770A (15 Points)

ARCHHTC 770B (15 Points)

Elective Study

Topics approved by the Head of School of Architecture and Planning.

To complete this course students must enrol in ARCHHTC 770 A and B, or ARCHHTC 770

ARCHHTC 771 (10 Points)
History Elective 1

An advanced study in architectural history, theory and criticism on a topic approved by the Head of School of Architecture and Planning.

ARCHHTC 772 (10 Points)
History Elective 2

An advanced study in architectural history, theory and criticism on a topic approved by the Head of School of Architecture and Planning.

ARCHHTC 773 (10 Points)
History Elective 3

An advanced study in architectural history, theory and criticism on a topic approved by the Head of School of Architecture and Planning.

Architectural Media

Stage I

ARCHDRC 102 (10 Points)
Architectural Media I

An introduction to drawing and computing techniques related to design studio practice and an overview of the analytical and critical value of these techniques for design.

Restriction: ARCHDRC 100, 101

Stage II

ARCHDRC 202 (10 Points)
Architectural Media II

The study of drawing, computing and related art practices in terms of architectural representation and analysis and the practice of selected techniques.

Prerequisite: Both ARCHDRC 100 and 101, or ARCHDRC 102

Restriction: ARCHDRC 200, 201

Stage III

ARCHDRC 300 (10 Points)
Life Drawing

Analysis and understanding of proportion, structure, scale and how the human figure relates to architectural space and form.

Prerequisite: ARCHDRC 202 or 201 or 752.201

Restriction: 752.300

ARCHDRC 301 (10 Points)
Measured Drawing

The measurement, recording and drawing of existing New Zealand architecture of historical and cultural significance.

Prerequisite: ARCHDRC 202 or 201 or 752.201

Restriction: 752.301

ARCHDRC 303 (10 Points)
Freehand Drawing

The examination, through penetrative seeing, of the basic structure, form, tonal colour and textural elements found in the environment and the development of these awarenesses in knowledgeable graphic communications with an emphasis on perceptual expression.

Prerequisite: ARCHDRC 202 or ARCHDRC 201 or 752.201

Restriction: 752.303

ARCHDRC 304 (10 Points)
Introduction to Architectural Photography

An introduction to architectural photography and photographic techniques.

ARCHDRC 370 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

ARCHDRC 371 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

ARCHDRC 372 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

ARCHDRC 373 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

Stage IV

ARCHDRC 402 (10 Points)
Advanced Drawing and Computing

An introduction to advanced theory and criticism of design media in architecture and research in drawing and computing.

Prerequisite: Both ARCHDRC 200 and ARCHDRC 201, or ARCHDRC 308

Restriction: ARCHDRC 400

ARCHDRC 470 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

ARCHDRC 471 (10 Points)
Elective Study

Topics approved by the Head of School of Architecture and Planning.

Postgraduate Courses

ARCHDRC 770 (30 Points)

ARCHDRC 770A (15 Points)

ARCHDRC 770B (15 Points)

Elective Study

Topics approved by the Head of School of Architecture and Planning.

To complete this course, students must enrol in either ARCHDRC 770 A and B, or ARCHDRC 770

ARCHDRC 771 (10 Points)**Architectural Media Elective 1**

An advanced study in architectural media on a topic approved by the Head of School of Architecture and Planning.

ARCHDRC 772 (10 Points)**Architectural Media Elective 2**

An advanced study in architectural media on a topic approved by the Head of School of Architecture and Planning.

ARCHDRC 773 (10 Points)**Architectural Media Elective 3**

An advanced study in architectural media on a topic approved by the Head of School of Architecture and Planning.

Architectural Professional Studies

Stage IV**ARCHPRM 401 (10 Points)****Project Management 1**

Management of the building project from inception through to the stage of tendering. Client needs and agreements, feasibility studies, project constraints, cost planning and control, consultants, administration and quality control. Particular emphasis on documentation, and the place of information technology in the architect's practice.

Restriction: ARCHPRM 400, 423, 431, 756.400

ARCHPRM 402 (10 Points)**Project Management 2**

Management of the building project from the tendering stage through to project completion, including post-occupancy evaluation. Establishment of the building contract, contract administration and site observation, study of contract law and cost management during the construction phase. All aspects of documentation during construction and final project accounts.

Restriction: ARCHPRM 400, 432, 756.400

Stage V**ARCHPRM 501 (10 Points)****Practice Management 1**

Introduction to the New Zealand legal system and the law of contract and torts. Negotiations, negligence, disputes and remedies relevant to architects in practice. Introduction to the professional institute, the registration procedure, risk management and professional ethics.

Prerequisite: Either ARCHPRM 401 and ARCHPRM 402, or 756.400

Restriction: ARCHPRM 500, 531, 756.500

ARCHPRM 502 (10 Points)**Practice Management 2**

Establishing and maintaining an architectural practice as a business venture. Organisational structures. Strategic market management. Financial planning, insurance and taxation. Aspects of the law as related to practice.

Prerequisite: Either ARCHPRM 401 and 402, or 756.400

Restriction: ARCHPRM 500, 532, 756.500

ARCHPRM 531 (8.57 Points)**Practice Management 1**

Introduction to the New Zealand legal system and the law of contract and torts. Negotiations, negligence, disputes and remedies relevant to architects in practice. Introduction to the professional institute,

the registration procedure, risk management and professional ethics.

Available to transition students only.

Prerequisite: ARCHPRM 401, 402

Restriction: ARCHPRM 500, 501

ARCHPRM 532 (8.57 Points)**Practice Management 2**

Establishing and maintaining an architectural practice as a business venture. Organisational structures. Strategic market management. Financial planning, insurance and taxation. Aspects of the law as related to practice.

Available to transition students only.

Prerequisite: ARCHPRM 401, 402

Restriction: ARCHPRM 500, 502

Postgraduate Courses

ARCHPRM 700 (15 Points)**Professional Studies 1**

The management of the building project from inception to tendering. An examination of client needs and agreements, feasibility studies, project constraints, cost planning and control, consultants, administration and quality control. An analysis of all aspects of the contracts and documentation during construction and final project accounts.

ARCHPRM 701 (15 Points)**Professional Studies 2**

The New Zealand legal system and the law of contract and torts; negotiations, negligence, disputes and remedies relevant to architects in practice. An examination of the requirements for establishing and maintaining an architectural practice as a business venture as well as strategic market management, financial planning, insurance and taxation.

ARCHPRM 770 (30 Points)**ARCHPRM 770A (15 Points)****ARCHPRM 770B (15 Points)****Elective Study**

Topics approved by the Head of School of Architecture and Planning.

To complete this course students must enrol in ARCHPRM 770 A and B, or ARCHPRM 770

ARCHPRM 771 (10 Points)**Professional Studies Elective 1**

An advanced study in architectural professional studies on a topic approved by the Head of School of Architecture and Planning.

ARCHPRM 772 (10 Points)**Professional Studies Elective 2**

An advanced study in architectural professional studies on a topic approved by the Head of School of Architecture and Planning.

ARCHPRM 773 (10 Points)**Professional Studies Elective 3**

An advanced study in architectural professional studies on a topic approved by the Head of School of Architecture and Planning.

Architectural Technology

Stage I**ARCHTECH 106 (15 Points)****Architecture and Sustainability**

People and internal and external environments through history; climate and microclimate; resources; materials,

production, properties and environmental impact; comfort – psychology and measurement (thermal, lighting, sound); the sustainable house in New Zealand; architecture, techniques and systems; building and lifestyle, and measurement techniques.

Restriction: ARCHTECH 102, 103, 758.101

ARCHTECH 107 (10 Points)
Design Technology I

Structural concepts and construction principles relating to light timber, steel, concrete and other typical construction materials for domestic scale buildings. In-depth investigations of structural systems, building envelopes and detailing. Application of principles to design studio projects.

Restriction: ARCHTECH 100, 104, 105, 758.100

Stage II

ARCHTECH 202 (10 Points)
Thermal and Services Design I

Climate, energy and sustainability considerations in building. Thermal performance, ventilation and condensation. Mechanical, electrical and hydraulic services for domestic-scale and low-rise buildings.

Prerequisite: ARCHTECH 106 or 103 or 758.101

Restriction: 758.201, ARCHTECH 212

ARCHTECH 203 (10 Points)
Lighting and Acoustic Design I

Visual performance and visual comfort. The interaction of light with materials and control systems. Artificial light sources and luminaires. Natural and artificial lighting design. Lighting standards and codes of practice. The behaviour of sound and its control by materials and building systems. Measuring sound, and acceptability criteria. Requirements of the New Zealand Building Code. Design needs requiring specialist aid.

Prerequisite: ARCHTECH 106 or 103 or 758.101

Restriction: 758.201, ARCHTECH 213

ARCHTECH 206 (10 Points)
Design Technology II

Structural concepts and construction principles relating to light timber, steel, concrete and other typical construction materials for domestic scale buildings. In-depth investigations of structural systems, building envelopes and detailing. Application of principles to design studio projects.

Prerequisite: ARCHTECH 107, or 104 and 105

Restriction: ARCHTECH 204, 205, 200, 758.200

ARCHTECH 207 (15 Points)
Design Technology II

Development of structural and construction principles and systems. Outline of forces acting in buildings. Characteristics and behaviour of common building materials. Standard details in residential housing. Outline of building codes, health and safety regulations and site operations. Active and passive building services and technology including heating, cooling, ventilation, water, waste, electrical services and vertical transportation. Application to design studio projects.

Prerequisite: ARCHTECH 107, or 104 and 105

Restriction: ARCHTECH 200, 204, 205, 206, 758.200

ARCHTECH 208 (15 Points)
Environmental Design I

Climate, energy and sustainability considerations in buildings. Solar analysis and design tools. Thermal performance, ventilation and condensation. Visual performance and visual comfort. Interaction of light

with materials and daylight performance of buildings. Natural and artificial lighting design. Behaviour of sound and its control by materials and building systems. Measuring sound, and acceptability criteria. Requirements of the New Zealand Building Code.

Prerequisite: ARCHTECH 106, or 102 and 103, or 758.101

Restriction: ARCHTECH 202, 203, 212, 213, 758.201

ARCHTECH 212 (8.57 Points)
Environment and Services 1

Climate and energy considerations in building. Thermal performance, ventilation and condensation. Mechanical, electrical and hydraulic services for low-rise buildings.

Available to transition students only.

Prerequisite: ARCHTECH 106 or 103

Restriction: ARCHTECH 202

ARCHTECH 213 (8.57 Points)
Environment and Services 2

Natural and artificial lighting; noise control and acoustical design principles and their application in buildings; requirements and recommendations to practice.

Available to transition students only.

Prerequisite: ARCHTECH 106 or 103

Restriction: ARCHTECH 203

Stage III

ARCHTECH 307 (10 Points)
Environmental Design II

Heat and the thermal environment. Light and the luminous environment. Sound and the sonic environment. Energy and resources. Integrating environmental design and performance. Relevant physical principles reviewed with application and integration of the four topic areas and their relationship to human comfort. Simulation tools, measurements and techniques. Quantitative and qualitative approach to sustainable practices.

Prerequisite: ARCHTECH 202 and 203, or 208, or 212 and 213, or 758.201

Restriction: ARCHTECH 308, 309, 318, 319

ARCHTECH 312 (10 Points)
Design Technology III

Development of construction and structural principles for complex, large scale and multi-storey buildings. Investigation into advanced structural systems, façade technology, material selection and detailing. Introduction of factors affecting buildability, environmental performance. Fire protection and building code requirements. Application to design studio projects.

Prerequisite: ARCHTECH 207, or 206, or 204 and 205

Restriction: ARCHTECH 311, 475

Stage IV

ARCHTECH 421 (10 Points)
Design Technology IV

Investigations of complex, larger-scale buildings with particular emphasis on the evaluation and selection of conceptually appropriate structural systems, materials and assembly. Factors affecting buildability, environmental performance, fire protection and building code requirements will be introduced. Self-directed research into, and representation of, technical systems and details of selected case study buildings and students' studio projects.

Prerequisite: ARCHTECH 312 or 311 or 475

Restriction: ARCHTECH 420, 400

ARCHTECH 470 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

ARCHTECH 471 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

ARCHTECH 472 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

ARCHTECH 475 (8.57 Points)
Elective Project
 Available to transition students only.

Stage V

ARCHTECH 570 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

ARCHTECH 571 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

ARCHTECH 572 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

ARCHTECH 573 (10 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.

Postgraduate Courses

ARCHTECH 704 (30 Points)

ARCHTECH 704A (15 Points)

ARCHTECH 704B (15 Points)
Sustainability of the Built Environment
 Evolution of sustainable settlements and buildings, and the technologies used both past and present. Analysis of examples in terms of flows of resources and energy. Defining sustainability quantitatively.
To complete this course students must enrol in ARCHTECH 704 A and B, or ARCHTECH 704

ARCHTECH 705 (30 Points)

ARCHTECH 705A (15 Points)

ARCHTECH 705B (15 Points)
Energy and the Built Environment
 Contemporary achievements in low-energy building design. Methods of prediction and assessment of building energy performance. Energy modelling as a design tool for the sustainable built environment.
To complete this course students must enrol in ARCHTECH 705 A and B, or ARCHTECH 705

ARCHTECH 770 (30 Points)

ARCHTECH 770A (15 Points)

ARCHTECH 770B (15 Points)
Elective Study
 Topics approved by the Head of School of Architecture and Planning.
To complete this course students must enrol in ARCHTECH 770 A and B, or ARCHTECH 770

ARCHTECH 771 (10 Points)
Technology Elective 1
 An advanced study in architectural technology on a topic approved by the Head of School of Architecture and Planning.

ARCHTECH 772 (10 Points)
Technology Elective 2
 An advanced study in architectural technology on a topic approved by the Head of School of Architecture and Planning.

ARCHTECH 773 (10 Points)
Technology Elective 3
 An advanced study in architectural technology on a topic approved by the Head of School of Architecture and Planning.

Architecture: General

Stage III

ARCHGEN 300 (10 Points)
Design as Research
 An investigation into the nature of the architectural design process, the research process, and the ways in which these two processes may be creatively combined in the context of a Masters level design thesis, in order that the thesis process and thesis outcomes might achieve the expectations associated with a research-based thesis.
Restriction: ARCHGEN 400, 410, 758.400

Stage V

ARCHGEN 590 (20 Points)
Research Report
 A research report on a topic approved by the Head of School of Architecture and Planning.

ARCHGEN 591 (20 Points)
Research Report
 A research report on a topic approved by the Head of School of Architecture and Planning.

ARCHGEN 595 (30 Points)
Dissertation
 A dissertation involving applied research and/or a development project on a topic approved by the Head of School of Architecture and Planning.

Postgraduate Courses

ARCHGEN 700 (10 Points)
Research Process
 An introduction to the research process including: research paradigms and strategies, the identification of research topics and research questions, the review and critique of literature, research methodologies, the structuring of research theses and reports, referencing and the preparation of a bibliography. The focus of the course is on preparing students to undertake their own research projects.
Restriction: ARCHGEN 400, 753.400, 753.600

ARCHGEN 710 (15 Points)
Cultural and Maori Studies Seminar
 Postgraduate seminar topic approved by the Head of the School of Architecture and Planning in the field of Cultural and Maori Studies, with topics that include Pacific, social and/or political contexts as they affect architectural production.

ARCHGEN 720 (15 Points)

Sustainable Design Seminar

Postgraduate seminar topic approved by the Head of the School of Architecture and Planning in the field of sustainable design studies, with topics that include environmentalism, sustainability, and/or eco-technology and address issues ranging from building in extreme climates to global responses towards sustainability to the history of the environmental movement.

ARCHGEN 730 (15 Points)

Urban Design Seminar

Postgraduate seminar topic approved by the Head of the School of Architecture and Planning in the field of urban design studies, with topics that include infrastructure, urban density, urban sprawl, suburbs, urban and settlement history and theory, and urban design methods.

ARCHGEN 740 (15 Points)

Materials and Fabrication Seminar

Postgraduate seminar topic approved by the Head of the School of Architecture and Planning in the field of Materials and Fabrication, with topics that include the study of digital fabrication, timber frame construction, new materials, new tools and techniques, new modes of representation and new software.

ARCHGEN 770 (20 Points)

ARCHGEN 770A (10 Points)

ARCHGEN 770B (10 Points)

Elective Study

Topics approved by the Head of School of Architecture and Planning.

To complete this course students must enrol in ARCHGEN 770 A and B, or ARCHGEN 770

ARCHGEN 793A (60 Points)

ARCHGEN 793B (60 Points)

Thesis

A study of research processes, together with a thesis involving a discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture under the guidance of an appointed supervisor.

Restriction: ARCHGEN 795, 796, 797

To complete this course students must enrol in ARCHGEN 793 A and B

ARCHGEN 795A (45 Points)

ARCHGEN 795B (45 Points)

Thesis

A study of research processes, together with a thesis involving a discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture under the guidance of an appointed supervisor.

Restriction: ARCHGEN 793, 796, 797

To complete this course students must enrol in ARCHGEN 795 A and B

ARCHGEN 798 (40 Points)

ARCHGEN 798A (20 Points)

ARCHGEN 798B (20 Points)

Research Report

A report involving research and application in an architectural subject for the Postgraduate Diploma in Architecture under the guidance of an appointed

supervisor on a topic approved by the Head of School of Architecture and Planning.

Corequisite: ARCHGEN 700

To complete this course students must enrol in ARCHGEN 798 A and B, or ARCHGEN 798

Dance Studies

Stage I

DANCE 101 (15 Points)

DANCE 101G (15 Points)

Introduction to Dance and Creative Processes

To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytical writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. (DANCE 101 not available for BPerfArts – Dance Studies Major; DANCE 101G not available for Bachelor of Performing Arts).

DANCE 107 (15 Points)

Dance History and Contexts

Study of the historical development in western theatre dance from the nineteenth century to the beginning of the twentieth century.

DANCE 110 (15 Points)

Contemporary Dance and Choreography 1

Fine Arts

Stage I

FINEARTS 101 (30 Points)
Studio 1.1

Students will work on a range of 'ideas based' activities that will challenge them progressively to develop and extend their knowledge and skills. These range from short focused projects to those allowing more time for research and personal development. Students will cover a range of the disciplines available in the school and be encouraged to explore in a cross-disciplinary manner.

Corequisite: FINEARTS 103

FINEARTS 102 (30 Points)
Studio 1.2

An extension of projects from FINEARTS 101 Studio 1.1. Students will be encouraged to develop personal creative directions with a focus on experimentation and interdisciplinary art and design outcomes.

Prerequisite: FINEARTS 101
Corequisite: FINEARTS 104

FINEARTS 103 (15 Points)
Drawing and Related Practices

An introduction to different approaches to drawing and its relationship with contemporary practices in art and design. Including traditional approaches to drawing and drawing techniques. Students will also explore drawing as a conceptual process. Research which investigates drawings as both a technical and conceptual practice is encouraged.

Corequisite: FINEARTS 101

FINEARTS 104 (15 Points)
Studio 1: Introduction to Critical Studies

An introduction to some key terms used in the

discussion of contemporary art and design presented and discussed with reference to students' learning in FINEARTS 101 and 102 in particular. This provides both an introduction to contemporary discourses and a means of enabling students to understand such discourses in relation to their own practices.

Corequisite: FINEARTS 101 or 102

FINEARTS 105 (15 Points) **Special Topic**

Stage II

FINEARTS 201 (30 Points) **Studio 2.1**

Provides an understanding of contemporary artistic practice relevant to students' developing artistic interests. Students engage with current art and/or design ideas, methodologies and positions and become experienced in understanding their own practice in relationship to contemporary practices in an increasingly reflexive manner. Consists of the supervised completion of a number of prescribed briefs from which students select.

Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100

Corequisite: FINEARTS 203

FINEARTS 202 (30 Points) **Studio 2.2**

Focuses on the conditions of reception relevant to students' work including: ways meaning is created; how art and/or design works are read; and the significance of presentation strategies. Consists of the supervised completion of longer briefs, of which one is self-generated.

Prerequisite: FINEARTS 201

FINEARTS 203 (15 Points) **Studio 2.3**

Study and exploration through practice of an issue relevant to a discipline or area of contemporary discourse. Students will understand, explore and analyse a selected issue through readings, discussions and production and presentation of studio work.

Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100

Corequisite: FINEARTS 201 or 202

FINEARTS 204 (15 Points) **Studio 2 Critical Studies**

This course presents a range of different modes of cultural production and discusses the relationships of these with studio practices. It extends on the learning in FINEARTS 104 and leads to a more complex understanding of the ways in which art and design is produced and experienced.

Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100

Corequisite: FINEARTS 201 or 202

FINEARTS 205 (15 Points) **Special Topic**

FINEARTS 206 (15 Points) **Fields of Practice 2**

This course allows students to study and explore through practice an issue relevant to a media area, with the aim of encouraging reflexivity in relation to media processes. In this course students will understand, explore and analyse a selected issue through readings, discussions and production and presentation of studio work.

Prerequisite: FINEARTS 101, 102, 103, 104, 201, 203

Corequisite: FINEARTS 202

FINEARTS 210G (15 Points)

Understanding Contemporary Visual Arts Practice

How does the contemporary artist and designer work? This course presents first hand, locally engaged practitioners' perspectives on creative practice. On successful completion of this course students will be able to access local, contemporary art and design with confidence, and to discuss examples of practitioners' methodologies and areas of investigation. Coursework will involve active exploration of the local art world.

Prerequisite: 60 points at Stage I in any subject/s

Stage III

FINEARTS 302 (30 Points) **Studio 3.1**

Builds on the conceptual, material, technical, and contextual work undertaken in Studio 2. Students will explore and develop, through studio activities, a range of methodologies required to generate and sustain an independent practice. Students are required to pursue open-ended exploration and critical analysis within their making and thinking with an emphasis on experimentation and reflexivity.

Prerequisite: FINEARTS 201, 202, 203, 206 or FINEARTS 200

Corequisite: FINEARTS 304

FINEARTS 303 (30 Points) **Studio 3.2**

Extends the self-directed aspect of FINEARTS 301 through work on one or two long-term personal projects. A key focus is the identification of and response to a contextual issue relevant to contemporary art and/or design. Students will begin to develop an understanding of their practice within the context of a wider field of contemporary art and design practices.

Prerequisite: FINEARTS 302, 304

FINEARTS 304 (15 Points) **Studio 3.3**

Builds on the different disciplines or areas of contemporary discourse explored in Studio 2. Students will study issues relevant to their individual practice and analyse, extend and develop an understanding of them through readings, discussions and the production and presentation of studio work.

Prerequisite: FINEARTS 201, 202, 203, 206 or FINEARTS 200

Corequisite: FINEARTS 302 or 303

FINEARTS 305 (15 Points) **Studio 3 Critical Practices**

This course analyses and provides discussion for the different ways in which art and design engage with social structures that, in turn, define creative practices. The course leads to a critical understanding of the insertion of practices into wider fields, which provides students with a means of understanding their studio-based practices in a range of relevant professional contexts.

Prerequisite: FINEARTS 201, 202, 203 or FINEARTS 200

Corequisite: FINEARTS 302 or 303

FINEARTS 306 (15 Points) **Special Topic**

FINEARTS 307 (15 Points) **Fields of Practice 4**

Building on the media areas explored in Studio 2, this course allows students to study and explore an idea or issue in and around an area of contemporary art and/or design discourse. Students will investigate, analyse and develop the selected idea or issue through

readings, discussions alongside the production and presentation of studio work.

Prerequisite: FINEARTS 101, 102, 103, 104, 201, 202, 203, 206, 302, 304

Corequisite: FINEARTS 303

Stage IV

FINEARTS 402 (30 Points) **Studio 4.1**

Places emphasis on students' understanding and articulation of concepts and discourse surrounding their work. Promotes the development of independent artistic and/or design philosophies and their effective use in relation to studio practice.

Prerequisite: FINEARTS 302, 303, 304 and 305 or FINEARTS 300

Corequisite: FINEARTS 403

FINEARTS 403 (30 Points) **Studio 4.2**

Advances students' understanding of the way meaning effects are produced by things done or made and the way they are presented. Develops students' personal methodology through the production of a coherent body of work supported by a considered use of studio research and explorative work.

Prerequisite: FINEARTS 302, 303, 304 and 305 or FINEARTS 300

Corequisite: FINEARTS 402

FINEARTS 404 (30 Points) **Studio 4.3**

Further develops students' understanding and articulation of concepts and discourse surrounding their studio work. Promotes the development of independent artistic and/or design philosophies and their effective use in relation to studio practice.

Prerequisite: FINEARTS 402

Corequisite: FINEARTS 403 or 405

FINEARTS 405 (30 Points) **Studio 4.4**

Directed at the synthesis and refinement of previous studio practice towards the production and presentation of a body of studio work that demonstrates advanced understandings and professional capabilities. Emphasis placed on the development of presentation strategies appropriate to the exhibition and/or professional submission of work.

Prerequisite: FINEARTS 403

Corequisite: FINEARTS 402 or 404

FINEARTS 406 (30 Points) **Special Topic**

A development of Part III Studio courses in selected fields.

FINEARTS 407 (30 Points) **Special Topic**

A development of Part III Studio courses in selected fields.

FINEARTS 408 (60 Points) **Studio 4 A**

This course will assist students to develop their creative practice through the production of a coherent body of studio-based work. This will be supported by considered development of an artistic and/or design philosophy and its effective use in relation to studio practice. The course encourages a solid understanding of presentation strategies appropriate to the exhibition and/or professional presentation of creative work.

Prerequisite: FINEARTS 302, 303, 304, 307

Restriction: FINEARTS 402, 403

FINEARTS 409 (60 Points) **Studio 4 B**

Building on Studio 4A this course will assist students to develop further their creative practice through the production of a coherent body of studio-based work. Students will further develop their understanding and articulation of concepts and discourses relevant to their studio work. The course promotes a reflexive understanding of creative practice and strategies for its professional presentation.

Prerequisite: FINEARTS 100, 101, 102, 103, 104, 201, 202, 203, 206, 302, 303, 304, 307, 408

Restriction: FINEARTS 404, 405

Music Education

Stage I

MUSED 160 (15 Points)

Foundations of Music Education

A conceptual and practical foundation for ongoing work in music education. A survey of the field, the role of the music educator and the meaning and function of music in society. School and other pedagogical contexts are explored. Students are asked to critically reflect on their own musicianship and musical experiences.

Stage II

MUSED 260 (15 Points)

Critical Studies in Music Education

A critical examination of issues and concepts related to the learning and teaching of music. Maori music education, music from a cultural studies perspective and music in the postmodern condition. The impact of music technologies on education and the preparation of curriculum materials within the framework of the New Zealand Arts Curriculum. Practical considerations in relation to these theories.

Prerequisite: MUSED 160

MUSED 261 (15 Points)

Music Education Practicum Project

Students undertake investigations of music education practice. Various aspects of learning and teaching music in action are considered: planning and lesson design, teaching strategies, educational contexts, methodologies, assessment and evaluation. A range of situations are explored including private, community and school music teaching.

Prerequisite: MUSED 160 or Departmental approval

Stage III

MUSED 360 (15 Points)

Music Education Research

Current research in the fields of social psychology and the philosophy of music education and an introduction to music education research methodologies. Students undertake their own fieldwork in schools and the community, in which this knowledge is applied.

Prerequisite: MUSED 260 or MUSIC 262

MUSED 361 (15 Points)

Music Education Leadership Project

Students prepare and implement a leadership project in music education. The project involves planning, organisation, teaching and, if appropriate, performing and sharing of outcomes. Project outcomes are reflected on and evaluated.

Prerequisite: 30 points in Music Education or Departmental approval

MUSED 366 (15 Points)**Performance Practices and Analysis in Music Education**

Provides students with an opportunity to develop experience in a selected group of musical genres and practices in a school context. Contemporary, Māori and Pacific music are examined along with the formation of active performance groups. Students arrange and lead their own performance project using music technology where applicable.

Prerequisite: MUSED 260 or 261

Postgraduate Courses**MUSED 701 (30 Points)****Music Education**

An examination at advanced level of the historical, philosophical and psychological foundations of music education, together with an examination of recent theories and writings in educational thought and their implications for music education.

Prerequisite: MUSED 360, 366, or Departmental approval

MUSED 702 (30 Points)**Music Education Research Project**

An introduction to methodologies of research relevant to music education, and a supervised project investigating research in some area of the field.

Prerequisite: MUSED 360, 366, or Departmental approval

Sound Recording and Design

Postgraduate Courses

SOUND 702 (15 Points)

Live Recording Research and Practice

The construction of electronic and electro-acoustic systems, microphone design, application and placement; engineering suitable systems for live studio and 'in concert' recording. Particular emphasis on acoustic instruments/ensemble recording.

SOUND 703 (15 Points)

Physical and Cognitive Sound

The application of physical acoustic sound properties to the recording process, the physiology and functioning of the ear, aural cognition and human perception, and sound processing as these affect the production and recording process. Audience preferences in live and recorded sound.

SOUND 706 (15 Points)

Sound Design

The application of technological music skills to a range of media. The selection, preparation and integration of electronic or electro-acoustic sounds into live drama, video, film, web sites etc, as background music, sound effects or other component parts of multimedia productions or installations. Introduction to aesthetic considerations for sound design and to technological methodologies such as surround format and audio/video synchronisation.

SOUND 707 (15 Points)

Acoustics for Recording

Study of the behaviour of sound in an enclosed space. Moves progressively towards research, analysis of design criteria and the engineering of appropriate acoustic environments. The primary focus is on recording studios and control rooms. The practical testing of acoustic spaces and electronic systems

is covered, as are certain aspects of budgeting for recording studio construction.

SOUND 710 (15 Points)

Research in Sound

Guided research in a topic chosen with approval of the academic supervisor. Assessed work may be academic, technical or creative.

SOUND 712 (15 Points)

SOUND 713 (15 Points)

Special Topic

SOUND 715 (15 Points)

Creative Sound Design and Installation

The creation and application of electronic and electro-acoustic music in multi-media projects and/or installations. The creation of effective sound environments. The collaborative use of sound design to supplement installations in other media and the creation of interactive sound sculptures whether real or virtual.

SOUND 791A (15 Points)

SOUND 791B (15 Points)

Professional Practice and Research

An audio engineering research course, in which an investigation into professional, technological or industrial issues is conducted through practical experience in a professional/industrial setting. With approval of the coordinator and subject to availability of suitable placement, this course may include placement and internship in practical settings throughout New Zealand. Professional practice is to be complemented by written work presenting theoretical and technical insights based on the work undertaken. Students considering enrolling for this course must obtain prior departmental approval.

To complete this course students must enrol in SOUND 791 A and B

SOUND 793A (15 Points)

SOUND 793B (15 Points)

Academic research project in areas of sound recording or design. Developed in consultation with the academic supervisor and approved by the programme coordinator.

To complete this course students must enrol in SOUND 796 A and B

Urban Design

Postgraduate Courses

URBDES 700 (10 Points)

Sustainable Development

A critical exploration of the concepts, principles and indicators of sustainable urban development.

URBDES 701 (10 Points)

Urban Development Processes

An overview of urban development processes in New Zealand and around the world.

URBDES 702 (15 Points)**Urban Design Theory and Practice**

The language of urban design, urban analysis, urban history, contemporary theory, international and local practice, allied disciplines, cities in the developing world and pacific urbanism.

Restriction: ARCHHTC 700

URBDES 704 (15 Points)**Urban Development Processes**

An overview of urban development processes in New Zealand and around the world.

Restriction: PROPERTY 784, URBDES 701

URBDES 710 (30 Points)**Urban Design Studio 1**

Foundation urban design studio.

URBDES 720 (30 Points)**Urban Design Studio 2**

Development urban design studio.

URBDES 730 (30 Points)**Urban Design Research Project**

Individual research project in an aspect of urban design theory or practice.

Visual Arts**Stage I****VISARTS 151 (15 Points)****Contextual Studies 1A**

An introduction to some key terms used in the discussion of contemporary art and applied media practices. Provides an opportunity to explore the contexts of contemporary creative practices and their connection to a range of relevant other academic disciplines. The course will be delivered so as to link with students' studio practice and their learning in VISARTS 171.

VISARTS 152 (15 Points)**Contextual Studies 1B**

An extension of VISARTS 151 Contextual Studies 1A. Students will be encouraged to investigate critically some of the key concepts used in the discussion of contemporary art and applied media practices. In addition to continuing to provide an introduction to contemporary discourses the course will encourage and enable students to understand such discourses in relation to their own practices.

VISARTS 161 (15 Points)**Drawing 1A**

An introduction to different approaches to drawing and their relationship to contemporary practices in art and applied media. Develops skills in visualisation, exploration, interpretation and communication of ideas through drawing in relation to given topics. In addition to traditional and experimental drawing techniques students will be encouraged to explore drawing as a conceptual process.

VISARTS 162 (15 Points)**Drawing 1B**

An extension of VISARTS 161 Drawing 1A. The course expands on the exploration and practice of a diverse range of drawing methodologies by focusing on ideas-driven approaches to drawing and their relationship to contemporary art and applied media. In addition to traditional and experimental drawing techniques

students will be encouraged to explore drawing as a conceptual process.

VISARTS 171 (30 Points)**Studio 1A**

Students will work on a range of activities that will establish the core languages of the study and practice of contemporary practices in art and applied media. These will challenge them progressively to develop their knowledge and skills. Students will cover a range of areas of practice relevant to contemporary art and design with an emphasis on experimentation.

VISARTS 172 (30 Points)**Studio 1B**

An extension of VISARTS 171. Students continue to work on a range of activities that establish the core languages of the study and practice of contemporary practices in art and applied media. An independent project with outcomes that build on students' learning during the year is developed. Students develop this project from a conceptual and critical base and with interdisciplinary outcomes.

Stage II**VISARTS 251 (15 Points)****Contextual Studies 2**

Selected topics of relevance to aspects of contemporary practices and theories of visual arts and applied media. Students will be encouraged to investigate those topics critically to develop a fuller understanding of the contexts of contemporary art, applied media and related fields. Encourages and enables students to understand such discourses in relation to their own practices and to recognise contexts of potential connection.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 261 (15 Points)**Drawing 2A**

A programme of drawing study and practice that is oriented toward the development of drawing as an ideas-based and ideas-generating resource for studio outcomes. The course is delivered through directed briefs that give students the opportunity to extend their knowledge and practice of drawing.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 262 (15 Points)**Drawing 2B**

A programme of drawing study and practice that is oriented toward the development and consolidation of drawing as a means of supporting and expanding outcomes in studio practice. The course is delivered through directed briefs that give students the opportunity to extend their knowledge and practice of drawing.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 271 (10 Points)**Studio Practice 2A**

This course enables students to develop technical skills in selected areas of studio practice in art and applied media. The course allows for students to develop areas of practice that extend and/or complement their studio practice in VISARTS 273.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 272 (10 Points)**Studio Practice 2B**

This course enables students to develop additional technical skills in selected areas of studio practice in art and applied media to those offered in VISARTS

271. The course allows for students to develop areas of practice that extend and/or complement their studio practice in VISARTS 274.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 273 (20 Points) **Studio 2A**

This course provides an understanding of contemporary practices in art and applied media relevant to students' developing studio practice interests. Students will engage with current methodologies, ideas and practical issues and become experienced in understanding their interests in a reflexive manner. Consists of the supervised completion of prescribed briefs.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 274 (20 Points) **Studio 2B**

This course provides an extended understanding of contemporary practices in art and applied media relevant to students' developing studio practice interests. Students will engage with current methodologies, ideas and practical issues and become more experienced in understanding their interests in an increasingly reflexive manner. Consists of the supervised completion of prescribed briefs with students encouraged to adopt an increasingly independent position.

Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 275 (15 Points) **Studio Special Topic 2A**

A development of Part I Studio courses in selected fields.

Stage III

VISARTS 351 (15 Points) **Contextual Studies 3**

A readings-based programme emphasising a critical engagement with contemporary and historic visual arts, applied media and other relevant theories and ideas. Drawn from a range of textual sources, it encourages students to engage with a variety of texts before enabling them to develop individualised reading programmes that complement their studies in VISARTS 372.

Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 361 (15 Points) **Drawing 3A**

A development of VISARTS 262, students are encouraged to advance media and conceptual skills in drawing relevant to their developing studio interests. Consists of the supervised completion of an extended brief that gives students the opportunity to experiment with and develop drawing and drawing-related outcomes that realise an independent position.

Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 362 (15 Points) **Drawing 3B**

The refinement of media and conceptual skills and knowledge towards the development of an independent drawing practice. Through supported critical supervision in studio, students are encouraged to initiate, develop and realise a body of drawing and drawing-related outcomes. The course develops understandings of appropriate modes of exhibition and/or professional submission of those outcomes.

Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 371 (30 Points) **Studio 3A**

A development of VISARTS 274, students are

encouraged to advance media and conceptual skills in art and applied media studios relevant to their studio practice interests. Consists of the supervised completion of an extended brief that gives students the opportunity to develop studio outcomes that realise an independent position.

Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 372 (30 Points) **Studio 3B**

Through supported critical supervision in studio, students are encouraged to initiate, develop and realise a body of studio work that supports the development of an independent studio practice. Develops understandings of appropriate modes of exhibition and/or professional submission of that work. It also encourages students to understand their work in relation to the context of a wider field of contemporary art and applied media practices.

Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 373 (15 Points) **Studio Special Topic 3A**

A development of Part II Studio courses in selected fields.

Stage IV

VISARTS 471 (60 Points) **Studio 4A**

Facilitated studio and contextual research project, oriented towards personalised studio outcomes in art and/or applied media. Students are encouraged to experiment with methodologies and ideas relevant to their field of inquiry in a manner that develops knowledge and skills that establish their independent practice. Establishes a sound understanding of an area or areas of practice and relevant contexts that may be extended in VISARTS 472.

Prerequisite: VISARTS 351, 361, 362, 371, 372

VISARTS 472 (60 Points) **Studio 4B**

Facilitated studio and contextual research, oriented to the refinement of technical and conceptual skills and knowledge relevant to the realisation of a coherent outcome or set of outcomes resulting from studio-based independent research. A development of the research project initiated in VISARTS 471, emphasis will be given to the development of presentation strategies appropriate to the exhibition and/or professional submission of the outcomes of studio research.

Prerequisite: VISARTS 351, 361, 362, 371, 372, 471

Disability Studies

Stage I

DISABLT 110 (15 Points) **Introduction to Intellectual Disability**

An overview of the characteristics of people with an intellectual disability. Covers definition, assessment and classification systems, etiology, and educational, social, behavioural and medical services. Discusses the physiological, psychological, sociological, and educational implications of having an intellectual disability. Current trends in care, education and habilitation will be examined from both descriptive and best practice perspectives.

DISABLT 111 (15 Points) **Disability and Support**

Examines key perspectives and influences found in support for disabled people. The role of staff and services is critically analysed in light of concepts such as, autonomy, choice and self-determination. Alongside these, practice for supported living and transition to employment and continuing education are examined.

DISABLT 112 (15 Points) **Theories of Disability**

Introduces the way in which society defines and constructs disability. A range of discourses and cultural understandings related to disability are examined. The historical development of social understandings and accounts of the lived experience of disability are examined.

Prerequisite: SOCWORK 112

Restriction: ACE 962.601

DISABLT 113G (15 Points) **Making Disabilities: The Construction of Ideas**

Examines the expression of social and cultural ideas

of disability in popular culture through film, television and print media. The course aims to develop skills to examine the construction and maintenance of concepts of disability and disabling identities in popular culture. The consequences of these processes are also discussed and their implications for perpetuating social devaluation, discrimination, and disadvantage.

Stage II

DISABLT 210 (15 Points) **Intellectual Disability and ABA**

An introduction to the principles of applied behaviour analysis and its benefits for people with intellectual disabilities. Students will learn skills in the development and evaluation of behaviour change programs, and behaviour change issues such as generalisation, maintenance and self-management. A major component of the course will be the development, implementation and evaluation of a behaviour change project.

Prerequisite: Any 30 points passed from the BHumServ Schedule

DISABLT 230 (15 Points) **Positive Behaviour Support**

An introduction to critical features of positive behaviour support which have emerged from applied behaviour analysis with a focus on community participation, and person-centred values. Assists students to examine assumptions about behaviour, undertake problem identification and functional assessment, and design and evaluate behaviour plans in relation to community settings.

Prerequisite: Any 30 points passed from the BHumServ Schedule

Restriction: ACE 560.708, EDSPEC 230

Education

Stage I

EDUC 113 (15 Points)

Current Issues in Education

Educational issues are pressing concerns in our society. The course will help develop understanding of the background of today's public debates around schooling and will introduce ways in which educational thought and research address big topics.

EDUC 114 (15 Points)

Introduction to Māori Education

An introduction to Māori education and to the education of Māori in Aotearoa. A range of critical issues related to Māori experiences both in and as a result of schooling and education in Aotearoa, and Māori educational interventions that have emerged, are examined.

Restriction: EDUC 103, EDPROFST 100

EDUC 115 (15 Points)

Introduction to Child and Adolescent Development

Study of factors influencing children's development and socialisation within the culturally and linguistically diverse context of New Zealand. Research from developmental psychology and from family and parenting will be drawn upon to explore physical, emotional, social, cognitive and language development during childhood and adolescence.

EDUC 116 (15 Points)

Introduction to Educational Thought

Why do we go to school? What is the purpose of schooling in society and do good grades translate into good jobs? An introduction to the study of education from sociological, historical and philosophical perspectives with reference to the forces that have shaped the development of education, especially in New Zealand. Understanding social inequalities in education relating to ethnicity, gender and class form a central concern of this course.

EDUC 117 (15 Points)

Teaching and Learning: An Educational Psychological Perspective

Includes an examination of core aspects of educational psychology that include thinking, learning, and behaving. An analysis of relevant theory and research within psychology in education: topics include behaviour analysis, measurement and assessment, cognition, socialisation, and individual differences. Students will explore these in relation to different educational settings and contexts, for example, culture, community, school, and classroom.

Restriction: ACE 903.501, EDUC 111, 112, 140, EDUCUM 140

EDUC 119 (15 Points)

Development, Learning and Teaching

Presents an introduction to developmental and psychological theory and research and its application to teaching and learning within a variety of educational settings. Understandings for creating effective learning environments which foster high levels of motivation for all learners will be identified through an exploration of typical and atypical development; and behavioural, cognitive, constructivist and social approaches to teaching and learning.

EDUC 120G (15 Points)

Education, Knowledge and Society

Examines how philosophical thought has constructed models of knowledge which in turn inform approaches to teaching and learning. Educational implications of developments in the theory of knowledge are also examined. The changing conceptions of the nature and purpose of education are investigated with reference to education for Māori and Pacific communities.

EDUC 121 (15 Points)

EDUC 121G (15 Points)

How People Learn

Focuses on learning in formal and informal settings and addresses such questions as: why do some things seem easier to learn than others, why do we forget things we once knew, and why do some people learn faster or better than others? It also examines the nature of intelligence and how to help personal learning or the learning of others.

Restriction: EDUC 111

EDUC 122 (15 Points)

EDUC 122G (15 Points)

Learning Sexualities

How and what do we learn about sexualities in New Zealand? Learning about sexualities is viewed as occurring both formally (eg, through sexuality education) and informally (eg, through the media) in a diversity of social sites. Schools are examined as one significant site where students are offered sexual meanings. The historical derivation and current context of contemporary education about sexuality along with its social effects are investigated.

Restriction: ACE 535.507

EDUC 130 (15 Points)
Philosophy of Education

An introduction to relevant philosophical schools of thought including elements of philosophical reasoning in Western and other cultural contexts. Focus will be on the philosophy of education and its purpose in achieving excellence in education.

Prerequisite: Student must be enrolled in BEd(TESOL)

EDUC 131 (15 Points)
Human Development

Designed to help students analyse human development with particular emphasis on secondary school-age children. It will be concerned with the development of knowledge of constancy, change and individual differences as a perspective on all aspects of development. As a consequence, students will be able to interact effectively with a diverse group of children in a wide range of educational settings.

Prerequisite: Student must be enrolled in BEd(TESOL)

EDUC 132 (15 Points)
Learning and the Learner

Learning is examined from a variety of perspectives including behaviourism, social learning theory, cognitivism, constructivism, as well as humanistic approaches to learning. Within this learning theory framework, consideration is given to how learners construct knowledge and how teachers can assist them to become self-motivated, self-regulated and independent in their learning. Attention is paid to the development of thinking skills, including the ability to think about one's own thinking (metacognition), and development of creative problem-solving skills.

Prerequisite: Student must be enrolled in BEd(TESOL)

EDCURSEC 660 (30 Points) **English for Teaching 2**

Enhances the integration of disciplinary-based content knowledge and scholarship with the knowledge, skills and attitudes associated with planning, teaching and assessing for diverse learners of English. Addresses questions such as: What do teachers need to know to assess English effectively? What difficulties do students commonly face? How do we determine and monitor success?

Prerequisite: EDCURSEC 659

Restriction: EDCURSEC 656, 657, 658, EDCURR 603, 626, ACE 720.751, 720.752, 720.753

EDCURSEC 661 (15 Points) **Drama within English Education**

Develops the pedagogical content knowledge, skills and attitudes associated with planning, teaching and assessing Drama within English. Addresses questions such as: Why is this subject important? What are the important principles, concepts and skills in this subject? How can diverse needs of students be addressed? How do teachers plan lessons? What teaching methodologies, management strategies and resources maximise success?

Corequisite: EDCURSEC 656, 657

Restriction: ACE 720.758, EDCURSEC 651, 652

EDCURSEC 662 (15 Points) **Senior Media Studies**

Develops the pedagogical content knowledge, skills and attitudes associated with planning, teaching and assessing Media Studies. Addresses questions such as: What are the important principles, concepts and skills for teaching the senior curriculum? How are senior curriculum units and programmes planned using national qualification assessment requirements? What teaching methodologies and management strategies maximise student success? How is student success determined?

Restriction: EDCURSEC 663, 664, EDCURR 632, 682, ACE 720.756

EDCURSEC 663 (15 Points) **Teaching Media Studies 1**

Integrates disciplinary-based content knowledge and scholarship with developing the knowledge, skills and understandings associated with planning, teaching and assessing diverse learners in Media Studies at years 12 and 13. Addresses questions such as: What do teachers need to know to teach and assess for national qualifications? What strategies and resources maximise motivation and learning in Media Studies?

Restriction: EDCURR 632, 682, ACE 720.756, EDCURSEC 662

EDCURSEC 664 (15 Points) **Teaching Media Studies 2**

Enhances the integration of disciplinary-based content knowledge and scholarship with the knowledge, skills and understandings associated with planning, teaching and assessing diverse learners in Media Studies. Addresses questions such as: How do teachers

structure programmes for students years 9-13 in Media Studies? What knowledge, skills and understandings are central to this subject? How do teachers determine and monitor success?

Prerequisite: EDCURSEC 663

Restriction: EDCURSEC 662, EDCURR 632, 682, ACE 720.756

EDCURSEC 665 (15 Points) **Teaching ESSOL 1**

Develops the pedagogical content knowledge, skills and attitudes associated with planning, teaching and assessing ESSOL. Addresses questions such as: Why is this subject important? What are the important principles, concepts and skills in this subject? How can the diverse needs of students be addressed? How do teachers plan lessons? What teaching methodologies, management strategies and resources maximise success?

Restriction: EDCURR 627, ACE 720.761

EDCURSEC 666 (15 Points) **Teaching ESSOL 2**

Develops the pedagogical content knowledge, skills and attitudes associated with planning, teaching and assessing ESSOL. Addresses questions such as: How are units and programmes planned using the curriculum and national assessment requirements? How is success determined for the beginning stages of high stakes assessment?

Prerequisite: EDCURSEC 665

Restriction: EDCURR 627, ACE 720.762

EDCURSEC 667A (15 Points)

EDCURSEC 667B (15 Points)

Teaching Languages

Addresses the methodologies for teaching languages by developing the knowledge, skills and attitudes associated with planning, teaching and assessing Languages. Addresses questions such as: Why is language learning important? What do teachers need to know to teach languages effectively? What strategies and resources maximise student motivation and language acquisition when learning a language?

Restriction: EDCURR 665, 678, 680, ACE 720.765, 720.766

To complete this course students must enrol in EDCURSEC 667 A and B

EDCURSEC 668A (7.5 Points)

EDCURSEC 668B (7.5 Points)

Teaching Chinese

Integrates content knowledge and scholarship with the knowledge, skills and attitudes associated with planning, teaching and assessing Chinese. Addresses questions such as: Why is it important to learn Chinese? What do teachers need to know to teach Chinese effectively? What strategies and resources maximise motivation and language acquisition in learning Chinese?

Corequisite: EDCURSEC 667

Restriction: EDCURR 601, 623, 649, 663, ACE 720.767C

Visual Arts in the Early Years

Develops fundamental knowledge, skills and attitudes associated with planning teaching and assessing children's visual arts learning in early childhood. Addresses questions such as: Why is visual arts important to children's learning? What are effective design features of quality learning experiences that encourage individual responses from a diverse range of learners? How do we assess for children's learning?

Restriction: ACE 922.624

EDCURRIC 130 (15 Points)

Physical Education Practice 1

Introduces students to the practical foundations of physical education. Involves experiential learning including residential field-based experiences. Addresses such questions as: How do I perform selected physical activities, improve my technical knowledge of the competencies required in the selected activities, analyse selected movements and provide feedback to others?

Restriction: ACE 923.555

EDCURRIC 131 (15 Points)

Physical Education Practice 2

Develops students' competency and knowledge about the physical foundations of physical education. Emphasis is placed on experiential learning. Addresses such questions as: Do I have the knowledge and competence: to be able to perform selected physical activities, to apply appropriate technical knowledge to specific physical activities, and to analyse selected movements and provide feedback?

Prerequisite: EDCURRIC 130

EDCURRIC 132 (15 Points)

Bio-Physical Foundations of Health and Physical Education

Introduces students to the anatomical and physiological foundations of Health and Physical Education with particular reference to the roles of body systems in human movement. Addresses such questions as: What roles do the musculo-skeletal systems play in movement and learning? How do the circulo-respiratory systems work during rest and activity? How do the neuro-muscular systems function to produce movement?

Restriction: ACE 923.553, 923.554

EDCURRIC 133 (15 Points)

Concepts Underpinning Skilled Movement

Introduces students to the bio-physical foundations of Health and Physical Education including the roles of skill acquisition and bio-mechanics in physical education contexts. Addresses such questions as: How can knowledge of the internal and external mechanics

be applied to understand human movement? What is skill and how do people learn motor skills?

Restriction: 923.553, 923.554

EDCURRIC 134 (15 Points)

Expressive Movement and Physical Education

Develops an understanding of purposeful expressive physical activity that embraces aesthetic and inherent cultural values in learning dance and te ao kori. Addresses such questions as: What knowledge do teachers need in a range of aesthetic and bicultural physical education contexts to develop this work in schools? What choreographic skills are needed for devising aesthetic movement compositions?

Restriction: ACE 923.559

EDCURRIC 135 (15 Points)

EDCURRIC 303 (15 Points) **Scientific and Technological Literacies: Primary**

Develops a critical view of scientific and technological literacies and an understanding of their inter-relationship within a range of learning environments. Asks questions such as: What are scientific and technological literacies? What do teachers need to know to be scientifically and technologically literate? How can teachers develop a quality science/technology learning environment?

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 307 (15 Points) **Junior Primary**

Investigates quality teaching and learning across the curriculum for learners in years 0-3. Addresses questions such as: What constitutes effective teaching for diverse learners at these levels? How can curriculum be integrated at this level and how can the effectiveness of this integration be monitored?

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 308 (15 Points) **Middle Primary**

Investigates quality teaching and learning across the curriculum for learners in years 4-6. Addresses questions such as: What constitutes effective teaching for diverse learners at these levels? How can curriculum be integrated at this level and how can the effectiveness of this integration be monitored?

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 309 (15 Points) **Senior Primary**

Investigates quality teaching and learning across the curriculum for learners in years 7-8. Addresses questions such as: What constitutes effective teaching

for diverse learners at these levels? How can curriculum be integrated at this level and how can the effectiveness of this integration be monitored?

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 310 (15 Points) **Pasifika Learners**

Examines what helps Pasifika learners to succeed in New Zealand education. Addresses questions such as: Who are Pasifika learners? How is Pasifika success addressed in classrooms/centres? How can the study of Pasifika learners help promote effective teaching in multiethnic primary and intermediate schools in New Zealand?

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 311 (15 Points) **Junior Primary Pasifika Focus**

Focuses on the teaching of the NZ curriculum framework in years 0-3 with particular attention to Pasifika learners. Addresses questions such as: What do teachers need to know to teach the curriculum effectively with Pasifika children in years 0-3? What teaching approaches and resources maximise Pasifika student success in years 0-3?

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 312 (15 Points) **Middle and Senior Primary Pasifika Focus**

Examines principles and practices of excellent teaching in years 4-8, with particular attention to Pasifika student success. Addresses questions such as: What do teachers need to know and utilise in classroom practices to teach the curriculum effectively with Pasifika children in years 4-8? Also addresses the wider context of excellent teaching in multiethnic schools.

Prerequisite: At least 225 points passed in the BEd(Tchg)

EDCURRIC 313 (15 Points) **Play and Pedagogy**

Social Work Practice Theories

An introduction to a range of theories and models of practice in social work and their application to a variety of social work settings, including an exploration of personal and professional values within the framework of relevant codes of ethics, cultural practice and the importance of professional supervision. To be studied concurrently with SOCWORK 213.

Corequisite: SOCWORK 213

Restriction: ACE 990.503

SOCWORK 216 (15 Points)

Law and the State in Social Work

A sociological exploration of the issues presented by the legal framework that impact on social workers' mandate to practise. A critical investigation of the state's law-making functions and conflicting imperatives across a range of social work fields, including the family, justice, and mental health.

Restriction: ACE 991.602

Stage III

SOCWORK 300 (15 Points)

Professional Supervision

An introduction to the concept, role, purpose and benefits of supervision in a wide range of professions. The rationale for supervision within professional and organisational contexts in health, education and human services, with reference to the ethical requirements will be examined.

Restriction: ACE 791.705

SOCWORK 301 (15 Points)

Supervision in Social Work

An introduction to the theory and practice of professional supervision in social work, including an examination of the organisational culture of social work agencies. Topics will include the mandate for supervision, the ethical requirements of supervision practice, and the skills for reflective supervision relationships.

Restriction: ACE 790.700

SOCWORK 302 (15 Points)

Approaches to Supervision

The integration of knowledge, skills and values of supervision into anti-oppressive professional practice. A range of approaches to supervision will explore modes and styles of supervision for health, education and human services contexts.

Prerequisite: SOCWORK 300 or 301

Restriction: ACE 790.701

SOCWORK 303 (15 Points)

Management in Human Services

Key issues in front-line management in health, social and human services settings. Examines professional identity, personal values and agency requirements and management practice. The responsibilities of services

regarding the Treaty of Waitangi, equal opportunities and other relevant legislation will be examined.

Restriction: ACE 790.702

SOCWORK 304 (15 Points)

Managing and Developing Performance

Effective management and performance development of professional staff in the human services. Topics include key components of an effective management system, including recruitment and selection, induction and orientation, supervision, performance planning, coaching, training and development, addressing unsatisfactory performance, and staff care strategies.

Restriction: ACE 790.704

SOCWORK 305 (15 Points)

Supervision in Child Protection

A critical examination of the impact and influence of professionally dangerous dynamics on child protection practice with families/whānau, in supervision, and within agency and interagency collaboration. A range of theoretical perspectives explaining dangerous dynamics will be explored. Examines strategies to resolve dangerous dynamics with child protection practice.

Restriction: ACE 790.705

SOCWORK 306 (15 Points)

Supervising Students on Placement

An exploration of the skills, knowledge and dispositions required for effective and high quality field placements for students in social and human services. Topics will include teaching and learning in field education, designing learning experiences, teaching critical thinking for professional practice.

Restriction: ACE 790.706

SOCWORK 308 (15 Points)

Research in Professional Supervision

Research and evaluation skills for professional staff in a range of human services agencies. Topics will include research and evaluation, design and methods and the development of a small personal research project related to current student professional work. The ethical imperative for research informing professional practice will be examined.

Restriction: ACE 791.700

SOCWORK 309 (15 Points)

Research Essay GradCertProfSup

A research essay will normally consist of either an in-depth, critical review of the literature in one area of professional supervision, staff development or professional leadership, or a detailed formal report of research undertaken by the student.

Prerequisite: SOCWORK 308

SOCWORK 310 (15 Points)

Special Topic

SOCWORK 311 (15 Points)

Social Work Approaches and Interventions

An examination of a range of social work methods and theories, including community work, cultural and indigenous models of practice, that enable students to develop their individual practice approach. The opportunity to develop skills for intervention strategies in workshop settings will be given.

Prerequisite: SOCWORK 214

Restriction: ACE 990.603

SOCWORK 312 (15 Points)

Applied Social Research

Social workers are reclaiming the research agenda in social work. Sound social work practice relies on evidence to inform theoretical frameworks, intervention decisions and practice evaluation. A practical introduction to the principles, theories and approaches that inform social research, with a particular emphasis on social work contexts.

Prerequisite: SOCWORK 112

Restriction: ACE 990.605

SOCWORK 315 (15 Points)

Organisations and Management

Examines the variety of organisational frameworks from which human services are practised and the impact of these contexts on professional identity and practice in the workplace. Contemporary management approaches will be examined with reference to theory and roles and responsibilities assumed by human service managers in a complex and dynamic environment.

Prerequisite: SOCWORK 211

Restriction: ACE 991.601

SOCWORK 316 (45 Points)

Professional Practice Portfolio

This course requires students to demonstrate through portfolio compilation and verbal presentation their competency and professional identity, applicable to their current field of social activity. A critical evaluation of practice approach through discussion of favoured models of practice, application of these to practice situations, values, skills, political perspective and commitment to accountability.

SOCWORK 317 (30 Points)

Supervised Field Practice and Professional Development 1

A practicum course which focuses on developing a professional identity and a philosophy of practice that is shaped by integrating personal experience and professional knowledge, values and skills gained from the first two years of the Bachelor of Social Work programme. A significant part of this course includes a period of 12 weeks supervised agency-based practical experience for which the student will be prepared through developing individual learning goals.

Prerequisite: SOCWORK 213, 214

Restriction: ACE 990.501

SOCWORK 351 (15 Points)

Working with Pasifika Communities

Pasifika organisations working with Pasifika communities in Aotearoa is a relatively new phenomenon. This course seeks to navigate "Pasifika waves" that embrace traditional and contemporary notions of working with Pasifika Nations.

SOCWORK 353 (15 Points)

Counselling in Social Practice

An exploration of theories and models of practice in counselling in social services settings. Includes preparation for work with individuals and whānau in a range of settings and with clients from different social and cultural backgrounds.

Restriction: ACE 992.705

SOCWORK 356 (15 Points)

Community Development

An in-depth examination of the historical and theoretical framework of community development and community work with reference to strategies for the development of diverse and indigenous communities. Skills, strategies and models of community work,

advocacy, networking and development work are explored.

Prerequisite: Any 60 points passed at Stage II

Restriction: ACE 990.608, 991.603

SOCWORK 383 (15 Points)
Special Topic

Stage IV

SOCWORK 411 (15 Points)

Social Work Interventions for Best Practice

An in-depth examination of contemporary issues in social work practice, focusing on evidence-based practice and intervention skills that have direct application to complex practice situations.

Prerequisite: SOCWORK 311

Restriction: ACE 990.703

SOCWORK 413 (15 Points)

The Social Work Discourse

The application of sociological analysis to consideration of the role and characteristics of social work practice. An exploration of the professional discourse is framed and how major social trends impact on that discourse in practice and the public domain.

Prerequisite: SOCWORK 112

Restriction: ACE 990.704

SOCWORK 414 (15 Points)

Research and Evaluation in Social Practice

An exploration of relevant social work research literature and formulation of a research or service evaluation proposal. Develops confidence and skills in the application of research principles, the design and implementation and critique of research strategies and the utilisation of research outcomes in the articulation of professional practice in social work and social services.

Prerequisite: SOCWORK 312

SOCWORK 415 (30 Points)

Supervised Field Practice and Professional Development 2

An advanced practicum course which provides an exposition of the relationship between critical reflection, professional supervision and ethical practice to the knowledge, skills and practice experience of the social work profession. A period of 16 weeks supervised agency-based practical experience is included in this course that builds on participant knowledge and skills.

Prerequisite: SOCWORK 317

Restriction: ACE 990.601

SOCWORK 416 (45 Points)

Professional Practice Project

A student directed project intended to develop a field of proficiency applicable to current or future professional interests. The project will involve research investigation, critical reflection and analysis, evaluation, and the preparation of resources or development of new practice. On completion students will showcase their project in a verbal presentation.

SOCWORK 484 (15 Points)
Special Topic

Postgraduate Courses

SOCWORK 711 (15 Points)

Social Work Interventions for Best Practice

An in-depth examination of contemporary developments in social work practice, with an emphasis on the

employment of evidence-informed interventions that have direct application to complex practice situations.

Prerequisite: SOCWORK 311

Restriction: ACE 990.703, SOCWORK 411

SOCWORK 713 (15 Points)

The Social Work Discourse

A critical analysis of contemporary social work practice, utilising sociological perspectives and contemporary social theory. An in-depth exploration of how the professional discourse of social work is framed and how major social trends impact on that discourse in practice and the public domain.

Restriction: ACE 990.704, SOCWORK 413

SOCWORK 714A (22.5 Points)

SOCWORK 714B (22.5 Points)

Social Work Honours Research Project

An exploration of relevant social work research literature and design, leading to limited implementation of a research or service evaluation. Students will critically apply research and practice principles to problem definition, literature review, research strategies and design, to pilot a small supervised evaluation, culminating in a research project report.

Prerequisite: SOCWORK 312

To complete this course students must enrol in SOCWORK 714 A and B

SOCWORK 715 (30 Points)

Supervised Field Practice and Professional Development

An advanced practicum course which includes a critical interrogation of the relationships between critical reflection, professional supervision and ethics and their application to professional social work practice. This course includes a minimum of 65 days supervised agency-based practical experience, building on the knowledge and skills gained in the first practicum and subsequent coursework.

Prerequisite: SOCWORK 317

Restriction: ACE 990.601, SOCWORK 415

SOCWORK 716 (30 Points)

Practice Case Studies

A student directed project intended to enhance proficiency in advanced practice applicable to current or future professional interests. The project will involve review of literature, critical reflection and analysis, evaluation, the exploration of narrative reports and the preparation of case studies. On completion students will showcase their project in a verbal presentation.

Prerequisite: SOCWORK 316

SOCWORK 750 (15 Points)

Practice Research: Conduct, Utilisation and Dissemination

An in-depth examination of the development of evidence-informed practice exploring approaches to research in and for practice and the management of knowledge. The essential skills of scholarship and reflective social work practice are explored.

SOCWORK 751 (15 Points)

Interpersonal and Family Violence

An in-depth examination of theoretical, cultural and practice perspectives on interpersonal violence with consideration of local, national and global issues. Examines education, screening, risk assessment and interventions with individuals and families. Organisational responses and leadership in health services and the community are explored.

SOCWORK 752 (15 Points) **Issues in Clinical Practice**

An in-depth examination of theoretical and cultural perspectives in a range of fields within health social work. Content will include contemporary literature and research on assessments and interventions that can assist adults and children experiencing grief, loss and change through the lifespan and the impact of major change in social circumstances on health and wellbeing.

Social Work Child and Family Practice

Stage II

SOCCHFAM 215 (15 Points) **Whānau-Family-Aiga Practice**

An exploration of the structural, emotional, social and cultural dimensions of families encompassing the relevance of cultural knowledge and appropriate interventions in diverse family practice and examination of the significance and impact on social issues on whānau-family-aiga systems.

Restriction: ACE 991.604

SOCCHFAM 232 (15 Points) **Child and Family Law and Social Work**

An in-depth exploration of legislation that impacts on children, young people and their families. The processes of guardianship, custody and access in the context of Aotearoa New Zealand will be examined. Emerging trends in the conception, configuration and perceptions of families will be critically discussed in relation to the legislation and rights of children and young people.

Stage III

SOCCHFAM 314 (15 Points) **Child Protection Practice**

An examination of the theoretical frameworks for understanding child abuse and neglect, and an investigation of strategies for safe professional practice in child protection. It includes the consideration of the role of both statutory and community agencies in protecting and assisting children and families.

Prerequisite: SOCWORK 311

Restriction: ACE 992.703

SOCCHFAM 332 (15 Points) **Working with Children and Families**

An exploration of effective approaches, policies, practices and principles used to engage with children and their families within the context of Aotearoa New Zealand. This course will develop the skills and knowledge necessary for working with children and their families. This will involve assessing family capacity, child development and the significant relationships that promote child and family wellbeing.

SOCCHFAM 382 (15 Points) **Special Topic**

Stage IV

SOCCHFAM 431 (15 Points) **Child and Adolescent Mental Health Issues**

A critical examination of specific diagnoses and disorders of childhood and adolescence that impact on their mental health and wellbeing, with emphasis on the current successful treatments for severely

emotionally distressed children and young people within Aotearoa New Zealand.

SOCCHFAM 482 (15 Points) **Special Topic**

Postgraduate Courses

SOCCHFAM 731 (15 Points) **Child and Adolescent Mental Health Issues**

An in-depth examination of specific diagnoses and disorders of childhood and adolescence that impact on their mental health and wellbeing, with emphasis on contemporary literature and evidence informed practice with children and young people within Aotearoa New Zealand.

Restriction: SOCCHFAM 431

Social Work Health Practice

Stage II

SOCCHLTH 231 (15 Points) **Health Social Work Practice**

Explores the role of social work practice in a health setting. An examination of the social work role both within a community and institutional setting, key health strategies, the structure and funding of health, and core skills in facilitating family meetings and working with issues of grief, loss and recovery.

Restriction: ACE 992.701

Stage III

SOCCHLTH 313 (15 Points) **Mental Health in Social Practice**

An exploration of the dynamics of social practice with service users and their whānau/family with mental health issues. This course includes an examination of mental health policy and broad approaches to care and recovery. An overview knowledge of the major mental health illnesses and associated recovery strategies will be provided. The impact of mental health issues in Māori, Pasifika, people with disabilities, young people and refugee and migrant communities will be examined.

Restriction: ACE 992.702

SOCCHLTH 334 (15 Points) **Effective Social Work in Health and Disability Services**

Explores the role of social work with people who have disabilities or experience disabling conditions through accident, illness and aging. Examines policy and strategies of support for recovery and rehabilitation. Develops skills to address the psychosocial impact of physical loss and change with individuals, carers and families.

SOCCHLTH 381 (15 Points) **Special Topic**

Stage IV

SOCCHLTH 432 (15 Points) **Working with Grief and Loss**

An in-depth examination of theoretical and cultural perspectives of grief and loss that includes loss associated with trauma, terminal and chronic illness and suicide. Personal experience of loss will also be explored. Content will include developing social work skills and interventions that can assist adults and children experiencing grief, loss and change.

SOCHLTH 481 (15 Points)
Special Topic

Postgraduate Courses
SOCHLTH 732 (15 Points)
Working with Grief and Loss

An in-depth examination of theoretical and cultural perspectives of grief and loss that includes loss associated with trauma, terminal and chronic illness and suicide. Personal experience of loss will also be explored. Content will include contemporary literature and the examination of evidence-informed interventions that can assist adults and children experiencing grief, loss and change.

Restriction: ACE 990.601, SOCHLTH 432

SOCHLTH 753 (15 Points)
Health Social Work: Identity and Theory

A critical examination of contemporary literature, research and cutting edge strategies in health social work. Changes in the meaning of health and the impact on identity and practice will be explored with reference to professional borders and boundaries and interprofessional collaboration.

Restriction: POPLPRAC 755

SOCHLTH 754 (15 Points)
Health Social Work: Leadership and Professional Development

A critical examination of essential aspects of leadership relevant to health social work, drawing from contemporary approaches to organisational behaviour. Essential skills for organisational excellence, including quality and auditing, project design and management, change management and leadership of professional development are explored.

Social Work Youth Practice
Stage II
SOCYOUTH 233 (15 Points)
Working with Young People

An exploration of the role of social work with young people in Aotearoa New Zealand. An introduction to youth services with reference to the legal, policy and practice dimensions that impact on young people, their families and communities.

Restriction: ACE 535.506

Stage III
SOCYOUTH 333 (15 Points)
Working with Challenging Behaviours

An application of skills, knowledge, strategies and interventions that enable successful engagement with people who present with behaviours and attitudes that may impede or challenge the establishment of effective working relationships. This course will examine a variety of contemporary approaches that inform best practice with the dynamics of aggression, violence and other problematic behaviours with a range of client populations.

Stage IV
SOCYOUTH 433 (15 Points)
Youth Justice Issues and Strategies

An in-depth examination of contemporary literature, research and cutting edge strategies in youth offending and recidivist behaviours, with an emphasis on the

skills necessary for working successfully with this client group.

SOCYOUTH 483 (15 Points)
Special Topic

Postgraduate Courses
SOCYOUTH 733 (15 Points)
Youth Justice Issues and Strategies

A critical examination of contemporary literature, research and evidence informed strategies in youth offending and recidivist behaviours, with an emphasis on the skills necessary for working successfully with this client group.

Restriction: ACE 990.601, SOCYOUTH 433

Youth Work
Stage I
YOUTHWRK 151 (15 Points)
Conceptualising Young People

An exploration of historical and contemporary social constructions of youth and the ways in which socio-cultural factors such as gender, ethnicity, sexual orientation and environment impact on young people's development and identity.

Restriction: ACE 435.501

YOUTHWRK 152G (15 Points)
Understanding New Zealand Youth

This course examines the concept of 'youth' and the historical, economic and political contexts in which young people live and are schooled in New Zealand society. The concept of youth is explored as a fundamental aspect of human development, identity and culture. The ways that we learn about what it is to be a young person in New Zealand today, including sport, body image, media, music, technology and social networking will be explored.

Stage II
YOUTHWRK 251 (15 Points)
Recreation and Youth Development

Recreation, sport and outdoor education are examined for their contribution to the healthy development of young people. Services and initiatives targeted at enhancing youth development are critically examined with reference to current theories, research and community perspectives

Prerequisite: Any 30 points passed from the BHumServ Schedule

YOUTHWRK 252 (15 Points)
Working with the Impact of Violence

An exploration of identified types of violence including physical, sexual, psychological, emotional, social and political violence. Explores strategies for working safely in and with contexts where violence may occur.

Prerequisite: Any 30 points passed from the BHumServ Schedule

Restriction: ACE 535.602

YOUTHWRK 253 (15 Points)
Addictions and Youth

An examination of addictions related to intoxicating commodities such as alcohol, intimacy and sex, food and exercise, money and information technologies and their impact on health outcomes for young people in Aotearoa New Zealand. It examines the patterns and effects of discourses and practices related to

various addictions and their treatment where youth are concerned.

Prerequisite: Any 30 points passed from the BHumServ Schedule

Restriction: ACE 535.508

YOUTHWRK 281 (15 Points)

Prerequisite: Any 30 points passed from the BHumServ Schedule

Stage III

YOUTHWRK 353 (15 Points)

Enhancing Pasifika Development

Examines the place, roles and relationships of Pasifika youth in Aotearoa New Zealand society. Examines both the cultural assets of Pasifika youth and challenges the difficulties they face. Services and initiatives targeted at enhancing Pasifika youth inclusion and development will be critically examined with reference to current theories, research and community perspectives.

Prerequisite: Any 30 points passed at Stage II from the BHumServ Schedule

Restriction: ACE 535.705

YOUTHWRK 354 (15 Points)

Rangatahi: Taonga Tuku Iho

An examination of social and cultural factors that influence the aspirations and participation of Rangatahi in society. The course will encourage the integration of theoretical perspectives that inform the development and implementation of practical strategies predicated on a Māori worldview.

Prerequisite: Any 30 points passed at Stage II from the BHumServ Schedule

Restriction: ACE 535.704

Biomedical Engineering

Stage II

BIOMENG 221 (15 Points)

Mechanics of Biomaterials

The principles of mechanics and the special circumstances associated with applying these principles to living and prosthetic structures will be presented. Topics include: introduction to linear elasticity, stresses and strains specific to direct and torsional loading, material constitutive relationships

(including anisotropy, nonlinearity, and viscoelasticity), axial and transverse loading of bone, pressure loading of the heart, and theories of failure.

Restriction: ENGSCI 274

BIOMENG 241 (15 Points)

Instrumentation

Introduction to instrumentation, measurement systems, and signal processing. This course will consider aspects of hardware and software related to the measurement of biological signals.

Prerequisite: ELECTENG 101

Restriction: BIOMENG 233

Stage III

BIOMENG 321 (15 Points)

Continuum Modelling in Bioengineering

An introduction to continuum modelling approaches to bioengineering problems across a range of spatial scales. Topics include: mathematical modelling of gene regulation; molecular and cellular mechanics of striated muscle, nerve and cardiac cellular and tissue electrophysiology; and finite deformation elasticity and constitutive laws of soft biological materials; vascular networks and flow.

Restriction: ENGSCI 371

BIOMENG 341 (15 Points)

Chemical and Materials Engineering

Stage I

CHEMMAT 100G (15 Points)

Materials of the Modern World

Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.

CHEMMAT 121 (15 Points)
Materials Science

Atomic structure and bonding. Structure of solids. Microstructure. Mechanical properties. Alloying and phase diagrams. Engineering alloys and their heat treatment. Engineering ceramics and glasses. Engineering polymers. Engineering composites. Biomaterials. Electronic materials. Corrosion and degradation of metals.

Stage II**CHEMMAT 211 (15 Points)**
Introduction to Process Engineering

First law of thermodynamics, materials and energy balancing with and without chemical reaction, materials and energy balances in multiphase systems such as crystallisation, evaporation, drying, humidification, dehumidification, absorption, distillation, extraction and filtration. An introduction to the most important unit operations in the chemical industry, design concept and safety as applied to processing.

CHEMMAT 212 (15 Points)
Energy and Processing

The second law of thermodynamics. Thermodynamics of power and refrigeration cycles and flow processes. Classical chemical thermodynamics including concepts of chemical potential, fugacity and activities; their applications to reacting systems. Thermodynamics of solutions; various stability zone diagrams. Multi-component physical equilibria. Multiple reaction equilibria and system-free energy minimisation. Practical examples and applications.

CHEMMAT 213 (15 Points)
Transfer Processes 1

Fluid properties and definitions – fluid flow, energy and continuity relationships. Viscosity, laminar and turbulent flow, compressible flow, forces and momentum relationships, flow measurement. Heat transfer via steady state conduction, convection and radiation. Effect of geometry, force and natural convection. Dimensionless correlations of heat transfer processes with flow processes. Film and overall heat transfer coefficients. Practical examples and applications.

CHEMMAT 221 (15 Points)
Materials

Solid state transformation – diffusion, vacancies, solidification, nucleation and growth. Dislocations and plastic deformation, grain boundaries, annealing. Mechanical performance of materials. Strengthening mechanisms. Iron/carbon alloy systems and transformations (including pearlitic, austenitic, bainitic and martensitic), effects of alloying elements. Analytical methods – X-ray diffraction and methods, scanning electron microscopy, microanalysis, surface analysis methods. Texture, residual stress. Polymers, structure/property relationships; viscoelasticity.

CHEMMAT 232 (15 Points)
Process Design 1

Mechanics of solids and analysis of stress and strain. Introduction to materials selection. Design of thin walled pressure vessels. Application to the design of vessels, tanks, reactors, piping and heat transfer equipment. Introduction to the chemical industry, unit operations, line diagrams and process equipment. Report writing and oral communication skills.

Restriction: CHEMMAT 231

CHEMMAT 242 (15 Points)
Applied Chemistry

Topics in physical, analytical, polymer and biological chemistry: Surface and interfacial processes: heterogeneous catalysis, mechanism, rate of surface reactions, solid/liquid interfaces. Polymers: structure, synthesis, properties and characterisation, industrial application of polymers, processing and coatings. Analytical chemistry: data analysis, sampling, aqueous equilibria; titrimetric, spectrophotometric and chromatographic techniques. Components of living cells – lipids, proteins, enzymes, DNA. Molecular recognition, targets for drug action.

Stage III**CHEMMAT 312 (15 Points)**
Transfer Processes 2

Principles of continuous and staged processes. Mass transfer in various media, systems and phases. Interrelating reactor design to mass transfer processes. Studies of selected separation processes such as absorption, solvent extraction, and distillation. Heat transfer with phase change; nucleate and film boiling of liquids.

CHEMMAT 313 (15 Points)
Advanced Process Engineering

An in-depth analysis of selected topics that influence the design, operation, and performance of process plants. Topics include particulate technology, particle mechanics and particle motions, non Newtonian fluid flow, two-phase solid-liquid and gas-liquid flow, flow through porous media and packed beds, filtration, centrifugation, fluidisation, variable-analysis of variations in materials and product processing, membrane separation methods and optimisation techniques.

Restriction: CHEMMAT 316, 411

CHEMMAT 315 (15 Points)
Chemical Reactor Engineering

Kinetics of multiple reactions, analysis of basic reactors – batch, plug flow, and continuous stirred tank. Performance under isothermal, adiabatic, and varying temperature. Effect of semi-continuous, counterflow and recycle on performance. Heterogeneous reactions and catalysis, diffusion and reaction in porous catalysts, effects of external mass transfer resistance, fixed and fluidised bed reactors, gas-liquid reactors. Reactor engineering for biological and electrochemical systems.

CHEMMAT 317 (15 Points)
New Developments in Process Engineering

Guided technical 'tours' in the world of fast growing technologies focusing on green (sustainable) process engineering. Students will be introduced to recent and breaking sustainable process developments in chemical, biological, pharmaceutical, food and materials processing, energy utilisation and exploration. Students will be expected to critically evaluate new technologies and trends and encouraged to think laterally to develop new ideas and directions based on original scientific analyses.

CHEMMAT 322 (15 Points)
Materials Processing and Performance

Materials Performance: Materials degradation and protection, including high temperature corrosion and high temperature materials, corrosion principles and practice, testing methods, corrosion resistant

materials and corrosion protection. Cast irons and non-ferrous alloys; performance of polymers and ceramics. Materials Processing: Liquid metal processes, including metal smelting, solidification and casting; deformation processes. Joining techniques; welding, soldering, adhesives and NDT. Failure analysis.
Restriction: CHEMMAT 321, 421

CHEMMAT 331 (15 Points)
Process Design 2

The nature and function of design – process conception, alternatives, constraints and their simulation. Raw materials, safety and environmental considerations. Flow sheet representation of information. Separation systems, heat exchanger networks, and specification of equipment. Process economics and project documentation.

Stage IV

CHEMMAT 412 (15 Points)
Process Dynamics and Control

Introduction to process instrumentation, modeling and simulation, first, second and higher order systems, transport delay, linearisation, interactive elements, open-loop and negative feedback systems, transient response analysis, stability, controllers and controller tuning, frequency response analysis, advanced control strategies including feed-forward, cascade control, and predictive control. Control of common loops, unit operations, multiple loops and whole plants.
Restriction: CHEMMAT 311, 411

CHEMMAT 422 (15 Points)
Non-metallic Materials

Polymers – structure and physical properties, influence of structure and temperature on mechanical properties. Rubber elasticity, viscoelasticity. Engineering polymers and design. Biomaterials – structural hierarchical relationships, structural proteins, natural fibres, biomaterials as integrated multicomponent systems, mechanical gels, bioceramics. Ceramics – bonding, structure, mechanical and thermal properties, high performance ceramics, glasses and composites, processing techniques.

CHEMMAT 423 (15 Points)
Materials Engineering

Advanced aspects of mechanical behaviour, primarily application of fracture mechanics and failure analysis. Selected topics in primary materials processing, modern steel making. Further topics on materials joining – modern welding processes, standards and specifications, exotic materials. Surface engineering of materials and coating processes.

CHEMMAT 424 (15 Points)
Electronic Materials and their Applications

Introduction to electronic properties of materials and their applications. Contents include: basic theories of electrical conduction, conducting and insulating materials, semiconductor properties and materials, dielectric, magnetic, optical, thermal and sensing properties and materials, and superconductors. This course will cover the basic properties, processing methods and performance of electronic materials. The applications of electronic materials in various industries will be emphasised.

CHEMMAT 432A (15 Points)

CHEMMAT 432B (15 Points)

Design Project

Specification, planning and executing a specific process

design project. The detailed considerations in the project to include environmental impact, safety and occupational health issues, material selection, process energy demand and efficiency, costing and economics, process start-up and operation.

Restriction: CHEMMAT 431

To complete this course students must enrol in CHEMMAT 432 A and B

CHEMMAT 442A (15 Points)

CHEMMAT 442B (15 Points)

Research Project

A student is required to submit a report on project work carried out on a topic assigned by the Head of Department of Chemical and Materials Engineering. The work shall be supervised by a member of staff.

Restriction: CHEMMAT 441

To complete this course students must enrol in CHEMMAT 442 A and B

CHEMMAT 463 (15 Points)

Food Process Engineering

Application of engineering principles to food processing. Thermal treatment, dehydration and separation technologies. Physical properties and microstructure of foods. Meat and dairy technology. Food engineering design.

CHEMMAT 464 (15 Points)

Engineering Biotechnology

Principles of biochemical engineering. Exploitation of bioreaction and bioprocess systems. Introduction to biochemistry and microbiology. Especially focusing on biomolecular techniques and their applications, enzyme and microbial reaction kinetics, bioreactor design and downstream processing. Examples of biochemical process industries and food industry applications.

Restriction: CHEMMAT 361

Postgraduate Courses

CHEMMAT 712 (15 Points)

Chemical Engineering Seminar

A course on a topic or topics from the advanced fields of fluid mechanics, transport phenomena, heat transfer, particulate technology, chemical reactors and fuel technology.

CHEMMAT 713 (15 Points)

Studies in Chemical Engineering

An advanced course on topics to be determined each year by the Head of Department of Chemical and Materials Engineering.

CHEMMAT 716 (15 Points)

Advanced High Temperature Processing

A theoretical and applied treatment of selected topics related to industrial processing in New Zealand. Examples may include: electrochemical engineering for aluminium production, reactors, heat and mass transfer in electrothermal production of metals and slags, metallurgical reactors for treatment and quality control of metals and alloys.

CHEMMAT 717 (15 Points)

Electrochemical Engineering

The thermodynamics of aluminium electrolysis; heat and mass balance; components of the cell voltage; anode effect and its mitigation, resistance and voltage tracking; cell magnetism and magnetic modelling.

Corequisite: CHEMMAT 718, 726, 727

CHEMMAT 718 (15 Points)**Aluminium Reduction Process Operations**

Monitoring overall aluminium cell performance – what are the appropriate parameters to measure, how are they measured and how are they used for process control? Optimising cell performance, scheduling of operations, dealing with process excursions, metal treatment and quality. Novel cell designs.

Corequisite: CHEMMAT 717, 726, 727

CHEMMAT 721 (15 Points)**Advanced Materials**

A course with emphasis on new developments in materials science and engineering and their impact on technology and society. Topics may be selected from: surface engineering, nanocrystalline materials and composites, rapid solidification and mechanical alloying, diffusional synthesis, processing via solid state reaction, intermetallics, amorphous alloys and superconductors.

CHEMMAT 722 (15 Points)**Materials Seminar**

A course on a topic or topics in the field of materials to be determined each year by the Head of Department of Chemical and Materials Engineering.

CHEMMAT 724 (15 Points)**Advanced Materials Characterisation**

A course on modern methods for materials microstructural characterisation and analysis including: electron microscopy (SEM and TEM), microanalysis and surface analysis, atomic force microscopy (AFM), nanoindentation. The course will include both principles and practical experience of these techniques.

CHEMMAT 726 (15 Points)**The Light Metals Industry**

An overview of the light metals, Ti, Al and Mg, their chemistry, metallurgy and processing. It also deals with trends in the global light metals production and uses and recent advances in extending applications for these materials; economics of feedstock and materials selection and availability; power supply and management; efficient use of equipment and resources; and environmental issues.

Corequisite: CHEMMAT 717, 718, 727

CHEMMAT 727 (15 Points)**Materials Performance and Selection for Light Metals Processing**

Performance requirements of anodes, cathodes, cell refractories and other aluminium cell construction materials are assessed. Techniques for monitoring materials performance in operation and post operation (autopsies) are discussed. This course also covers materials specifications, how well they predict performance in the aluminium cell as well as the relationship between the fabrication of the cell components and their performance. New materials.

Corequisite: CHEMMAT 717, 718, 726

CHEMMAT 731 (30 Points)**Advanced Design for Reduction Technology**

Specification, planning and execution of a specific process design project in reduction technology. Detailed considerations in the project will include material selection, process energy demand and efficiency, costing and economics, environmental impact and process start-up and operation.

CHEMMAT 732 (30 Points)**Advanced Design Project**

An advanced design project looking at the design and manufacture of a product based on a plastics material. Detailed considerations will include material and process selection, mould design, costing and economics, and environmental impact.

CHEMMAT 740 (15 Points)**Advanced Polymer Materials**

Microstructure and morphology of semi-crystalline and amorphous polymers, including alloys and thermoplastic elastomers. The study of structure/property/processing inter-relationships for plastics materials. Coverage includes characterisation of plastics materials, especially spectroscopic, thermal and rheological analysis. Mechanical testing.

CHEMMAT 741 (15 Points)**Processing of Plastics**

In-depth coverage of advanced processing techniques including associated rheology and heat transfer considerations. The course includes the study of additives, degradation processes and the prevention of degradation, formulation of products and the mixing of materials.

CHEMMAT 742 (15 Points)**Plastics Materials Design**

Material properties and selection. Tool design, including fabrication techniques. Environmental issues including lifecycle considerations.

CHEMMAT 743 (15 Points)**Selected Topics in Plastics Processing**

Modular course covering specialised topics and applications. Topics typically include biopolymers, silicones, film blowing, rotational moulding and thermoforming.

CHEMMAT 787 (15 Points)**Project X**

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CHEMMAT 788A (15 Points)**CHEMMAT 788B (15 Points)****Project Y**

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in CHEMMAT 788 A and B

CHEMMAT 789 (30 Points)**Project Z**

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CHEMMAT 796A (60 Points)**CHEMMAT 796B (60 Points)****ME Thesis (Chemical and Materials)**

A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in CHEMMAT 796 A and B

Civil Engineering

Stage II**CIVIL 201 (10 Points)****Land Information Systems**

Aspects of elementary engineering surveying as used

for gathering site information for the design and setting out of works. Land information systems, modern methods of gathering, processing and presenting information for engineering purposes.

CIVIL 210 (15 Points)

Introduction to Structures

Structural forms and systems. Analysis of determinate systems, elasticity. Engineering beam theory, elasticity, failure theories. Introduction to structural design.

Restriction: ENVENG 210, RESOURCE 210

CIVIL 211 (10 Points)

Structures and Design 1

Introduction to structural design – philosophy, loads, codes; design of simple structural elements in various materials.

CIVIL 220 (10 Points)

Introductory Engineering Geology

Principles of physical and structural geology. Elementary stratigraphy. Applied geomorphology. Geologic surveying and mapping. Elementary seismology; microzoning and seismotectonic hazard evaluation. Engineering properties, description and identification of geologic materials. General applications of geology to engineering.

CIVIL 221 (10 Points)

Geomechanics 1

Nature and classification of soils. Density, permeability, stress-strain relationships, shear strength. Fluid flow in soils. States of stress in soil. Compaction. Introduction to stability of soil and rock masses.

CIVIL 230 (10 Points)

Fluid Mechanics 1

Fluid properties and definitions. Hydrostatics and stability of floating bodies. Fluid flow, energy and continuity relationships. Viscosity. Force and momentum relationship. Dimensional analysis and similarity. Introduction to turbomachinery.

CIVIL 250 (10 Points)

Civil Engineering Materials and Design

Properties of concrete and other materials. Design projects using common construction materials.

Stage III

CIVIL 312 (15 Points)

Structures and Design 2

Design of simple structures in timber, concrete steel and masonry to resist gravity, wind, earth pressure and other loads. Elastic and plastic analysis of indeterminate structures. Structural stability. Introduction to structural analysis programs.

CIVIL 313 (15 Points)

Structures and Design 3

Design of structures in reinforced concrete, prestressed concrete and structural steel. Computer analysis of structures; use of a commercial analysis program. Design project.

CIVIL 314 (10 Points)

Structural Dynamics

Dynamics of single and multi-degree-of-freedom systems. Ground motion, response spectra, time-history and spectral modal analysis; introduction to seismic design.

CIVIL 322 (10 Points)

Geomechanics 2

Stability analysis in geotechnical engineering; slope stability, soil pressures on retaining structures, bearing capacity. Consolidation and settlement.

CIVIL 324 (10 Points)

Geomechanics 3

Shear strength of soil – triaxial testing, measurement of pore water pressures, and interpretation of test data. Effective and total stress paths for drained and undrained loading in laboratory tests and field applications. Consolidation and the use of preloading to accelerate consolidation. Application of elastic solutions in geomechanics.

Restriction: CIVIL 420

CIVIL 331 (10 Points)

Hydraulic Engineering

Pipe flow – fluid resistance, friction factor, simple pipe flow and minor losses, steady-state pipe flow and pipe networks. Open channel flow – energy and momentum, uniform flow and flow resistance, critical flow, specific energy and flow force, backwater analysis, channel transitions.

CIVIL 332 (10 Points)

Fluid Mechanics 2

Laminar and turbulent flow. Ideal fluid flows. Boundary layer theory and separation, drag and lift. River morphology and flows. River pollution. Unsteady flow in channels.

CIVIL 360 (10 Points)

Transportation Engineering 1

Impact of land transport, highway alignment geometrics (horizontal, vertical and cross sectional design), aesthetics and location impact considerations. Basis of the main pavement design techniques, pavement materials and bituminous surfacings.

CIVIL 361 (10 Points)

Transportation Engineering 2

Planning for land transport facilities and urban development. Arrangement of street networks and environmental areas. Basic operational analyses at priority and signalised intersections for vehicles and pedestrians. Highway capacity analyses. Parking design. Introduction to transportation planning modelling.

Stage IV

CIVIL 403 (15 Points)

Special Topic in Civil Engineering 1

A course on a topic in Civil Engineering to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 404 (15 Points)

Special Topic in Civil Engineering 2

A course on a topic in Civil Engineering to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 406 (15 Points)

Special Topic

CIVIL 408A (15 Points)

CIVIL 408B (15 Points)

Research Project

Restriction: CIVIL 402

To complete this course students must enrol in CIVIL 408 A and B

CIVIL 409 (15 Points)
Construction Management

Understanding topics necessary for effective construction management. Using a generic construction project life cycle, essential aspects of construction projects including client brief preparation, the tendering process, preparing tenders, tender evaluation, project planning, resource allocation, teamwork, site safety, and contract types are covered. Case studies are used to reinforce the application of theoretical ideas to the successful running of construction projects.

Restriction: CIVIL 404

CIVIL 411 (15 Points)
Structures and Design 4

Continuation of the design and detailing of structures in structural steel, reinforced concrete, reinforced masonry, and timber including connections in steelwork, composite steel/concrete beams, masonry structures and retaining walls in reinforced masonry. Practical understanding and design of concrete ground floor slabs. Introduction to the NZ Standard for light timber frame construction. Introduction to fire engineering. Techniques in the checking of existing structures.

CIVIL 416 (15 Points)
Matrix Structural Analysis

Direct stiffness method applied to linear, nonlinear and stability analyses. Introduction to variational principles and finite element method. Projects in practical modelling of major structures such as bridges and multi-storey buildings. Use of commercial software.

Restriction: CIVIL 412, 415

CIVIL 421 (15 Points)
Foundation Engineering

Foundation performance requirements. Foundation types. Foundation design loads. Limit state design. Design of shallow foundations. Design of deep foundation. Case histories illustrating construction, performance and failure of foundations. Design and performance of gravity retaining structures, embedded retaining walls and reinforced earth walls.

Restriction: CIVIL 323

CIVIL 422 (15 Points)
Slope Engineering

Site investigation for slope assessment. Geological appraisal of slope behaviour and the use of aerial photographs. Failure mechanisms, shear strength of soil and rock masses. Influence of groundwater. Evaluation of stability and risk. Earth dams, stability analysis, flow net construction. Slope instrumentation. Remedial measures.

Restriction: ENVENG 324

CIVIL 451 (15 Points)
Timber Engineering

The practical understanding of timber and its use in the construction industry. Design and detailing techniques for connections in timber structures, plywood structures, pole structures, timber floor systems, bridges, multi-storey buildings, formwork and falsework, arches and cable stayed systems.

CIVIL 460 (15 Points)
Traffic Systems Design

Traffic signal timing analysis. Gap acceptance parameters. Intersection analysis of performance (priority, roundabouts and signalised). Some human factors. Introduction to transportation planning modelling. Planning land transport in NZ under

the Resource Management and other requirements. Computer modelling and simulation.

Prerequisite: CIVIL 361

Restriction: CIVIL 403

CIVIL 461 (15 Points)
Highway and Transportation Design

Economic and environmental assessments of transport projects. Land transport funding in NZ. Road safety engineering. Crash reduction and prevention methods. Geometric design of intersections. Pavement asset management systems. Pavement rehabilitation techniques. Use of cement/concrete and lime, heavy-duty pavements.

Prerequisite: CIVIL 360

CIVIL 482 (15 Points)
Water Resources Engineering

A selection from the following: reservoir design and optimisation, flood control and design of flood control structures, micro to large scale hydroelectric engineering, river engineering and sedimentation. A water resources engineering design project.

Prerequisite: RESOURCE 333 or ENVENG 333 or equivalent

Restriction: CIVIL 480

CIVIL 490 (15 Points)
Civil Engineering Administration

The application of legal principles to problems in civil engineering and environmental engineering management. Examines the administration of national and international engineering contracts. Discusses statutes affecting engineering business. Investigates the implications of resource management and natural resource allocation legislation on engineering projects. Analyses processes for resolving engineering disputes.

Restriction: CIVIL 401

Diploma Courses
CIVIL 660 (15 Points)
Traffic Engineering and Planning

A range of selected topics in traffic engineering and transportation planning which will provide a basis for extension into further studies.

Restriction: CIVIL 361, 460

CIVIL 661 (15 Points)
Highway and Pavement Engineering

A range of selected topics in highway and pavement engineering which will provide a basis for extension into further studies.

Restriction: CIVIL 360, 461

Postgraduate Courses
CIVIL 701 (15 Points)
Studies in Civil Engineering 1

Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 702 (15 Points)
Studies in Civil Engineering 2

Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 703 (15 Points)
Project Management 1

Planning, organisation and control of engineering projects.

CIVIL 704 (15 Points)**Project Management 2**

Contract administration, negotiation and dispute resolution for engineering project managers.

Prerequisite: CIVIL 703 or equivalent

CIVIL 707 (15 Points)**Construction Logistics Engineering**

Develops students' understanding of logistics issues facing construction engineering supplychains; including inventory costing and ordering models; Materials Requirements Planning (MRP); Manufacturing Resource Planning (MRP2); Just in Time (JIT) models; quick response systems and forecasting logistics requirements. Understand concurrent construction and client involvement in project definition of the Construction Logistics Function. Understanding logistics data management issues, including barcoding and tagging technologies.

CIVIL 708 (15 Points)**Work Based Learning**

Develops students' professional and interpersonal skills within the context of the developing professional construction engineer, application of theory and development of work procedures and processes; developing ability to question concepts and relate the theoretical and technological aspects of the specialisation to the working practices and developments in the construction industry. *Note, students must be following a part-time mode of study and in professional employment within the construction industry.*

CIVIL 709 (15 Points)**Cost Engineering**

This course introduces construction engineering cost planning. Key subjects include estimating and prediction throughout the project lifecycle; principles and applications of cost planning, control and design economics. Construction cost data sources and applications, standard forms of cost analysis, estimating and tendering; effects of procurement methods and contract conditions on pricing; preliminaries costing and contractor's cash flow and bidding strategy.

CIVIL 710 (15 Points)**Advanced Structural Dynamics**

Vibration theory. Linear theory of discrete and continuous systems including the shear beam and coupled shear walls. Introduction to the non-linear theory of vibration. Response of structures to earthquake, traffic and wind loading. Response spectra concepts. Normal mode analysis. Numerical integration techniques.

Prerequisite: CIVIL 412 or 416 or equivalent

CIVIL 711 (15 Points)**Structures Seminar**

Selected topics from recent developments in structural analysis and design, including an introduction to the advanced behaviour and design of thin-walled steel sections and composite components made from cold-formed sheet and light-weight fillers.

CIVIL 712 (15 Points)**Structural Analysis**

Analytical methods for some or all of the following structures: frames and grids, slabs, shear wall systems, shell structures, bridge superstructures. Structural optimisation.

CIVIL 714 (15 Points)**Multistorey Building Design**

Techniques for the design of structures to resist seismic loading. Derivation of design actions, alternative structural systems for resisting these loads, design of structural components subject to cyclic inelastic action, detailing of members and joints to enhance earthquake resistance. Techniques of seismic isolation. Design project.

Restriction: CIVIL 413

CIVIL 715 (15 Points)**Advanced Structural Concrete**

Behaviour of reinforced and prestressed concrete components and systems under complex loading and environmental conditions. Thermal and other loading conditions in bridge structures.

Restriction: CIVIL 414

CIVIL 716 (15 Points)**Engineering Risk Management**

A broad based understanding of the critical elements of risk and risk management within the construction and engineering industry. Key elements include risk identification with regard to the forms and types of risk inherent in construction. Risk analysis tools and techniques for the construction engineer, and risk response. Risk monitoring techniques, risk control and transference of risk methods. Risk within procurement, insurance issues and risk attenuation.

CIVIL 717 (15 Points)**Advanced Structural Timber**

Advanced topics in timber design such as: shearwalls, diaphragms, special glulam beams, bolted connections, new fasteners, engineered wood products, laminated bridges, inspection of timber structures. Emphasis will be placed on latest international developments.

Prerequisite: CIVIL 451 or equivalent

CIVIL 718 (15 Points)**Advanced Steel Structures**

This course covers relevant and current issues affecting the design and construction of steel structures for complex loading and environmental conditions. It combines theoretical aspects of the design of advanced steel structures with practical aspects and introduces new developments.

Prerequisite: CIVIL 411 or equivalent

CIVIL 720 (15 Points)**Earthquake Engineering**

The fundamentals of seismology including earthquake waves, magnitudes and felt-intensities. The damaging effects of earthquake upon land and the constructions of man. Study of some relevant historical earthquakes. Strong earthquake motions and the vibratory response of land and buildings. Fundamentals of the earthquake-resistant design of engineering structures.

CIVIL 723 (15 Points)**Rock Mechanics and Excavation Engineering**

Engineering rock behaviour – strength, elasticity and role of discontinuities. Stress – strain analysis, stability assessment of rock structures and support. Theoretical, practical and environmental aspects of ground excavations including ripping, cutting and blasting.

Restriction: RESOURCE 723

CIVIL 724 (15 Points)**Soil Behaviour**

A systematic review of the engineering properties

of soils: principle of effective stress, soil types and origins, permeability, dilatancy and pore pressure response, shear strength properties, compressibility models, consolidation and time dependent properties, partially saturated soil. Sedimentary, transported, residual soils and volcanically derived soils. Models for soil behaviour.

CIVIL 725 (15 Points)

Geotechnical Earthquake Engineering

Introduction to the concepts, theories and practices of modern geotechnical earthquake engineering. Seismic considerations are a significant factor in the design of much of the infrastructure in seismically active countries like New Zealand. The course will include geophysical site investigation, site response analysis, liquefaction assessment and the earthquake behaviour of earth dams.

CIVIL 730 (15 Points)

Fluid Mechanics Seminar

Special topics selected from fluid dynamics, water resources engineering, statistics and numerical methods.

CIVIL 731 (15 Points)

Water Resources Modelling

Risk and uncertainty in water resources systems; evaluation of alternatives in water resources; hydrologic modelling; hydraulic modelling; river basin modelling; water resources economics.

CIVIL 732 (15 Points)

Coastal Engineering 2

Waves, wave theories, wave forces on structures. Breakers, tsunamis, flow-induced oscillations, resonance problems in tidal estuaries. Sediment transport by waves. Topics from coastal and harbour engineering.

Prerequisite: CIVIL 431 or 733 or equivalent

CIVIL 733 (15 Points)

Coastal Engineering 1

Coastal, port and ocean engineering. Theories governing waves, tides and currents. Design of structures subject to a marine environment.

Restriction: CIVIL 431

CIVIL 734 (15 Points)

River Engineering

Scales; flows; fluvial processes; mixing; ecohydraulics.

CIVIL 740 (15 Points)

Studies in Civil Engineering 3

Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 751 (15 Points)

Experimental Geotechnical Engineering

A student will undertake and report on experimental work, field or laboratory. The work will entail a range of soil and/or rock tests, such as but not limited to, triaxial tests, ring shear, consolidation, permeability, cone penetration tests, shear wave velocity and in situ vane tests.

CIVIL 752 (15 Points)

Computational Geotechnical Engineering

The student will undertake and report on analytical work that relates to geotechnical engineering. The work will entail analysis of engineering works using state of practice numerical analysis software to elucidate geotechnical design and performance.

CIVIL 754 (15 Points)

Geotechnical Modelling

Analysis of stress and strain in two and three dimensions, the idea of a constitutive law, elastic and plastic models for geomaterials. Numerical modelling of consolidation. Implementation of realistic models for soil and rock mass stress-strain-strength behaviour in numerical analysis software and evaluation of geotechnical software against known solutions.

CIVIL 755 (15 Points)

Advanced Mechanics of Materials

Advanced treatment of topics relating to the mechanics and properties of materials, components and systems used in civil engineering.

Restriction: CIVIL 450

CIVIL 760 (15 Points)

Traffic Operations and Management

Selected topics from: traffic signal performance measures (queues, delays, stops), coordination of signals and platoon dispersion. Traffic characteristics, traffic studies, analytical tools in traffic engineering, queuing theory and applications. Traffic impact assessment and parking design. Travel demand management and other intelligent transport systems techniques.

Prerequisite: CIVIL 460 or CIVIL 660 or equivalent

CIVIL 761 (15 Points)

Planning and Design of Transport Facilities

Selected topics from: traffic signal practice/safety audits, two way highway planning, arterial traffic management, modelling and simulation and traffic flow.

Prerequisite: CIVIL 460 or 660 or equivalent

CIVIL 762 (15 Points)

Transportation Planning

Provides an in-depth exploration of various components of the urban transportation planning process, with emphasis on theories on modelling. The principle behind the conventional four-stage transport planning model, namely, trip generation, trip distribution, modal split and trip assignment, is covered in detail.

Prerequisite: CIVIL 460 or CIVIL 660 or equivalent

CIVIL 763 (15 Points)

Transportation and Networks Analysis

A course on logistics and scheduling from a graph and network theory perspectives; max-flow network problems; shortest-path and minimal-cost network problems; network synthesis and location problems.

Prerequisite: CIVIL 460 or CIVIL 660 or equivalent

CIVIL 764 (15 Points)

Highway Safety and Operations

An advanced course in the planning, design, safety management and operation of highways. Topics include; traffic flow characteristics, highway capacity, special design vehicles and facilities. Passing and overtaking models analysis and treatments, highway safety, collision modification and mitigation, roadway and roadside design, skid resistance, delineation, temporary traffic control, evaluation methods, and environmental design and management measures.

Prerequisite: CIVIL 360 and 361, or 661 or equivalent

CIVIL 765 (15 Points)

Infrastructure Asset Management

An advanced course in the procedures, systems and techniques used in the planning, management, operation and maintenance of infrastructure assets.

Topics include; institutional issues, legislation and resource management. Developing and critiquing asset management plans. Levels of service, demand forecasting, life cycle asset management, demand management, risk analysis, condition monitoring and deterioration modelling, optimised decision making, data needs and integration of asset management systems.

CIVIL 766 (15 Points)
Road Management Systems

The planning, administration and management of the construction and maintenance of roads using maintenance management systems. The principles, methods and techniques of pavement deterioration modelling and the multi-year programming of works using RAMM, HDM models and dTIMS.

Prerequisite: CIVIL 360 and 461, or 661, or equivalent

CIVIL 767 (15 Points)
Advanced Pavement Engineering

Selected topics from: pavement construction materials, analytical and empirical pavement design methods, pavement maintenance and rehabilitation techniques and data collection methodologies for the assessment of pavement performance.

Prerequisite: CIVIL 360 and CIVIL 461, or CIVIL 661, or equivalent

CIVIL 768 (15 Points)
Crash Reduction and Prevention

An in-depth analysis of the techniques used to reduce and prevent road based crashes. Topics include; safety analysis, crash patterns, measuring safety, hazardous location identification, treatment and investigation procedures. Human factors, problem diagnosis and evaluation procedures. Road environment factors, geometrics, lighting, signs, delineation, road side safety and road surface characteristics. Vehicle design trends, safety auditing, speed management, vulnerable road users.

Prerequisite: CIVIL 461 or 661 or equivalent

CIVIL 769 (15 Points)
Highway Geometric Design

An advanced course in geometrical design techniques used in Highway Engineering. Topics include; design context, human perception / reaction, sight distances. Economic considerations, speed environment, design speed and alignment consistency. Horizontal, vertical and cross sectional design, element coordination. Design plans and documentation, CAD, intersection design, road lighting, signs, marking and delineation, access controls and motorway interchanges.

Prerequisite: CIVIL 360 or 661 or equivalent

CIVIL 770 (15 Points)
Transport Systems Economics

Fundamentals of transport economics covering concepts in: (1) Demand, supply, pricing, congestion and other externalities in transport with a focus on their application in congestion pricing; and (2) Principles of economic evaluation in transport planning.

CIVIL 771 (15 Points)
Planning and Managing Transport

Outline of the following: NZ Transport Strategy and the relevant Acts for the provision of transport (LTMA and RMA); integrating land use with transport and with sea and air transport; urban design protocol; sustainable transport practices. Travel demand management and congestion pricing.

CIVIL 772 (15 Points)

Public Transport: Planning and Operation

Introduction and framework; PT data collection; frequency and headway determination; alternative timetables; vehicle scheduling; crew scheduling; short-turn design; PT network design; PT reliability; design of shuttle and feeder lines; bus priority and BRT.

CIVIL 773 (15 Points)

Sustainable Transport: Planning and Design

Pedestrian planning and design; cycling facilities and planning; land use and trips; travel behaviour change and travel plans; integrated transport assessment; transport impact guidelines for site development.

CIVIL 774 (15 Points)

Studies in Transportation 1

A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

CIVIL 775 (15 Points)

Studies in Transportation 2

A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

CIVIL 780 (15 Points)

Advanced Water Resources

Selected topics from hydrology and water resources engineering.

Restriction: RESOURCE 780

CIVIL 787 (15 Points)

Project X

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CIVIL 788A (15 Points)

CIVIL 788B (15 Points)

Project Y

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in CIVIL 788 A and B

CIVIL 789 (30 Points)

Project Z

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CIVIL 796A (60 Points)

CIVIL 796B (60 Points)

ME Thesis (Civil)

A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in CIVIL 796 A and B

Computer Systems Engineering

Stage II

COMPSYS 201 (15 Points)

Fundamentals of Computer Engineering

The hardware/software interface: processors, registers, memory, basic I/O. Representation of data, number systems, and computer arithmetic; assembly language programming and debugging; support for high-level languages; exceptions and multithreading; combinational and sequential circuits (traditional design and standard circuits); instruction sets; communication principles.

Prerequisite: ELECTENG 101

COMPSYS 202 (15 Points)**Object Oriented Design and Programming**

A project-based course with extensive hands-on programming experience. Includes: an introduction to object oriented design including UML, sequence diagrams, use-case analysis; an introduction to object oriented programming in a modern high level language, algorithms, data abstraction and elementary data structures.

Prerequisite: ENGGEN 131 or ENGSCI 131

Stage III**COMPSYS 301 (15 Points)****Design: Hardware Software Systems**

An appreciation of the engineering design process as applied to computer systems. Design skills are enhanced through engineering projects which typically include elements of: computer hardware design, computer software design, system design and control, sensing, actuation and interfacing.

Prerequisite: COMPSYS 302, COMPSYS 305 or ELECTENG 304, ELECTENG 206 or 209

COMPSYS 302 (15 Points)**Design: Software Practice**

A project-based course with extensive hands-on programming experience emphasising problem-solving techniques and applications in computer systems engineering. Topics include: algorithms and data structures, parsing and translation, concurrent programming, scripting languages, systems programming.

Prerequisite: COMPSYS 202 or ELECTENG 203

COMPSYS 303 (15 Points)**Microcomputers and Embedded Systems**

Embedded applications. Microprocessors, microcontrollers, architecture, organisation, programming memories, I/O interfacing. Sensors, actuators, analog interfaces. Hardware/Software partitioning and interfacing. Concurrency. Implementing data transformations and reactivity. Case studies.

Prerequisite: COMPSYS 202 or ELECTENG 203, and COMPSYS 305 or ELECTENG 304

COMPSYS 304 (15 Points)**Computer Architecture 1**

Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.

Prerequisite: 15 points from COMPSYS 201, ELECTENG 205

COMPSYS 305 (15 Points)**Digital Systems Design 1**

Digital Systems implementation technologies; abstraction levels; hardware description languages; structural, architectural and behavioural modelling; register-transfer level design; datapath and control units; fixed and microprogrammed control units; ASM charts; synthesis from ASM charts, digital computation; verification; design flow. Design of a simple processor. FPGAs as prototyping technology.

Prerequisite: 15 points from COMPSYS 201, ELECTENG 205

Stage IV**COMPSYS 401A (15 Points)****COMPSYS 401B (15 Points)****Research Project**

A student is required to submit a report on project work carried out on a Computer Systems Engineering topic assigned by the Head of Department. The work shall be supervised by a member of staff.

Prerequisite: COMPSYS 301, and 45 points from COMPSCI 313, COMPSYS 302, 303, 304, 305, ELECTENG 303, 304
To complete this course students must enrol in COMPSYS 401 A and B

COMPSYS 403 (15 Points)**Embedded Systems Design**

Principles of embedded systems modeling. Models of computation. Languages for embedded systems design. Hardware/Software partitioning and co-design. Technologies. Energy-aware systems. Rapid prototyping. Distributed embedded systems. Case studies.

Prerequisite: 15 points from COMPSYS 303, ELECTENG 304

Restriction: COMPSYS 402

COMPSYS 404 (15 Points)**Real-time Systems**

Real-time concepts. Data- versus control-dominated systems. Hardware versus software tradeoffs. DSP algorithms. Architectures. Real-time operating systems. Reliability. Fault-tolerant computing systems. Internet-based and mobile systems.

Prerequisite: 15 points from COMPSYS 303, ELECTENG 304

Restriction: COMPSYS 402

COMPSYS 405 (15 Points)**Computer Networks and Distributed Applications**

Network layers and protocols. Packet switching. Broadband network principles. Low versus high bandwidth services. Network interfaces and instrumentation. Wireless networks in embedded applications. Industrial networking.

Prerequisite: COMPSYS 201 or ELECTENG 205, and COMPSYS 202 or ELECTENG 203

COMPSYS 406 (15 Points)**Robotics and Intelligent Systems**

Introduction to robotics and intelligent systems, including: robot manipulators and mobile robots, navigation techniques, planning and programming of robot actions, sensors and actuators, artificial intelligence, artificial neural nets, fuzzy systems, genetic algorithms.

Prerequisite: 15 points from COMPSYS 302, MECHENG 313, SOFTENG 306

COMPSYS 420 (15 Points)**Special Topics 1**

An advanced course on topics to be determined each year by the Head of Department.

COMPSYS 421 (15 Points)**Special Topics 2**

An advanced course on topics to be determined each year by the Head of Department.

Postgraduate Courses**COMPSYS 701 (15 Points)****Advanced Digital Systems Design**

Register-transfer, behavioural and system-level design and synthesis; resource sharing; scheduling; the use

of hardware-description languages; algorithms to logic; hardware/software partitioning; systems-on-chip; component re-usability; reconfigurable systems, low-power systems; case studies (DSP, speech, image and video algorithms implementation).

Prerequisite: 15 points from COMPSYS 305, ELECTENG 304

COMPSYS 703 (15 Points)

Advanced Intelligent Systems

Selected topics from current research in robotics and intelligent systems, such as: navigation, human-robot interaction, control, programming, path planning, problem solving, pattern recognition, artificial neural networks, fuzzy systems, genetic algorithms.

Prerequisite: COMPSYS 406 or ELECTENG 707

COMPSYS 704 (15 Points)

Advanced Embedded Systems

Selected topics from current research in embedded systems, such as: models of computation, architectures, distributed embedded systems, systems-on-chip, real-time operating systems, heterogeneous models of computation, architectures and technologies, formal verification, model-checking.

Prerequisite: 15 points from COMPSYS 402–404, 701 or ELECTENG 423

COMPSYS 705 (15 Points)

Formal Methods for Engineers

Validation versus Verification, Formal models, Formal Specification: Process Algebraic, Logic Based, Temporal Logic, Methods of Verification: Bisimulation, Model Checking, Theorem Proving. State Space explosion problem and solutions: BDDs, Symbolic Model Checking, Modular Verification. Verification of HDL designs, Tools: STeP, VIS, NuSMV.

Prerequisite: COMPSYS 302 and COMPSYS 305 or ELECTENG 304

COMPSYS 706 (15 Points)

Speech and Language Processing

Introduction to the fundamentals of speech and language processing. Concepts, methods and applications of speech signal processing. Principles of speech analysis, coding, modelling, recognition, synthesis and language processing.

Prerequisite: ELECTENG 413

COMPSYS 707 (15 Points)

Advanced Microcomputer Architecture

Hardware and software approaches for instruction-level parallel processing, multiprocessors and multithreading, embedded multiprocessing and memory systems, architectures for embedded multiple processors and networks on chip, dynamic reconfigurable architectures.

Prerequisite: 15 points from COMPSYS 304, ELECTENG 304

COMPSYS 710 (15 Points)

Studies in Computer Systems Engineering 1

Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 711 (15 Points)

Studies in Computer Systems Engineering 2

Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 712 (15 Points)

Studies in Computer Systems Engineering 3

Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 713 (15 Points)

Studies in Computer Systems Engineering 4

Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 714 (15 Points)

Studies in Computer Systems Engineering 5

Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 715 (15 Points)

Studies in Computer Systems Engineering 6

Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 787 (15 Points)

Project X

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

COMPSYS 788A (15 Points)

COMPSYS 788B (15 Points)

Project Y

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in COMPSYS 788 A and B

COMPSYS 789 (30 Points)

Project Z

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

COMPSYS 796A (60 Points)

COMPSYS 796B (60 Points)

ME Thesis (Computer Systems)

A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in COMPSYS 796 A and B

Electrical and Electronic Engineering

Stage I

ELECTENG 101 (15 Points)

Electrical and Digital Systems

An introduction to electrical, computer and electronic systems and technology. Digital circuits and analysis techniques, computer organisation. Analog circuits and analysis techniques. Inductive power transfer, power systems and electric machines. Communication systems.

Stage II

ELECTENG 202 (15 Points)

Circuits and Systems

This course aims to provide a good understanding of the way electrical circuits work. It covers DC and AC circuit theorems and analysis; transient analysis, including the Laplace transform; transfer functions; AC power calculations; and time and frequency representation of signals.

Prerequisite: ELECTENG 101

ELECTENG 204 (15 Points)

Engineering Electromagnetics

Electrical conduction theories, conducting materials and insulators, magnetic and dielectric properties and materials, electrostatics and magnetostatics, steady electric currents, the magnetic field of steady electric currents, Ampere's law and its applications.

electromagnetic induction, Faraday's law and its applications, electromagnetism, simple transmission lines, magnetic circuits, permanent magnets, inductors, transformers, introduction to electrical machines.

Prerequisite: ELECTENG 101

ELECTENG 208 (15 Points)

Electric Circuit Analysis

Aims to provide a good understanding of the way electrical circuits work. The course covers DC and AC circuit theorems and analysis. It also introduces some semiconductor devices (diodes, transistors and operational amplifiers) and gives examples of their applications.

Prerequisite: ELECTENG 101

Restriction: ELECTENG 202

ELECTENG 209 (15 Points)

Analogue and Digital Design

This project-based course provides an introduction to real-world design of analogue and digital circuits. Practical skills will be gained in electronic circuit analysis, use of CAD tools, PCB design and construction, circuit testing and calibration using laboratory equipment. Appropriate design methodology will be developed in a practical framework.

Prerequisite: ELECTENG 101, 202, ELECTENG 205 or COMPSYS 201, ELECTENG 207 or 210

ELECTENG 210 (15 Points)

Electronics 1

An introduction to semiconductor devices (diodes, bipolar junction transistors, field-effect transistors, operational amplifiers) and their applications. Device operation, device models and terminal characteristics. Biasing, coupling and bypass techniques. Small-signal analysis. Signal amplifiers, oscillators and power amplifiers. Switches and sensors.

Prerequisite: ELECTENG 101

Stage III

ELECTENG 303 (15 Points)

Systems and Control

Introduction to linear, time-invariant, continuous-time system theory from both a time-domain and frequency domain standpoint. This leads on to the fundamental body of knowledge underlying the control and enhancement of system behaviour, with application to the analysis and control of electrical systems.

Prerequisite: ELECTENG 202

ELECTENG 305 (15 Points)

Electronics 2

The operation, analysis and design of a range of electronic devices and systems will be discussed, taking examples from the full spectrum of electrical engineering. Such analysis will consider non-ideal circuit models and their frequency dependence. Selected applications will be taken from the fields of signal conditioning, amplifiers, communications systems and energy conversion.

Prerequisite: ELECTENG 202, 207 or 210

ELECTENG 307 (15 Points)

Transmission Lines and Systems

The basic concepts of electromagnetism are completed with a formal treatment of Maxwell's equations and their applications, including electromagnetic wave propagation, transmission lines, the Smith chart, and an introduction to antennas and radio systems, EMI and RFI.

Prerequisite: ELECTENG 204

ELECTENG 309 (15 Points)

Power Apparatus and Systems

This course introduces students to fundamentals of electric machinery and power system components. It covers theory, control and practical aspects of electric machines and apparatus as well as their applications in relation to power electronics.

Prerequisite: ELECTENG 204

ELECTENG 310 (15 Points)

Electrical Engineering Design 1

An appreciation of the design process as applied to various electrical and electronic engineering systems. Design skills are enhanced through a variety of engineering projects which typically introduce students to modelling, simulation and analogue and digital electronic hardware design.

Prerequisite: ELECTENG 202, ELECTENG 203 or COMPSYS 202, ELECTENG 205 or COMPSYS 201, ELECTENG 206 or 209, ELECTENG 207 or 210

ELECTENG 311 (15 Points)

Electrical Engineering Design 2

The formal introduction to the design process is completed by one or more open-ended projects which typically include elements of design from concept to working prototype.

Prerequisite: ELECTENG 310 or ELECTENG 203, 205, 206, 207

Stage IV

ELECTENG 401A (15 Points)

ELECTENG 401B (15 Points)

Research Project

A student is required to submit a report on project work carried out on a topic assigned by the Head of Department. The work shall be supervised by a member of staff.

Prerequisite: ELECTENG 303, 305, ELECTENG 301 or 310 and 311

To complete this course students must enrol in ELECTENG 401 A and B

ELECTENG 411 (15 Points)

Power Systems

Power system network modelling; power system analysis – load flow, fault, stability, power quality; control of real and reactive power.

Prerequisite: ELECTENG 302 or 309

ELECTENG 412 (15 Points)

Communication Systems

Analog modulations, AM and FM modulation. Noise. Noise in AM and FM systems. Broadband systems: FDM, TDM, PCM. Information theory, data networks, waveform coding and data compression, baseband data transmission. Introduction to digital systems: Digital modulation.

Prerequisite: ELECTENG 303

ELECTENG 413 (15 Points)

Signal Processing

Analog signals and systems: Signal processing concepts and tools for analysing deterministic and random continuous-time signals and systems. Digital signals and systems: Discrete-time deterministic signal analysis, digital filters and transforms, including the FFT. Digital Signal Processor (DSP) architectures and DSP applications.

Prerequisite: ELECTENG 303

ELECTENG 414 (15 Points)

Power Electronics

This course introduces students to selected building

blocks in power electronics by way of a practical design project utilising modern power electronic converters with supporting lectures that include: inductive power transfer, switched mode DC-DC converter design and control, high frequency magnetics design, semiconductor switches, practical design issues, controlled rectifiers and PWM converters with application to conventional and brushless DC motors.

Prerequisite: ELECTENG 303

ELECTENG 415 (15 Points) **Special Topics 1**

An advanced course on topics to be determined each year by the Head of Department.

ELECTENG 416 (15 Points) **Analog and Digital Filter Synthesis**

Filter concepts and network functions, a review of approximation techniques and frequency transformations, leading to a thorough treatment of passive, active and digital filter implementations.

Prerequisite: ELECTENG 303

ELECTENG 421 (15 Points) **Radio Systems**

Transmission lines and waveguides, impedance matching, devices. Radio propagation, antennas and arrays. Radio system design – mobile, point-to-point, area coverage.

Prerequisite: ELECTENG 307 or 302 or 306

ELECTENG 422 (15 Points) **Control Systems**

State space analysis, relationship to transfer function methods, controllability and observability, multivariable plant. Computer simulation. Stability considerations. State variable feedback. Digital control system, design and realisation of digital controllers, adaptive controllers. Nonlinear systems, phase-plane and describing function techniques, Liapunov's method of stability analysis, design of controllers for non-linear systems. Variable structure systems.

Prerequisite: ELECTENG 303

ELECTENG 424 (15 Points) **Special Topics 2**

An advanced course on topics to be determined each year by the Head of Department.

ELECTENG 426 (15 Points) **Digital Communications**

Advanced principles and techniques in digital transmission systems: signal and information coding, data compression, digital modulation, digital transmission, error detection and correction. Digital networks. Information theory. Traffic theory.

Prerequisite: ELECTENG 303, 412

ELECTENG 428 (15 Points) **Sensors and Measurement**

Sensors: Principles of operation. Technologies. Applications: environmental and process monitoring, NDT, subsurface sensing, landmine detection, structural integrity, archaeological site evaluation. Smart sensors and MEMS. Sensor interfacing and signal conditioning. Measurement: Units, accuracy, standards, calibration. Time domain. Pulse parameters. Frequency domain. Transmission systems. TDR. Signal sources. Counters. Modulation-domain. Introduction to ATE.

Prerequisite: ELECTENG 305

Restriction: MECHENG 312

Postgraduate Courses

ELECTENG 701 (15 Points) **Wireless Communication**

Aspects of the design and planning of wireless communication systems. Introduction to cellular system design. Issues related to radio propagation: multipath, path loss prediction, channel characterisation. System aspects: cellular technologies, system planning and reliability estimation. Wireless systems and standards.

Prerequisite: ELECTENG 421

ELECTENG 702 (15 Points) **Applied Electromagnetics**

Selected topics in electromagnetic theory. Consideration will be given to both analytical and numerical techniques.

Prerequisite: ELECTENG 307 or 302 or 306

ELECTENG 703 (15 Points) **Advanced Power Systems**

Electricity markets – structure, pricing, optimisation. Application of power electronics to power systems. Distribution system issues. Integration of DG/ renewable sources to bulk power systems.

Prerequisite: ELECTENG 411

ELECTENG 704 (15 Points) **Advanced Control Systems**

Theory of modern control systems with emphasis on optimisation techniques for both deterministic and stochastic processes. State-space modelling of dynamic systems and choice of suitable performance criteria. Adaptive, fuzzy logic and sliding mode control systems.

Prerequisite: ELECTENG 422

ELECTENG 705 (15 Points) **Heavy Current Electronics**

Selected advanced topics in the design and control of power electronics are presented. Topics include: analysis of power electronic circuits using state space techniques with suitable applications; design and application of switch mode resonant converters; scalar and vector control of AC induction motors; advanced magnetics modelling.

Prerequisite: ELECTENG 414

ELECTENG 706 (15 Points) **Digital Signal Processing**

Advanced digital signal processing concepts and techniques for analysing discrete-time deterministic and random signals and systems. Stochastic signal description and analysis, system response to stochastic signals. Adaptive systems and applications. Multi-rate techniques. Digital Signal Processor (DSP) implementation strategies and real-world issues.

Prerequisite: ELECTENG 413

ELECTENG 709 (15 Points) **Image Processing and Computer Vision**

Two-dimensional signals and systems and methods of analysis. Digital image manipulation, enhancement and restoration techniques. Two-dimensional digital filters and their application. Colour image processing. Computer vision concepts and tools. Quantitative image analysis and information extraction.

Prerequisite: ELECTENG 413

ELECTENG 711 (15 Points) **Studies in Electrical and Electronic Engineering 1**

Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 712 (15 Points)
Studies in Electrical and Electronic Engineering 2
 Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 713 (15 Points)
Studies in Electrical and Electronic Engineering 3
 Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 714 (15 Points)
Studies in Electrical and Electronic Engineering 4
 Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 715 (15 Points)
Studies in Electrical and Electronic Engineering 5
 Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 716 (15 Points)
Studies in Electrical and Electronic Engineering 6
 Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 720 (15 Points)
Microwave Engineering
 Microwave systems, waveguides, passive components, resonators and filters. Microwave network theory, waveguide discontinuities. Microwave measurements. Aperture antennas.
Prerequisite: ELECTENG 421

ELECTENG 787 (15 Points)
Project X
 A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ELECTENG 788A (15 Points)
ELECTENG 788B (15 Points)
Project Y
 A student is required to submit a report on a topic assigned by the appropriate Head of Department.
To complete this course students must enrol in ELECTENG 788 A and B

ELECTENG 789 (30 Points)
Project Z
 A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ELECTENG 796A (60 Points)
ELECTENG 796B (60 Points)
ME Thesis (Electrical and Electronic)
 A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.
To complete this course students must enrol in ELECTENG 796 A and B

Energy Technology

Diploma Courses

GEO THERM 601 (15 Points)
Geothermal Resources and Their Use
 Worldwide occurrence of geothermal systems, introductory geology, volcanoes and volcanic rocks, New Zealand geothermal systems, structure of the TVZ, hydrothermal alteration, permeability and porosity, geologists role in geothermal development, introduction to geochemistry of geothermal systems, geothermal surface manifestations, water compositions, geothermometry, silica geochemistry, overview of

geophysics for geothermal exploration, geothermal resource assessment.

GEO THERM 602 (15 Points)
Geothermal Energy Technology
 Worldwide geothermal development, types of geothermal systems, thermodynamics, properties of water and steam tables, heat transfer, fluid mechanics, steamfield equipment, geothermal power stations, geothermal drilling, wellbore processes, completion tests, downhole measurements, reinjection, corrosion, stored heat, Darcy's law, cold groundwater, geothermal reservoirs, direct use, reservoir modelling, reservoir monitoring and steam-field management.

GEO THERM 603 (15 Points)
Geothermal Exploration
 Hydrothermal alteration, clays, fluid inclusions, direct use, subsidence, scaling and corrosion in geothermal wells, production geochemistry, environmental aspects of geothermal development, feasibility study, physical properties of rocks and self-potential (SP), magnetics, thermal methods, gravity, seismic methods, electrical methods, magneto-tellurics (MT).

GEO THERM 620 (15 Points)
Geothermal Engineering
 Completion tests, wellbore flow, two-phase flow, geothermal power cycles, flow measurements, direct use of geothermal energy, environmental effects, scaling and corrosion in geothermal wells, drilling engineering, flow measurements, steam-field operation and maintenance, subsidence, waste heat rejection, heat exchangers, geothermal well-test analysis, stimulation, pipeline design, feasibility study, reservoir modelling theory, MULGRAPH and TOUGH2, reservoir modelling process, case study (data and conceptual model, natural state modelling), Wairakei model.

GEO THERM 689 (15 Points)
Geothermal Project
 Based on a study using field, lab or theoretical methods, students are required to submit a report on some aspect of geothermal exploration, development or exploitation.

Engineering, General

Stage I

ENG GEN 100G (15 Points)
Technological Choices for the New Millennium
 A consideration of technological choices to support informed decision making in the use of technology in modern society. The course will be themed around important questions such as: Will water be the new oil? Is nuclear power the only practical solution to our energy demands? Nanotechnology – how small can or should we go? Are cell phones safe?

ENG GEN 115 (15 Points)
Introduction to Engineering Design
 The aim of the course is to develop an appreciation of design as a key aspect of professional engineering. Course elements: sketching and interpretation of engineering drawings; preparation of drawings using Computer Aided Design (CAD) software; design projects, some of which will require teamwork and cover design-build-test activities; an introduction to the engineering design process.

ENGGEN 121 (15 Points)**Engineering Mechanics**

An introduction to planar mechanics including: free body diagrams, equilibrium of rigid bodies, friction, distributed forces, internal forces, shear force and bending moment diagrams, kinematics and kinetics of particles, work and energy, relative motion, kinematics and kinetics of rigid bodies.

ENGGEN 131 (15 Points)**Introduction to Engineering Computation and Software Development**

Introduction to problem solving in engineering through the use of the software package MATLAB, and the high level programming language C.

Restriction: ENGSCI 131

ENGGEN 140 (15 Points)**Engineering Biology and Chemistry**

Introduction to chemical and biological systems. The application of engineering analysis and design techniques to facilitate understanding the multiscale structure, function and interactions of such systems. The use of case studies to illustrate systems approaches to chemistry and biology.

ENGGEN 150 (15 Points)**Advanced Mechanics and Mathematical Modelling**

An accelerated course replacing ENGGEN 121 and ENGSCI 111 for well-prepared and conjoint students. Topics include: Free body diagrams, equilibrium of rigid bodies, internal forces, shear force and bending moment diagrams, work and energy, motion of particles and rigid bodies. Introduction to mathematical modelling. Differentiation and integration, numerical integration. Differential equations, Vector and matrix algebra. Introduction to probability.

Restriction: ENGGEN 121, ENGSCI 111

ENGGEN 199 (0 Points)**English Language Competency**

To complete this course students must attain a level of competency in the English language as determined by the Faculty of Engineering.

Stage II**ENGGEN 204 (15 Points)****Technical Communication for Engineers**

The communication of complex engineering material will be emphasised in the following ways: the use of appropriate engineering graphical software at an advanced level; the use of appropriate multi-media; visual and spoken presentation, in styles appropriate to seminars, conferences, and presentations to technological industries; the construction of industrial displays; and the preparation of engineering reports.

ENGGEN 299 (0 Points)**Workshop Practice****Stage III****ENGGEN 303 (15 Points)****Management for Engineers**

An introduction to modern theory and practice of management, including project, quality and financial management appropriate to the engineering profession.

Prerequisite: ENGGEN 104 or 199

Restriction: ENGGEN 302

Stage IV**ENGGEN 401 (15 Points)****Professional Project**

A comprehensive investigation, analysis and reporting of a complex engineering design, development or professional engineering problem. Problem synthesis, solution specification, development and reporting as approved by the Head of Department of Mechanical Engineering.

Prerequisite: Departmental approval required

Restriction: ENGGEN 405, 410

ENGGEN 403 (15 Points)**Professional and Sustainability Issues**

Issues of particular relevance to the engineering profession including those relating to the law, ethics, culture and sustainability.

Restriction: ENGGEN 402

ENGGEN 405 (15 Points)**Advanced Innovation and New Product Development**

An advanced course dealing with the theoretical foundations of innovation, design and new product development. Theory is linked to practice in multidisciplinary teams engaged in innovation and design simulations and case studies.

Prerequisite: ENGGEN 302 or 303

Restriction: ENGGEN 401, 410, MGMT 305

ENGGEN 410 (15 Points)**History of Engineering**

Knowledge and understanding of the historical development of engineering and technology, including the social, cultural and political contexts of that development and its influence upon human society. Topics include the timing and location of engineering/technological development from ancient to modern times in both international and New Zealand contexts with an in-depth analysis of one topic of the student's choosing.

Restriction: CIVIL 405, ENGGEN 401, 405

ENGGEN 499 (0 Points)**Practical Work****Diploma Courses****ENGGEN 601 (15 Points)****Case Studies in Engineering 1**

The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. A student is required to submit a report.

ENGGEN 602 (15 Points)**Case Studies in Engineering 2**

The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. A student is required to submit a report.

ENGGEN 622 (15 Points)**Advanced Topics in Engineering 1**

Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

ENGGEN 623 (15 Points)**Advanced Topics in Engineering 2**

Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

Postgraduate Courses
ENGGEN 763 (15 Points)
Research Paper

The student will be required to write a research paper of publishable quality on a project supervised by a member of the academic staff. Where possible this project should relate to the analysis of a contemporary situation in an organisation, selected by the candidate, and presented in an academic context. The research paper may present the results of a survey or an evaluation of a particular advance in engineering management practice or the development of a new management strategy or an industrial case study or the description of an engineering management oriented computer software package.

ENGGEN 764 (15 Points)
Company Report

The student will be required to submit a report on a project supervised by a member of the academic staff. The project should relate to a contemporary situation in an organisation selected by the candidate and may take the form of an evaluation of advances in engineering management practices, the development of new management strategies or an industrial case study.

ENGGEN 796A (60 Points)
ENGGEN 796B (60 Points)
ME Thesis (Engineering)

A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in ENGGEN 796 A and B

ENGGEN 798A (60 Points)
ENGGEN 798B (60 Points)
Master of Operations Research Thesis

To complete this course students must enrol in ENGGEN 798 A and B

Engineering Science
Stage I
ENGSCI 111 (15 Points)
Mathematical Modelling 1

Introduction to mathematical modelling. Differentiation and integration (polynomials, trigonometric, exponential, logarithmic, hyperbolic and rational functions). Integration by parts, substitution and numerical integration. Differential equations and their solutions (including Euler's method). Complex numbers and roots of functions. Vector and matrix algebra, transformations, solving systems of linear equations. Modelling using probability.

Stage II
ENGSCI 205 (15 Points)
Special Topic
ENGSCI 206 (15 Points)
Special Topic
ENGSCI 211 (15 Points)
Mathematical Modelling 2

First and second order ordinary differential equations and solutions. Laplace transforms. Taylor series and series in general. Multivariate and vector calculus including divergence, gradient and curl. Further linear algebra. Eigenvalues and eigenvectors. Fourier series

and transforms. Application of the techniques through appropriate modelling examples. Introductory data analysis and statistics.

Prerequisite: ENGSCI 111 or ENGGEN 150

Restriction: ENGSCI 212, 213

ENGSCI 213 (15 Points)
Mathematical Modelling 2SE

Probability theory, random variables and distributions, statistics, linear algebra, discrete mathematics possibly including graph theory, trees and networks, optimisation.

Restriction: ENGSCI 211, ENGSCI 212

ENGSCI 233 (15 Points)
Computational Techniques and Computer Systems

Introduction to digital electronics, computer organisation and computational techniques. Digital gates, combinatorial and synchronous circuits, data representation, instruction sets, memory, hardware, interfacing. Numerical computation, numerical algorithms.

Prerequisite: ENGSCI 111 or ENGGEN 150, and 131 and ELECTENG 101

Corequisite: ENGSCI 211 or 213

Restriction: BIOMENG 233

ENGSCI 255 (15 Points)
Modelling in Operations Research

Emphasises the relationship between business and industrial applications and their associated operations research models. Software packages will be used to solve practical problems. Topics such as: linear programming, transportation and assignment models, network algorithms, queues, inventory models and simulation will be considered.

Prerequisite: 15 points at Stage I in Statistics or Mathematics or Engineering

Restriction: STATS 255

ENGSCI 263 (15 Points)
Modelling and Design 1

Introduction to concepts of modelling of engineering problems, including model formulation, dimensional analysis, solution procedures, comparisons with reality, and shortcomings, with examples from elementary mechanics, structures, hydrostatics, one-dimensional heat, diffusion and fluid motion. Further development of problem-solving skills and group project work. The use of computer tools in engineering design, including advanced spreadsheeting integrated with solid modelling.

Prerequisite: ENGSCI 111 or ENGGEN 150, and 115

Corequisite: ENGSCI 211 or 213

Restriction: ENGSCI 261, 262

Stage III
ENGSCI 305 (15 Points)
Special Topic
ENGSCI 306 (15 Points)
Special Topic
ENGSCI 311 (15 Points)
Mathematical Modelling 3

A selection from: ordinary differential equations, systems of equations, analytical and numerical methods, non-linear ODEs, partial differential equations, separation of variables, numerical methods for solving PDEs, models for optimisation, industrial statistics, data analysis, regression, experimental design reliability methods, regression.

Prerequisite: ENGSCI 211

Restriction: ENGSCI 312, 313, 314

ENGSCI 313 (15 Points)**Mathematical Modelling 3ECE**

Complex Analysis, including complex numbers, analytic functions, complex integration, Cauchy's theorem, Laurent series, residue theory; Laplace transforms; Modelling with partial differential equations, including electronic and electrical applications; Fourier Analysis, Fourier transform, Fast Fourier transform; Optimisation, including unconstrained and constrained models, linear programming and nonlinear optimisation.

Prerequisite: ENGSCI 211

Restriction: ENGSCI 311, 312, 314

ENGSCI 314 (15 Points)**Mathematical Modelling 3ES**

Mathematical modelling using ordinary and partial differential equations. Probability. Conditional probability, random variables as models of a population, common distribution models, the Poisson process, applications to reliability. Exploratory data analysis, confidence intervals, tests of hypothesis, t-tests, sample tests and intervals, paired comparisons. Introduction to one-way ANOVA. Linear and polynomial regression, regression diagnostics.

Prerequisite: ENGSCI 211

Restriction: ENGSCI 311, 312, 313, 321

ENGSCI 331 (15 Points)**Computational Techniques**

Numerical algorithms and their translation to computer code. A selection of topics from numerical solution of linear equations, eigen problems, ordinary differential equations, numerical integration, nonlinear equations, finite differences and partial differential equations.

Prerequisite: ENGSCI 233

Corequisite: ENGSCI 311 or 313 or 314

ENGSCI 343 (15 Points)**Continuum Mechanics**

Vector calculus and integral theorems. Continuum hypothesis, indicial notation, deformation, strain, traction, stress, principal directions, tensors, invariants, constitutive laws, isotropy, homogeneity. Navier-Stokes and Navier's equations. Isotropic elasticity, elastic moduli, plane stress and plane strain. Airy stress function, Viscous flow, simple solutions of the Navier-Stokes equations. Flow over flat plates, boundary layers. Ideal flow, velocity potential, stream function, 2-D flows.

Prerequisite: ENGSCI 263

Restriction: ENGSCI 341, 342

ENGSCI 355 (15 Points)**Applied Modelling in Simulation and Optimisation**

Use of optimisation modelling languages, simulation software and databases, with an emphasis on practical problem solving and laboratory-based learning.

Prerequisite: 15 points from ENGSCI 255, STATS 255

Restriction: OPSRES 385, 392

ENGSCI 363 (15 Points)**Modelling and Design 2**

Applications of elasticity and fluid dynamics theory to engineering problems including design and analysis of mechanical assemblies. Group projects to formulate design proposals, including costings for development and manufacture. Underlying Finite Element Modelling (FEM) and Continuum Mechanics concepts. Utilisation of 3D CAD and FEM software during both design and analysis phases.

Prerequisite: ENGSCI 343

Restriction: ENGSCI 342, 361

ENGSCI 391 (15 Points)**Optimisation in Operations Research**

Linear programming, the revised simplex method and its computational aspects, duality and the dual simplex method, sensitivity and post-optimal analysis. Network optimisation models, maximum flow, shortest path and spanning tree algorithms. Transportation, assignment and transshipment models, and the network simplex method.

Prerequisite: 15 points from ENGGEN 150, ENGSCI 111, MATHS 208, 230, 250, 253, and one of COMPSCI 101, ENGGEN 131, ENGSCI 131, MATHS 162, STATS 220

Restriction: STATS 391

Stage IV**ENGSCI 400A (15 Points)****ENGSCI 400B (15 Points)****Research Project**

An investigation carried out under the supervision of a member of staff on a topic assigned by the Head of Department of Engineering Science. A written report on the work must be submitted.

To complete this course students must enrol in ENGSCI 400 A and B

ENGSCI 405 (15 Points)**Special Topic****ENGSCI 406 (15 Points)****Special Topic****Postgraduate Courses****ENGSCI 701 (15 Points)****Studies in Engineering Science**

An advanced course on topics to be determined each year by the Head of Department of Engineering Science.

Prerequisite: Departmental approval required

ENGSCI 711 (15 Points)**Advanced Mathematical Modelling**

A selection of modules on mathematical modelling methods in engineering, including theory of partial differential equations, integral transforms, methods of characteristics, similarity solutions, asymptotic expressions, theory of waves, special functions, non-linear ordinary differential equations, calculus of variations, tensor analysis, complex variables, wavelet theory and other modules offered from year to year.

Prerequisite: ENGSCI 311 or 312 or 313 or 314

Restriction: ENGSCI 414, 415

ENGSCI 712 (15 Points)**Studies in Mathematical Modelling and Computation**

Advanced topics in mathematical modelling and computational techniques, including linear algebra and its applications (topics on singular value decomposition, ill-conditioning, orthogonal factorisation, least squares, eigen-problems and iterative methods), perturbation theory (topics on dimensional analysis, regular and singular perturbation analysis) and signal processing (topics on neural network models such as the multi-layer perception and self organising map).

Prerequisite: ENGSCI 314 and 331

Restriction: ENGSCI 416, 452

ENGSCI 721 (15 Points)**Advanced Numerical Methods**

An advanced course on finite elements, boundary elements and finite differences.

Prerequisite: Departmental approval required

ENGSCI 740 (15 Points)
Advanced Continuum Mechanics

Applications of continuum mechanics to problems in biomechanics, fluid mechanics and solid mechanics. Including topics such as large deformation elasticity theory applied to soft tissues, inviscid flow theory, compressible flows, viscous flows, meteorology, oceanography, coastal ocean modelling, mixing in rivers and estuaries. Fracture, composite materials and geomechanics.

Prerequisite: ENGSCI 363 or Departmental approval
Restriction: ENGSCI 440

ENGSCI 741 (15 Points)
Studies in Continuum Mechanics 1

Turbulence and turbulence modelling. Advanced numerical techniques in computational fluid dynamics (CFD). Application of CFD to environmental flows and aerodynamics. A variety of topics in engineering solid mechanics which could include composite materials, geomechanics, contact mechanics, fracture mechanics, rheology, thermomechanics, constitutive theory and computational methods.

Prerequisite: ENGSCI 363 or Departmental approval
Restriction: ENGSCI 442, 443

ENGSCI 742 (15 Points)
Studies in Continuum Mechanics 2

An advanced course in continuum mechanics covering topics in the mechanics of solids and fluids and other continua.

Prerequisite: Departmental approval required

ENGSCI 753 (15 Points)
Computational Techniques in Continuum Mechanics and Bioengineering

Theoretical and applied finite element and boundary element methods for static and time dependent problems of heat flow, bioelectricity and linear elasticity.

Prerequisite: ENGSCI 311 or 312 or 313 or 314
Restriction: ENGSCI 450, 451, 471

ENGSCI 760 (15 Points)
Algorithms for Optimisation

Meta-heuristics and local search techniques such as Genetic Algorithms, Simulated Annealing, Tabu Search and Ant Colony Optimisation for practical optimisation. Introduction to optimisation under uncertainty, including discrete event simulation, decision analysis, Markov chains and Markov decision processes and dynamic programming.

Restriction: ENGSCI 450, 451, 460

ENGSCI 761 (15 Points)
Computational Optimisation in Operations Research

Computational methods for solving optimisation problems, including branch and bound and cutting plane methods for integer programming and a selection of methods for convex, nonlinear and network optimisation, such as Lagrangean relaxation.

Prerequisite: 15 points from ENGSCI 391, STATS 391
Restriction: ENGSCI 450, 451, 460

ENGSCI 762 (15 Points)
Advanced Topics in Operations Research

A course of advanced topics arising in the practical application of optimisation models for machine and resource scheduling, routing applications, staff rostering and multiple objective functions.

Prerequisite: 15 points from ENGSCI 391, STATS 391
Restriction: ENGSCI 463

ENGSCI 763 (15 Points)
Advanced Simulation and Stochastic Modelling

Models for planning under uncertainty. Two-stage and multi-stage programs with recourse. Decomposition methods. Scenario construction and solution validation. Advanced simulation topics including uniform and non-uniform random variate generation, input distribution selection, discrete-event simulation models, how discrete-event simulation software works, output analysis, variance reduction, optimisation and simulation.

Prerequisite: 15 points from ENGSCI 391, STATS 391
Corequisite: ENGSCI 760
Restriction: ENGSCI 461, 464

ENGSCI 765 (15 Points)
Studies in Operations Research 1

An advanced course in recent developments in operations research and its applications.

Prerequisite: Departmental approval required

ENGSCI 766 (15 Points)
Studies in Operations Research 2

An advanced course in recent developments in operations research and its applications.

Prerequisite: Departmental approval required

ENGSCI 768 (15 Points)
Research Topics in Operations Research 1

Non-linear programming, advanced topics in operations research such as decomposition, integerisation, combinatorial optimisation, stochastic optimisation, game theory, smooth and non-smooth optimisation, multicriteria decision making.

Prerequisite: 15 points from ENGSCI 391, STATS 391
Corequisite: ENGSCI 760, 761
Restriction: ENGSCI 791, 792

ENGSCI 769 (15 Points)
Research Topics in Operations Research 2

Advanced topics in Operations Research.

Prerequisite: 15 points from ENGSCI 391, STATS 391
Corequisite: ENGSCI 760, 761

ENGSCI 772 (15 Points)
Whole Organ Modelling

Advanced computational modelling of whole organs with an emphasis on integrative physiology and coupled field problems in bioengineering. Finite deformation elasticity theory and computational aspects. Current flow in excitable tissue. Finite element collocation techniques. Coupled finite element – boundary element problems.

Prerequisite: PHYSIOL 210 or MEDSCI 205, ENGSCI 371 or BIOMENG 321
Restriction: ENGSCI 472

ENGSCI 787 (15 Points)
Project X

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ENGSCI 788A (15 Points)

ENGSCI 788B (15 Points)
Project Y

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in ENGSCI 788 A and B

ENGSCI 789 (30 Points)
Project Z

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ENGSCI 796A (60 Points)
ENGSCI 796B (60 Points)
ME Thesis (Engineering Science)
 A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.
To complete this course students must enrol in ENGSCI 796 A and B

Environmental Engineering

Stage II

ENVENG 244 (15 Points)
Environmental Engineering 1
 Water quality, water and wastewater characteristics – physical, chemical and biological treatments (unit operations and processes). Solid waste characteristics and disposal, hazardous waste treatment. Stormwater management.
Restriction: RESOURCE 244, ENVENG 243

Stage III

ENVENG 333 (10 Points)
Engineering Hydrology
 Hydrologic processes. Analysis of atmospheric and surface waters. Design for atmospheric and surface waters. Occurrence of groundwater. Groundwater levels and environmental influence. Groundwater movement. Well hydraulics and design.
Restriction: RESOURCE 333

ENVENG 341 (15 Points)
Environmental Engineering 2
 Examines natural environmental processes and their relevance to engineering. Soil and water chemistry, equilibrium and organic chemistry, microbiology, biochemistry and biological processes will be examined, focusing on the application of these in engineering design, practice and management.
Restriction: RESOURCE 341

ENVENG 342 (15 Points)
Environmental Engineering Design
 The applications of design practice in environmental engineering with a number of design projects. Elements of water and wastewater engineering. Landfill design and air pollution control.
Restriction: RESOURCE 342, ENVENG 405

ENVENG 343 (10 Points)
Environmental Engineering 3
 Industrial waste sources, impacts, characteristics and management measures; environmental impact assessment; design of sampling and methods of risk assessment; cost-benefit analysis.

Stage IV

ENVENG 402 (15 Points)
Special Topic in Environmental Engineering 1
 A course on a topic in environmental engineering to be determined each year by the Head of Department.
Restriction: RESOURCE 402

ENVENG 403 (15 Points)
Special Topic in Environmental Engineering 2
 A course on a topic in environmental engineering to be determined each year by the Head of Department.
Restriction: RESOURCE 403

ENVENG 407 (15 Points)
Special Topic in Environmental Engineering 3
 A topic in environmental engineering to be determined each year by the Head of Department.

ENVENG 419 (15 Points)
Design Project
 A design project requiring input from more than one engineering subdiscipline. The department will offer a number of projects from which the students may select. It will be possible for groups of students to work together on a project. Assessment will be based on a report and an oral presentation of the outcome of the project.
Restriction: RESOURCE 419

ENVENG 441 (15 Points)
Water and Wastewater Engineering
 Chemistry and microbiology of water and wastewater treatment, flow models and reactors. Unit operations and process analysis and design. Treatment plant design and operation. Nutrient removal processes. Effluent and residues disposal.
Restriction: RESOURCE 441

Postgraduate Courses

ENVENG 701 (15 Points)
Urban Stormwater Management
 Design and application of stormwater quantity and quality control approaches suitable for urban development. Includes device-specific design of systems such as detention ponds, constructed wetlands, and bioretention systems, green roofs and permeable/porous pavement, as well as integrated stormwater management planning known as Low Impact Development. Applies hydrologic principles and pollutant removal mechanisms to prevent or mitigate environmental impacts from urban stormwater runoff.
Prerequisite: ENVENG 244 and 333

ENVENG 702 (15 Points)
Studies in Environmental Engineering 2
 Advanced courses on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.
Restriction: RESOURCE 702

ENVENG 703 (15 Points)
Studies in Environmental Engineering 3
 Advanced course on topics to be determined each year by the Head of Department.

ENVENG 704 (15 Points)
Sustainable Resource Management
 Wide-ranging review of the issues and techniques required for the sustainable management of resources.
Restriction: ENVENG 404

ENVENG 741 (15 Points)
Hazardous Substance Management
 A review of topics in hazardous substance management including: substance classification, legislation and enforcement, storage and handling practices, occupational safety and health, emergency preparedness and response, risk evaluation and control.
Restriction: RESOURCE 741

ENVENG 744 (15 Points)
Environmental Engineering Processes Laboratory
 Laboratory research methods (safety, sampling procedures, sample preservation, data analysis and report writing). Laboratory experiments exploring

various physical, chemical and biological processes, such as sedimentation, chemical coagulation and precipitation, chlorination, reactor residence time distribution, activated carbon and anaerobic digestion.

ENVENG 745 (15 Points)

Modelling of Groundwater Flow and Pollutant Transport

Aquifer properties, principles of seepage and groundwater flow, solution techniques for two-dimensional flows, groundwater quality, contaminant transport in saturated and unsaturated media, biochemical transformation processes, multiphase flow and use of groundwater models.

ENVENG 746 (15 Points)

Surface Water Quality Modelling

Mass balance and steady state solutions for point and distributed loadings applied to rivers and lakes, feed-forward and feedback systems of reactors, mass transport in incompletely mixed systems, simple time-variable solutions, nutrient dynamics in water bodies and exchange with sediments, and eutrophication and toxic-substance modelling.

ENVENG 750 (15 Points)

Sustainability Engineering 2

An in-depth understanding of sustainability and engineering. The concept of sustainability engineering and engineering's relationship to global issues such as limitations on material and energy resources, pollution and global warming. Tools that engineers need to assist in resolving such problems, including design for environment, servicing, clean technologies and industrial ecology will be covered.

ENVENG 751 (15 Points)

Sustainable Technologies and Processes

Pollution prevention and clean engineering. Resource, waste and energy auditing, resource management, cost/benefit analysis of sustainable technologies, technology and process assessment and design and management of sustainable technologies and processes.

ENVENG 752 (15 Points)

Risk, LCA and Sustainability

The objectives of this course are to provide students with an understanding of sustainability, life cycle assessment, impact assessment and risk assessment and how these can be used to measure sustainability. The format will include discussions on sustainability, assessment methods and sustainability assessment, including scoping, sustainable levels, inventory, impact and risk assessment and mitigations measures.

ENVENG 753 (15 Points)

Sustainable Engineering Design

The principles of sustainable design, including design for environment, design for recycling, design for duration and design for reuse. Assessment of product design, appropriate product function, level of quality and life cycle. Students will be expected to provide input into effective, efficient and sustainable product design.

ENVENG 754 (15 Points)

Sustainability Engineering Seminar

A variety of relevant and current topics relating to sustainability engineering, including the impact of information technologies, GM engineering, nanotechnologies and other new engineering initiatives on society and means of ensuring that those technologies encourage sustainability. Students

will assess such issues and discuss the relevance to engineering, sustainability and future development of technology and society.

ENVENG 787 (15 Points)

Project X

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

Restriction: RESOURCE 787

ENVENG 788A (15 Points)

ENVENG 788B (15 Points)

Project Y

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

Restriction: RESOURCE 788

To complete this course students must enrol in ENVENG 788 A and B

ENVENG 789 (30 Points)

Project Z

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

Restriction: RESOURCE 789

ENVENG 796A (60 Points)

ENVENG 796B (60 Points)

ME Thesis (Environmental)

A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

Restriction: RESOURCE 796

To complete this course students must enrol in ENVENG 796 A and B

Mechanical Engineering

Stage II

MECHENG 211 (15 Points)

Thermofluids

The fundamentals of fluid mechanics, thermodynamics and heat transfer with practical applications to engineering devices and systems.

MECHENG 222 (15 Points)

Dynamics

Kinematics of particles, rectilinear and curvilinear motion, kinematics of rigid bodies in the plane. Kinetics of particles, systems of particles and rigid bodies. Impulse and momentum, mechanism motion in the plane. Vibration of a particle.

Prerequisite: 15 points from ENGGEN 121, 150

MECHENG 223 (15 Points)

Machines and Mechanisms

An introductory study of machines and mechanisms in terms of their function, design, manufacture and life. Aspects covered will include: gear trains, fluid power systems, electric motors, bearings, lubrication and wear, linkages, engines and manufacturing machines.

MECHENG 224 (15 Points)

System Dynamics Modelling, Simulation and Animation

The course introduces basics of modelling, simulation and animation of a dynamics of systems, structures, objects and devices. Simulations and animations lead to deeper understanding of dynamic phenomena in various fields of engineering as well as in economy, bio-medicine and sociology. The problems included throughout the course reinforce the mastery of both the theory and the practice of system dynamics.

MECHENG 234 (15 Points)**Engineering Design 2M**

Sound skills and principles of mechanical engineering design. Basics of engineering drawing. Introduction to Computer-aided design (CAD): geometrical and solid modeling methods. Design process as a problem-solving activity and the design of simple structural and machine elements, and systems. Design as a teamwork activity.

Prerequisite: ENGGEN 115 or (ENGGEN 110 and 111)

Restriction: MECHENG 232, 233

MECHENG 242 (15 Points)**Mechanics of Materials 1**

Statically determinate stress systems; stress – strain relations. Bending of beams: stress – moment and moment – curvature relations; beam deflections; buckling of struts. Shear in joints, couplings, beams and circular shafts. General analysis of plane stress. Introduction to failure criteria by yield and fracture. Safety factors.

MECHENG 270 (15 Points)**Software Design**

Fundamentals of software design and high-level programming making use of case studies and programming projects. Includes: requirements analysis, specification methods, software architecture, software development environments, software quality, modularity, maintenance, reusability and reliability; models of software development.

Stage III**MECHENG 311 (15 Points)****Thermal Engineering**

Second Law of Thermodynamics, entropy. Cycles and applications. Heat transfer, heat exchangers.

MECHENG 312 (15 Points)**Sensors and Actuators**

An introduction to mechatronics engineering and its main elements. Topics include interfacing and signal processing, sensors, actuators, control technologies, systems modelling, simulation and analysis.

Restriction: ELECTENG 428

MECHENG 313 (15 Points)**Real Time Software Design**

An introduction into the design of real time software addressing issues such as software design and specification, software life cycle methods, operating systems, programming in assembly and high-level languages, and simulation and analysis tools.

MECHENG 322 (15 Points)**Control Systems**

An introduction to classical control of mechanical and mechatronic systems. Topics include: transfer functions, block diagrams, time response characteristics, stability, sensitivity, frequency response characteristics, and controller design (eg, pole placement, lead-lag compensation, PID). Applications in MATLAB/Simulink and with physical systems.

MECHENG 325 (15 Points)**Machine and Structural Dynamics**

Kinetics: force-acceleration, work-energy, impulse momentum. Forced and transient vibration of single degree of freedom systems and applications. Multi-component systems. Free and forced vibration of two degree of freedom systems. Rigid body kinetics in 3D: the inertia tensor, Euler's equations, gyroscopic

motion. Flow induced vibrations: buffeting, vortex shedding, lock-in, flutter, galloping etc. Structural response and mitigating measures.

Restriction: MECHENG 324

MECHENG 334 (15 Points)**Engineering Design 3M**

Good practice and standard methods in mechanical engineering design. Conceptual and detailed design in projects involving machine elements, engineering sciences and engineering mechanics. Some of the advanced computer-aided tools (eg, CAD, CAM, CAE) will be introduced and utilised in some projects.

Prerequisite: MECHENG 234, or MECHENG 232 and 233

Restriction: MECHENG 332, 333

MECHENG 340 (15 Points)**Mechanics of Materials 2**

States of stress and strain at a point in a general stress system. Generalised stress – strain relations for linearly elastic isotropic and orthotropic materials. Axisymmetric stress systems, including thick walled pressure cylinders. Elementary plasticity, including flow rules for strain hardening materials and applications to metal forming processes. Fracture mechanics for brittle materials. Introduction to fibre composite materials.

Restriction: MECHENG 341

MECHENG 344 (15 Points)**Mechanical Wood Processing**

Plant layout and design. Environmental facilities design. Mechanical processing of wood. Wood product manufacturing techniques. Available only to students enrolled in the Wood and Woodfibre Composites option.

MECHENG 345 (15 Points)**Wood Physics and Mechanics**

States of stress and strain at a point, analysis of stress under conditions of plane stress and plane strain, generalised stress-strain relationships for linearly elastic, anisotropic materials. Elastic properties and ultimate strength of wood and wood products. Elementary physical and mechanical properties of wood and their variations in relation to structure. Design of timber structures. Available only to students enrolled in the Wood and Woodfibre Composites option.

Restriction: MECHENG 343

MECHENG 352 (15 Points)**Manufacturing Systems**

An introduction to the procedures and technological aspects of typical manufacturing systems; basic concepts of plant and work design; automation; planning, implementation; simulation, and monitoring of production processes; project-based introduction to the tools and techniques applied by professional engineers in modern manufacturing plants.

Restriction: MECHENG 351

MECHENG 370 (15 Points)**Analog Circuit Design**

An introduction to the design, analysis and implementation of electronic circuits or systems for various applications such as signal conditioning, interfacing, high power control and thermal management. These include PCB design and testing.

MECHENG 371 (15 Points)**Digital Circuit Design**

Introduction to a variety of techniques in digital system design ranging from simple combinational logic to finite state machines. Students will be exposed to the

use of FPGA to rapid prototype digital systems using schematic and hardware description language entries. The rapid prototyping approach accurately reflects contemporary practice in industry.

Stage IV

MECHENG 401 (15 Points)

Special Topic in Mechanical Engineering 1

Courses on special topics are to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 402 (15 Points)

Special Topic in Mechanical Engineering 2

Courses on special topics are to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 405 (15 Points)

Mechatronics Systems

Modelling and analysis of electro-mechanical systems, including MEMS. Fundamentals of digital control and systems applied to mechanical systems. Introduction to signal integrity as applicable to high-speed circuit design. Sensor and actuator designs using smart materials.

Prerequisite: MECHENG 312

MECHENG 406 (15 Points)

Mechatronics Design

A range of projects that demonstrate the application and integration of the material taught in lecture courses to create practical intelligent products and manufacturing processes.

MECHENG 409 (15 Points)

Industrial Automation

Automation technologies used in the manufacturing and processing industry. Topics include: robotics, PLCs, industrial process visualisation, data collection and supervisory control, robot sensors, computer vision systems, automated assembly systems, condition monitoring.

Prerequisite: MECHENG 312

MECHENG 411 (15 Points)

Building Services

Principles and practice of heating, ventilation, air-conditioning and refrigeration (HVAC&R), psychrometry, heating/cooling loads, mass transfer and air quality, refrigeration/heat pump systems, cooling towers, pumps, fans, valves, pipes and ducts.

MECHENG 412 (15 Points)

Aerohydrodynamics

The study of fluid mechanics relevant to external flows, eg, wind turbines, yachts, aircraft or wind loadings on buildings, boundary layers, computational fluid dynamics.

MECHENG 413 (15 Points)

Energy Technology

Industrial thermodynamics and energy conversion/efficiency, power cycles, availability and irreversibility, simple combustion analysis, mass transfer, energy studies, boiling and condensation.

MECHENG 421 (15 Points)

Dynamics, Vibrations and Spectral Analysis

Vibrations – causes and effects; multiple degree of freedom and continuous systems, modal analysis, analytical, approximate and numerical methods. Analytical mechanics, receptance modelling. Random

signals, spectral analysis, digital spectral analysis, aliasing, leakage, random vibrations. Vibrations instrumentation, measurement and testing. Vibration treatment. Applications.

MECHENG 423 (15 Points)

Digital and Computer Control

Advanced control of mechanical and mechatronic systems. Topics include: state-space representations, linearisation, discretisation, stability, state feedback control design, optimal control, state estimation and Kalman filters. Applications in MATLAB/Simulink and with physical systems.

MECHENG 425 (15 Points)

Acoustics for Engineers

Wave equations, sources, directionality; behaviour of sound waves. Principles of active control for sound. The ear and hearing system. Measurement of sound fields. Philosophy of annoyance. Legal and Standards requirements. Sound fields in enclosures. Mass Law. General insulation equation. Materials as absorbers and reflectors, room acoustics, requirements in auditoria, sound system design principles and transducer performance.

MECHENG 431 (15 Points)

Engineering Design 4M

A variety of engineering projects requiring the development and communication of design solutions to a professional standard, and using a wide range of advanced engineering methods.

MECHENG 441 (15 Points)

Composite Materials

Properties and mechanics of composite materials. Manufacture, analysis and design of composite laminates; sandwich composites.

MECHENG 444 (15 Points)

Chemical Wood Processing

Wood drying and preservation. Chemical processing operations important to wood-based industry. Recent advances in chemical modification of wood.

Prerequisite: MECHENG 343 or 345

MECHENG 445 (15 Points)

Woodfibre Composites

Introduction to wood-based composite materials, their processing, properties and design issues. Glued wood products. Woodfibre reinforced polymeric composites.

Prerequisite: MECHENG 343 or 345

MECHENG 446 (15 Points)

Management for Wood Products Manufacturing

Relationship between a manufacturing enterprise and the business environment. Business statistics and quality control. Quality improvement. Wood products marketing. Job costing and engineering economics. Customer research methods. Wood product development.

MECHENG 447 (15 Points)

Manufacturing and Industrial Processes

Theory of plasticity; material characterisation; process analyses; extrusion, wire drawing, forging, rolling; metal cutting: thin shear model and Merchant's diagram, tool wear and tool life; sheet forming; forming limit diagram; thermal analyses of industrial operations including transient conduction and drying; casting; polymer processing; basic polymer science: thermosets and thermoplastics, profile extrusion, sheet extrusion;

blown-film extrusion, filament extrusion, blow moulding.

Restriction: MECHENG 342

MECHENG 451 (15 Points)
Technology Management

An appreciation of the strategic systems and technology management aspects of manufacturing systems. Industry based projects that explore the design and optimisation of manufacturing operations form a major part of the course.

Prerequisite: MECHENG 351 or 352

MECHENG 461A (15 Points)

MECHENG 461B (15 Points)

Research Project

A comprehensive investigation leading to an oral presentation, a display and a report on a topic assigned by the Head of Department of Mechanical Engineering.

To complete this course students must enrol in MECHENG 461 A and B

MECHENG 462A (15 Points)

MECHENG 462B (15 Points)

Mechatronics Project

An innovative mechatronics project covering the research and design phases of problem analysis, specification and conceptual design, detailed design, prototype implementation and verification.

Restriction: MECHENG 407, 408

To complete this course students must enrol in MECHENG 462 A and B

Postgraduate Courses

MECHENG 701 (15 Points)

Studies in Mechanical Engineering 1

Advanced courses on topics to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 702 (15 Points)

Studies in Mechanical Engineering 2

Advanced courses on topics to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 711 (15 Points)

Computational Fluid Dynamics

The application of computational methods to fluid dynamics and heat transfer. Finite volume and finite difference methods. Convergence and stability. Mesh generation and post-processing. Application of commercial computer programs to industrial problems.

MECHENG 714 (15 Points)

Wind Engineering

The wind-loading chain – planetary boundary-layer flow, extreme winds, wind structure, wind loads, dynamic response, bluff body aerodynamics, vortex shedding, aero-elasticity, wind-tunnel testing, pedestrian level winds.

MECHENG 716 (15 Points)

Internal Combustion Engines

Combustion processes; calculations for Diesel and Otto cycles; ideal, fuel-air and real cycles; use of alternative fuels as supplements or replacements.

MECHENG 717 (15 Points)

Advanced Thermal Systems

Fundamentals of advanced thermodynamics-cycles and

applications, heat and mass transfer, psychrometry, refrigeration and air-conditioning, combustion, thermal system design and simulation.

MECHENG 721 (15 Points)

Mechanical Control Systems

A control problem of interest to both the student and the lecturer will be identified. Appropriate techniques are then sought for its solution.

MECHENG 725 (15 Points)

Structural Acoustics

Structural vibration at higher frequencies, vibration transmission and control. Wave motion and modal analysis. Structural intensity and statistical energy analysis.

MECHENG 729 (15 Points)

Machine Learning and Fuzzy Systems

The problems of learning from experimental data (support vector machines and neural networks) and the problem of embedding human knowledge into mathematical expressions (fuzzy logic) are covered. Learning from noisy sparse data patterns (examples) will be put in the framework of the theory of approximations of multivariate functions.

MECHENG 732 (15 Points)

Computer Graphics and Visualisation

Fundamentals of computer graphics and visualisation as related to applications in engineering, such as solid and surface modelling and computational fluid dynamics. Principles of graphics programming, user interface design and implementation. Students should be familiar with C, C++ or Java.

MECHENG 741 (15 Points)

Advanced Mechanics of Materials

Introduction to theory of elasticity: stress functions with applications to problems of contact stresses, stress concentrations and torsion of prismatic bars. Thin plates and shells. Theory of viscoelasticity.

MECHENG 742 (15 Points)

Advanced Materials Manufacturing

Polymer and composites manufacturing; properties and processing of polymers and reinforcing materials. Analysis of selected manufacturing processes; injection moulding, extrusion, liquid composites moulding, pultrusion. Consideration of viscous flow, flow through porous media and heat transfer.

MECHENG 751 (15 Points)

Advanced Manufacturing Technology

A project based study of advanced manufacturing technology. Projects cover selected topics that deal with the integrated use of CAD/CAPP/CAM, CIM, industrial robots, workstations, machine tools, materials handling and control systems.

MECHENG 753 (15 Points)

Manufacturing Information Systems

A study of new or emerging information technologies and their applications in manufacturing enterprises. The focus is on product modelling technologies based on STEP, and intelligent and interoperable manufacturing systems. The targeted applications are computer numerically controlled machine tools. Basic knowledge of Object-Oriented Programming and database techniques is a necessity. Students should also have basic programming skills, eg, C++.

MECHENG 758 (15 Points)**Special Topic in Engineering Management 1**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area of engineering management in consultation with the programme coordinator.

Students must be enrolled in the MEMgt programme.

MECHENG 759 (15 Points)**Special Topic in Engineering Management 2**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area of engineering management in consultation with the programme coordinator.

Students must be enrolled in the MEMgt programme.

MECHENG 760 (15 Points)**Special Topic in Technology Management 1**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area of technology management in consultation with the programme coordinator.

Students must be enrolled in the MEMgt programme.

MECHENG 761 (15 Points)**Special Topic in Technology Management 2**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area of technology management in consultation with the programme coordinator.

Students must be enrolled in the MEMgt programme.

MECHENG 787 (15 Points)**Project X**

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

MECHENG 788A (15 Points)**MECHENG 788B (15 Points)****Project Y**

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in MECHENG 788 A and B

MECHENG 789 (30 Points)**Project Z**

A student is required to submit a report on a topic assigned by the appropriate Head of Department.

MECHENG 796A (60 Points)**MECHENG 796B (60 Points)****ME Thesis (Mechanical)**

A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in MECHENG 796 A and B

Software Engineering**Stage II****SOFTENG 206 (15 Points)****Software Development Craft**

Project work. Skills and tools in systematic development of software, including testing, version control, build systems, working with others.

Prerequisite: SOFTENG 250, 251

SOFTENG 211 (15 Points)**Software Engineering Theory**

Sets, languages, operations on languages. Deterministic and nondeterministic automata. Designing automata. Determinisation. Regular expressions. Induction and Recursion. Program correctness. Counting. Elements of graph algorithms.

Prerequisite: ENGGEN 131 or COMPSCI 101

SOFTENG 250 (15 Points)**Introduction to Data Structures and Algorithms**

Introduction to the analytical and empirical behaviour of basic algorithms and data structures.

Prerequisite: ENGGEN 131 or COMPSCI 101

Corequisite: ENGSCI 213

SOFTENG 251 (15 Points)**Object Oriented Software Construction**

An introduction to Object Oriented software development. Programming with classes; objects and polymorphism. Evolutionary and test-driven development. Analysis and design. Modelling with UML. Design patterns. Design for reuse, for testing, and for ease of change.

Prerequisite: ENGGEN 131 or COMPSCI 101

SOFTENG 254 (15 Points)**Quality Assurance**

Software verification and validation. Static and dynamic QA activities as part of the software lifecycle. Unit, integration, system, performance and usability testing. Use of automation and tools to support testing activities. Metrics to quantify strength of testing and complexity of programs.

Prerequisite: SOFTENG 250, 251

Stage III**SOFTENG 306 (15 Points)****Team Project**

Working in project teams to develop software to meet changing requirements for a large application. Project Planning. Requirements gathering. Estimating, costing and tracking. Acceptance and unit testing. Evolutionary design and development. Collaborative development tools.

Prerequisite: SOFTENG 254, 350, 351

SOFTENG 325 (15 Points)**Software Architecture**

Taxonomy of software architecture patterns, including client/server and multi-tier. Understanding quality attributes. Methodologies for design of software architectures. Technologies for architecture level development, including middleware.

Prerequisite: 15 points from SOFTENG 350, COMPSYS 302

SOFTENG 350 (15 Points)**Human Computer Interaction**

Human behaviour and expectations. User interface design. User centred design. Usability evaluation techniques for web and standard interfaces. Constructing web and graphical user interfaces.

Prerequisite: SOFTENG 206

SOFTENG 351 (15 Points)**Fundamentals of Database Systems**

Relational model, Relational Algebra, Relational Calculus, SQL, SQL and Programming Languages, Entity Relationship Model, Normalisation, Query Processing and Query Optimisation, ACID Transactions,

Transaction Isolation Levels, Database Recovery, Database Security, Databases and XML.
Prerequisite: SOFTENG 211 or COMPSCI 225

SOFTENG 364 (15 Points) **Computer Networks**

Principles of data communications; representation, transmission. Physical layer, signals in time and frequency domain. Modulation and coding. Data layer and protocols. Layered architecture model of computer networks, OSI & TCP/IP, Flow control, error control. Local area networks and IEEE standards, Ethernet and Wireless LAN. Circuit, message and packet switching. The Internet protocol (IPv4 and IPv6), routing algorithms, design of subnets. TCP and UDP. Network security. Introduction to ATM.

Prerequisite: 15 points from COMPSYS 201, SOFTENG 252 and 15 points from SOFTENG 206, 211, 250, 251, 254, 325

SOFTENG 370 (15 Points) **Operating Systems**

History of operating systems. Multi-user systems. Scheduling. Concurrent processes, threads and synchronisation. Memory allocation and virtual memory. Managing files, disks and other peripherals. Security, protection and archiving. Engineering distributed systems; location, migration and replication transparency. Real-time programming and embedded systems.

Prerequisite: COMPSYS 201 or SOFTENG 252, 250

Supervised research that represents the personal scholarly work of a student based on a coherent area of inquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or scope of practice.

To complete this course students must enrol in CLINED 793 A and B

CLINED 796A (60 Points)**CLINED 796B (60 Points)****Thesis**

Prerequisite: POPLHLTH 701 or equivalent

To complete this course students must enrol in CLINED 796 A and B

CLINED 797A (60 Points)**CLINED 797B (60 Points)****Research Portfolio**

Supervised research that represents the personal scholarly work of a student based on a coherent area of inquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or scope of practice.

To complete this course students must enrol in CLINED 797 A and B

Health Informatics

Postgraduate Courses**HLTHINFO 722 (15 Points)****Special Topic****HLTHINFO 723 (15 Points)****Health Knowledge Management**

The objective of this course is to develop an ability to analyse the role and dynamics of knowledge in the working environment in the health sector, and to develop aspects of knowledge infrastructure.

Restriction: COMHLTH 724, POPLHLTH 723

HLTHINFO 724 (15 Points)**Special Topic****HLTHINFO 728 (15 Points)****Principles of Health Informatics**

The study of information technology and information management concepts relevant to the delivery of

high quality and cost-effective healthcare. Theoretical frameworks such as data management, decision support, strategic planning and implementation, change management, knowledge management and privacy and other ethical aspects of health informatics are included.

Restriction: COMHLTH 742, POPLHLTH 728

HLTHINFO 730 (15 Points)**Healthcare Decision Support Systems**

Familiarises students with the main developments of decision support systems in healthcare. The theoretical concepts and the technology including data mining, clinical decision support systems, diagnostic systems and decision support in managed care are outlined. Ethical issues are also addressed.

Restriction: COMHLTH 747, POPLHLTH 730

Health Management

Postgraduate Courses**HLTHMGT 791 (60 Points)****HLTHMGT 791A (30 Points)****HLTHMGT 791B (30 Points)****Dissertation**

A topic related to health management or organisation.

To complete this course students must enrol in HLTHMGT 791 A and B, or HLTHMGT 791

Health Psychology

Stage I**HLTHPSYC 122 (15 Points)****Behaviour, Health and Development**

Introduction to the relationship between behaviour and the major biological, cognitive and social-emotional processes, applying them to health and development across the life span. Focuses on aspects of behaviour and development particularly relevant for the health care professional.

Restriction: HUMANBIO 122, POPLHLTH 122

Postgraduate Courses**HLTHPSYC 714 (15 Points)****Health Psychology**

A review of the psychological factors involved in health and illness. Topics include: the understanding of patient behaviour in medical settings, preventative health behaviour, cognitive models of illness, stress and illness, communication and adherence to treatment, the psychology of physical symptoms and coping with chronic disease.

HLTHPSYC 715 (15 Points)**Research Methods in Health Psychology**

A review of the principal methods used in the design, conduct and analysis of studies in the health psychology area. This will focus on quantitative research, but qualitative methodologies will also be addressed.

HLTHPSYC 716 (15 Points)**Psychoneuroimmunology**

Outlines the nature of the human immune system, its measurement and limitations of current practices and models. The main focus of the course is the extent to which psychological processes such as stress, emotions, and social interactions have been found

to influence immune behaviour and the implications of these findings for health and wellbeing. Various theoretical frameworks through which psycho-immune relationships might be understood are presented and discussed.

HLTHPSYC 742A (15 Points)

HLTHPSYC 742B (15 Points)

Professional Practice in Health Psychology

Focuses on the professional intervention skills necessary to practice health psychology. Topics include: interviewing and assessment skills, formulation of problems, design and evaluation of interventions and models for interdisciplinary and multidisciplinary functioning. Relevant contexts include: hospitals, hospices, consultancies, general practice etc.

To complete this course students must enrol in HLTHPSYC 742 A and B

HLTHPSYC 743 (15 Points)

Psychopathology and Clinical Interviewing

Common psychological disorders encountered in clinical practice and health settings. Practical teaching of clinical interview and diagnostic skills is completed in class.

HLTHPSYC 744 (15 Points)

Research Topic in Health Psychology

Offers the opportunity for academic staff to provide a specific course of study for one or several students. It is available only by arrangement between the staff member(s) and students.

HLTHPSYC 745A (45 Points)

HLTHPSYC 745B (45 Points)

Practicum in Health Psychology

A practical component of supervised applied work of not less than 1,500 hours in approved health settings, and other work as required. A detailed written report of the work undertaken will be required of the student.

To complete this course students must enrol in HLTHPSYC 745 A and B

HLTHPSYC 757 (15 Points)

Psychosomatic Processes

Focuses on the psychological, social and biological mechanisms behind illnesses that present with medically unexplained symptoms. Such illnesses include: chronic fatigue syndrome, chronic pain, irritable bowel syndrome and the somatoform disorders. The diagnostic controversy surrounding these disorders and treatment approaches for these conditions will be addressed.

HLTHPSYC 758 (15 Points)

Special Topic in Health Psychology

HLTHPSYC 796A (60 Points)

HLTHPSYC 796B (60 Points)

MSc Thesis in Health Psychology

To complete this course students must enrol in HLTHPSYC 796 A and B

Health Sciences

Diploma Courses

HLTHSCI 600 (15 Points)

Research Essay

A substantial supervised essay centred in a culture of practice and written on a topic approved by the Director of the Graduate Diploma in Health Sciences Programme. The student is required to demonstrate

mastery of the relevant subject matter; to evaluate the findings and discussions in the literature; to research, analyse and argue from evidence; to apply the knowledge gained; and to engage in rigorous intellectual analysis.

Māori Health

MAORIHTH 10H (15 Points)

Introduction to Human Biology

An introduction to human biology through a study of the structure and function of mammalian organ systems with special reference to humans. Topics of particular focus include: skin and derivatives, digestive, nervous, reproductive, bone, muscle and circulatory systems. This course also exposes students to learning in a laboratory environment with a strong focus on microscope work and dissection.

Restriction: MPHEALTH 10H

MAORIH11H (15 Points)**Introduction to Physical Sciences for Health**

Covers the basic physico-chemical principles and concepts relevant to an understanding of biological systems.

Restriction: MPHEALTH 11H

MAORIH12H (15 Points)**Introduction to Population Health**

The social and contextual aspects of health. Introduces the techniques and approach of the social sciences with special reference to health and society, healthcare systems, and epidemiology. Topics include models for understanding health, health inequalities and inequities, determinants of health, healthcare systems, particular aspects of Aotearoa New Zealand's healthcare system, elements of epidemiology, the study of individuals, groups and people and the application of such studies in healthcare.

Restriction: MPHEALTH 12H

MAORIH13H (15 Points)**Introduction to Māori Health**

Introduces health issues important to Māori within Aotearoa New Zealand. Topics include Māori models of health, structure of the Māori population, health status of Māori, Māori rights as Tangata Whenua, similarities and differences with Pacific peoples, determinants that lead to health inequalities, differences in access to and through healthcare and interventions to address Māori health needs. Aspects of Māori tikanga and Pacific culture will also be studied.

Restriction: MPHEALTH 13H

MAORIH14H (15 Points)**Introduction to Pacific Health**

Introduces health issues important to Pacific peoples within Aotearoa New Zealand. Topics include Pacific models of health, structure of the Pacific population, health status of Pacific peoples, similarities and differences between Pacific peoples and Māori, determinants that lead to health inequalities, differences in access to and through healthcare and interventions to address Pacific health needs. Aspects of Pacific culture and Māori tikanga will also be studied.

Restriction: MPHEALTH 14H

MAORIH15H (15 Points)**Introduction to Chemistry**

Fundamentals of chemistry are explored with a view to enhancing appreciation of the chemical nature of the world around us as well as providing the foundation for further study in chemistry. Special attention is paid to familiarisation with the language of chemistry and the chemist's perspective of the properties of matter and its transformations.

Restriction: MPHEALTH 15H

MAORIH16H (15 Points)**Introduction to Physics**

An introduction to physics relevant to biological systems, including examples and illustrations that revolve around biological systems. Topics include mechanics, optics, waves, radiation and electricity. Mathematical knowledge of measuring, notation, functions, equations, exponential growth/decay and logarithms is required for the course.

Restriction: MPHEALTH 16H

MAORIH18H (15 Points)**Foundation Studies in Medical and Health Sciences**

Assists in preparing students for Stage I courses in the

medical and health science fields. Special attention is paid to topics not covered in other CertHSc courses including Chemistry, Biology for Biomedical Science and Population Health.

MAORIH19H (15 Points)**Academic and Professional Development**

Presents the study and writing skills required to complete the Certificate in Health Sciences and in preparation for ongoing tertiary study. Topics will be based around Māori and Pacific health workforce development and career planning and will include library and research workshops, study skills for the sciences, academic writing, communication skills, presentation skills, and test/examination techniques.

MAORIH20H (15 Points)**Introduction to Mathematics for Health**

A mathematical foundation for studies in health sciences to assist students develop mathematical thinking and discipline. Topics covered include measuring, notation, functions, equations, exponential growth/decay, logarithms and statistics. Examples used in the course will revolve around applications of mathematics in the health sciences.

Stage III**MAORIH301 (15 Points)****Māori Health**

Models of health and well-being that are promoted in relation to Māori and non Māori in Aotearoa New Zealand are examined and critiqued. The effect of these models on health outcomes is considered.

Prerequisite: POPLHLTH 210

Restriction: POPLHLTH 201

Postgraduate Courses**MAORIH701 (15 Points)****Foundations of Māori Health**

Provides an overview of the many dimensions of Māori Health. It examines the historical and contemporary determinants of Māori health status, and outlines strategies for improving Māori health in the context of the Treaty of Waitangi, and reducing health inequalities.

Restriction: COMHLTH 711, MPHEALTH 718

MAORIH702 (15 Points)**Māori Models of Health Practice**

Māori models of assessment, treatment, healing and health. Students will carry out assessments with Māori clients, whanau, and communities to achieve improved treatment, recovery and health outcomes for Māori. Students will recognise the diversity of Māori clients and will be able to work individually and collectively with different Māori groups to achieve the requested outcomes.

Restriction: MPHEALTH 712

MAORIH703 (15 Points)**Māori Concepts of Health and Mental Illness**

Explores Māori understandings of mental illness within the framework of Māori conceptualisations of health, such as Whare Tapa Wha. Other cultural frameworks of health and mental illness such as DSM IV and the biopsychosocial model of well-being will be examined.

Restriction: MPHEALTH 710

MAORIHTH 704 (15 Points)

Māori Mental Health Development

Reviews the social, political, economic and cultural influences on Māori mental health. Policy developments and projects for the promotion of Māori mental health will be assessed within a public health perspective and in relation to Te Tiriti o Waitangi.

Restriction: MPHEALTH 711

MAORIHTH 705 (15 Points)

Māori Health Promotion and Early Intervention

Discusses the importance of health promotion and early intervention for Māori. Models of health promotion used by different Māori providers will be presented as well as assisting students to design and implement health promotion and interventions which are likely to be effective for Māori individuals, families, and communities.

Restriction: MPHEALTH 715

MAORIHTH 706 (15 Points)

Māori Health: Policies and Outcomes

Examines current policies for Māori health and Māori responses to them.

Restriction: COMHLTH 712, MPHEALTH 719

MAORIHTH 707 (15 Points)

Practicum in Māori Health

Provides the opportunity to develop social assessment and critical analysis skills through the documentation of an approved practicum. Students will be expected to be able to use and demonstrate knowledge of different Māori views, concepts and frameworks. Each student will have supervision and practicum developed appropriate to their learning interests.

Restriction: MPHEALTH 714

MBChB

Part II

Note: MBChB students must complete 120 points in Part I before enrolling in Part II.

MBCHB 203 (15 Points)

The Musculoskeletal System

Integrated study of the human musculoskeletal system with emphasis on the structural and functional aspects that underpin common clinical problems such as:

fractures; soft tissue, nerve and joint injuries; hernias; osteo- and rheumatoid-arthritis; and osteoporosis. Practical work links anatomy, radiology, physiology and pathology and includes appropriate clinical skills.

MBCHB 205 (15 Points)

The Digestive System

The structure and function of the gastrointestinal system in health and disease, with relevant clinical examples. Multidisciplinary study of digestion and absorption of food components, their metabolic roles and actions, and the nutritional significance of dietary components. Includes fundamental anatomical, biochemical and pathological principles of gastrointestinal structure, digestion and nutrition.

MBCHB 206 (15 Points)

The Genito-urinary System

Multidisciplinary approach to the normal and abnormal structure and function of the renal and genital systems, including an overview of important diseases, their therapy, and population and behavioural perspectives. Clinically important examples and relevant clinical examination skills will be taught.

MBCHB 209A (15 Points)

MBCHB 209B (15 Points)

Principles of Medicine

Introduction to the description and pathogenesis of general disease processes as a basis for the systematic study of human disease. The application of genetics and genomics in medicine. General principles and mechanisms of drug action and therapeutic intervention in the management of human illness. Clinical examples and leading research will be used to explore these areas.

To complete this course students must enrol in MBCHB 209 A and B

MBCHB 210 (25 Points)

The Cardiorespiratory System

Multidisciplinary approach to the scientific basis of normal and abnormal structure and function of the human heart, airways, lungs and vascular system. This is focused around clinically-important cardiovascular and respiratory conditions and includes relevant clinical examination skills linked to practical exploration of relevant anatomy, radiology, physiology and pathology. Population, behavioural and therapeutic aspects will also be considered.

Restriction: MBCHB 202, 204

MBCHB 211A (10 Points)

MBCHB 211B (10 Points)

Professional, Clinical and Communication Skills 1

Multidisciplinary approach to the development of personal, professional, clinical and communication skills needed to be an effective medical practitioner. Topics include: ethics, communication skills, personal development, health promotion and consideration of cultural issues, with an emphasis on clinically-relevant interactions and scenarios.

Restriction: MBCHB 207

To complete this course students must enrol in MBCHB 211 A and B

Part III

MBCHB 303 (15 Points)

Reproduction, Development and Ageing

An integrated study of the biology of reproduction, development and endocrinology. Emphasis is placed on

understanding the endocrine regulatory mechanisms of the hypothalamic/pituitary/gonadal axis and the control of oogenesis and spermatogenesis, on the endocrinology and physiology of the menstrual cycle and pregnancy, and on the control of growth, development and aging from conception through puberty, menopause and beyond. Throughout there is a strong emphasis on clinical relevance and clinical sessions are an important component of the course.

MBCHB 305 (15 Points)
Regulation of Body Function

An integrated treatment of the regulation of human body function and its modification by drugs. Topics include: the regulation of gastrointestinal function; electrolytes and fluid volume; cardiovascular function; respiration; energy balance and body weight; body temperature; and the physiology of exercise. Clinical problem sessions are an important component and common illnesses are analysed to demonstrate that knowledge of normal function provides a basis for understanding and managing these disorders.

MBCHB 306 (15 Points)
Blood, Immunity and Infection

An integrated and multidisciplinary approach to the normal and abnormal function of the haematopoietic and immune systems, and how bacteria and viruses produce infections. Teaching and learning will be based around clinical examples and will include instruction in relevant examination skills.

MBCHB 311 (15 Points)

MBCHB 311A (7.5 Points)

MBCHB 311B (7.5 Points)

Medical Humanities

A variety of options from the study of medical humanities.

To complete this course students must enrol in MBCHB 311 A and B, or MBCHB 311

MBCHB 312A (15 Points)

MBCHB 312B (15 Points)

Professional, Clinical and Communication Skills 2

This builds on the Part II course. There is an emphasis on developing and applying the key professional, clinical and communication skills for medicine in the clinical context. The course culminates in a hospital-based clinical medicine attachment.

Restriction: MBCHB 307, 310

To complete this course students must enrol in MBCHB 312 A and B

MBCHB 313 (30 Points)
The Nervous System

A coordinated multidisciplinary approach to the central and peripheral nervous systems and the systems of the head and neck including the special senses. It provides a scientific understanding of normal and abnormal structure and function of the nervous system and associated systems. Clinical problem solving and clinical examination skills are important aspects of this course.

Restriction: MBCHB 301, 302

Stage IV

MBCHB 401A (60 Points)

MBCHB 401B (60 Points)

MBChB Part IV

During Part IV, students spend thirty weeks in seven clinical attachments, in emergency medicine,

anaesthesia, locomotor, psychiatry, general practice, medicine and surgery. These attachments are complemented by six weeks of topic teaching on campus. There is also a compulsory Māori and Pacific Health module.

To complete this course students must enrol in MBCHB 401 A and B

Stage V

MBCHB 501A (60 Points)

MBCHB 501B (60 Points)

MBChB Part V

Students spend thirty weeks in clinical attachments. These are obstetrics and gynaecology, specialty medicine, geriatric medicine, paediatrics, general practice, and specialty surgery. There is a four week selective experience and projects in professional development to be completed. There are five weeks of topic teaching on campus, including a Population Health week. Students may undertake the majority of the study-year in a rural/regional setting.

To complete this course students must enrol in MBCHB 501 A and B

MBCHB 551A (60 Points)

MBCHB 551B (60 Points)

MBChB Part VI

The 42 week trainee intern year includes an 'elective' period when students may undertake optional training in an area of medicine of their choice. The remaining weeks are spent practising under supervision, in hospitals and community facilities. Students undertake patient care in the disciplines of medicine, surgery, psychiatry, general practice, paediatrics, and obstetrics and gynaecology. Students must also complete an advanced cardiac life support course, a module in radiology, and a surgical skills course.

To complete this course students must enrol in MBCHB 551 A and B

Medical Science

Stage I

MEDSCI 100G (15 Points)

Human Mind and Body Relationships

Humans share with other living things the features of physical self-generation and adaptation to the environment. Humans also live in a mental (mind) world and maintain relationships with our perceived environments. Minds and bodies mutually affect one another. This mind/body dance, which is explored in this course, is what gives rise to all of human behaviour from simple daily activities to the highest forms of creativity.

MEDSCI 101G (15 Points)

Environmental Threats to Human Health

Our environment sustains our lives but at times threatens our health. These threats may occur naturally, or arise from damage we have inflicted on the environment. This course considers health impacts of climate change, pollution, lifestyle choices, poverty and affluence, workplace hazards, emerging infectious diseases, and dangers affecting cancer risk.

MEDSCI 142 (15 Points)

Biology for Biomedical Science: Organ Systems

Introduction to human biology with particular emphasis on integrated organ function. The course will deal with:

structures and processes associated with the function of the nervous, locomotor, cardiovascular, respiratory, digestive, renal, endocrine, musculoskeletal and reproductive systems.

Restriction: HUMANBIO 142

Stage II

MEDSCI 201 (15 Points)

Human Structure and Function

Presents the structure of biological systems with special reference to human biology, from the levels of histology through to gross anatomy. Specific examples of the correlation between structure and function will be considered. An introduction to current techniques for the visualisation of biological structure will be presented.

Prerequisite: 30 points from BIOSCI 107, HUMANBIO 142, MEDSCI 142

Restriction: ANATOMY 201

MEDSCI 202 (15 Points)

Microbiology and Immunology

An introduction to the nature and roles of bacteria, viruses, fungi and parasites as the causative agents of human diseases. Topics include: the defence mechanisms of the body, the immune system including autoimmunity and allergy, control of disease by antimicrobials, sterilisation, disinfection and infection control practice.

Prerequisite: 30 points from BIOSCI 107, HUMANBIO 142, MEDSCI 142

Restriction: OPTOM 241, PHARMACY 203, MOLMED 201

MEDSCI 203 (15 Points)

Mechanisms of Disease

Outlines the basic mechanisms, operating at the molecular, cellular and tissue levels, by which human disease develops. These include genetic factors, cell injury, inflammation, repair, circulatory disturbances, and neoplastic change. These mechanisms are illustrated by descriptions of the pathogenesis of specific diseases that are relevant to the New Zealand situation, or are the focus of current biomedical research.

Prerequisite: 30 points from BIOSCI 107, HUMANBIO 142, MEDSCI 142

Restriction: PATHOL 251

MEDSCI 204 (15 Points)

Introduction to Pharmacology and Toxicology

A solid grounding in the principles underlying pharmacology and toxicology, including the nature of drug targets, their interaction and response (pharmacodynamics), the fate of drugs within the body (pharmacokinetics), toxicity classification and testing, poisons and antidotes, adverse drug reactions, selective toxicity, drug discovery and development. Selected drug examples will be studied to illustrate key principles of clinical pharmacology.

Restriction: PHARMCOL 201

MEDSCI 205 (15 Points)

The Physiology of Human Organ Systems

An integrative approach is used to study fundamental physiological processes which enable the body to overcome the challenge of life. Drawing on examples of normal and abnormal function, the course examines the interaction of vital physiological processes, from cellular control mechanisms to multiple organ systems. Topics include: control of fluid and electrolytes, cardiovascular control, energy use, and the delivery of oxygen and metabolites.

Prerequisite: 30 points from BIOSCI 107, HUMANBIO 142, MEDSCI 142

Restriction: PHYSIOL 210

MEDSCI 206 (15 Points)

Introduction to Neuroscience

The impact of neuroscience revolution on our understanding of human physiology and biomedical research is reviewed. Topics include: mechanisms of neurotransmission, learning, memory, sensory perception (vision, hearing, touch and smell) and application of gene therapy for treating neurological diseases. Special emphasis is placed on the integration and control of physiological function by the nervous system. Examples include control of movement and coordination, regulation of reproduction, blood pressure, breathing, appetite, body weight and sexuality. Developmental neuroscience is also considered. Laboratory exercises provide insight into neural structure and function and include application of neuroimaging technologies.

Prerequisite: 30 points from BIOSCI 107, HUMANBIO 142, MEDSCI 142

Restriction: PHYSIOL 220

Stage III

MEDSCI 301 (15 Points)

Molecular Basis of Disease

An in-depth analysis of the cellular and molecular basis of disease, including the role of environmental and inherited risk factors, as well as mechanisms of response to cell injury and inflammation in the disease process. Models of common diseases such as diabetes, obesity, cancer and infectious agents will be studied.

Prerequisite: PATHOL 251 or MEDSCI 203

Restriction: PATHOL 301

MEDSCI 302 (15 Points)

Cancer Biology

A study of the scientific basis of cancer including: mechanisms underlying the pathogenesis of cancer, carcinogenesis, DNA damage and repair, properties of cancer cells (including abnormalities of growth and cell cycle control), the growth of tumours, the classification and histopathology of cancers, and an introduction to therapeutic strategies.

Prerequisite: BIOSCI 356 or PATHOL 251 or MEDSCI 203

Restriction: PATHOL 302, 705

MEDSCI 303 (15 Points)

Principles of Pharmacology

Topics covered are: ADME and pharmacokinetics; therapeutic drug monitoring; drug-drug interactions; pharmacogenetics and pharmacogenomics; drug development and analysis; novel drug delivery, chemotherapy including antibiotics, anticancer and antiviral drugs.

Prerequisite: 15 points from PHARMCOL 201, MEDSCI 204 and 15 points from MEDSCI 205, 206, PHYSIOL 210, 220, BIOSCI 203

Restriction: PHARMCOL 301

MEDSCI 304 (15 Points)

Molecular Pharmacology

Considers the molecular mechanisms of drug action. The cellular and molecular mechanisms of drugs acting at receptors, ion channels, enzymes and intermediate messengers are covered. These concepts are applied through a detailed examination of cell cycle and apoptotic pathways, the molecular basis of drug

addiction and the mechanisms of action of common recreational drugs.

Prerequisite: 15 points from PHARMCOL 201, MEDSCI 204 and 15 points from MEDSCI 205, 206, PHYSIOL 210, 220, BIOSCI 203

Restriction: PHARMCOL 302

MEDSCI 305 (15 Points) **Systematic Pharmacology**

Considers the modification by drugs of human systems under physiological and pathological conditions. The cellular and molecular mechanisms of drugs as receptors, ion channels, enzymes and intermediate messengers are considered. The modification of drugs on the cardiovascular, gastrointestinal, endocrine, reproductive, respiratory and central nervous systems will be covered.

Prerequisite: 15 points from PHARMCOL 201, MEDSCI 204 and 15 points from MEDSCI 205, 206, PHYSIOL 210, 220, BIOSCI 203

Restriction: PHARMCOL 304

MEDSCI 306 (15 Points) **Principles of Toxicology**

Considers the principles and concepts that result in detrimental effects in animals and humans. It addresses: biochemical pathways and targets in the toxicity of chemicals, the effects at cellular, organ and whole body level, eg, cell death, cancer and hypersensitivity, as well as the basis for cell and organ-selective toxicity. Drugs, occupational and environmental toxicants are discussed.

Prerequisite: 15 points from PHARMCOL 201, MEDSCI 204 and 15 points from MEDSCI 205, 206, PHYSIOL 210, 220, BIOSCI 203

Restriction: PHARMCOL 305

MEDSCI 307 (15 Points) **Neuroscience: Neuropharmacology**

An introduction to the principles and concepts involved in neuropharmacology. The course covers: the anatomy, neurochemistry and pharmacology of the normal and diseased human brain; the biochemical causes of psychiatric and neurological diseases; and the types and mechanisms of action of drugs used to treat brain disorders.

Prerequisite: 15 points from PHARMCOL 201, MEDSCI 204 and 15 points from MEDSCI 205, 206, PHYSIOL 210, 220, BIOSCI 203

Restriction: PHARMCOL 306

MEDSCI 308 (15 Points) **Molecular Physiology and Neuroscience**

The molecular physiology of cellular homeostasis and signaling. This discipline integrates molecular biology, electrophysiology, imaging technologies and other advanced techniques in molecular neuroscience and allied fields. The course considers the characterisation and manipulation of gene expression, and translation to gene therapy treatments for neurological diseases. The lab component focuses on analysis of gene expression and use of recombinant DNA technologies. Practical training includes isolation of RNA, gene cloning, and DNA fingerprinting using the polymerase chain reaction.

Prerequisite: 30 points from MEDSCI 205, 206, PHYSIOL 210, 220

Restriction: PHYSIOL 301

MEDSCI 309 (15 Points) **Biophysics of Nerve and Muscle**

An advanced treatment of the physiology of excitable cells. Topics include: the biophysical basis of membrane

potential, the spread of electrical activation and synaptic transmission, structure, excitation, mechanics and energetics of muscle and functional differences among muscle types. The approach is quantitative with particular emphasis on current advances in the field.

Prerequisite: 30 points from MEDSCI 205, 206, PHYSIOL 210, 220 or for Bachelor of Engineering (Honours) students 15 points from MEDSCI 205, PHYSIOL 210 and 15 points from courses at Stage II listed in Part II of the Biomedical Engineering specialisation in the Bachelor of Engineering (Honours) Schedule.

Restriction: PHYSIOL 302

MEDSCI 310 (15 Points) **Physiology and Pathophysiology of the Brain**

The relationship between the structure and function of the nervous system in health and disease. Topics include organisational principles of the CNS, imaging of the human brain, synaptic function in health and disease, selected topics in pathophysiology of motor and sensory systems (including vision and auditory function), brain ischemia and sleep/sleep disorders. The topics are covered at an advanced level with emphasis on current advances in the fields.

Prerequisite: 30 points from MEDSCI 205, 206, PHYSIOL 210, 220

Restriction: PHYSIOL 303

MEDSCI 311 (15 Points) **Cardiovascular Biology**

An advanced treatment of the human cardiovascular system that provides an integrated framework for understanding the structure, function and regulation of the heart and circulation, and their modification by drugs. Topics include: the energetics and mechanics of the heart, the regulation of heart rhythm and the control of blood pressure and the regulation of flow through the microcirculation. The course is illustrated using examples drawn from current research in the field and from representative disease states.

Prerequisite: 15 points from MEDSCI 205, PHYSIOL 210

Restriction: PHYSIOL 304

MEDSCI 312 (15 Points) **Endocrinology of Growth and Metabolism**

An introduction to the mechanism controlling the production of hormones and how these achieve their effects in regulating body function. The course focuses in particular on the hormone systems controlling growth and metabolism and contrasts the differences between fetal and adult life. It also highlights how defects in endocrine systems are associated with conditions such as obesity and diabetes.

Prerequisite: 30 points from BIOSCI 203, MEDSCI 201, 205, PHYSIOL 210, ANATOMY 201

Restriction: PAEDS 301, PHYSIOL 305

MEDSCI 313 (15 Points) **Reproductive Biology**

Aspects of reproductive biology including: regulation of gonadal function, the menstrual and oestrus cycles, ovulation, spermatogenesis, feto-maternal physiology including placental function, animal reproduction and assisted reproductive technologies.

Prerequisite: 15 points from BIOSCI 107, 203, HUMANBIO 142, MEDSCI 142

Restriction: OBSTGYN 351

MEDSCI 314 (15 Points) **Immunology**

The biology, cellular and molecular events underlying the immune response. The nature and characteristics

of antibody-mediated and cell-mediated immunity including antigen recognition and presentation, antibody and T cell receptor structure, immune regulation and cytokines, immunogenetics and histocompatibility. The relationships of the immune system to the activities of pathogenic organisms. Applied immunology including biotechnology, infection, autoimmunity, tumour immunology, transplantation and immunodeficiency.

Prerequisite: MOLMED 201 or MEDSCI 202 or BIOSCI 201
Restriction: BIOSCI 357

MEDSCI 315 (15 Points)

Nutrition, Diet and Gene Interactions

Practical applications of nutrition in protection against, and reduction of symptoms in, chronic disease from a clinical perspective. Both non-communicable diseases (eg, cancer, osteoporosis, auto-immune disease) and communicable disease (eg, whooping cough, influenza) will be considered. Factors regulating appetite and food intake, and the role of genotype and epigenotype will also be studied.

Prerequisite: BIOSCI 202, 203

Stage IV

MEDSCI 401 (15 Points)

Bioengineering Neurophysiology

Advanced molecular physiology of cellular homeostasis and signaling integrating molecular biology, electrophysiology, imaging technologies and other advanced techniques in molecular neuroscience. The use of genetic manipulation treatments for neurological diseases. Design and application of recombinant DNA-based projects for investigating key research questions in neuroscience.

Prerequisite: 15 points from MEDSCI 205 or PHYSIOL 210
Restriction: PHYSIOL 301, MEDSCI 308

MEDSCI 402 (15 Points)

Bioengineering in the Cardiovascular System

An integrated framework for understanding the structure, function and regulation of the heart and circulation, and their modification using bioengineering and pharmacological techniques. The energetics and mechanics of the heart, the regulation of heart rhythm and the control of blood pressure and the regulation of flow through the microcirculation are explored using examples drawn from current research in the field and from representative disease states.

Prerequisite: 15 points from MEDSCI 205 or PHYSIOL 210
Restriction: PHYSIOL 304, MEDSCI 311

Postgraduate Courses

MEDSCI 701 (15 Points)

Special Studies in Medical Science 1

A specific course of study for one or more students. Available only by arrangement between the staff member(s) and students.

Restriction: MEDSCI 702

MEDSCI 702 (15 Points)

Special Studies in Medical Science 2

The critical review and analysis of research literature relating to a research topic. Components include an extensive literature review article defining the current knowledge relevant to a particular research area, a research proposal outlining proposed masters research topic and its significance, and a formal presentation of the proposal. Suitable for students intending to undertake a Master's thesis.

Restriction: MEDSCI 701

MEDSCI 703 (15 Points)

Advanced Biomedical Imaging

Theory and practice of biomedical imaging from the sub-cellular to whole body level with specific emphasis on recent developments. Principles of digital image-processing and image analysis (including quantitative morphology), computed tomography and volume rendering and analysis. Imaging modalities including atomic force microscopy, light and confocal microscopy, electron microscopy, x-ray, CT, ultrasound and magnetic resonance imaging.

Restriction: ANATOMY 751

MEDSCI 704 (15 Points)

Developmental Genetics

Genetics approaches used to understand developmental mechanisms. These utilise a variety of model systems including *Drosophila* and zebrafish to study processes such as pattern formation, cell specification, lineage commitment and cell-cell interaction. Insights into control of these events are critical to advancing understanding of disease processes, particularly cancer.

Restriction: MOLMED 701

MEDSCI 705 (15 Points)

Infection, Immunity and Disease

Examines the ways in which host immune mechanisms control infection, infectious organisms evade host defence mechanisms, and the consequences of these processes for the host. Examples of human infectious diseases will include: HIV, hepatitis B, influenza, tuberculosis and streptococcal infections. Consideration of the consequences of infection will incorporate discussion of immune self/non-self discrimination, immune tolerance and autoimmune mechanisms, including the impact of response against infections on autoimmunity.

Restriction: MOLMED 708

MEDSCI 706 (15 Points)

Genetic Disease

Examines a range of medical genetic disorders that illustrate principles of disease mechanisms, diagnosis and management. These will include: haemophilia, familial cancer, late-onset neurological disorders and mitochondrial disease.

Restriction: MOLMED 710

MEDSCI 707 (15 Points)

Activities of Microbes in Disease

The dynamic interaction between pathogenic micro-organisms and humans will be explored. Examines the molecular mechanisms which enable microbes to survive, proliferate and cause disease; to evolve and acquire new genes; and to control the expression of their genes. Emphasis will be placed on recent advances in the understanding of major human microbial diseases.

Restriction: MOLMED 711

MEDSCI 708 (15 Points)

Advanced Immunology and Immunotherapy

Recent advances in immunology including: the genes and proteins involved in the innate and adaptive immune response, intracellular signalling mechanisms that determine immune outcomes, and the mechanisms by which the immune system learns 'self' from 'non-self'. Examines a range of inflammatory diseases, and methods of immunotherapy, in particular approaches to combat cancer.

Restriction: MOLMED 712

MEDSCI 709 (15 Points)
Nutrition in Health and Disease

The influence that dietary patterns, foods and food components have on the promotion and protection against the common nutrition-related diseases in New Zealand. The relevant epidemiological, clinical, and biochemical/physiological aspects of each disease are covered.

Restriction: NUTRN 700

MEDSCI 710 (15 Points)
Nutrition Mechanisms

The mechanisms by which food and food components can influence disease processes. Topics covered include: the interaction between genotype and nutrition, antioxidants and oxidation protection mechanisms, dietary toxicology, the process of atherosclerosis, and the influence of the intra-uterine environment on growth and disease.

Restriction: NUTRN 701

MEDSCI 711 (15 Points)
Clinical Nutrition

Prevention of malnutrition and maintenance of nutritional status during acute and chronic illness through 'artificial' or 'interventional' means. Diagnosis and quantitation of malnutrition, and monitoring of nutrition support therapy. Practical techniques, common complications and quality assurance through a multidisciplinary team approach. Includes treatment of anorexia nervosa and cancer cachexia.

Restriction: NUTRN 702

MEDSCI 712 (15 Points)
Critical Evaluation of Nutritional Therapies

The suggested roles for micronutrients, 'nutriceuticals' and functional foods in general health, exercise performance and disease are evaluated using an evidence-based approach. The roles of micronutrients as dietary supplements and the potential actions of nutriceuticals and functional foods are also critically evaluated. Regulatory and ethical issues in the use of nutritional remedies are considered, including their use as supplements in chemotherapy or other conventional therapies, or in individuals with no symptoms.

Restriction: NUTRN 703

MEDSCI 713 (15 Points)
Principles of Cancer Therapy

Examines the molecular and cellular processes underlying cancer treatment and the development of tumour-selective therapy; the principles of radiotherapy and chemotherapy; DNA and the basis for its interactions with anticancer drugs; recognition of DNA by proteins; exploitation of these processes by anticancer drugs, oncogenes and other regulatory gene products; signal transduction mechanisms and strategies for changing cell cycle control; cytokines and the role of host responses in cancer therapy; new approaches to cancer therapy including gene therapy and photodynamic therapy.

Prerequisite: PATHOL 302

Restriction: PATHOL 704

MEDSCI 714 (15 Points)
Advanced Cancer Biology

Advanced studies of concepts related to the biology of cancer. These will include: molecular mechanisms, signal transduction pathways, genomic instability, telomeres and telomerase, anoikis, DNA damage sensing mechanisms, and hypoxia and tumour progression.

Prerequisite: PATHOL 302

Restriction: PATHOL 705

MEDSCI 715 (15 Points)
Molecular Toxicology

Covers the current understanding of mechanisms implicated in toxicity of drugs and environmental chemicals plus the basis of inter-individual susceptibility. The course identifies strategies used to predict and prevent adverse reactions during drug development.

Restriction: PHARMCOL 711

MEDSCI 716 (15 Points)
Drug Disposition and Kinetics

Advanced study of the absorption, distribution, metabolism and excretion of drugs, and the analysis of these processes. Also included are: in vivo/in vitro techniques in drug ADME studies used in drug development; drug analysis in biological matrices; and pharmaco-genomic aspects related to drug disposition.

Restriction: PHARMCOL 712

MEDSCI 717 (15 Points)
Advanced Neuroscience: Neuropharmacology

An advanced study of current research topics in neuroscience. Involves critical analysis of the literature within the context of a series of major research themes that encompass models from molecular through to systems level neuroscience. Themes will be selected from the following areas: neurogenesis, neurodegeneration and/or addiction.

Restriction: PHARMCOL 713

MEDSCI 718 (15 Points)
Pharmacology of Anaesthetics and Analgesics

General aspects of anaesthetics and analgesics. Topics covered include the development of modern anaesthesia, the mechanisms of action of drugs used in general and local anaesthesia, and issues surrounding safety and efficacy of anaesthesia, including drug error and circadian variation in drug action.

Restriction: PHARMCOL 715

MEDSCI 719 (15 Points)
Pharmacometrics

An introduction to the application of mathematical models used in the interpretation of pharmacological observations. Computer-based analysis methods are investigated using individual and population-oriented approaches.

Restriction: PHARMCOL 716

MEDSCI 720 (15 Points)
Biomedical Research Techniques

An introduction to some of the most commonly used techniques used in today's research laboratories; from tissue culture to confocal microscopy, RT-PCR to mass spectrometry, immunoassay to cloning. Emphasis is placed on understanding the principles behind the techniques, how they are applied to address specific questions, and how to evaluate and use the data they generate.

Restriction: PHARMCOL 719

MEDSCI 721 (15 Points)
Advanced Toxicology

Focuses on classes of drugs associated with idiosyncratic adverse reactions and studies to define their metabolic basis and assessment of toxic risk.

Restriction: PHARMCOL 721

MEDSCI 722 (15 Points)
Clinical Pharmacology

The disposition and action of drugs in the elderly, young and in pregnancy will be considered, as well as therapeutic drug monitoring, pharmacoeconomics,

adverse drug reactions, ethnic differences in PK's and PD's, evaluation of clinical trials and population kinetics. Emphasis is placed on the use of medicines in humans.

Restriction: PHARMCOL 722

MEDSCI 723 (15 Points)

Cancer Pharmacology

The pharmacological basis of the action of anti-tumour drugs relevant to human cancer therapy, emphasising the variability of chemotherapy effects, interactions between anti-cancer agents and early phase clinical trials.

Restriction: PHARMCOL 728

MEDSCI 725 (15 Points)

Experimental Design

Principles of experimental design and data analysis in physiological research. Topics include: analysis of variance, post-hoc multiple comparisons, non-linear and multiple linear regression, analysis of covariance and statistical power. The approach is practical and computer statistical packages are used.

Restriction: PHYSIOL 701

MEDSCI 727 (15 Points)

Advanced Neuroscience: Neurophysiology

An advanced treatment of selected topics in neurophysiology. Involves presentations and critical analysis by the students of the current scientific literature within the context of several major research themes that encompass models from molecular and cellular to systems level. Themes will be selected from the following areas: (1) motor control and motor disorders (Parkinson's disease, motorneuron disease, stroke); (2) synapse physiology and pathophysiology; (3) advances in neural stem cell research; and (4) selected topics in sensory neuroscience research.

Restriction: PHYSIOL 703

MEDSCI 729 (15 Points)

Perinatal Physiology and Medicine

Fetal development has long-term consequences for health. This advanced course offers a wide range of research themes relating to fetal development and future health. Topics include: placental development, fetal physiology, and endocrine regulation and metabolic function during fetal and postnatal life. The course explores pathogenesis of disease and injury of the fetus and newborn, and how biomedical research leads to potential clinical treatment strategies.

Prerequisite: 15 points from MEDSCI 312, PHYSIOL 305

Restriction: PAEDS 701, 702, 703, PHYSIOL 708

MEDSCI 730 (15 Points)

Reproductive Science

Molecular regulation and coordination of normal reproduction. The reproductive disorders that arise when normal biological processes are disrupted. Recent molecular methods have enabled us to study these processes and to understand how they can go wrong. Genomic and proteomic approaches to the understanding of reproduction and reproductive disorders will be presented. Examination of the new technologies that allow us to overcome some of these reproductive problems.

Prerequisite: 15 points from BIOSCI 351, 353, 356, MEDSCI 312, 313, OBSTGYN 351, PHYSIOL 305

Restriction: OBSTGYN 706

MEDSCI 731 (15 Points)

Reproductive Medicine

Understanding normal reproductive events and how normal biological processes are disrupted to cause

medical problems. A range of specific disorders of reproduction (Pre-eclampsia, polycystic ovarian syndrome, endometriosis), including infertility and gynaecological cancer, will be discussed. Attention will be given to the recent advances in understanding of disease at a molecular level and how they translate to become a clinical disorder.

Prerequisite: 15 points from OBSTGYN 351, PHYSIOL 305, BIOSCI 351, 353, 356

Restriction: OBSTGYN 707

MEDSCI 732 (15 Points)

Molecular Aspects of Endocrinology and Metabolism

Explores how hormones are able to control such a wide range of physiological processes. Covers molecular aspects of hormone action with particular reference to the neuroendocrine and peripheral endocrine systems that control appetite and metabolism. Other topics covered include how defects in hormone action lead to diseases such as cancer, obesity, Type-2 diabetes and cardiovascular disease.

MEDSCI 733 (15 Points)

Advanced Methods in Cell Physiology

The theoretical basis underpinning electrophysiological and live cell imaging techniques used to probe cellular function will be addressed. Emphasis will be placed on the instrumentation, data acquisition, and data analysis associated with each technology. The approach is practical and computer-based software programmes are used to analyse pre-recorded data, and data produced by the students themselves.

Restriction: MEDSCI 726, PHYSIOL 702

MEDSCI 734 (15 Points)

Advanced Integrative Physiology

In the post-genomic world the limitations of reductionism as a basis for understanding complex function have become apparent and it is necessary to integrate genomics with the biology of organ systems. This course will portray how an integrative physiological approach can reveal new levels of understanding in the field of biomedical research. Examples of this approach will be drawn from research programmes within the areas of cardiovascular biology, fetal physiology, neurophysiology and vision.

Restriction: MEDSCI 728, PHYSIOL 705

MEDSCI 735 (15 Points)

Special Topic

MEDSCI 736 (15 Points)

Special Topic

MEDSCI 737 (15 Points)

Biomedical MRI

Designed to give students a thorough understanding of a range of biomedical MRI techniques as well as advanced clinical MRI applications such as functional imaging of the brain and cardiovascular system. Laboratories will cover MRI pulse programming, MRI applications in basic science, and MRI applications in clinical medicine.

MEDSCI 738 (15 Points)

Biological Clocks

Chronobiology – the study of biological rhythms and the clocks that control them. Theory, anatomical location and molecular machinery of biological clocks will be covered, as will the control of rhythms of different time scales from days (circadian rhythms) to years (circannual rhythms). The influence the human circadian clock has on physiology and drug efficacy, and the effect hospitalisation has on the control of sleep cycles will be given special attention.

MEDSCI 790 (60 Points)

Medicine

Postgraduate Courses

MEDICINE 703 (15 Points)

Special Topics in Medicine

Advanced study in a specific area usually related to the field of study of the thesis.

MEDICINE 713 (15 Points)

Cardiovascular Medicine

Cardiovascular anatomy and physiology with a detailed study of the pathophysiology of common cardiovascular conditions and management principles. Areas of study include atherosclerosis, hypertension, coronary artery disease and heart failure.

Restriction: MEDICINE 701

MEDICINE 721 (15 Points)

Investigating Human Incidents and Injury

The investigation of human incidents and injury through a multi-disciplinary study of the interaction between humans and the socio-technical systems that define their work and non-work environments.

Integrates knowledge from psychology, physiology, sociology, biology, engineering and management, into the applied science of human factors and incident investigation. Focuses on the identification of investigative systems which enhance safety in safety critical social systems.

MEDICINE 732 (15 Points)

Special Topic in Occupational Medicine

Advanced study in a specific area of occupational health as approved by the Head of Discipline.

Nursing

Stage I

NURSING 104 (15 Points)

Applied Science for Nurses

Provides an opportunity for the application of specific and selected topics from the biological and physical sciences to be related to beginning nursing practice.

NURSING 105 (30 Points)

Nursing in Practice

An introduction to nursing as a profession including concepts of nursing practice, and communication skills. The theoretical basis for nursing practice as well as legal and ethical boundaries are introduced. The role of the nurse in health maintenance and health promotion is explored. Skills in assessment of clients and planning client care are introduced.

Restriction: NURSING 101, 102

NURSING 199 (0 Points)

English Language Competency

To complete this course students must attain a level of competency in the English language as determined by the School of Nursing.

This course must be completed prior to enrolling in Part II of the Bachelor of Nursing degree.

Stage II

NURSING 201 (60 Points)

Nursing Clients with a Pathophysiological Problem

A problem-based course where students acquire the skills associated with nursing clients requiring medical and surgical interventions and subsequent rehabilitation. Understanding the mechanisms of disease and prevention of such diseases is the basis for the course. Students are introduced to the principles of pharmacology and pharmacokinetics. Issues such as caring for clients with chronic pain and an understanding of death and grief are included. Practicums and teaching take place in a variety of clinical settings.

NURSING 202 (60 Points)

Nursing Clients in Mental Health and Disability

This course allows students to understand perspectives of mental health and illness, the crisis nature of mental illness and the therapeutic models of mental health management. Students acquire the specific nursing skills required to care for people with mental health problems and also those who have a long-term disability. Students undertake a range of clinical attachments in hospital and community settings.

Stage III

NURSING 301 (60 Points)

Child and Family Health Nursing

An understanding of concepts related to family, women's and child health. The focus is on childbirth

as a healthy event in the life of a family, care in the community, together with the nursing care of children suffering illness in a hospital setting. Older persons' health focuses on an alternate aspect of family health. Clinical attachments are in a variety of clinical and community settings.

NURSING 302 (60 Points)
Professional Nursing Practice

This course allows the student to make the transition from student to professional nurse. A period of practice in an elected area of clinical speciality is included. Issues such as the development of nursing knowledge, autonomy of practice, accountability for practice, and the legal and ethical parameters of competency as a nurse are emphasised.

Postgraduate Courses

NURSING 701 (30 Points)
Clinical Project

The Clinical Project represents the personal scholarly work based on a focused area related to clinical nursing practice that reflects an understanding of research purpose and process. The project includes a critical and comprehensive review of relevant literature which results in new insights, perspectives and applications of existing knowledge.

NURSING 702 (30 Points)

NURSING 702A (15 Points)

NURSING 702B (15 Points)

Developing Nursing Practice

Early career nurses develop nursing knowledge and skills in a speciality practice area. Focus will include recognition of the contextual factors that impact on the practice area and a critique and analysis of their practice.

To complete this course students must enrol in NURSING 702 A and B, or NURSING 702

NURSING 704 (15 Points)

Applied Science for Registered Nurses

Nurses' knowledge, understanding and application of scientific concepts is extended in order to assist registered nurses to safely plan and deliver care for clients. Students have the opportunity to apply concepts to their own area of practice.

NURSING 706 (15 Points)

Principles of Pharmacology and Pharmacokinetics

Drug therapy for advanced nursing practice is introduced through the study of the principles of pharmacology and pharmacokinetics.

NURSING 709 (15 Points)

Clinical Teaching

Explores theoretical and practical approaches to clinical teaching and learning within the health professions.

NURSING 710 (15 Points)

Special Studies in Nursing

As prescribed by the Head of the School of Nursing.

NURSING 714 (15 Points)

Nursing Practicum 1

The articulation and demonstration of advanced nursing knowledge and skills within a specialist clinical area. Students work with an academic and clinical adviser to develop an individual learning contract. Students may build on this course in NURSING 728 Nursing Practicum 2.

NURSING 716 (15 Points)

Primary Health Care of Children and Adolescents

The development of nursing knowledge specific to advanced nursing practice in a child health setting. Focuses on the primary health care of children, throughout childhood and adolescence, including health promotion and maintenance of the well child and family.

NURSING 719 (15 Points)

Specialty Nursing Knowledge and Practice

Extend nursing knowledge and skill related to the management of clients in specialty based clinical practice. Available in various specialty practice streams.

NURSING 720 (15 Points)

Evidence-based Nursing

A guide to nurses' clinical decision-making and the consideration of the clinical effectiveness and cost-effectiveness of practice, as well as client preference and practitioner expertise.

NURSING 721 (15 Points)

Nurse Prescribing Practicum

Detailed knowledge of the medicines applicable to the nurse's prescribing scope are developed. Through case studies and practical experience the nurse will have supervision of their knowledge and skills in their identified prescribing scope.

Prerequisite: NURSING 722

NURSING 722 (15 Points)

Principles of Therapeutics for Advanced Nursing

The principles of therapeutics and mechanisms necessary for prescribing to be safe and effective.

Prerequisite: NURSING 706

NURSING 728 (15 Points)

Nursing Practicum 2

Builds on the advanced practice skills developed in NURSING 714 Nursing Practicum 1. The Nurse Practitioner competencies developed by the Nursing Council of New Zealand are used as a framework to guide the student toward advanced practice roles/ Nurse Practitioner status. Students develop learning contracts and work with academic and practice advisors to develop the Nurse Practitioner role.

Prerequisite: NURSING 714

NURSING 729 (15 Points)

Nurse Leadership in Health Services

Nursing and related workforce and professional development issues are addressed, including acuity and workload management, risk management, retention and turnover, skill mix, interdisciplinary/ professional, power and decision-making uses and international trends.

NURSING 730A (15 Points)

NURSING 730B (15 Points)

Knowledge/Science in Specialty Nursing

Extends knowledge and understanding of biomedical and social science concepts related to an identified specialty area and covers specialty-based practice knowledge required to care for clients in specialty practice streams.

Restriction: NURSING 704, 719

To complete this course students must enrol in NURSING 730 A and B

NURSING 731 (15 Points)**Nursing the Hospitalised Child**

Nursing knowledge related to themes and current issues central to caring for hospitalised children. Topics include: developmental issues, family centred care, advocacy, family/environmental assessment, epidemiology and government strategies.

NURSING 732 (30 Points)**Nursing Leadership Practicum**

Theoretical and practice principles of leadership and management in the context of health care organisations. Utilises an action based learning model, mentorship and project work.

NURSING 733 (15 Points)**Special Studies in Nursing****NURSING 734 (15 Points)****Special Topic in Nursing****NURSING 735 (30 Points)****NURSING 735A (15 Points)****NURSING 735B (15 Points)****Clinical Education Practicum**

To complete this course students must enrol in NURSING 735 A and B, or NURSING 735

NURSING 736 (15 Points)**Health Policy and Nursing**

Health policy planning and development in New Zealand. Promotes understanding of policy theory, the policy process, the role government plays, and the role of nursing as a special interest group in the policy community.

NURSING 737 (30 Points)**The Scholarship of Practice**

The development of professional knowledge is explored from a variety of perspectives, including the wider health care environment and national and international trends, as relevant to advancing nursing practice.

NURSING 738 (30 Points)**Long Term Condition Management in Primary Health Care**

Covers knowledge to plan and implement appropriate programmes of health care for populations and individuals with chronic conditions and development of knowledge central to the delivery of client-centred health care in the community with a particular focus on risk assessment and management.

NURSING 739 (30 Points)**Advanced Rural Nursing**

Prepares nurses who are working in rural areas with the knowledge and skills to balance and integrate high level skills in communication, health assessment, diagnostic reasoning, with particular focus on improving health outcomes for those with chronic conditions.

NURSING 740 (30 Points)**Prescribing in Advanced Nursing Practice**

The knowledge and competencies that form the basis of prescribing in advanced nursing are developed under supervision.

NURSING 741 (30 Points)**Special Topic****NURSING 742 (30 Points)****Special Topic****NURSING 743 (30 Points)****Special Topic****NURSING 744 (30 Points)****Special Topic****NURSING 750 (15 Points)****Social Context: Mental Health Nursing Practice**

A critical analysis of socio-political issues in mental health nursing practice including the history, scope and context of practice, the construction of nursing knowledge, consumer issues, cultural safety and the Treaty of Waitangi.

Restriction: PSYCHIAT 750

NURSING 753 (30 Points)**Specialty Practice in Mental Health Nursing 1**

A clinically focused course introducing nurses in their first year of practice to the mental health specialty. Students extend their theoretical understanding and clinical skill in assessment, care and treatment of people with mental distress and illness. The course integrates theoretical concepts with clinical practice using classroom teaching and clinical preceptorship.

Restriction: PSYCHIAT 753

NURSING 754 (15 Points)**Legal Issues in Mental Health Nursing**

Critical reflection on ethical and legal issues related to mental health nursing practice. Topics include: analysis of nurses' involvement in compulsory treatment; consent, compliance and issues related to the Mental Health (Compulsory Assessment and Treatment) Act and other relevant legislation.

Restriction: PSYCHIAT 754

NURSING 756 (30 Points)**Specialty Practice in Mental Health Nursing 2**

Builds on NURSING 753 to further develop clinical skills and application of theoretical concepts in the mental health specialty. Students further extend their theoretical understanding and clinical skill in assessment, care and treatment of people with mental distress and illness. The course integrates theoretical concepts with clinical practice using classroom teaching and clinical preceptorship.

Prerequisite: NURSING 753

NURSING 758 (15 Points)**Special Topic****NURSING 759 (15 Points)****Service Delivery In Mental Health Nursing**

Service delivery systems adopted in mental health. Considers delivery systems such as case management, case coordination, key-worker models and the role of responsible clinician. There is a focus on clinical decision-making and leadership within multidisciplinary teams.

NURSING 760 (15 Points)**Cognitive and Behavioural Therapy in Nursing Practice**

The application of principles of cognitive and behavioural therapy (CBT) in mental health settings. Critiques the use of cognitive tools and techniques within the nurse-client relationship.

NURSING 761 (15 Points)**Special Topic****NURSING 762 (15 Points)****Rural Nursing Practicum – Initial Response**

Prepares rural nurses to undertake their role in pre-hospital emergency care and associated clinical interventions.

NURSING 763 (15 Points)

Mental Health Nursing in Primary Care

Focuses on the development of a primary health care component in mental health nursing. Students will explore mental health nursing roles within primary health care, and the interface between primary and secondary services, and will develop an understanding of the impact of mental health care provided by primary health care services.

NURSING 765 (15 Points)

Nursing the Client with Breast Cancer

Explores the care of women across the continuum of breast cancer and includes concepts such as health promotion, pathology, impact of social and cultural issues, collaboration in health care, advocacy, evidence based practice.

NURSING 766 (15 Points)

Concepts of Advanced Cancer Nursing

Examines and applies concepts of advanced nursing practice in cancer care and the client's experience of cancer, eg, survivorship, resilience, hope, family dynamics, client involvement in decision making, government strategies, advanced nursing roles, service development.

NURSING 768 (15 Points)

Research Methods in Nursing and Health

Supports appreciation and use of published research relevant to practice, and equips students with the skills to design and execute their own research, including research as part of the Masters programme. Students will design a research study ready to be conducted as the thesis or research portfolio as part of a Masters degree.

NURSING 770 (30 Points)

Clinical Practice Development

Develops knowledge, practice and skills within the scope of a beginning registered nurse; enhances client assessment, planning and delivery of client-centred care within a specific health care context. Also fosters critical exploration of knowledge and skills appropriate to professional, socio-political, legal-ethical, cultural aspects of practice.

Restriction: NURSING 725

NURSING 771 (30 Points)

Chronic Care Interventions

Develops the specialty knowledge and skill inherent in the management of long term conditions in the community. Emphasises application of self management models into practice.

NURSING 772 (30 Points)

Population Health and Primary Health Care Nursing

Assists primary health care nurses working in diverse settings to put population health into practice through primary health care. Determinants of health, equity, community empowerment, partnerships and effective ways to care for people with long-term conditions in communities will be explored.

NURSING 773 (30 Points)

Advanced Assessment and Clinical Reasoning

Nurses make a variety of diagnoses in their daily practice. Advanced nursing practice requires skilled health assessment, estimation of probabilities and evidence based diagnostic reasoning. This complex cognitive process is developed in relation to skills and knowledge required for sound clinical reasoning.

NURSING 774 (30 Points)

Nursing in Acute Mental Health Settings

The concept of recovery forms the basis of exploring nursing care of people in states of acute crisis. The course focuses on models of acute care, collaborative care, risk assessment and management, and maintaining a safe, non-coercive environment. Students will be expected to engage in critical reflection and analysis of practice issues and case studies.

NURSING 775 (30 Points)

Leadership and Management for Quality Health Care

Builds management and leadership knowledge, competence and business acumen through project based learning. Focuses on critical thinking, quality service delivery and improvements and maximises organisational performance and change management.

NURSING 776 (30 Points)

Assessment and Clinical Decision Making in MHN

A clinically based course focussing on history taking, assessment and problem formulation. Using case studies from clinical practice, the course explores narrative and descriptive models. There is an emphasis on mental state assessment, and development of a client-focused plan of care.

NURSING 777 (30 Points)

Advanced Practice in Mental Health Nursing

Explores the social and clinical context of advanced practice in mental health nursing by encouraging critical awareness of advanced nursing roles in mental health services. Involves analysing practice development in a range of contexts in relation to clinical issues.

NURSING 778 (30 Points)

Health Promotion and Early Detection of Cancer

Examines the latest knowledge and research available around health promotion, risk assessment and early intervention for cancer and consider the implications for nursing practice. Content addressed includes epidemiology, genetic risk, nutrition, lifestyle and environmental screening, surveillance, government policies and interventions.

Restriction: NURSING 767

Postgraduate Courses

PAEDS 704 (15 Points)

Special Topics in Paediatrics

Advanced study in a specific area, usually related to the field of study of the thesis.

PAEDS 712 (15 Points)

Youth Health Clinical Skills

Develops and extends knowledge and skills in clinical interviewing, comprehensive assessments and effective interventions with young people.

PAEDS 714 (15 Points)**Emergency Paediatrics**

Combines theoretical knowledge with clinical practice. Medical practitioners will learn how to manage the major paediatric medical and surgical emergencies until transfer.

PAEDS 719 (15 Points)**Health, Education and Youth Development**

Examines the overlap of health and education in the context of youth development, exploring the impact of past and current concerns and strategies of both sectors on the well-being of young people. It reviews the 'business' of schools, the Health and Physical Education curriculum, school-based health and support services, whole school approaches to health, and the health and education needs of students not engaged with the school system.

PAEDS 720 (15 Points)**Youth Health Theory, Application and Leadership**

Extends students' knowledge of youth health and well-being and aims to provide preparation for leadership roles in youth health. Focuses on expanding knowledge of the theory of youth development and students will study examples of effective youth development programmes and will be required to develop and present a youth health project in their field of work.

Pharmacy**Stage I****PHARMACY 101 (15 Points)****Pharmacy Practice 1**

The role of medicines in society (including complementary medicines), introductory pharmacy law and ethics. The evolution and role of the pharmacist as a health care professional, pharmacy organisations, sources of pharmaceutical information, and professional communication. Introduction to dispensing and compounding of medicines.

PHARMACY 111G (15 Points)**Drugs and Society**

The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary

medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

PHARMACY 199 (0 Points)**English Language Competency**

To complete this course students must attain a level of competency in the English language as determined by the School of Pharmacy.

This course must be completed prior to enrolling in Part III of the Bachelor of Pharmacy degree.

Stage II**PHARMACY 201 (15 Points)****Pharmacy Practice 2**

Dispensing of prescriptions, pharmaceutical calculations, and preparation of extemporaneous medicines in common use. Development of knowledge, skills and attitudes required for communicating with other health professionals and patients. Sociocultural dimensions of healthcare. Law, ethics and medicines information. Practical experience in community pharmacy.

Prerequisite: PHARMACY 101

PHARMACY 202 (15 Points)**Pharmaceutics 1**

The physical and chemical properties of materials used in the design of medicinal dosage forms. These principles are applied in the formulation and design of drug dosage forms and delivery systems, and choice of routes of administration of drugs.

PHARMACY 205 (15 Points)**Physiology for Pharmacy**

An integrated approach to the fundamental physiological processes which enable the human body to maintain its viability in an ever-changing world. Examples of normal and abnormal function are used to illustrate interactions in vital physiological processes, including control of fluid and electrolytes, energy use, oxygen and metabolites, and cardiovascular control.

Prerequisite: 30 points from BIOSCI 107, HUMANBIO 142, MEDSCI 142

Restriction: MEDSCI 205, PHYSIOL 210

Stage III**PHARMACY 301 (15 Points)****Pharmacy Practice 3**

Dispensing of medicines in accordance with legal and professional requirements. Responding to symptoms, over-the-counter prescribing and health promotion. Quality and safety of medicines use. Evidence-based practice. Practical experience in community pharmacy.

Prerequisite: PHARMACY 201 and 45 points from MEDSCI 202, 203, 204, MOLMED 201, PATHOL 251, PHARMCOL 201

PHARMACY 302 (30 Points)**PHARMACY 302A (15 Points)****PHARMACY 302B (15 Points)****Pharmacotherapy**

Actions, mechanisms of action and therapeutic uses of drugs with reference to the following systems and disorders: cardiovascular system disorders and risk management, respiratory disorders, gastrointestinal disorders, common skin disorders, rheumatic disorders, neurological disorders, and fever and pain

control. A case-based approach is supplemented by clinical visits.

Prerequisite: PHARMACY 201 and 45 points from MEDSCI 202, 203, 204, MOLMED 201, PATHOL 251, PHARMCOL 201

To complete this course students must enrol in PHARMACY 302 A and B, or PHARMACY 302

PHARMACY 303 (15 Points) **Pharmaceutics 2**

The scientific principles of formulation and drug delivery, and the choice of appropriate routes of administration. Principles behind the development of pharmaceutical dosage forms capable of achieving predictable and reproducible therapeutic responses are developed, including an introduction to industrial processes and quality assurance.

Prerequisite: PHARMACY 202

PHARMACY 304 (15 Points) **Pharmaceutics 3**

Themes in pharmaceutical formulation, Good Manufacturing Practice (GMP), quality assurance, dosage form design, and novel drug delivery systems are further developed. A problem-based approach is supplemented by industrial visits.

Prerequisite: PHARMACY 303

Restriction: PHARMACY 404

Stage IV

PHARMACY 407 (30 Points) **Integrated Pharmacy Studies 1**

Elements of pharmacy practice, pharmacotherapy and pharmaceutical science are integrated with an emphasis on the optimal drug treatment of individual patients with cardiovascular disease, asthma, diabetes, and other complex conditions and special populations. A mix of workshops, case discussions, and dispensing practicals is provided. Pharmaceutical care provision is emphasised.

Restriction: PHARMACY 401

PHARMACY 408 (30 Points) **Integrated Pharmacy Studies 2**

Elements of pharmacy practice, pharmacotherapy and pharmaceutical science are integrated with an emphasis on the optimal drug treatment of individual patients with mental health (and substance misuse), cancer, infections and other complex conditions and special populations. A mix of workshops, case discussions, and dispensing practicals is provided. Pharmaceutical care provision is emphasised.

PHARMACY 712 (30 Points)

PHARMACY 712A (15 Points)

PHARMACY 712B (15 Points)

Clinical Pharmacy Practice

Enhances key pharmaceutical knowledge and skills for effective practice in community and hospital settings, including oral and written communication, critical literature appraisal, review of patient medication and the design and implementation of pharmaceutical care plans.

To complete this course students must enrol in PHARMACY 712 A and B, or PHARMACY 712

PHARMACY 720 (15 Points)

Issues in Concordance

Factors influencing the prescribing and recommendation of drug therapy and those which influence patients in their use of medicines. Addresses the issue of an ethical framework for prescribing and strategies to promote effective use of medicines by patients.

PHARMACY 730 (15 Points)

Cardiovascular Pharmacotherapy

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of cardiovascular disease. The critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with cardiovascular disease.

PHARMACY 731 (15 Points)

Respiratory Pharmacotherapy

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of respiratory disease. The critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with respiratory disease.

PHARMACY 732 (15 Points)

Endocrine Pharmacotherapy

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of endocrine disorders and in regard to reproduction. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with endocrine disorders.

PHARMACY 733 (15 Points)

GIT/Rheumatology Pharmacotherapy

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of gastrointestinal disease and

rheumatic disorders. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with gastrointestinal disease and rheumatic disorders.

PHARMACY 734 (15 Points)

Pharmacotherapy of Infections

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy and vaccination in the management of infectious diseases. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with infectious diseases.

PHARMACY 735 (15 Points)

Pharmacotherapy in Psychiatry

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of psychiatric disorders. Critical review of the relevant literature, the design and implementation of pharmaceutical care plans, and consideration of the role of drug therapy in the overall management of psychiatric disorders.

PHARMACY 736 (15 Points)

Pharmacotherapy in Dermatology

The application of pharmaceutical and pharmacological knowledge to the selection and use of preparations and drug therapy in the management of dermatological conditions. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with dermatological conditions.

PHARMACY 737 (15 Points)

Pharmacotherapy in Oncology

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of cancer and the care of the terminally ill patient. Critical review of the relevant literature, the design and implementation of pharmaceutical care plans for cancer and terminally ill patients, and consideration of the role of drug therapy in the treatment of neoplastic disease.

PHARMACY 740 (15 Points)

Evidence-based Pharmacy Practice

Examines the evidence base for the practice of pharmacy. Includes a critical review of the relevant literature and addresses issues related to both community and hospital practice.

PHARMACY 741 (15 Points)

Pharmacotherapy in the Elderly

Examines patient factors that influence drug use in elderly patients. It will address the issues of dosage modifications, polypharmacy and medicine management in elderly patients, and include a critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for elderly patients.

PHARMACY 742 (15 Points)

Paediatric Pharmacotherapy

Examines patient factors that influence drug use in the new born through to adolescence. Addresses the issues of dosage modifications, appropriate drug formulations and the use of unlicensed medicine in paediatric patients, and includes a critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for paediatric patients.

PHARMACY 743 (15 Points)

Nutrition for Pharmacists

Examines nutritional requirements in pregnancy and

lactation, in infants and the elderly and in relation to specific disease states. Includes a critical review of the relevant literature and the determination of patient requirements in respect of parenteral feeding.

PHARMACY 750 (30 Points)

Pharmaceutical Formulation

Physiological and physicochemical factors in drug delivery and formulation of pharmaceutical products. Consideration of both traditional (eg, solutions, semi-solids, solids, aerosols) and novel (eg, liposomal) drug delivery systems based on the experimental literature.

PHARMACY 751 (30 Points)

Pharmaceutical Techniques

Experimental and analytical techniques in the assessment of pharmaceutical products and of drug action in biological systems. Consideration of pharmacopoeial and official standards, drug stability and drug metabolism.

PHARMACY 752 (15 Points)

Pharmaceutical Quality Assurance

Principles of good manufacturing practice (GMP), quality assurance and quality control as applied to pharmaceutical products and processes. Consideration of relevant industrial processes, legislation, safety issues, packaging, labelling, stability and regulatory requirements.

PHARMACY 753 (15 Points)

Regulatory Affairs

National and international requirements pertaining to the registration, licensing and distribution of pharmaceutical products. Consideration of the legal framework, pre-clinical testing, clinical trials, pharmacovigilance, role of statutory authorities, pharmacoeconomic data and the role of health professionals.

PHARMACY 754 (15 Points)

Pharmaceutical Science Research Proposal

A comprehensive critical study of the literature pertaining to the proposed thesis research. This will include a review of the relevant methodologies, the analysis of research results and the relationship of published work to the proposed research.

Evidence-based Pharmacotherapy

Principles and techniques of evidence-based medicine and pharmacotherapy (EBM and EBP) including meta-analyses, systematic reviews and international collaborations (eg, Cochrane Collaboration). Application of EBP (eg, guidelines, protocols, academic detailing) including limitations. Role of health professionals in EBP, with an emphasis on pharmacy. Research project in a selected application of EBP.

PHARMACY 802 (60 Points)
Applied Pharmacoeconomics

Principles and techniques of pharmacoeconomics in the context of pharmaceutical management in New Zealand. Application of cost-minimisation, cost-benefit, cost-effectiveness and cost-utility analyses in policy development and medicines use. Research project in a selected application of pharmacoeconomic analysis.

PHARMACY 803 (60 Points)
Management of Pharmaceuticals

National and international strategies in the management of pharmaceuticals. Consideration of supply-side (eg, pharmaceutical subsidisation) and demand-side (eg, prescriber education) initiatives. The role of industry, regulatory authorities and government agencies and of health professionals with an emphasis on pharmacy. Pharmacy initiatives including drug-use evaluation and pharmaceutical care. Research project in a selected application of pharmacy intervention.

PHARMACY 804 (60 Points)
Philosophical Basis of Pharmacy Practice

Development of pharmacy from compounding and dispensing medicines to a knowledge system which renders a health service. Pharmacy's societal purpose. Evolving concepts of product-orientation, patient-orientation and pharmaceutical care. Development of pharmacy values. Interaction of pharmacy developments with evolving models of health care. Predictions for future models of pharmacy practice. Reflective project to identify the student's analysis of personal development and vision for the future.

Population Health

Stage I
POPLHLTH 101 (15 Points)
Health Systems 1

Provides an overview and understanding of the New Zealand health system, including: history of health and health service delivery in New Zealand; the role and functioning of hospitals; primary care; purchasers and funders of health services; the role of insurance and private health care providers.

Restriction: COMHLTH 101, 201

POPLHLTH 102 (15 Points)
Health and Society

A description and analysis of health within a social context. Discusses different models of health and provides a range of explanations for how social factors influence health. Options for addressing these issues are also explored.

Restriction: COMHLTH 102

POPLHLTH 103G (15 Points)
Epidemics: Past, Present and Possible

Epidemics – what are they, what causes them and what can we do about them? With the global burden of disease as a backdrop, this course explores the concept of the epidemic, including the labeling and recording of disease, and investigates ways in which epidemics have presented in the past and are unfolding in modern societies.

POPLHLTH 104G (15 Points)
Future Health

Healthcare systems face complex challenges in improving people's health. The goal of this course is to give students the opportunity to learn how the health system works, the challenges it faces, what role innovation plays, and how they can make a difference with knowledge about the role of information in the delivery of healthcare in the twenty-first century.

POPLHLTH 111 (15 Points)
Population Health

To introduce frameworks and tools for measuring and understanding and improving the health of populations, both locally and globally. These frameworks and tools are derived from epidemiology, demography, public health, environmental health and global health sciences.

Restriction: HUMANBIO 111

Stage II
POPLHLTH 202 (15 Points)
Research Methods in Health

A review of the different ways of approaching, designing and undertaking social science research in the health field, covering research paradigms and methodologies, including both quantitative and qualitative methods.

Restriction: COMHLTH 203

POPLHLTH 203 (15 Points)
Health Promotion: Philosophy and Practice

Explains in detail the theoretical basis of health promotion; calling on current practice examples to bring the theory to life. Introduces international and New Zealand health promotion concepts and tools. Explains how health promotion practice rests on particular approaches, values and ethical considerations which directly link to a political analysis of deprivation and powerlessness.

Restriction: PSYCHIAT 201, COMHLTH 204

POPLHLTH 204 (15 Points)

Health Care Ethics

An introduction to health care and medical ethics. A theoretical foundation of ethics in addition to the practical ethical issues relevant to healthcare professionals.

Restriction: COMHLTH 205

POPLHLTH 206 (15 Points)

Life Cycle Nutrition

Provides students with a general background and introduction to: the New Zealand diet; food preparation and meal patterns; dietary requirements during pregnancy and lactation, childhood and adolescence, lifestyle changes, maturity and ageing.

Restriction: COMHLTH 207

POPLHLTH 207 (15 Points)

Community and Cultural Development

An introduction to the study of community and cultural development as both philosophical approach and programme of practice for building active and sustainable communities from grassroots. Real world examples of effective practice will demonstrate the interdependence of theory, research and practice in health development. Emphasis is placed on collaboration and participation.

Prerequisite: 15 points from COMHLTH 102, POPLHLTH 102

Restriction: BEHAVSCI 202

POPLHLTH 208 (15 Points)

Mental Health Development

The importance of mental health to overall health and well-being is explored. Major threats to mental health are reviewed, and contemporary responses to mental ill health are placed in historical perspective. Current theory, research and practice related to mental health development, which includes both recovery-based approaches and mental health promotion practice (ie, promotion of well-being) at the community and population levels are reviewed.

Prerequisite: 15 points from COMHLTH 102, POPLHLTH 102

Restriction: BEHAVSCI 201, 203

POPLHLTH 210 (15 Points)

Equity and Inequalities in New Zealand Health

Investigates the way in which social determinants lead to particular distributions of health in populations. Draws on a social epidemiological approach to explore ways in which inequalities in health in New Zealand (based on factors such as age, ethnicity and socio-economic status) are created, then maintained or eliminated. The place of the Treaty of Waitangi with respect to health is considered.

Prerequisite: POPLHLTH 102

Restriction: POPLHLTH 201

POPLHLTH 211 (15 Points)

Introduction to Environmental Health

Provides students with the concepts and knowledge necessary to understand the influence of the environment on health, and introduces the tools, such as Health Impact Assessment, that can be applied to identify and control environmental hazards.

POPLHLTH 212 (15 Points)

Bio-behavioural Aspects of Drug Use

An introduction to the ways drugs exert their effects on the body, why drug dependence (addiction) occurs and what factors may predispose individuals to the development of drug dependence, including the

aetiology of drug dependence and ways in which the study of bio-behavioural aspects of drug use has influenced public health interventions to reduce drug dependence.

POPLHLTH 301 (15 Points)

Health Systems 2

The New Zealand health system in an international context. Health system reform, priority setting and rationing. Managed care and health integration. The future of health care in New Zealand.

Prerequisite: 15 points from COMHLTH 101, 201, POPLHLTH 101, 15 points from STATS 101, 102, 108

Restriction: COMHLTH 301

POPLHLTH 302 (15 Points)

Health Services Internship

This course requires students to examine or research a contemporary issue in health services, health management or health systems, and present their findings in an extended essay.

Prerequisite: POPLHLTH 202

Restriction: COMHLTH 302

POPLHLTH 303 (15 Points)

Health Informatics

Students will explore the development and management of information systems in contemporary New Zealand healthcare services. Health informatics concepts, conceptualised in different healthcare settings, are critically reviewed in terms of their practical application.

Prerequisite: 15 points from COMHLTH 101, 201, POPLHLTH 101, and 15 points from COMHLTH 203, POPLHLTH 202

Restriction: COMHLTH 303

POPLHLTH 304 (15 Points)

Principles of Applied Epidemiology

The application of an epidemiological approach in population health, including study of the principles of epidemiological thinking, epidemiological study design and analyses, and the application of these findings to population health. Modules will be taught through specific themes for example, a life course approach or injury prevention.

Prerequisite: 45 points from COMHLTH 203, HUMANBIO 111, POPLHLTH 111, 202, STATS 101, 102, 108

Restriction: COMHLTH 304

POPLHLTH 305 (15 Points)

Community Nutrition

Provides students with an understanding of the nutritional practices and requirements in different sectors of the New Zealand population. Includes: socio-economic factors related to dietary habits; the health impacts of Māori and Pacific dietary habits; the relationship between diet, health, malnutrition and nutrition-related diseases; and the importance of nutrition education programmes.

Prerequisite: 30 points from COMHLTH 207, HUMANBIO 111, POPLHLTH 111, 206

Restriction: COMHLTH 305

POPLHLTH 306 (15 Points)

Health Promotion 2

Builds on the theory and practice in POPLHLTH 203,

and examines in depth the relationship between economic and political processes and health status. The course also looks at the most effective strategies to put health promotion theory into practice. Mixed in with this will be an in-depth introduction to some of the emerging issues in health promotion, and a look at some of the specific areas of health promotion practice.

Prerequisite: 15 points from BEHAVSCI 202, COMHLTH 204, POPLHLTH 203

Restriction: BEHAVSCI 301

POPLHLTH 307 (15 Points)
Communities and Addictions

Examines how addictions such as tobacco, alcohol, drugs and gambling seriously undermine the health of individuals and the communities in which they live and/or work. Case studies are used to understand the primary elements of community and cultural health development.

Prerequisite: 30 points from BEHAVSCI 202, COMHLTH 204, POPLHLTH 203, 207

Restriction: BEHAVSCI 302, 722

Shaping Health Policy

Investigates recent changes to the ways in which governments seek to intervene to improve a population's health. NZ case studies will be used to illustrate the interrelationships between research, policy and practice in a devolved health system and the changing relationships between government agencies and health providers.

Prerequisite: POPLHLTH 202

POPLHLTH 312 (15 Points)
Health and Pacific People in NZ

An overview of the major health issues facing Pacific peoples, including analysis of the key determinants of health status, focusing on approaches to improving health for Pacific peoples through research, policy, public health programmes and health services. A critique of dominant paradigms of health and well-being in relation to Pacific communities in Aotearoa New Zealand is included with consideration of their effect on health outcomes.

Prerequisite: POPLHLTH 201

POPLHLTH 313 (15 Points)
Health in Asian Communities

An overview of Asian health issues, including, the biological, ecological cultural, economic social and psychological factors that determine health for Asian New Zealanders is provided. Current practice, policy development and research priorities for Asian communities are included.

Prerequisite: 15 points from POPLHLTH 201, 210

POPLHLTH 314 (15 Points)
Health Services Integration

An exploration of the issues associated with integrating health services. Case studies form the basis for consideration of the ways in which primary and secondary health care may more effectively inform and be informed by public health programmes.

Prerequisite: 15 points from POPLHLTH 201, 210

POPLHLTH 315 (15 Points)
Special Topic

Postgraduate Courses

POPLHLTH 701 (15 Points)
Research Methods in Health

A comprehensive overview, focusing particularly on the primary health care arena, of: 'ways of knowing'; the asking of research questions; literature reviews; the design, implementation and appraisal of qualitative and quantitative research; and the writing up of research.

Restriction: GENPRAC 704

POPLHLTH 702 (15 Points)
Research Methods for Health Services

Provides students with the skills to plan and carry out small-scale research projects. Focuses on planning projects, developing a research design, selecting methods and writing proposals. Both qualitative and quantitative research methods are covered, with illustrative examples from health programmes and services.

Restriction: COMHLTH 744

POPLHLTH 704 (15 Points)
Undertaking Qualitative Health Research

Provides practical experience in the appraisal and use of qualitative methods in research in health. The development of studies from research questions through design, conduct, and analysis and interpretation of such studies are examined in detail. Students are required to prepare a portfolio examining the use of a specific methodological approach in qualitative health research.

POPLHLTH 705 (15 Points)
Evaluation Research Methods

Provides a comprehensive outline of the nature of programme evaluation in the health sector and an overview of a variety of approaches to programme evaluation and the appropriate use of research tools. Includes logic models, stakeholder analysis, developing indicators, client surveys and multicultural evaluation. Emphasis on mixed methods evaluation designs involving qualitative and quantitative data gathering.

Restriction: COMHLTH 710

POPLHLTH 706 (15 Points)
Statistics in Health Science

An introduction to statistics and statistical methods for health scientists. Covers basic methods and tests, including regression.

Restriction: COMHLTH 701

POPLHLTH 707 (15 Points)
Statistics in Health Science 2

Develops and builds on elementary statistical methods and prepares the student for advanced epidemiological and statistical analysis.

Prerequisite: 15 points from COMHLTH 701, POPLHLTH 706

Restriction: COMHLTH 722

POPLHLTH 708 (15 Points)
Epidemiology

An introduction to epidemiological study design, measures of effect, screening, basic statistics for epidemiology and critical appraisal.

Restriction: COMHLTH 703

POPLHLTH 709 (15 Points)

Clinical Epidemiology and Evidence-based Health Care

Explores the application of epidemiological principles to clinical decision making, central to the practice of evidence based health care. Underlying this practice is the ability to effectively, critically and systematically appraise and synthesise relevant evidence to answer important clinical and health care questions about screening, diagnosis, prognosis, interventions (including therapy), and economic implications (cost-effectiveness and efficiency).

Restriction: COMHLTH 720

POPLHLTH 711 (15 Points)

Systematic Reviews and Meta-analysis

An introduction to the principles and critical appraisal of systematic reviews and meta-analysis and their role in evidence-based practice. Topics include: protocol development, question formulation, identification of evidence, selection of studies for inclusion, appraisal and quality of included studies, extraction and recording of data, synthesis (meta-analysis) and interpretation of results, and application.

Prerequisite: COMHLTH 720 or POPLHLTH 709 or equivalent experience

Restriction: COMHLTH 739

POPLHLTH 712 (15 Points)

Clinical Trial Design, Analysis and Management

An introduction to the methodological and practical aspects of clinical trial design, analysis and management. Participants will develop skills in designing and conducting randomised controlled trials.

Prerequisite: COMHLTH 720 or POPLHLTH 709 or equivalent experience

Restriction: COMHLTH 732

POPLHLTH 715 (15 Points)

International Public Health

Explores global health from a public health perspective, with a strong emphasis on health and its determinants in developing countries. Topics covered include the global burden of risk and disease, global environmental challenges to health, international health governance, international healthcare financing and international health promotion.

POPLHLTH 716 (30 Points)

Foundations of Public Health

Aims to introduce students to a public health perspective and provides a framework for exploring public health issues. Covers the scope, methods and practice of public health of which health services are an integral part. As well as introducing students to aspects of epidemiology, the course also touches on a range of social science perspectives, which explore the relationship of health with society.

Restriction: COMHLTH 725

POPLHLTH 717 (15 Points)

Health and Society

An exploration of health within a social context. Examines the relationships between social factors, their impact on health and the ways in which these relationships inform our understanding of health and help direct health care provision.

Restriction: COMHLTH 704

POPLHLTH 718 (15 Points)

Health and Public Policy

A discussion of policy studies frameworks, and

how these can be used to analyse policy issues and processes relevant to health and health care.

Restriction: COMHLTH 705

POPLHLTH 719 (15 Points)

Health Economics

Fundamental economic concepts and their application to health care. Provides students with some analytical skills with which to address issues and problems in the funding and organisation of health services.

Restriction: COMHLTH 707

POPLHLTH 720 (15 Points)

Cost Effectiveness Evaluation

The application of economic methods to the evaluation of health services and programmes. The principles and techniques of economic evaluation, the process of measuring costs and benefits of health services, quality of life measurement.

Restriction: COMHLTH 708

POPLHLTH 721 (15 Points)

Health Management

The application of general management principles to health organisations and services, with particular reference to the nature of health organisations, managing with professionals, working with teams and designing teamwork, leadership in change, improving service delivery and organisational performance in a turbulent environment.

Restriction: COMHLTH 715

POPLHLTH 722 (15 Points)

Health Care Organisation

The principles, structure, organisation and funding of health systems. Special reference to how the New Zealand health system operates and to current issues from an international perspective.

Restriction: COMHLTH 716

POPLHLTH 724 (15 Points)

Quality in Health Care

Quality health care is examined with an emphasis on strategies that enable individuals, teams, and services within health care organisations to implement and sustain performance improvement. Allows students to explore the quality principles to an area of their own choice.

Restriction: COMHLTH 723

POPLHLTH 725 (15 Points)

Environmental Health

Introduction to the mechanisms behind environmental hazards causing damage to human health. Links between industrial and agricultural development, environmental change and public health at local, national and global levels. The role of policies, legislation and public health actions in reducing environmental health risks.

Restriction: COMHLTH 717

POPLHLTH 726 (15 Points)

Health Protection

Current issues will be used to illustrate principles of health protection as an element of public health at local and national levels. The main inter-related topic areas within health protection: communicable disease control and surveillance; non-communicable disease control; food safety; alcohol and smokefree; and water quality will be discussed, along with identification of health hazards, development of prevention strategies, and field implementation methods.

Restriction: COMHLTH 718

POPLHLTH 729 (15 Points)**Information and Strategic Health Management**

Examines the potential for information from all sources to enhance management and impact on strategy in the health sector and health care organisations.

Restriction: COMHLTH 734

POPLHLTH 731 (15 Points)**Child Health**

Need, assessment and evaluation of programmes concerning the health of infants and children and their families. Specific examples include injury and infection prevention, and child advocacy.

Restriction: COMHLTH 745

POPLHLTH 732 (15 Points)**Population Youth Health**

Youth injury prevention, resiliency factors and reproductive issues, and advocacy for young people. How do you make a difference in youth health? This course introduces key concepts in population youth health and utilises an evidence based approach and New Zealand practice examples to consider how youth health can be improved in communities and populations.

Restriction: COMHLTH 746

POPLHLTH 733 (15 Points)**Health Promotion Theory and Models**

Explores the concept, scope and practice of health promotion, and in particular the empowering nature of health promotion in terms of various theoretical models and practice settings. The emphasis is on practical applications in the everyday work of health professionals.

Restriction: COMHLTH 713

POPLHLTH 734 (15 Points)**Health Promotion Strategies**

An overview of approaches and key strategies employed to promote health with an emphasis on public policy, community action and advocacy. Practical application of the principles and techniques of design, implementation and evaluation of health promotion programmes.

Restriction: COMHLTH 714

POPLHLTH 735 (15 Points)**Mental Health Development: Theory and Principles**

Mental Health Development (MHD) represents an emergent paradigm in the mental health sector, one which emphasises strengths, resilience and positive quality of life. It is applicable to all people, including those with mental illness, and to all aspects of mental health and social services. The course has a particular focus on the treatment and recovery for individuals affected by mental health problems.

Restriction: BEHAVSCI 717

POPLHLTH 736 (15 Points)**Mental Health Promotion**

Examines the central role that positive mental health and well-being plays in the health of populations. It focuses on understanding the determinants of mental health and the processes by which these determinants affect mental health. The theory and application of mental health promotion practice, encompassing strategies for action at the societal, community and individual level, are discussed.

Restriction: 575.707, BEHAVSCI 729

POPLHLTH 737 (15 Points)**Alcohol, Tobacco and Other Drug Studies**

Provides an introduction and overview to studies on

alcohol and other drugs. Incorporates theory and research developed within public health, mental health, and specialised treatment frameworks. Topics will include: coverage of historical developments, a review of major theoretical issues and an overview of current trends.

Restriction: 575.706, BEHAVSCI 721

POPLHLTH 738 (15 Points)**Biology of Addiction**

The genetic and neurobiological factors that predispose to addiction. The response of the brain to various addictive substances. The pharmacological, clinical and behavioural effects of alcohol, tobacco, opioids, marijuana, amphetamines and hallucinogens. Treatment of intoxication and withdrawal.

POPLHLTH 739 (15 Points)**Introduction to Pacific Health**

Issues in the health of Pacific people in New Zealand and the Pacific. The application of these issues to improve health and health services of Pacific populations.

Restriction: COMHLTH 730, MPHEALTH 730

POPLHLTH 746 (15 Points)**Ethics, Culture and Societal Approaches to Death**

Approaches to death by Māori and other cultures. Resource and legal issues in the New Zealand context. Ethical issues: euthanasia versus palliative care, privacy, living wills and end of life medical decision-making; particularly treatment abatement. Duties after death, the nature of teamwork, the multidisciplinary nature of palliative care, the role of volunteers, emotional self care for palliative care providers, and home versus residential care.

Restriction: GENPRAC 760

POPLHLTH 747 (15 Points)**Loss, Grief and Bereavement**

Contemporary understandings of change, loss, grief and bereavement in a variety of settings and arising from different causes and situations. Theories and research pertaining to assessment and support procedures and services will be reviewed.

POPLHLTH 749 (15 Points)**Biology of Ageing**

The systematic analysis of the physiological changes in ageing and the relationship of these changes to current beliefs and theories around the ageing process. Current issues around biogerontology are discussed.

Restriction: GENPRAC 778

POPLHLTH 750 (15 Points)**Research Project in Population Health****POPLHLTH 751 (15 Points)****Special Studies****POPLHLTH 752 (15 Points)****Special Topic****POPLHLTH 753 (15 Points)****Special Topic: Tobacco Control****POPLHLTH 754 (15 Points)****Special Topic: Health Leadership****POPLHLTH 755 (60 Points)****POPLHLTH 755A (30 Points)****POPLHLTH 755B (30 Points)****Applied Research Project**

Provides a supervised learning experience for students in their place of work in the health sector. Students must undertake project work and write a report

documenting the work undertaken, the results arising, and the learning obtained.
To complete this course students must enrol in POPLHLTH 755 A and B, or POPLHLTH 755

POPLHLTH 756 (15 Points)

Health Services Analysis and Policy

Examines how social factors, financing systems, organisational systems processes, health technologies and personal behaviours affect health outcomes and quality of life. Provides an overview of current research on access to health care, health care expenditure, quality of care and evidence based management and policy. Provides students with the expertise to conduct quantitative analysis in health services research, and includes the use of statistical packages.

POPLHLTH 757 (15 Points)

Evaluation Theory and Practice

Provides an in-depth perspective of evaluation theory and practice, and their application to the health sector. There will be an advanced level focus (following on from POPLHLTH 705) on how to conduct evaluations using a variety of models and applying them to specific contexts. Suitable for students wishing to develop more advanced skills in evaluation.

Prerequisite: COMHLTH 710 or POPLHLTH 705 or permission from the Course Coordinator

POPLHLTH 758 (15 Points)

Theoretical Concepts of Health

A number of theoretical explanations of public health are considered in order to address health issues in diverse communities. An ecological perspective of health will be explored and the specific models of population health will be critiqued.

Population Health Practice

Postgraduate Courses

POPLPRAC 701 (15 Points)

Therapeutic Communication

Critical analysis of patient-centred approaches to

communication with a strong practical emphasis. Topics will reflect the learning needs of the participants as located within their own area of clinical practice, and may include: communication within family systems; preparing for and managing challenging and/or difficult communication situations, including the giving of bad news; appropriate communication styles, including assertiveness and managing conflict. The role of self in the therapeutic relationship will be explored.

Restriction: GENPRAC 703

POPLPRAC 702 (15 Points)

Primary Mental Health

Provides an overview of the recognition and primary care management of adult mental health. A clinically focused course for primary care practitioners. The content covers high prevalence conditions (depression, anxiety, adjustment disorders) along with assessment and treatment options. Long term conditions – bipolar affective disorder and schizophrenia – are discussed. Topics include recovery, cultural approaches, resilience, psychosomatic interface, stigma, CBT techniques for depression, insomnia, and alcohol and drugs.

Restriction: GENPRAC 721

POPLPRAC 703 (15 Points)

Primary Mental Health 2

Common mental illnesses that present in Primary Care. Topics include: Child and Adolescent Mental Health (depression, risk assessment, panic disorder, substance use, eating disorders, Attention Deficit Hyperactivity Disorder, families, behavioural problems, pain and somatic problems), mental health in older adults (depression, dementia, legal and ethical issues), chronic conditions (screening issues, physical and mental illness, common problems in Primary Care). This course has a clinical and practical focus.

Prerequisite: POPLPRAC 702 or equivalent experience

Restriction: GENPRAC 722

POPLPRAC 706A (15 Points)

POPLPRAC 706B (15 Points)

Interventions for Mental Health

The design of appropriate interventions in the community and a variety of applied contexts (eg, in-patient units, community support services or schools) using mental health development principles such as the recovery approach, empowerment, resiliency and cultural development.

Restriction: BEHAVSCI 700

To complete this course students must enrol in POPLPRAC 706 A and B

POPLPRAC 707 (15 Points)

Theory and Skills in Counselling Practice

The theory, research and practice regarding counselling and psycho-therapeutic approaches used in mental health and addiction service contexts. Approaches will be critically examined in terms of history, theory, social context and trends in research. Particular attention will focus on counselling methods currently in use within services.

Restriction: BEHAVSCI 710

POPLPRAC 708A (15 Points)

POPLPRAC 708B (15 Points)

Assessment and Intervention with Addiction

Aims to provide students with understanding and competency in assessment and intervention work with alcohol and drug affected clients. It is divided into a series of training modules focusing on comprehensive assessment, effective clinical interventions, drug specific interventions and approaches within families

and communities. It will involve regular case-based supervision.

Restriction: BEHAVSCI 736

To complete this course students must enrol in POPLPRAC 708 A and B

POPLPRAC 709 (15 Points)

Gambling and Health

Provides an overview of gambling in New Zealand with an emphasis on historical, social, psychological and public health perspectives. It examines the emergence of harm from gambling and reviews research and theory as applied in services at the level of prevention, intervention and treatment.

Restriction: BEHAVSCI 738

POPLPRAC 710 (15 Points)

Health Promotion: Practicum

Theoretical and practical principles of health promotion processes, combined with practical experience, in the context of relevant organisations, community groups and research projects. Students are expected to find their own placement for the practicum.

Restriction: COMHLTH 743

POPLPRAC 711 (15 Points)

Health Promotion in Pacific Community Development

Allows supervised experience for students in a Pacific-specific service. A course of study relevant to the area of placement will be prescribed.

Restriction: MPHEALTH 726

POPLPRAC 712 (15 Points)

Project Planning for Lifestyle Change

Focuses on the planning and development of interventions aimed at addressing lifestyle issues such as alcohol and other dangerous consumptions, obesity, lack of exercise and mental trauma. Students synthesise strategies from published literature and adapt them pragmatically for application in local contexts. Interventions will include those occurring in communities, primary and mental health care settings, hospitals, workplaces, and educational institutions.

Restriction: BEHAVSCI 722

POPLPRAC 713 (15 Points)

Health and Lifestyle

Theory and research regarding lifestyle issues influencing health and the information base for the delivery of health advice. Topics include: the epidemiology of risk and protection factors affecting physical and mental health; responses to alcohol, tobacco, gambling and other drug issues; reproductive health and the evidence on other lifestyle behaviours affecting health.

Restriction: GENPRAC 735

POPLPRAC 714 (15 Points)

Health Promotion and Education

The delivery of health interventions and the development of the processes used in providing health advice and education. Critical appraisal of the effectiveness of strategies for assisting lifestyle changes such as weight reduction, substance use and increasing exercise. Students will examine the issues and practicalities associated with introducing health interventions into primary health contexts.

Restriction: GENPRAC 736

Practicum in Population Health

Learning of advanced knowledge and skills, and

supervised experience within an area of Population Health.

To complete this course students must enrol in POPLPRAC 715 A and B, or POPLPRAC 715

POPLPRAC 716 (15 Points)

Practicum in Pacific Health

Supervised experience for students in a Pacific-specific health environment. A course of study relevant to the area of placement will be provided.

POPLPRAC 717 (15 Points)

Coexisting Disorders: Theory and Principles

Suitable for students who work within both the mental health and the alcohol and drug services. It introduces students to research and theory on coexisting disorders and examines recent developments in intervention strategies from a theoretical point of view.

Restriction: BEHAVSCI 737

POPLPRAC 718 (15 Points)

Coexisting Disorders: Interventions

Develops the theoretical ideas in practice introduced in Coexisting Disorders: Theory and Principles. Additionally, students have an opportunity to reflect on the organisation of services to people with a dual diagnosis and the best practice that is offered within them.

Prerequisite: BEHAVSCI 737 or POPLPRAC 717

Restriction: BEHAVSCI 739

POPLPRAC 719 (15 Points)

Essentials of Palliative Care

Philosophy of palliative care, self-care including professional supervision and debriefing, cultural and ethical issues in palliative care, pain and other symptom management, loss, grief and spirituality issues in palliative care. Palliative care interventions such as paracentesis and thoracentesis. Coordination and planning of future care.

POPLPRAC 720 (15 Points)

Psychosocial Issues in Palliative Care

The psychological and social study of patients with cancer or active, progressive disease, unresponsive to curative treatment. Existential philosophy and models of coping with suffering, communication in palliative care, psychiatric disorders in palliative care, and bereavement.

Restriction: GENPRAC 761

POPLPRAC 721 (15 Points)

Reflective Practice in Palliative Care

Advanced study in an appropriate area of palliative care that is of special interest to the student as approved by the Head of School.

Restriction: GENPRAC 763

POPLPRAC 722 (15 Points)

Foundations of Clinical Symptom Management in Palliative Care

Management of pain, nausea and vomiting, respiratory symptoms, bowel care, mouth and skin care, cognitive mood and sleep disorders, oncological emergencies, palliative care for non malignant conditions, HIV/AIDs, and paediatric palliative care.

Restriction: GENPRAC 762

POPLPRAC 723 (15 Points)

Clinical Symptom Management in Palliative Care 2

Advanced concepts of the management of symptoms in a variety of palliative care situations.

Restriction: GENPRAC 785

POPLPRAC 724 (15 Points)

Child and Adolescent Palliative Care

An examination of specific palliative care issues related to the care of children, adolescents, and their families.

Restriction: GENPRAC 786

POPLPRAC 725 (15 Points)

Principles of Gerontology

The basic biology, demographics, social policy, sociology, psychology and economics of ageing.

Restriction: GENPRAC 605, 770

Health Services for Elderly People

Regulatory and accreditation requirements for facilities caring for the elderly in a wide variety of organisations and models of care for the elderly. Critical review of innovative services in elderly care.

Restriction: GENPRAC 605, 771

POPLPRAC 727 (15 Points)

Mental Health in Old Age

The psychological aspects of ageing, common psychiatric presentations in the elderly, sleep disturbance, grief and loss, anxiety disorders, drug and alcohol abuse, depression, delirium, dementia, behavioural disorders, psychosis, and medico-legal aspects.

Restriction: GENPRAC 606, 772

POPLPRAC 728 (15 Points)

Rehabilitation in Later Life

The rehabilitation of elderly people having suffered from stroke, amputation, fractures and invasive procedures. Includes a practical attachment to a rehabilitation unit for the elderly.

Restriction: GENPRAC 773

POPLPRAC 729 (15 Points)

Medical Care of the Elderly 1

The clinical pharmacology, altered disease presentation, interpretation of laboratory data, surgical and anaesthetic risk, analgesia, infections, falls, vascular disease, oral and dental disorders commonly seen in the elderly.

Restriction: GENPRAC 606, 774

POPLPRAC 730 (15 Points)

Medical Care of the Elderly 2

Ophthalmic disease, respiratory disease in the elderly, orthopaedic disorders, rheumatic disorders, health issues of the elderly male and female, sexually transmitted diseases and the utility of medical imaging procedures in the care of the elderly.

Restriction: GENPRAC 775

POPLPRAC 731 (15 Points)

Medical Care of the Elderly 3

Medical aspects of assessment of the psycho-geriatric patient, psychopharmacology, medical matters in the depressed and anxious patient, depression and bipolar affective disorder, differential diagnosis of delirium and dementia and its medical and pharmacological management, treatment of psychotic disorders, Parkinson's disease and Parkinsonism, and gait disorders.

POPLPRAC 736 (15 Points)

Clinical Skills and Organisational Issues in Accident and Medical Practice

Develops a number of clinical skills relevant to the Acute Medical and Acute Surgical courses, as well as an examination of client-centred communication practices. The positioning of Accident and Medical

Practice within the New Zealand health system is examined including management, medico-legal and statutory issues.

POPLPRAC 737 (15 Points)

Acute Orthopaedics

Assessment and management of injuries and acute conditions of the musculoskeletal system and the skin. Included are clinical examination techniques, radiological examination and management of sprains, fractures, arthritis soft tissue wounds and dermatological conditions.

Restriction: GENPRAC 749, 751

POPLPRAC 738 (15 Points)

Acute Plastics

Assessment and management of acute plastic surgical, soft tissue and dermatological conditions. Included are assessment and management of hand, facial and dental injuries, burns, a wide variety of wounds and wound complications. Optimal use of analgesics and local anaesthetics is also discussed.

Restriction: GENPRAC 750, 751

POPLPRAC 739 (15 Points)

Acute Medical

Assessment and management of a broad range of acute conditions and related issues including: chest pain, dyspnoea, collapse, coma, anaphylaxis, diabetes, toxicology, psychiatry and environmental conditions.

Restriction: GENPRAC 752, 754

POPLPRAC 740 (15 Points)

Acute Surgical

Assessment and management of acute surgical and subspecialty conditions and related issues including: trauma, head injury, abdominal pain, ophthalmology, ENT, gynaecology, pregnancy, and genito-urinary conditions.

Restriction: GENPRAC 752, 755

POPLPRAC 741 (15 Points)

Practical Orthopaedics and Plastics

Specific practical skills including: joint and limb examination, common reductions, splint and plaster application, wound repair, x-ray interpretation. A log book of attendance at specialist clinics and practical work experience is required.

Prerequisite: 30 points from GENPRAC 749, 750, POPLPRAC 737, 738

Restriction: GENPRAC 603, 751, 753

POPLPRAC 742 (15 Points)

Immediate Care

Assessment and management of emergencies in the field and the initial stages of inpatient care of the undifferentiated casualty. Includes: airway management, initial stabilisation, transport systems, care of the patient in transit, triage, disaster medicine and mass incident management.

Restriction: GENPRAC 756

POPLPRAC 743 (15 Points)

Upper Limb and Spine

The management of acute and chronic sporting injuries of the upper limb and spine including: initial management, surgical intervention, and rehabilitation.

Restriction: GENPRAC 780

POPLPRAC 744 (15 Points)

Lower Limb and Physiotherapy

The management of acute and chronic sporting injuries

of the lower limb including: initial management, surgical intervention, and rehabilitation. Physiotherapy principles in relation to diagnosis, management and rehabilitation are covered.

Restriction: GENPRAC 758, 781

Child and Adolescent Psychopathology

Includes teaching on conceptualisation of mental disorder in children and adolescents, specifically considering the benefits and pitfalls of an illness model. The major focus will be a biopsychosocial and developmental perspective and there will be specific teaching focusing on the DSM IV classification in child and adolescent psychiatry.

PSYCHIAT 741 (15 Points)

Therapy in Child and Adolescent Mental Health – Theory

Covers the range of treatment modalities used in child and adolescent mental health. Rationale and nature of current therapies will be covered. Students will undertake critical appraisal of the evidence base for therapy pertinent to specific clinical situations.

Prerequisite: PSYCHIAT 740

PSYCHIAT 746 (15 Points)

Research Topic in Forensic Psychiatry

A detailed research study of key issues in forensic psychiatry.

PSYCHIAT 747 (15 Points)

Child and Adolescent Development

Evaluation of research support for major conceptual and theoretical frameworks for understanding development will be addressed. There will be a focus on specific aspects of development in relation to mental health in childhood and adolescence. These will include: theories of attachment, cognitive development, and social and emotional development in the context of the family; and identity and self-concept issues in adolescence.

Restriction: 575.620

PSYCHIAT 760 (15 Points)

Legal Issues in Psychiatry

An overview of the key issues in the interface between the law and psychiatry, including issues in criminal law (legal insanity, fitness to stand trial, sentencing issues of mentally abnormal offenders), mental health law and civil forensic psychiatry. Report writing and the principles of expert testimony will be addressed.

PSYCHIAT 761 (15 Points)**Clinical Forensic Psychiatry 1**

Addresses the major clinical themes of forensic psychiatry. Students will develop an understanding of the relationship between mental disorder and dangerous behaviour, the principles of risk assessment and management, and the service needs of mentally abnormal offenders.

PSYCHIAT 762 (15 Points)**Clinical Forensic Psychiatry 2**

Examines the literature in detail in relation to key forensic psychiatric issues including: the assessment of risk of violence, the impact of treatment services, the nature and application of the concept of psychopathy, and the role and directions of forensic psychiatric research.

Prerequisite: PSYCHIAT 761

PSYCHIAT 766 (15 Points)**Special Topic****PSYCHIAT 767 (15 Points)****Special Studies****PSYCHIAT 768 (30 Points)****PSYCHIAT 768A (15 Points)****PSYCHIAT 768B (15 Points)****Clinical Skills in Child, Adolescent and Family Mental Health Assessment**

The clinical skills of assessment, formulation and case recording of children and adolescents, and their families within a mental health setting. An amalgam of theory and practice including methods of assessment, assessment of specific psychiatric disorders, assessment interviewing skills, processing and synthesis of clinical assessment information in written work.

Corequisite: PSYCHIAT 740, 747

Restriction: PSYCHIAT 748, 749

To complete this course students must enrol in PSYCHIAT 768 A and B, or PSYCHIAT 768

PSYCHIAT 769 (15 Points)**CBT with Children, Adolescents and their Families 1**

Explores Cognitive Behavioural Therapy (CBT) as an evidence-based treatment for children, adolescents and their families, and covers both theoretical and practical applications of CBT. Specifically designed for New Zealand based practitioners working clinically and/or therapeutically with families, students will learn the CBT model, treatment packages and strategies for depression and anxiety. There is also a strong focus on culturally appropriate interventions (especially those appropriate for Māori).

Prerequisite: PSYCHIAT 740, 747

PSYCHIAT 770 (15 Points)**CBT with Children, Adolescents and their Families 2**

Examines advanced knowledge and skills applied to complex disorders. Builds on PSYCHIAT 769 and further extends the practitioner's knowledge and skill base to include more complex issues of Trauma, Anger, DBD, Self-esteem, OCD and Personality. The strong cultural focus continues, with issues for Māori families being considered in more depth. Students will also have access to New Zealand CBT resources and practice more in-depth CBT skills.

Prerequisite: PSYCHIAT 769

PSYCHIAT 771 (15 Points)**Special Topic****PSYCHIAT 772 (15 Points)****Special Topic****Faculty of Science****Anthropological Science**

Prescriptions for courses included in this programme are listed under their respective subject codes.

Applied Geology

Prescriptions for courses included in this programme are listed under their respective subject codes.

Applied Mathematics

Prescriptions for courses included in this programme are listed under their respective subject codes.

Bioinformatics**Postgraduate Courses****BIOINF 789A (22.5 Points)****BIOINF 789B (22.5 Points)****Project in Bioinformatics**

Prerequisite: BIOSCI 359 and approval of Programme Director

Restriction: COMPSCI 789, STATS 789

To complete this course students must enrol in BIOINF 789 A and B

BIOINF 796A (60 Points)**BIOINF 796B (60 Points)****MSc Thesis in Bioinformatics**

To complete this course students must enrol in BIOINF 796 A and B

Biological Sciences**BIOSCI 91F (15 Points)****Foundation Biology 1**

An introduction to unity in biological sciences. The structures and processes common to all living things at the cellular and molecular levels are introduced in the first half of the course. Genetic principles and processes and an overview of evolutionary concepts are explored in the second half. Laboratory classes complement and reinforce lecture material and several are computer-based utilising multi-media learning tools.

Restriction: BIOSCI 91W

BIOSCI 92F (15 Points)**Foundation Biology 2**

Concepts introduced in BIOSCI 91F are further developed with an emphasis on the diversity of living things (including bacteria, plants, fungi and animals). Fundamentals of classification and ecology are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory and field-based.

Restriction: BIOSCI 92W

Stage I**BIOSCI 100 (15 Points)****BIOSCI 100G (15 Points)****Antarctica: The Frozen Continent**

A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution. This course is suitable for students with both science and non-science backgrounds.

BIOSCI 101 (15 Points)**Essential Biology: From Genomes to Organisms**

An introduction to the structures and processes which are common to micro-organisms, animals and plants at the cellular, molecular and biochemical levels. Genetic principles and processes and an overview of evolution and evolutionary concepts are included.

This course assumes a knowledge of NCEA Level 3 Biology and at least NCEA Level 2 Chemistry.

BIOSCI 102 (15 Points)**Plants, Microbes and Society**

A multidisciplinary approach is taken to studying the relationships between plants, microbes and humans. The course begins with an introduction to the key characteristics of plants and microbes and then goes on to show how they are used for food and pharmaceuticals. The impact of plants and microbes on human health, as well as their role in a variety of industrial and biotechnological processes, will be highlighted.

BIOSCI 103 (15 Points)**Comparative Animal Biology**

A comparative approach to the study of animals, focusing on the processes which underlie and unite all animal life. Emphasis will be placed on evolutionary relationships and history, and on the relationship between form and function and the predictability of animal design. Reference will be made to the New Zealand fauna and to other animals of economic or evolutionary importance, where appropriate.

BIOSCI 104 (15 Points)**BIOSCI 104G (15 Points)****New Zealand Ecology and Conservation**

An introduction to the diversity of animals and plants in New Zealand including endemic, native and introduced species, biogeographical and evolutionary relationships, community structure and interrelationships, behaviour and ecology, Maori perspectives in biology, and current conservation, environmental, social, animal welfare and economic issues relevant to New Zealand biology.

BIOSCI 106 (15 Points)**Foundations of Biochemistry**

Biochemical reactions as essential elements of life processes with reference to the genes that control them. Material covered includes: the molecular structure and action of proteins, the synthesis and metabolism of carbohydrates and fats in the fed and starved states, and elements of enzymology, energetics, metabolism,

nutrition and hormonal control in health, physical performance and disease. Reference will be made to specific biomedical examples, where appropriate.

BIOSCI 107 (15 Points)**Biology for Biomedical Science: Cellular Processes and Development**

The cellular basis of mammalian form and function including embryology and development. Particular emphasis will be placed on the cellular components of the blood, neural, muscular, reproductive, immune and supporting systems, and how they contribute to the structure and function of the body as a whole.

Stage II**BIOSCI 201 (15 Points)****Cellular and Molecular Biology**

The basic structures of biomolecules, the evolution and structure of cells and their organisation into tissues and organs are examined first. This is followed by a study of the nucleus, the regulation of gene expression, and DNA, RNA and protein synthesis. Further sections deal with cell behaviour, development, cancer and the basis of immunity.

Prerequisite: BIOSCI 101, and 30 points from BIOSCI 102–107, MEDSCI 142, and 15 points from CHEM 110, 120, 150

BIOSCI 202 (15 Points)**Genetics**

The basic principles of mutation, recombination and genetic mapping are established in this course. These principles are developed in a variety of prokaryotic and eukaryotic organisms. Laboratory work uses molecular, microbial and eukaryotic material to explore the key features of heredity.

Prerequisite: 30 points from Stage I Biological Sciences including BIOSCI 101

BIOSCI 203 (15 Points)**Biochemistry**

This course presents core areas of modern animal and plant biochemistry. Emphasis is on macromolecular (protein, enzyme and membrane) structure and function, central metabolism, including metabolic integration and control, and signal transduction in hormone action and vision. Plant biochemistry includes nitrogen fixation, photosynthesis and cell-wall structure.

Prerequisite: BIOSCI 101, 106 and 15 points from CHEM 110, 120

BIOSCI 204 (15 Points)**Applied and Environmental Microbiology**

Functions and behaviour of micro-organisms (prokaryotes, eukaryotes and viruses) as individuals and in communities. The fundamental role of micro-organisms in ecosystems. Application of microbial capabilities to biotechnology, food production, agriculture and industry. Methods for the isolation, culture and study of micro-organisms.

Prerequisite: BIOSCI 101 and at least 15 points from BIOSCI 102, 106, 107

BIOSCI 205 (15 Points)**Plant, Cell and Environment**

Unlike animals, plants cannot move to respond to changes in their environment. Plants have evolved diverse signaling systems and the ability to grow towards their essential resources. Explores the intricate ways plants function, how they are able to respond to

developmental and environmental signals at the whole plant and cellular level.

Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102, 104, 106, 107

BIOSCI 206 (15 Points)

Principles of Ecology

An examination of ecosystem processes, factors that affect distribution and interactions of organisms, population ecology, and applications of ecology such as restoration and conservation. The key principles of ecology are taught in a New Zealand context emphasising an experimental approach.

Prerequisite: BIOSCI 101, 104

Corequisite: BIOSCI 209

BIOSCI 207 (15 Points)

Adaptive Design

The principles of evolutionary adaptation to different habitats and their application to behaviour, morphology, physiology and life histories. Comparative examples are drawn from diverse life forms and contexts, including the biology of dinosaurs, how animals navigate, the evolution of ageing, costs and benefits of sex and an evolutionary account of human nutritional biology.

Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102–104, 106, 107

BIOSCI 208 (15 Points)

Invertebrate Diversity

Invertebrates make up over 95 percent of animal species. This course explores the biology of invertebrates with an emphasis on structure, function, life histories, behaviour and ecology. Invertebrate diversity is examined in a variety of environments, using New Zealand examples where possible, and provides the basis for advanced courses in conservation and marine ecology.

Prerequisite: BIOSCI 101, 103

BIOSCI 209 (15 Points)

Biometry

The analysis of data from biological investigations using computer packages and the interpretation and communication of the results of statistical analyses. Understanding the logic of statistical techniques. The topics covered include: regression and analysis of variance models, analysing frequencies and counts, experimental design and sampling.

Prerequisite: 15 points in either STATS 101 or STATS 108 and 30 points from Biological Sciences, Environmental Sciences or Geography

BIOSCI 210 (15 Points)

Evolution and the Origins of Life

Covers basic concepts in evolutionary biology including Darwin and the theory of evolution by natural selection, phylogenetics, population genetics, molecular evolution, speciation and extinction. The extent to which Darwin's theory of evolution by natural selection can explain the origins of biological complexity is explored.

Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102, 103, 104, 106, 107

Stage III

BIOSCI 320 (15 Points)

Pure and Applied Entomology

An introduction to the systematics of insects describing the characters that define the major lineages, discussion of the role insects play in different ecological systems, and insect anatomy, physiology, and genetics. Their impact on agriculture and as disease vectors is discussed with descriptions of various control methods for insect pests and how these methods are

integrated. Students wishing to complete a course in plant protection should take both BIOSCI 320 and 321.

Prerequisite: BIOSCI 103 and 15 points from Stage II Biological Sciences courses

BIOSCI 321 (15 Points)

Plant Pathology

Micro-organisms are of major importance to agriculture. This course will examine the biology of plant pathogens, plant-microbial interactions at the cellular and sub-cellular level, and the epidemiology and control of plant diseases. Practicals will focus on techniques for isolation, culture, identification and study of plant pathogens.

Prerequisite: 15 points from BIOSCI 204, 205

BIOSCI 322 (15 Points)

Evolution of Genes, Populations and Species

Fundamentals of molecular evolution, population genetics, phylogenetic and organismal evolution. Examples from animals, plants and microbes, as well as current issues, including speciation, adaptation, co-evolution, conservation, genomics, biotechnology and human disease will be considered.

Prerequisite: BIOSCI 202 and 210

BIOSCI 323 (15 Points)

Plant Diversity

An introduction to plant systematics, plant reproductive strategies, and the evolution of plants with a comprehensive survey of the characteristics and distributions of the major plant groups. Coverage will also include classical and phylogenetic approaches to plant identification, and applications of systematics. Practical work will focus on tools for identifying plants, introduction to plant diversity in the lab and field, and development of a herbarium collection.

Prerequisite: 30 points at Stage II in Biological Sciences, Environmental Science or Geography

BIOSCI 328 (15 Points)

Fisheries and Aquaculture

Harvest and capture of aquatic organisms and inter-relationships with aquaculture. Fisheries and aquaculture are treated not as distinct disciplines but in the context of integrating exploitation and sustainable environmental integrity. Case studies include deep sea and coastal fisheries, and shellfish culture.

Prerequisite: BIOSCI 207 or 208

BIOSCI 329 (15 Points)

Biology of Fish

A comprehensive coverage of the biology of fish including their evolution, diversity and organism biology. Coverage includes habitats of particular interest to New Zealand such as Antarctica, the deep sea, coral and temperate reefs, and New Zealand's lakes and rivers.

Prerequisite: 15 points from BIOSCI 207, 208

BIOSCI 330 (15 Points)

Freshwater and Estuarine Ecology

The structure, biodiversity and ecology of lakes, streams, wetlands and estuaries and linkages with near-shore marine habitats. Emphasis is placed on the role of science in monitoring and managing these ecosystems. Case studies include the impact of Auckland's urban sprawl on stream, estuarine and near-shore marine habitats, and local estuaries as nurseries for fish.

Prerequisite: BIOSCI 206, or 104 and 15 points from BIOSCI 205 or 207 or 208, and 209

BIOSCI 333 (15 Points)
Marine Ecology

Patterns and processes in marine ecology and biodiversity are described; including animal and plant interactions, benthic and pelagic habitats, biogeography, productivity and physiology. Applied aspects include resources such as fisheries and aquaculture, survey methods, and pollution. Other lectures cover nutritional and chemical ecology and invertebrate reproduction.

Prerequisite: BIOSCI 206, 209

BIOSCI 335 (15 Points)
Ecological Physiology

Focuses on the strategies used by animals to cope with physical and biological challenges in the environment. Accordingly, we work at the level of the individual and the interface between physiological, biochemical or molecular approaches on the one hand, and ecology on the other. The adaptive strategies employed by a range of species, with an emphasis on aquatic organisms, in response to physical factors such as temperature, oxygen and food availability, are considered. Energetics and nutrition are emphasised. The course aims to meet the needs of students with ecological interests wishing to recognise the experimental approach to solving problems in environmental biology. The practical work is project oriented rather than laboratory based.

Prerequisite: 15 points from BIOSCI 207, 208

BIOSCI 337 (15 Points)
Animal Behaviour

Proximate and ultimate causes of behaviour are investigated experimentally in the field and the laboratory. Responses by animals to variations in the physical environment and to other organisms are studied. The development and organisation of behaviour and the theoretical background to topics of current interest are covered, using both New Zealand and overseas examples. A knowledge of BIOSCI 206 is recommended.

Prerequisite: BIOSCI 207 and STATS 101 or 108 or BIOSCI 209

BIOSCI 340 (15 Points)
Plant Cell Biology and Biotechnology

Explores the cellular basis of how plants develop, function and respond to the environment and how this knowledge is applied to biotechnology. Topics include: methods in plant cell biology, control of gene expression, control of cell shape, intracellular transport and targeting, plant growth hormones and signaling, controlled flowering, structures and biosynthesis of plant cell walls and horticultural biotechnology.

Prerequisite: BIOSCI 201 or 202 or 205

BIOSCI 347 (15 Points)
Environmental Microbiology and Biotechnology

The ecology and physiology of micro-organisms in natural and engineered environments. Key themes include marine microbiology, the importance of microbial symbioses to life on Earth, and contemporary research methods in microbiology. Processes such as wastewater treatment and the production of bioactives are used to emphasise exploitation of microbial metabolism for environmental biotechnology purposes.

Prerequisite: 15 points from BIOSCI 204, MOLMED 201, MEDSCI 202

Restriction: BIOSCI 352

BIOSCI 348 (15 Points)
Food and Beverage Microbiology

The use and scientific fundamentals of micro-organisms in the production of foods and food additives, nutraceuticals and probiotics. Molecular and applied aspects of the fermentation processes for beer and wine including aroma generation and analysis. Microbial food spoilage, pathogens involved, food safety and quality control.

Prerequisite: 15 points from BIOSCI 204, MOLMED 201, MEDSCI 202

Restriction: BIOSCI 352

BIOSCI 349 (15 Points)
Biomedical Microbiology

The major biochemical, physiological and genetic systems involved in the biology of micro-organisms affecting human health. Properties of micro-organisms important in pathogenesis and virulence, and examples of infectious diseases. The molecular response of the host cells during infection; the molecular basis for antimicrobial therapy, acquisition of resistance, and vaccination; use of micro-organisms in medical biotechnology.

Prerequisite: 15 points from BIOSCI 204, MOLMED 201, MEDSCI 202

BIOSCI 350 (15 Points)
Protein Structure and Function

The relationship of molecular structure to protein function will be emphasised. Techniques for the purification, characterisation, production of native and recombinant proteins and three-dimensional structure determination will be combined with a description of protein structure. Specific groups of proteins will be selected to illustrate structure/function relationships and protein evolution.

Prerequisite: BIOSCI 201, 203

BIOSCI 351 (15 Points)
Molecular Genetics

The analysis of genetic material in prokaryotes, viruses, yeast, plants and humans is addressed. The means by which genetic information is transferred and the mechanisms underlying genome diversity will be examined, together with the study of eukaryote genomes at the level of chromosome structure and organisation. The molecular mechanisms underpinning selected inherited human disorders will be discussed as well as the role of model species in understanding normal and perturbed biological pathways.

Prerequisite: BIOSCI 201, 202

BIOSCI 352 (15 Points)
Applied and Food Microbiology

Physiological and behavioural ecology of micro-organisms, and microbial communities in food and natural environments including plants, animals and water. Applications of biotechnology in waste management. Bacterial signalling systems, inducible responses, biofilm formation, microbial interactions and genetics. Molecular approaches to the study of micro-organisms and the use of phylogenetic methods. Relevant national and international policy and legislation governing the occurrence and use of micro-organisms.

Prerequisite: 15 points from BIOSCI 204, MOLMED 201, MEDSCI 202

BIOSCI 353 (15 Points)
Molecular and Cellular Regulation

The molecular mechanisms which mediate intracellular sorting and targeting of biologically active molecules and

the networks of intracellular and extracellular signals which regulate cell function form the focus of this course. The roles of growth factors, oncogenes, plasma membrane receptors, nuclear receptors, ion channels and membrane transporters are emphasised.

Prerequisite: BIOSCI 201, 203

BIOSCI 354 (15 Points)

Gene Expression and Gene Transfer

Molecular biology of plant and animal cells is stressed in topics covering gene expression and genetic engineering. These include: methods of gene isolation, transcription factors and the control of gene expression, animal viruses as gene vectors, gene therapy in humans and genetic engineering of livestock, methods of gene transfer in plants, and examples of genetic engineering for crop improvement.

Prerequisite: BIOSCI 202 and either 201 or 203 or 205

BIOSCI 356 (15 Points)

Developmental Biology and Cancer

Molecular, cellular and genetic aspects of normal and abnormal development focusing on a variety of model systems including *Drosophila*, the zebrafish and the mouse. Molecular events underlying the development of body form, the differentiation of specific tissues such as the blood, and abnormalities of development which contribute to diseases of the body such as cancer. Implications of transgenic techniques on development.

Prerequisite: BIOSCI 201, 202

BIOSCI 358 (15 Points)

Nutritional Science

The scientific basis of nutrition focusing on its biochemistry and physiology in health and disease. Nutritional aspects of carbohydrates, fats, proteins, vitamins and trace nutrients are covered in an integrated manner. The methodologies which underpin nutritional science and its applications are included. Reference will be made to a broad range of examples, and a number of specific nutritional topics of current interest will also be included.

Prerequisite: BIOSCI 203

BIOSCI 359 (15 Points)

Bioinformatics

An overview of the methods and applications of computational biology with specific reference to: Internet-accessible database technology, technology and database mining, applications for gene and protein sequence analysis, phylogenetic analyses, and three-dimensional protein prediction methods.

Prerequisite: 15 points from Stage II in Biological Sciences, and COMPSCI 369, and 15 points from Mathematics or Statistics

BIOSCI 394 (15 Points)

Conservation Ecology

Conservation of species and ecosystems. Population ecology, population growth, harvesting and pest control, marine and terrestrial conservation practice, forest and fisheries management. Impacts and control of invasive species. Population viability analysis and case studies in the conservation of threatened species. International conservation.

Prerequisite: 30 points at Stage II in either Biological Sciences or Geography

BIOSCI 395 (15 Points)

Pacific Biogeography and Biodiversity

Island biogeography and insular biodiversity across the Pacific. A multi-disciplinary approach involving

the study of both plant and animal systematics and biogeography.

Prerequisite: 30 points at Stage II in either Biological Sciences or Geography

BIOSCI 396 (15 Points)

Terrestrial Ecology

Experimental and theoretical population and community ecology focusing on the interactions and environmental forces controlling the distribution and abundance of terrestrial populations of plants and animals. Both New Zealand and international examples will be used to explain the fundamental processes shaping ecological systems throughout the world.

Prerequisite: BIOSCI 209 and 206 or BIOSCI 104 and 205 or 207 or 208

Postgraduate Courses

BIOSCI 724 (15 Points)

Marine Ecology

Current topics in marine ecology at the population, community, and ecosystem level. Seminars focus on ecology and evolution in a life-history context, including topics on fertilisation, larval development, and recruitment.

Restriction: BIOSCI 710

BIOSCI 725 (15 Points)

Ecological Physiology

Physiological and biochemical processes enable animals to occupy diverse habitats. Highly variable and extreme environments provide an opportunity to study the functional attributes of animals, particularly ectotherms, with respect to their metabolic, respiratory, and nutritional adaptations. A sound understanding of BIOSCI 335 or equivalent is assumed.

Restriction: BIOSCI 711

BIOSCI 727 (15 Points)

Aquaculture

Current assessment of the national and global status of aquaculture and fisheries, including consideration of future prospects. Examples of algal, invertebrate, and fish aquaculture in New Zealand, and a review of general environmental and biological problems and the role of scientific knowledge in aquaculture management. Coverage of factors contributing to wild fisheries management, including spawning, larval survival, recruitment, principles of stock assessment and fisheries modelling. A sound knowledge of BIOSCI 328 or equivalent is assumed.

Restriction: BIOSCI 712, 726

BIOSCI 728 (15 Points)

Neuroethology

The experimental study of the neural basis of behaviour, including current topics in sensory systems (eg, vision, olfaction, audition, lateral line, electro- and magneto-reception) together with neural mechanisms underlying biological rhythms. The application of neuroethology to biomimetic systems will also be discussed. A sound understanding of BIOSCI 337 or equivalent is assumed.

BIOSCI 729 (15 Points)

Evolutionary Biology

A contemporary approach to central issues in evolutionary biology including mechanisms that produce macroevolutionary patterns. Current research using phylogenetic methods for testing evolutionary hypotheses will be discussed, encompassing the role of selection, the origin of mutations, and concepts of

heredity. A sound understanding of BIOSCI 322 or equivalent is assumed.

Restriction: BIOSCI 706

BIOSCI 730 (15 Points)

Entomology and Biosecurity

More than half of all described species are insects, and even more species await discovery and description. Insects at every trophic level above plants dominate terrestrial and freshwater food chains. Examines the evolution of insects, the importance of their role in terrestrial ecosystems, and the problems posed by insects as biosecurity invaders in non-native environments. A sound understanding of BIOSCI 320 or equivalent is assumed.

Restriction: BIOSCI 708

BIOSCI 731 (15 Points)

Biogeography

Examines the patterns of animal and plant distribution, and the processes that influence these patterns. Topics covered include equilibrium theory, island succession, vicariance and dispersal, insular speciation, and human migration and colonisation. A sound understanding of BIOSCI 395 or equivalent is assumed.

BIOSCI 733 (15 Points)

Molecular Ecology and Evolution

Interpreting the molecular archive by reconstructing the branching history of inheritance and its relationship to genetic diversity within and between species. Topics may include the neutral theory of molecular evolution, rates of molecular evolution, molecular systematics, genome change and speciation, molecular identification of species, gene flow and population structure, selection at the molecular level, inbreeding depression and mutational load, and the use of molecular markers for estimation of kinship and the description of mating systems. A sound understanding of BIOSCI 322 or equivalent is assumed.

Restriction: BIOSCI 719

BIOSCI 735 (15 Points)

Advanced Behavioural Ecology

Focuses on organisms interacting in natural environments. Both the mechanistic underpinnings of behaviour and the fitness consequences of such behavioural traits will be examined. Behavioural ecology is not limited to questions of behaviour, but draws in issues of energetics and physiology as these factors are often used as proxies for fitness traits such as differences in survival and reproduction. A sound understanding of BIOSCI 337 or equivalent is assumed.

Restriction: BIOSCI 723

BIOSCI 736 (15 Points)

Microbial Genomics and Metabolism

Cross-disciplinary issues involved in the understanding of microbial genome structure, gene regulation and metabolism. Includes: the genetic basis of microbial interactions and horizontal gene transfer, the effect of stress and mutation on microbial and viral evolution and modern approaches used to link gene sequence to biological function and phenotypes.

BIOSCI 737 (15 Points)

High Resolution Imaging of Biological Molecules

X-ray crystallography and electron microscopy are two of the principal techniques used by biologists to determine molecular structure. The theory and practice of X-ray crystallography and electron microscopy, including a laboratory component where 3D structure

are determined from experimental data, are addressed. Accessible to students with a variety of backgrounds, including Biology, Bioengineering, Chemistry and Physics. This course complements CHEM 738 and BIOSCI 757.

BIOSCI 738 (15 Points)

Advanced Biological Data Analysis

Advanced biological data analysis, including analysis of variance with nested and random effects, analysis of covariance, cluster analysis, principal components analysis, multidimensional scaling, and randomisation methods. There will be a practical component to this course involving the use of appropriate statistical software.

Prerequisite: BIOSCI 209 or equivalent

BIOSCI 739 (15 Points)

Dialogues in Biology

Cross-disciplinary issues in biology will be debated and explored including ethical and commercial issues underpinning science as a vocation; genetic engineering; development, and evolution versus genetic reductionism; environmentalism, conservation and biodiversity, the role of taxonomy, the history and philosophy of biological science.

BIOSCI 741 (15 Points)

Applied Microbiology and Biotechnology

Historical overview of the development of industrial microbiology. Diversity and complexity of applications. Biodiversity of fermentations. Microbial metabolism and the assimilation of carbon, nitrogen, and sulphur. Interconnections between catabolic and biosynthetic pathways. Metabolic considerations in continuous culture. Selection, isolation and construction of useful organisms. Manipulation of growth conditions to optimise process yield. Contemporary examples of industrial processes using microbes. A sound understanding of BIOSCI 352 or equivalent is assumed.

BIOSCI 742 (15 Points)

Bioinformatics and Computational Biology

The methods and applications of computational biology with specific reference to: Internet-accessible database technology and database mining, search algorithms, applications for gene and protein sequence analysis, phylogenetic analyses, plus three-dimensional protein prediction methods.

Restriction: BIOSCI 359

BIOSCI 743 (15 Points)

Advanced Bioinformatics 1

Biological sequence analysis focussing on RNA, DNA, genes and proteins. Students will be introduced to advanced probabilistic and computational methods of alignment, phylogenetic reconstruction, gene discovery and structural prediction. The use of genetic markers as disease correlates, and the analysis of quantitative trait loci will also be covered.

Prerequisite: BIOSCI 359

BIOSCI 744 (15 Points)

Advanced Bioinformatics 2

Introduction to structural, functional and comparative genomic analysis, and the analysis of micro-array and gene expression data. This course will also survey recent developments in bioinformatics.

BIOSCI 747 (15 Points)

Biosecurity and Invasion Biology

The science of invasion biology, including stages

of the invasion process and ecological interactions between species. The impacts of invasive alien species in different ecosystems. Population and community ecology, in relation to biosecurity.

BIOSCI 748 (15 Points)

Weed and Pest Management

Techniques for the management of invasive plants and animals (vertebrates and invertebrates) in different ecosystem types, including terrestrial and aquatic ecosystems. Approaches to the prevention, control and eradication of invasive species in different situations.

BIOSCI 749 (15 Points)

Ecology of Microbial Interactions

The associations of micro-organisms with their immediate environment are considered. Topics to be discussed include microbial communities and their survival strategies in natural and artificial systems. A sound understanding of BIOSCI 352 or equivalent is assumed.

Restriction: BIOSCI 722

BIOSCI 751 (15 Points)

Advanced Plant Pathology

Addresses selected topics in plant pathology. Modern research on issues relating to plant disease spread (epidemiology) and plant pathogen interactions (disease resistance and susceptibility) will be investigated and discussed. A sound understanding of BIOSCI 321 or equivalent is assumed.

Restriction: BIOSCI 703

BIOSCI 752 (15 Points)

Plant Genomics and Biotechnology

How genomics and gene transfer technologies could be used to achieve improved plant growth and to develop food with new traits. Includes: plant genomics methods, engineering fruit colour, control of fruit ripening and texture, biotechnology project design. A sound understanding of BIOSCI 354 or BIOSCI 340 or equivalent is assumed.

BIOSCI 753 (15 Points)

Synthesis of Plant Products and Foods

Includes the biosynthesis of: selected plant cell-wall components important in dietary fibre or biomass for the production of biofuels, including lignins, cellulose or non-cellulosic polysaccharides; antioxidant pigments in food plants and their possible impacts on human health. The manipulation of nitrogen assimilation in plants to increase the yield and quality of agricultural and horticultural plant products. A sound understanding of BIOSCI 340 or equivalent is assumed.

Restriction: BIOSCI 721

BIOSCI 754 (15 Points)

Plant Genomes and Gene Expression

The analysis of plant genomes and regulation of gene expression in plant biology. Includes: inferences from whole plant genome sequences, transcription factors, transcriptional control of flowering time and post-translational control of hormone receptors by ubiquitination and degradation. A sound understanding of BIOSCI 354 or 340 or equivalent is assumed.

BIOSCI 755 (15 Points)

Genomics and Gene Expression

The analysis of genomes and gene expression as a means of understanding biological processes. Aspects of functional and chemical genomics will be

presented, as well as gene expression profiling using microarray technology. In terms of the latter, features of experimental design and data analysis will be discussed in the context of disease and developmental processes. A sound understanding of BIOSCI 351 or equivalent is assumed.

Restriction: BIOSCI 714

BIOSCI 756 (15 Points)

Proteomics and Protein Interactions

Proteomics describes a field of research concerned with the large-scale study of protein expression and function. Highlights biochemical approaches used to link protein sequence and function. The application of proteomics to drug action, discovery and toxicology will be included. A sound understanding of BIOSCI 350 or equivalent is assumed.

BIOSCI 757 (15 Points)

Structural Biology

A selection of contemporary topics in the field of structure and function of important biomolecules and cellular activities. Topics may include: protein folding in the cell; motor proteins; influenza and HIV; protein structure determination; protein structure and function from genomic data. A sound understanding of BIOSCI 350 or equivalent is assumed.

Restriction: BIOSCI 717

BIOSCI 758 (15 Points)

Development, Differentiation and Disease

A critical analysis of normal and perturbed gene expression in selected model organisms as a means of understanding biological pathways and disease processes. Includes the development and use of transgenic organisms as models for human disease. A sound understanding of BIOSCI 356 or equivalent is assumed.

Restriction: BIOSCI 714, 740

BIOSCI 759 (15 Points)

Molecular Cell Biology and Biomedicine

Explores recent advances in cell biology that have led to a greater understanding of a variety of cellular processes at the molecular level. Emphasis will be placed on biochemical and genetic approaches to understand disease mechanisms at the cellular level. A sound understanding of either BIOSCI 349 or 353 or MEDSCI 314 or equivalent is assumed.

BIOSCI 761 (15 Points)

MSc Thesis Proposal

An extensive review of background material associated with the thesis topic, and a detailed outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

BIOSCI 762 (15 Points)

BSc(Hons) Dissertation Proposal

A review of the literature associated with the dissertation topic and an outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

Chemistry

CHEM 91F (15 Points)
Foundation Chemistry 1

Introduction to elements, compounds, the periodic table, atomic structure, covalent bonding, molecular shape and polarity. Quantitative chemistry, including balancing equations, calculating moles and particles present, calculation of concentration in mol L⁻¹. Energy and thermo-chemistry. Laboratories include practical skills and qualitative analysis, and simple modelling.

Restriction: CHEM 91W

CHEM 92F (15 Points)
Foundation Chemistry 2

Introduces further principles of chemistry. Physical chemistry and qualitative inorganic analysis, including chemical kinetics and chemical equilibrium. Organic chemistry, including hydrocarbons, oxygen-containing functional groups, isomerism and reaction classifications, acids, bases, buffer solutions and titrations. Laboratories include reactions of hydrocarbon and oxygen-containing organic compounds, chromatography, testing for anions and cations in solution, acid-base titrations.

This course requires prior enrolment in CHEM 91F.

Restriction: CHEM 92W

Stage I

CHEM 100 (15 Points)

CHEM 100G (15 Points)
Molecules that Changed the World

The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that

explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated.

Prerequisite: No formal prerequisite, but the course assumes a science background at Year 11 or higher

CHEM 110 (15 Points) **Chemistry of the Living World**

A foundation for understanding the chemistry of life is laid by exploring the diversity and reactivity of organic compounds. A systematic study of reactivity focuses on the site and mechanism of reaction including application of chemical kinetics. A quantitative study of proton transfer reactions features control of pH of fluids in both living systems and the environment.

It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 110.

Restriction: CHEM 195

CHEM 120 (15 Points) **Chemistry of the Material World**

The chemistry of the elements and their compounds is explored. The relationship between molecular structure and reactivity, the role of energy, concepts of bond formation and chemical equilibrium are discussed. Issues such as sustainability, energy and fuels, and the creation of new materials are also discussed.

It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 120.

CHEM 150 (15 Points) **Concepts in Chemistry**

The fundamentals of chemistry are explored with a view to enhancing understanding of the chemical nature of the world around us and providing a foundation for further study in chemistry. Special attention is paid to familiarisation with the language of chemistry and the chemist's perspective of the properties of matter and its transformations. It is recommended that students with a limited background in chemistry take this course prior to CHEM 110 or 120.

It is recommended that students with a limited background in chemistry take this course prior to CHEM 110 or CHEM 120.

Restriction: May not be taken with or after any other Chemistry course.

Stage II

CHEM 210 (15 Points) **Physical and Materials Chemistry**

Physical chemistry is essential for developing and interpreting the modern techniques used to investigate the structure and properties of matter. Materials chemistry is an increasingly important subject aimed at producing new or improved materials for a variety of practical applications. Covers topics involving the application of physical chemistry to the study of modern materials: polymer chemistry, electrochemistry and energy storage, and the electrical properties of solids.

An understanding of basic maths at the level covered in MATHS 102 will be assumed.

Prerequisite: Either CHEM 110 and 120, or B- in CHEM 110 or 120

Restriction: CHEM 201, 208

CHEM 220 (15 Points) **Inorganic Compounds: Structure, Bonding and Reactivity**

Modern inorganic chemistry encompasses the study of compounds with a broad diversity of reactivities, structures and bonding types. Often these have widespread relevance for many other areas of science

and technology. Fundamental concepts in atomic and molecular structure will be provided to give a foundation for examples drawn from coordination, bioinorganic, organometallic and main group chemistry. The associated laboratories provide complementary experience in synthesis and measurement of physical properties for selected inorganic compounds.

Prerequisite: Either CHEM 110 and 120, or B- in CHEM 110 or 120

Restriction: CHEM 202

CHEM 230 (15 Points) **Molecules for Life: Synthesis and Reactivity**

Students will build on their repertoire of fundamental reaction types that have previously been encountered with the introduction of new reactions and their application to more complex molecules of biological and medicinal importance. The laboratory course is an integral component of the course that emphasises preparative chemistry and the use of modern spectroscopic methods for structure determination.

No formal prerequisite, but knowledge of organic chemistry and basic laboratory practice at the level covered in CHEM 110 will be assumed.

Restriction: CHEM 203

CHEM 240 (15 Points) **Measurement and Analysis in Chemistry and Health Sciences**

An introduction to the physico-chemical principles and techniques underlying a wide range of modern analytical methods used in chemistry and the biomedical sciences. Topics include chromatographic methods for the separation of complex mixtures, the application of modern electrochemical and spectroscopic techniques to analytical problems, and methods for assessing the reliability of results. Experiments illustrating these principles are an integral part of this course.

No formal prerequisite, but knowledge of aspects of chemistry and laboratory practice at the level covered in CHEM 110, and an understanding of basic mathematics at the level covered in MATHS 102 will be assumed.

Restriction: CHEM 204, 209

CHEM 243 (15 Points) **Physicochemical Principles for the Biological and Health Sciences**

Topics of physical chemistry and chemical measurement relevant to the bioscience and health science student. Atomic theory, molecular bonding and structure, the behaviour of gases and other phases of matter, essential thermodynamics, electrochemistry, reactions at surfaces, and basic assay and chromatography principles. Associated laboratories focus upon reinforcing underlying principles through practical exercises using materials and concepts pertinent to the bioscience and health science experience.

Recommended preparation: CHEM 110

Restriction: CHEM 210, 240

CHEM 270 (15 Points) **Environmental Chemical Processes**

An introduction to the chemistry of the natural environment, including biogeochemical cycling of elements and chemical processes operating in the lithosphere, hydrosphere, atmosphere and biosphere. The objective is to develop a good understanding of how the natural environment works. The laboratory programme includes analytical methods and concepts central to environmental chemistry.

No formal prerequisite, but knowledge of aspects of chemistry and laboratory practice at the level covered in CHEM 110 and 120 will be assumed.

Restriction: CHEM 207

Stage III**CHEM 310 (15 Points)****Structural Chemistry and Spectroscopy**

Molecular structure is fundamental to the understanding of modern chemistry. Molecular spectroscopy provides an important method for probing the structure of molecules, and the following aspects of this subject will be presented: molecular energies and molecular spectra, molecular symmetry and spectroscopy, surface spectroscopy and the structure and chemistry of surfaces.

No formal prerequisite, but knowledge of appropriate material at the level covered in CHEM 201 or 202 or 210 or 220 will be assumed.

Restriction: CHEM 301

CHEM 320 (15 Points)**Design and Reactivity of Inorganic Compounds**

A selection of the most recent developments in contemporary inorganic chemistry will be covered. These will include ligand design and reactivity in coordination chemistry, macrocyclic chemistry, redox chemistry, photochemistry, construction of devices, organometallic chemistry, catalysis, and main group rings, chains, clusters and polymers. The laboratories provide complementary experience in synthesis and measurement of physical properties for selected inorganic compounds.

Prerequisite: CHEM 220 or 202

Restriction: CHEM 302

CHEM 330 (15 Points)**Contemporary Organic Chemistry**

Topics in advanced organic chemistry, including the synthesis, reactions and uses of compounds containing phosphorus, selenium, boron and silicon. Organotransition metal chemistry. Asymmetric synthesis. Heterocyclic chemistry and pericyclic reactions. Laboratories emphasise synthetic and structural methods.

Prerequisite: CHEM 230 or 203

Restriction: CHEM 303

CHEM 340 (15 Points)**Advanced Analytical Chemistry**

Principles and applications of modern instrumental analytical chemistry. Statistical methods, quality control and assurance, sampling, instrumentation, chromatographic and other separation methods, spectrophotometric methods, electro-analytical methods.

No formal prerequisite, but knowledge of analytical chemistry and laboratory practice at the level covered in CHEM 240 or 204 or 209 will be assumed.

Restriction: CHEM 304

CHEM 350 (15 Points)**CHEM 350A (7.5 Points)****CHEM 350B (7.5 Points)****Topics in Chemistry**

Topics in modern chemistry. Students will select three of the modules offered, details of which are available in the Department of Chemistry Undergraduate Handbook.

No formal prerequisite, but knowledge of appropriate aspects of Stage II Chemistry will be assumed.

Restriction: CHEM 305

To complete this course students must enrol in CHEM 350 A and B, or CHEM 350

CHEM 370 (15 Points)**Environmental Chemistry**

Anthropogenic chemicals in the environment and their influence on environmental systems and processes, including the chemistry of waste water, marine pollutants, pesticides, CFC's, geothermal effluents and ozone.

No formal prerequisite, but knowledge of environmental chemistry and laboratory practice at the level covered in CHEM 270 or 207 will be assumed.

Restriction: CHEM 307

CHEM 380 (15 Points)**Materials Chemistry**

Synthesis, properties characterisation and applications of advanced materials. Includes a review of current trends in materials research. Important aspects of solid inorganic materials and organic polymers are covered.

No formal prerequisite, but knowledge of materials chemistry and laboratory practice at the level covered in CHEM 210 or 201 will be assumed.

Restriction: CHEM 308

CHEM 390 (15 Points)**Medicinal Chemistry**

Nature of cellular targets for drug action – lipids, proteins, enzymes, DNA. Principles of molecular recognition. Enzymes and receptors as targets for drug action. DNA as a target for drug action. An overview of approaches to drug discovery and development. Structure-activity relationships, stereochemistry and drug action, prodrugs, drug solubilisation and delivery, drug metabolism and antibiotic resistance. Laboratories focus on the synthesis, computer modelling and biological testing of drugs.

No formal prerequisite, but knowledge of organic chemistry and laboratory practice at the level covered in CHEM 230 or CHEM 203 will be assumed.

Restriction: CHEM 309

CHEM 392 (15 Points)**Issues in Drug Design and Development**

Intellectual property and patent law in the pharmaceutical industry. An overview of the legal and regulatory framework for drug design and development. Clinical trials: formulation of a drug; phase I, phase II and phase III protocols. An introduction to the principles involved in the Codes of Good Manufacturing Practice and Good Laboratory Practice (quality control and quality assurance procedures) as applied to the manufacture of drug products and the quantification of drugs and metabolites in biological fluids. Examples of drug development. Case studies of selected drugs from design to release.

Diploma Courses**CHEM 690A (15 Points)****CHEM 690B (15 Points)****Graduate Diploma Dissertation (Chemistry)**

To complete this course students must enrol in CHEM 690 A and B

CHEM 691A (15 Points)**CHEM 691B (15 Points)****PG Diploma Dissertation (Chemistry)**

To complete this course students must enrol in CHEM 691 A and B

Postgraduate Courses**CHEM 701 (15 Points)**
PG Topics in Chemistry 1

A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

CHEM 702 (15 Points)
PG Topics in Chemistry 2

A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

CHEM 710 (15 Points)
Structural and Computational Chemistry

Quantum mechanics, and the calculation of molecular structure at the fundamental level. Statistical thermodynamics: the relationship between molecular structure and bulk properties of matter. The quantum mechanics of magnetic resonance: theory and applications of nuclear magnetic resonance (NMR) and electron paramagnetic resonance (EPR) spectroscopy in structural chemistry.

No formal prerequisite, but knowledge of physical chemistry at the level covered in CHEM 310 or 301 and of basic calculus will be assumed.

Restriction: CHEM 711

CHEM 720 (15 Points)
Advanced Inorganic Chemistry

The topics covered are chosen from areas of current research in inorganic chemistry, and will include functional supramolecular devices, organometallic and inorganometallic chemistry, and main group element multiple bonding.

No formal prerequisite, but knowledge of inorganic chemistry at the level covered in CHEM 320 or 302 will be assumed.

Restriction: CHEM 721

CHEM 730 (15 Points)
Modern Methods for the Synthesis of Bioactive Molecules

The use of modern methods for the construction of complex molecules with an emphasis on carbon-carbon bond formation and control of stereochemistry. Principles and practice of synthesis design based on retrosynthetic analysis. Each student will present and discuss a recent synthesis of a complex bioactive organic compound.

No formal prerequisite, but knowledge of organic chemistry at the level covered in CHEM 330 or 303 will be assumed.

Restriction: CHEM 731

CHEM 735 (15 Points)
Advanced Medicinal Chemistry

A selection of topics dealing with aspects of medicinal chemistry, including anticancer agents, metals in medicine, antibacterial and antiviral chemotherapy, contemporary topics in medicinal and/or bio-organic chemistry.

CHEM 738 (15 Points)
Biomolecular Chemistry

Discusses how techniques including NMR spectroscopy, calorimetry, neutron scattering and computational modeling, can characterise the molecular structure, dynamics, and interactions of biological macromolecules. The principles of each technique will be presented and complemented with examples of where these methods have made major advances in understanding important biochemical processes. Accessible to students with a background in chemistry, biology, bioengineering, or physics.

CHEM 740 (15 Points)**Current Topics in Analytical Chemistry**

Principles and applications of modern analytical chemistry. Emphasis will be on the solution of problems met by analytical chemists, including a study of the development of instrumentation, and a study of current trends in analytical research.

No formal prerequisite, but knowledge of analytical chemistry at the level covered in CHEM 340 or 304 will be assumed.

CHEM 750 (15 Points)**CHEM 750A (7.5 Points)****CHEM 750B (7.5 Points)****Advanced Topics in Chemistry 1**

CHEM 751 (15 Points)**CHEM 751A (7.5 Points)****CHEM 751B (7.5 Points)****Advanced Topics in Chemistry 2**

A modular course comprising topics in physical, inorganic, organic and analytical chemistry related to departmental research interests, which will vary from year to year. Students satisfactorily completing three modules will be awarded CHEM 750. Students satisfactorily completing an additional three modules will be awarded CHEM 751.

To complete this course students must enrol in CHEM 751 A and B, or CHEM 751

CHEM 755 (15 Points)**Special Topics in Chemistry 1****CHEM 770 (15 Points)****Advanced Environmental Chemistry**

Selected current research topics in environmental chemistry. Topics change from year to year, but may include: chemical impacts of geothermal energy development or mining on the environment, trace metal fingerprinting, naturally occurring metal-adsorbents such as iron oxides, the behaviour of persistent organic contaminants, the chemistry of drinking water treatment and the chemical theory behind the design of environmental monitoring instruments. Includes a half-day field trip.

No formal prerequisite, but knowledge of environmental chemistry at the level covered in CHEM 370 or 307 will be assumed.

CHEM 780 (15 Points)**Advanced Materials Chemistry**

A selection of topics on the chemistry of advanced materials, including novel polymeric materials and materials characterisation and analysis.

No formal prerequisite, but knowledge of materials chemistry at the level covered in CHEM 380 or 308 will be assumed.

CHEM 793 (60 Points)**CHEM 793A (30 Points)****CHEM 793B (30 Points)****BSc(Hons) Dissertation in Chemistry**

Restriction: CHEM 792

Computer Science

Stage I

COMPSCI 101 (15 Points)

Principles of Programming

An introduction to computers and computer programming in a high-level language. The role of computers and computer professionals in society is also introduced. The course is intended for students who may wish to advance in Computer Science or in Information Systems and Operations Management.

Restriction: 415.114, 415.115

COMPSCI 105 (15 Points)

Principles of Computer Science

Extends the programming skills of COMPSCI 101, covering more advanced data structures and their representation and manipulation. Topics include: pointers, dynamic data structures (lists, queues, stacks, trees, hashtables), recursion, sorting and searching.

Prerequisite: COMPSCI 101

COMPSCI 111 (15 Points)

COMPSCI 111G (15 Points)

Mastering Cyberspace: Introduction to Practical Computing

A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the Internet as a communication medium, applying programming concepts, and social implications of technology.

Stage II

COMPSCI 210 (15 Points)

Computer Systems 1

The low level representation of data and algorithms in the computer. An introduction to computer organisation. The instruction execution model. Assembly language programming. Study of a high-level language and how it is implemented at the machine level. Assembly and disassembly of instructions.

Prerequisite: COMPSCI 101 and 105

Restriction: 415.212

COMPSCI 215 (15 Points)

Computer Systems 2

Interacting with the operating system via a command line interface and use of a scripting language. Hardware support necessary to implement a secure multi-user operating system: user/kernel mode, exceptions and interrupts, virtual memory, context switching, synchronisation, interrupt driven input/output. An introduction to data communications: the OSI reference model, particularly how the lower layers combine to implement sockets.

Recommended preparation: Prior or concurrent enrolment in COMPSCI 210

Prerequisite: COMPSCI 101, 105

COMPSCI 220 (15 Points)

Algorithms and Data Structures

An introduction to the analysis of algorithms and data structures. Common abstract data types and their implementations. Asymptotic complexity analysis. Sorting and searching algorithms. Depth-first and breadth-first search and applications. Graph optimisation problems.

Prerequisite: COMPSCI 101, 105 and 15 points from MATHS 108, 150, 153

COMPSCI 225 (15 Points)

Discrete Structures in Mathematics and Computer Science

An introduction to logic, principles of counting, mathematical induction, recursion, relations and functions, graphs and trees, and algorithms. This course is suited to students who are interested in the foundations of computer science, mathematics and logic. The main themes are: proof methods, logic and induction; sets and functions; counting; discrete structures.

Prerequisite: 15 points from MATHS 108, 150, 153, COMPSCI 101, PHIL 101

Restriction: MATHS 255

COMPSCI 230 (15 Points)

Software Construction

Students will develop a software application of reasonable complexity through the application of established software development techniques. In doing so, students will demonstrate fundamental skills in object-oriented software development, GUI programming and application-level multithreading. In addition, students will learn established techniques to ensure that their software satisfies quality criteria.

Prerequisite: COMPSCI 101, 105

COMPSCI 280 (15 Points)

Enterprise Software Development

Develop a distributed application using an Enterprise technology. Demonstrate skills in data modelling, manipulating and querying; and accessing a remote database server. Model system requirements and design using established notations, to leverage a component-based Enterprise technology, and to use tools to support their activities. Collaborative work experience through pair programming.

Prerequisite: COMPSCI 101, 105

Restriction: INFOSYS 280

Stage III

COMPSCI 313 (15 Points)

Computer Organisation

Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.

Prerequisite: COMPSCI 210, 215 (PHYSICS 140 or 243)

Restriction: SOFTENG 363, COMPSYS 304

COMPSCI 314 (15 Points)

Modern Data Communications

The structure of data communications and networks, including the Internet, covering all levels of the communications architecture. The layered protocol model, data transmission and coding, link-level and local area network protocols, wide-area internetworking, routing, transport and security protocols. Basic application protocols as the foundation for distributed computing.

Prerequisite: COMPSCI 210

Restriction: SOFTENG 364

COMPSCI 320 (15 Points)
Applied Algorithmics

Fundamental design techniques used for efficient algorithmic problem-solving and software development. Methods that yield algorithms that are both provably correct and efficient. Efficiency of algorithms to provide a basis for deciding which algorithm is best for the job. Limits on the power of computers and the theory of NP-completeness. An introduction to methods whose correctness or performance is not guaranteed.

Prerequisite: COMPSCI 220, 225

COMPSCI 335 (15 Points)
Distributed Objects, Services, and Programming

Programming introduction to distributed services and to browser based applications. Introduction to functional programming for data integration. Specific topics will include simple distributed applications, using message-based, declarative or functional programming methods. Concepts of programming with XML, SOAP and HTTP based mechanisms, and programming for dynamic web content generation.

Prerequisite: COMPSCI 230 and 15 points at Stage II in Computer Science

COMPSCI 340 (15 Points)
Operating Systems

Operating system principles. Multi-user systems. Virtualisation. Scheduling. Concurrent processes, threads, synchronisation and deadlock. Memory allocation and virtual memory. Managing files, disks and other peripherals. Security, protection and archiving. Distributed systems and algorithms, location, migration and replication transparency. Real-time requirements. History of operating systems.

Prerequisite: COMPSCI 215, 230

Restriction: SOFTENG 370

COMPSCI 345 (15 Points)
Human-computer Interaction

Human behaviour and humans' expectations of computers. Computer interfaces and the interaction between humans and computers. The significance of the user interface, interface design and user centred design process in software development. Interface usability evaluation methodologies and practice. Includes a group development and evaluation project using current implementation techniques and tools.

Prerequisite: COMPSCI 230 or SOFTENG 206

Restriction: COMPSCI 370, SOFTENG 350

COMPSCI 350 (15 Points)
Mathematical Foundations of Computer Science

The aim of this course is to present mathematical models for programming languages and computation, and derive some theorems regarding what can and cannot be computed. Abstract programming languages (finite automata, context-free grammars, Turing and register machines) are studied. Basic concepts for programming languages, limits on computational power and algorithmic complexity are presented. Church-Turing thesis and quantum computing are briefly and critically discussed.

Prerequisite: COMPSCI 225 and (COMPSCI 220 or PHIL 222)

COMPSCI 351 (15 Points)
Databases

Database principles. Relational model, Relational Algebra, Relational Calculus, SQL, SQL and Programming Languages, Entity Relationship Model, Normalisation, Query Processing and Query Optimisation, ACID Transactions, Transaction Isolation

Levels, Database Recovery, Database Security, Databases and XML.

Prerequisite: COMPSCI 220, 225

Restriction: SOFTENG 351

COMPSCI 367 (15 Points)
Artificial Intelligence

The cornerstones of AI: representation, utilisation, and acquisition of knowledge. Taking a real world problem and representing it in a computer so that the computer can do inference. Utilising this knowledge and acquiring new knowledge is done by search which is the main technique behind planning and machine learning.

Prerequisite: COMPSCI 220, 225

Restriction: COMPSCI 365, 366

COMPSCI 369 (15 Points)
Computational Science

Principles of computational science. Computational science is the development and application of computer algorithms and software to solve scientific and engineering problems including probabilistic computer modeling, computer-based statistical inference and computer simulation. Focus is on the analysis of real-world data with emphasis on Computational Biology and Computational Engineering.

Prerequisite: COMPSCI 220 and 15 points from STATS 101-125

COMPSCI 373 (15 Points)
Computer Graphics and Image Processing

Basic geometric processes including transformations; viewing and projection; back projection and ray tracing. Graphics modeling concepts: primitives, surfaces, and scene graphs, lighting and shading, texture mapping, and curve and surface design. Graphics and image processing fundamentals: image definition and representation, perception and colour models, grey level and colour enhancement, neighbourhood operations and filtering. Use of the OpenGL graphics pipeline.

Prerequisite: COMPSCI 210, 230

Restriction: COMPSCI 372, 375

COMPSCI 380 (15 Points)**COMPSCI 380A (7.5 Points)****COMPSCI 380B (7.5 Points)****Undergraduate Project in Computer Science**

Each student taking one of these courses will be expected to do an individual practical project under the supervision of a member of staff. Only students with excellent academic records will be allowed to take these courses, and only after a supervisor and topic have been agreed upon by the Head of Department.

Prerequisite: Approval of Head of Department

COMPSCI 711 (15 Points)
Parallel and Distributed Computing

Computer architectures and languages for exploring parallelism, conceptual models of parallelism, principles for programming in a parallel environment, different models to achieve interprocess communication, concurrency control, distributed algorithms and fault tolerance.

Recommended preparation: COMPSCI 335 Prerequisite: Departmental approval
COMPSCI 715 (15 Points)
Advanced Computer Graphics

An advanced look at current research issues in computer graphics. Typical topics include: ray-tracing acceleration methods; radiosity; subdivision surfaces; physically-based modelling; animation; image-based lighting and rendering; non-photorealistic rendering;

advanced texturing. The precise content may vary from year to year. Consult the department for details.

Recommended preparation: COMPSCI 373 or equivalent, and 15 points at Stage II in Mathematics
Prerequisite: Head of Department approval
COMPSCI 720 (15 Points)
Advanced Design and Analysis of Algorithms

Selected advanced topics in design and analysis of algorithms, such as: combinatorial enumeration algorithms; advanced graph algorithms; analytic and probabilistic methods in the analysis of algorithms; randomised algorithms; methods for attacking NP-hard problems.

Recommended preparation: COMPSCI 320
Prerequisite: Departmental approval
COMPSCI 725 (15 Points)
System Security

Data security: confidentiality, integrity, availability. System security: prohibitions, permissions, obligations, exemptions. The gold standard of dynamic security: authentication, audit, authorisation. Governance: specification, implementation, assurance. Three-layer defence: prevention, detection, response. Control modalities: architectural, economic, legal, normative. System-centric analyses: attacks, threats, vulnerabilities, information flows. Owner-centric analyses: functionality, security, trust, distrust. Data-centric analyses. Security techniques: encryption, obfuscation, tamper resistance. System designs.

Recommended preparation: 30 points from COMPSCI 313, 314, 320, 335, 340, 351, 702, 734, 742
Prerequisite: Departmental approval
COMPSCI 732 (15 Points)
Software Tools and Techniques

An advanced course examining research issues related to tools and techniques for software design and development. Typical topics include: techniques for data mapping and data integration, software architectures for developing software tools, issues in advanced database systems. The precise content may vary from year to year. Consult the department for details.

Recommended preparation: COMPSCI 335
Prerequisite: Departmental approval
COMPSCI 734 (15 Points)
Web, Mobile and Enterprise Computing

Examines advanced and emerging software architectures at the confluence of XML, web services, distributed systems, and databases. Includes advanced topics in areas such as: mobile computing, remoting, web services for enterprise integration, workflow orchestrations for the enterprise, peer-to-peer computing, grid computing.

Recommended preparation: COMPSCI 335
Prerequisite: Departmental approval
COMPSCI 742 (15 Points)
Advanced Internet: Global Data Communications

The protocols and performance of local area networks. The special requirements of very high speed networks (100 Mb/s and higher). Asynchronous transfer mode (ATM) and its relation to other protocols. The TCP/IP suite.

Recommended preparation: COMPSCI 314
Prerequisite: Departmental approval
COMPSCI 750 (15 Points)
Computational Complexity

Definitions of computational models and complexity classes: time complexity (eg, P and NP), space

complexity (eg, L and PSPACE), circuit and parallel complexity (NC), polynomial-time hierarchy (PH), interactive complexity (IP), probabilistic complexity (BPP), and fixed-parameter complexity.

Recommended preparation: COMPSCI 320 or 350

Prerequisite: Departmental approval

COMPSCI 760 (15 Points)

Datamining and Machine Learning

An overview of the learning problem and the view of learning by search. Techniques for learning such as: decision tree learning, rule learning, exhaustive learning, Bayesian learning, genetic algorithms, reinforcement learning, neural networks, explanation-based learning and inductive logic programming. Experimental methods necessary for understanding machine learning research.

Recommended preparation: COMPSCI 367

Prerequisite: Departmental approval

COMPSCI 767 (15 Points)

Intelligent Software Agents

An introduction to the design, implementation and use of intelligent software agents (eg, knowbots, softbots etc). Reviews standard artificial intelligence problem-solving paradigms (eg, planning and expert systems) and knowledge representation formalisms (eg, logic and semantic nets). Surveys agent architectures and multi-agent frameworks.

Recommended preparation: COMPSCI 367

Prerequisite: Departmental approval

COMPSCI 773 (15 Points)

Intelligent Vision Systems

Computational methods and techniques for computer vision are applied to real-world problems such as 2/3D face biometrics, autonomous navigation, and vision-guided robotics based on 3D scene description. A particular feature of the course work is the emphasis on complete system design.

Recommended preparation: COMPSCI 373 and 15 points at Stage II in Mathematics

Prerequisite: Departmental approval

COMPSCI 775 (15 Points)

Advanced Multimedia Imaging

Camera calibration, image sequence analysis, computer vision, 3D visualisation, ground truth for image sequence analysis, performance evaluation (noise, accuracy). Applications in vision-based driver assistance, panoramic or 3D visualisation using recorded images, or image and video retrieval.

Recommended preparation: COMPSCI 373 and MATHS 208 or 250

Prerequisite: Departmental approval

COMPSCI 777 (15 Points)

Computer Games Technology

An advanced course looking at some of the computer graphics and artificial intelligence technology involved in computer games. Typical topics are: an introduction to the gaming industry; commercial modelling and animation software; maximising graphics performance, including such techniques as visibility preprocessing, multiple levels of detail, space subdivision, fast collision detection, direct programming of the graphics card; AI for computer games, including decision trees, rule-based systems, path planning, flocking behaviours, intelligent agents; research issues, such as physically-based modelling, terrain generation, computer learning.

Recommended preparation: COMPSCI 367, 373

Environmental Management

Postgraduate Courses

ENVMGT 741 (15 Points)

Social Change for Sustainability

How social change happens and how to improve the uptake of sustainability. Covers the theoretical frameworks that contribute to our understanding of how social change occurs, and their use in the development of sustainability programmes. Includes the methodologies used to gain insight into attitudes, behaviour and values, and their use as a basis for decision-making in environmental management.

ENVMGT 742 (15 Points)

Ecosystem Complexity and Adaptive Management

A review of the evolution in governance and knowledge systems for addressing environmental uncertainty. Learning objectives emphasise the socio-ecological complexity and scientific dilemmas in the determination of performance standards, the management of environmental risk and the assessment of ecosystem services and their capacities.

ENVMGT 743 (15 Points)
Environmental Policy

Debates surrounding environmental policy and governance provide insights into the complexities of environmental management issues. Examples of environmental governance will be considered at global and local scales. The roles of international agencies, nation-states, civil society and corporations in shaping environmental policy and governance are examined.

ENVMGT 744 (15 Points)
Resource Management

A review of advanced principles, concepts and approaches to the sustainable management of natural resources. Case studies emphasise the need for conflict resolution, equitable allocation, and decentralised decision-making to address the social and environmental impacts of resource utilisation.

Restriction: GEOG 751

ENVMGT 746 (15 Points)
Collaborative Environmental Management

An exploration of participatory management and its potential for engaging communities, resource users and stakeholders in the pursuit of sustainable development. Students will examine strategies for incorporating local knowledge within conservation practices and for reconciling natural resource management with human welfare, social justice and indigenous rights.

Restriction: GEOG 753, ENVSCI 735

ENVMGT 747 (15 Points)
Current Issues in Sustainability

A topical review of approaches to sustainability as applied within a particular industry or sector. Consult the postgraduate handbook (Environmental Management) for information about this year's topic.

Restriction: ENVMGT 745

ENVMGT 796A (60 Points)
ENVMGT 796B (60 Points)
MSc Thesis in Environmental Management

To complete this course students must enrol in ENVMGT 796 A and B

Environmental Science

Stage I
ENVSCI 101 (15 Points)
ENVSCI 101G (15 Points)
Environment, Science and Management

Key environmental debates are explored to identify the challenges of understanding underlying scientific principles and effective environmental management. Case studies highlight the complexity of environmental problems and the difficult task of integrating science, knowledge and values in their resolution.

Stage II
ENVSCI 201 (15 Points)
Sustaining our Environment

An examination of environmental effects associated with urban lifestyles. In particular, effects due to everyday activities, eg, pollution and the consequences of resource exploitation. Sustainable options for mitigation of adverse effects are identified and discussed.

No formal prerequisite but an understanding of Stage I science and the material covered in ENVSCI 101 will be assumed.

Stage III
ENVSCI 301 (15 Points)
Environmental Effects and Management

Effective management of the environmental effects of human activities depends upon a sound basis of environmental science. The effects of industrial production and resource usage are used to illustrate the requirements humans place on the environment. A key theme is the use of tools, derived through environmental research, to effect sustainable management of the environment whilst satisfying human needs. The examples used relate to issues of local, national and international significance. Includes tutorials and a field trip.

No formal prerequisite but knowledge of those aspects of environmental science covered in ENVSCI 201 will be assumed.

ENVSCI 310 (15 Points)
Modelling Environmental Systems

An introduction to how models are used in the study and management of environmental impacts in a range of natural environments (eg, terrestrial, fluvial, atmospheric, subterranean, coastal etc). Developing skills in designing and critically assessing ecological, geochemical, chemical, physical and numerical models of the environment. Includes computer laboratories and tutorials.

No formal prerequisite but an understanding of data analysis is assumed.

ENVSCI 311 (15 Points)
Ecological Restoration and Management

The application of ecological principles to restoration. Principles of ecosystem and landscape management, project management, and the integration of ecosystem services into productive landscapes. Policy and planning for mainland and island restoration; evaluation of pest and weed impacts and priorities for control as well as cultural, social and economic considerations.

Restriction: BIOSCI 393

Postgraduate Courses
ENVSCI 701 (15 Points)
Research Practice in Earth, Environmental and Geographical Sciences

Students will consider multiple ways of knowing and understanding research in a broader context and in relation to disciplinary specific examples. Students will be challenged to critically analyse ways of understanding and thinking and use this knowledge to: assemble and represent information, perform analyses and predict outcomes, validate or critique the process, and communicate or question findings.

ENVSCI 702 (15 Points)
Special Topic in Environmental Science

A course of study prescribed by the Head of the School, in the absence of an appropriate formal course being available.

ENVSCI 703 (15 Points)
Research Topics in Environmental Science

A course of study prescribed by the Head of the School, in the absence of an appropriate formal course being available.

Prerequisite: Approval of the Programme Coordinator

ENVSCI 704 (15 Points)
Modelling of Environmental and Social Systems

The following themes are emphasised: (i) building and using models to investigate environmental and social problems, (ii) understanding the utility of

modelling in various disciplines, and (iii) appreciating how dynamic phenomena can be represented and analysed computationally. The course provides an understanding of modelling concepts, approaches and applications, and methods for determining the suitability of a particular modelling approach for a given task.

No formal prerequisite but a knowledge of statistics and data analysis to at least Stage II is assumed.

ENVSCI 711 (15 Points)

Assessing Environmental Effects

A focus on the interdisciplinary, scientific assessment of environmental activities within the New Zealand context. Methodologies used in the assessment, monitoring and regulation of environmental effects, trends and risks will be critically assessed. Aspects of the RMA, including consenting procedures and the role of public and professional participants in the process, will be discussed.

Corequisite: ENVSCI 710 or equivalent knowledge

ENVSCI 713 (15 Points)

Air Quality and Atmospheric Processes

Monitoring, modelling and management will be considered with emphasis on air quality standards and guidelines and applications of science and technology to indoor and outdoor air pollution prevention, mitigation and remediation. Case studies and practical work will link the theoretical and practical aspects of air quality science.

ENVSCI 714 (15 Points)

Water Quality Science

Water contaminants, monitoring techniques and modelling systems for impact prediction and assessment of effects for both point and non-point sources. Application of science and technology to water pollution prevention, mitigation and remediation. Case studies and practical work (laboratory and field methods).

ENVSCI 716 (15 Points)

Aquatic Ecological Assessment

Application of science to freshwater ecological assessment, management and restoration. Assessment techniques and interpretation of risks associated with natural and anthropogenic disturbance of aquatic ecosystems. Monitoring and reporting of condition and health of aquatic environments. Relevant policy, strategic and legislative frameworks, and national and regional perspectives on applied freshwater management. Course includes case studies and practical work (incl. field trip).

No formal prerequisite but an understanding equivalent to BIOSCI 330 is assumed.

ENVSCI 733 (15 Points)

Biodiversity Management and Conservation

The management of species, ecosystems and conservation areas, including potential synergies and conflicts between different uses. Bio-security and the management of invasive species in a conservation context. Biodiversity management and conservation in terrestrial and aquatic habitats. National and international mechanisms for the sustainable management of natural resources.

No formal prerequisite but an understanding equivalent to BIOSCI 394 is assumed.

ENVSCI 734 (15 Points)

Landscape and Restoration Ecology

The integration of ecological principles and ecological services at the landscape level for both management and restoration. Topics include: the ecology of fragmented

ecosystems such as demography, metapopulation issues, ecological genetics, biota-physical environment interactions, the consequences and techniques for restoration of damaged ecosystems and mitigation of the effects of development. Emphasis will be on sustainable solutions including biophysical, legal, social, cultural and economic considerations.

No formal prerequisite but an understanding equivalent to BIOSCI 393 is assumed.

ENVSCI 737 (15 Points)

Applied Terrestrial Ecology

The dynamics of change in terrestrial ecosystems with a focus on forest and wetland environments. The effects of factors such as climate change and fire in New Zealand's terrestrial ecosystems will be considered. Students will be introduced to modern methods for vegetation assessment and monitoring, including multivariate statistical methods. Students are required to participate in a residential field course as this is a major component of ENVSCI 737.

ENVSCI 738 (15 Points)

Water and Society

How modern lifestyles influence, and are influenced by, water resources are explored to develop ideas for sustainable infrastructure in future settlements. The importance of human behaviour in water system function is unpacked along with mechanisms to influence those behaviours.

ENVSCI 796A (60 Points)

ENVSCI 796B (60 Points)

MSc Thesis in Environmental Science

To complete this course students must enrol in ENVSCI 796 A and B

Exercise Rehabilitation

Prescriptions for courses included in this programme are listed under their respective subject codes.

Food Science

Stage II

FOODSCI 201 (15 Points)

Foundations of Food Science

The aim of this course is to give the student a general appreciation of the composition and structure of food. Material covered includes the molecular structure of the major food components and how they are altered by processing and preservation. Common foods will be studied in order to understand the complex relationships between food molecules and the physical structure of foods. Topical issues such as genetically modified foods and antioxidants will be included.

Prerequisite: At least 30 points from BIOSCI 101, 102, 106, 107, CHEM 110, 120, MEDSCI 142, PHYSICS 160, PSYCH 109

Stage III

FOODSCI 301 (15 Points)

Food Quality Attributes

Attributes that make food attractive, such as colour, flavour, and texture, and how they alter during processing are studied. Texture measurement and methods of studying food structure will be discussed. Lectures will be given on non-destructive testing of food.

Recommended preparation: BIOSCI 203 and 204

Prerequisite: FOODSCI 201

FOODSCI 302 (15 Points)
Food Preservation

The fundamental principles of freezing and thawing, thermal processing and canning, fermentation and dehydration are studied. Consideration is also given to emerging technologies, with an eye to methods of most interest to New Zealand food industries. An overview of the major causes of food degradation, from microbiological to chemical, is presented. Methods of shelf-life testing are introduced with an emphasis on the maintenance of the nutritive value, safety of the food product and appeal to the consumer.

Recommended preparation: FOODSCI 301, BIOSCI 204, CHEMMAT 211

Prerequisite: FOODSCI 201

FOODSCI 303 (15 Points)
Sensory Science

Human perception and preference of food products. Design of experiments, statistical methodologies and applications in industry and research. Sampling of foods is undertaken in this course.

Prerequisite: STATS 101 and FOODSCI 201

Corequisite: FOODSCI 301 or Permission of the Programme Director/Course Coordinator

FOODSCI 304 (15 Points)
Food Product Development

Development and evaluation of new products from raw ingredients through a thorough understanding of the physical and chemical properties of materials. Sensory evaluation will be a component. Sampling of food products is therefore undertaken in this course.

Prerequisite: FOODSCI 301 and 303

Corequisite: FOODSCI 302 or Permission of the Programme Director/Course Coordinator

Restriction: FOODSCI 705

Postgraduate Courses
FOODSCI 703 (15 Points)
Food Processing

Preservation of food by standard methods including freezing, dehydration and thermal processing. New developments in food preservation. Unit operations, mass and energy balance, and heat transfer are covered. Chemical and physical changes food undergoes during processing.

Prerequisite: Permission of Programme Director

Restriction: 426.702

FOODSCI 704 (15 Points)
Food Biotechnology

Bioprocess engineering fundamentals, fermentation processes, fermenter design and operation, bioseparations, food biotechnology.

Prerequisite: Permission of Programme Director

Restriction: 426.702

FOODSCI 705 (15 Points)
FOODSCI 705A (7.5 Points)
FOODSCI 705B (7.5 Points)

FOODSCI 706 (15 Points)
Food Safety

An understanding of the changing regulations that apply to the New Zealand food industry is of paramount importance. Pathogen awareness and control from an industry perspective are examined. HACCP and risk management plans will be generated.

Prerequisite: Permission of the Programme Director

FOODSCI 707 (15 Points)
Food Science

Chemical, biological and physical aspects of foods. The decomposition of food due to lipid oxidation. Integrated study of selected basic foods.

Prerequisite: Permission of Programme Director

Restriction: 426.701

FOODSCI 708 (15 Points)
Advanced Food Science

The functions and properties of food additives. Food attributes including colour, flavour and texture. Enzymic and non-enzymic browning. Emulsions and foams. Introduction to the Food Regulations. Interaction of macromolecules.

Prerequisite: Permission of Programme Director

Restriction: 426.701

FOODSCI 709 (15 Points)
FOODSCI 709A (7.5 Points)
FOODSCI 709B (7.5 Points)
Selected Topics in Food Science and Technology

Modules will be organised by the staff and invited lecturers. Topics offered will usually be based on the specialist interests of the lecturers, although controversial issues may be included (for example, genetically modified food, irradiated food). Students may be required to participate actively by contributing seminars. Topics may vary from year to year.

To complete this course students must enrol in FOODSCI 709 A and B, or FOODSCI 709

FOODSCI 710 (15 Points)
Industrial Internship

The industrial internship is an opportunity for students to experience the food industry at first hand. While the placement would normally be in New Zealand, overseas internships are possible. The student will work in the food organisation on a defined project under the supervision of a suitably qualified person. A detailed written report on the assignment must be submitted.

FOODSCI 788 (60 Points)
FOODSCI 788A (30 Points)
FOODSCI 788B (30 Points)
BSc(Hons) Dissertation in Food Science

A research proposal will be prepared on the dissertation topic. Students will be required to present an overview of the proposal in a seminar. Students will participate in the critical analysis of scientific papers. The student will carry out an original piece of research. The results

will be presented and discussed in a dissertation. A seminar on the research will be given.

Restriction: FOODSCI 789

To complete this course students must enrol in FOODSCI 788 A and B, or FOODSCI 788

FOODSCI 796A (60 Points)

FOODSCI 796B (60 Points)

Forensic Science

Postgraduate Courses

FORENSIC 701 (15 Points)

Fundamental Concepts in Forensic Science

Ethics and quality assurance in forensic science. Principles of criminal law, principles of evidence and procedure, expert evidence, interpretation of scientific evidence, probability and statistics. Forensic pathology, psychology and psychiatry.

Prerequisite: Permission of Programme Director

FORENSIC 702 (15 Points)

Introduction to Forensic Science

Forensic biology, documents, fingerprints, physical evidence, toolmarks, fire examination, explosives, hairs and fibres, drugs, toxicology, alcohol (including blood and breath alcohol), crime scene examination, firearms identification.

Prerequisite: Permission of Programme Director

FORENSIC 703 (15 Points)

Statistics and Molecular Biology for Forensic Science

Statistics: data summarisation and reduction, laws of probability, conditional probability, likelihood ratios and Bayes theorem. Interpretation of statistical results. Forensic biology: basic principles of population genetics, genomic structure, conventional blood grouping. DNA profiling: structure, enzymology and basic chemistry of nucleic acids, PCR and microsatellites, interpretation of DNA profiles, developing forensic DNA technologies.

Prerequisite: Permission of Programme Director

FORENSIC 704 (15 Points)

Techniques and Applications for Forensic Science

Analytical techniques: GC, HPLC, GC-MS chromatography, IR and UV spectroscopy. Applications: toxicology, illicit drugs, sports drugs, racing chemistry. Physical and trace evidence.

Prerequisite: Permission of Programme Director

FORENSIC 706 (15 Points)

Environmental Forensic Science

Concepts of environmental science. Environmental monitoring and spill analysis, environmental legislation, criminal and environmental law. Case studies and practical work.

Prerequisite: Permission of Programme Director

FORENSIC 707 (30 Points)

FORENSIC 707A (15 Points)

FORENSIC 707B (15 Points)

Project in Forensic Science

A research essay on an aspect of forensic science.

Prerequisite: Permission of the Programme Director

Restriction: FORENSIC 705

To complete this course students must enrol in FORENSIC 707 A and B, or FORENSIC 707

FORENSIC 796A

(60 Points)

FORENSIC 796B

(60 Points)

MSc Thesis in Forensic Science

Prerequisite: Permission of the Programme Director

To complete this course students must enrol in FORENSIC 796 A and B

Note: The Forensic Science MSc thesis research courses are mounted with the assistance of the Institute of Environmental Science and Research Ltd (ESR) and ESR facilities and databases will be used for some research. As ESR facilities and databases are relied on in Court proceedings, appropriate steps must be taken to ensure the integrity of ESR's analyses. This means students wishing to use ESR laboratory facilities as part of the MSc programme will be subject to the same type of access requirements as ESR employees. This includes a security clearance (essentially a check of any convictions recorded against you) and a drug test prior to being given access to ESR resources. Students will normally be required to provide a DNA sample to ensure that any allegations of cross-contamination of a DNA sample can be properly investigated. The DNA profile will be retained by ESR. All other information will be returned to the students at the completion of their studies. Students who would like further details of these conditions should contact the Programme Director.

Geography

GEOG 91F (15 Points)

Foundation Geography 1

Introduces population and development themes, including global and regional patterns of population growth, overpopulation, migration, urbanisation, city planning issues, uneven patterns of economic growth and human well-being, and sustainable development.

Restriction: GEOG 91W

GEOG 92F (15 Points)

Foundation Geography 2

Focuses on the relationship between humans and the environment, emphasising long-term trends in resource use, human impacts in the environment, sustainable resource management and environmental hazards.

Restriction: GEOG 92W

Stage I

GEOG 101 (15 Points)

Geography of the Natural Environment

Examines the interrelationships between various components of the natural environment and includes: climate, hydrology, coastal and fluvial geomorphology, and biogeography using environmental processes as an integrating theme. Topics include: the atmospheric and hydrological systems, channel processes and stream patterns, physical forces shaping the coast, glacial processes and environmental change.

Restriction: GEOG 151

GEOG 102 (15 Points)

Geography of the Human Environment

Examines the relationships among personal geographies and global geographies of uneven development, economic, environmental and socio-cultural change. Using a variety of examples from New Zealand and the world we illustrate the connection between local places and global issues.

Restriction: GEOG 152

GEOG 103 (15 Points)**GEOG 103G (15 Points)**
Digital Worlds

Introduction to space-modifying technologies such as GIS, transport and communications, and their historical significance. Practical exposure to current digital technologies through laboratories, texting and web interaction and an introduction to the social impact of the technologies through media such as cyberspace, cellular phones and location based systems. Critical perspectives on new technologies and space, and the representation of such technologies in popular and academic writing.

GEOG 104 (15 Points)**GEOG 104G (15 Points)**
Cities and Urbanism

What makes a great city? This course explores 'urbanism' in both historical and contemporary cities to determine the essence of urbanity and the way that citizens (and visitors) experience city life. The dynamics and character of cities are considered in terms of their built environment, economic systems, population, human and cultural diversity and planning policies and practices.

GEOG 105 (15 Points)**GEOG 105G (15 Points)**
Natural Hazards in New Zealand

New Zealanders are exposed to extreme natural events and processes including earthquakes, volcanic eruptions, weather bombs, storm surge, tsunamis, flooding and erosion. The physical context for each hazard is provided, drawing on the disciplines of geology, geomorphology and climatology. The frequency and magnitude of natural hazards for New Zealand are considered using different sources. Impacts on modern society are discussed using case studies and scenario modelling.

Restriction: GEOLOGY 110

Stage II

Note: Students majoring in Geography should note the regulations for the Geography Major; in particular, they must complete GEOG 250.

GEOG 201 (15 Points)**Processes in the Natural Environment**

Selected topics in climatology, hydrology, biogeography, and geomorphology. The course focuses on near-surface processes in the physical environment, explored using a range of conceptual approaches and research methods.

Restriction: GEOG 251

GEOG 202 (15 Points)**Geography of Social and Economic Change**

A critical examination of geographic processes and consequences in contemporary society. Topics are selected from the instructors' research interests, which include: the transformation of urban places and spaces; the forms and location of industries and retailing; social geographies of the city; New Zealand's linkages with the global economy and society; urban historical geographies; and demographic and social changes in New Zealand and the Pacific region. The course is developed around the core themes of production, consumption and identity as important focuses for the examination of society.

Restriction: GEOG 252

GEOG 205 (15 Points)**Environmental Processes and Management**

Provides a foundation for understanding the complex mix of human and physical factors that must be considered by those involved in environmental management. Key concepts are introduced, and a variety of contemporary case studies explored to illustrate how decisions are made in practice.

Restriction: GEOG 255

GEOG 207 (15 Points)**Field Studies in Environment and Community**

Connections between environment and community in New Zealand are explored on the ground through consideration of topics from among the following themes: biodiversity and vegetation change; land transformation; heritage values; environmental management; Maori resource management; coastal and fluvial geomorphology; regional economics; community development and planning; tourism development; and government policy. The course involves a one week field trip.

GEOG 210 (15 Points)**Introduction to GIS and Spatial Thinking**

An introduction to the conceptual base of Geographic Information Science, the practical use of geo-spatial data and various societal issues related to the use of Remote Sensing and Geographic Information Systems. The course exercises cover a range of application of GIS for analysis and display of spatial data, focusing on non-programmable solutions.

Restriction: GEOG 208, 318

GEOG 250 (15 Points)**Geographical Research in Practice**

A critical exploration of the research experience in geography. Case studies and field work demonstrate approaches to understanding the complex interactions of social and environmental processes. Students will develop practical skills in problem identification, research methodologies, ethics and analytical practices.

Stage III

Note: Students majoring in Geography should note the regulations for the Geography major; in particular, they must complete one of GEOG 315, 330.

GEOG 302 (15 Points)**Regions, Industries and Enterprises**

Examines economic, social and political processes underpinning recent transformations in the global economy. Debates concerning the transition from Fordism to post-Fordism and flexible accumulation are examined in conjunction with an analysis of the role of firms, industries, nation-states and supra-national organisations in changing the character of regions.

GEOG 305 (15 Points)**Population, Health and Society**

A survey of major themes in population, health and social geography. An examination of the dynamics of population complements analyses of health and health care, the education sector, the welfare state, and the changing character of urban places.

GEOG 307 (15 Points)**Urban Geography**

Analysis of key processes shaping socio-cultural geographies of contemporary cities. Using international and local examples, issues such as the economy

of cities, the culture of cities, home and housing, segregation and polarisation, the imaging of cities and sustainability are explored.

GEOG 312 (15 Points)

Geographies of Pacific Development

Examines development processes and issues in the countries of the Pacific. Themes will include development theory, colonialism, environment, population, economic systems, migration, gender, ethnicity and identity, geopolitics and international linkages, and development strategies.

GEOG 313 (15 Points)

Advanced Analytical Methods in Geography

An introduction to multivariate statistical methods and their application to model building and systems analysis.

GEOG 315 (15 Points)

Research Design and Methods in Human Geography

A lecture, practical and field course, the focus of which is a residential field section during the mid-semester study break. The course provides students with experience in designing and executing a research project. It is designed both to prepare students for the increasing number of jobs that require these research skills and as an introduction to research for those proceeding to higher degrees.

GEOG 317 (15 Points)

Remote Sensing and GIS for Physical Environments

Further develops key concepts of geographic information science in earth and environmental sciences including physical geography. Covers techniques for describing the physical environment, ways of analysing and visualising the environment, particularly raster-based surface models, and spatial analysis of surface models. Also develops concepts and theories of remote sensing from space, aerial photography, and image analysis, emphasising the proper use of remotely sensed material.

GEOG 318 (15 Points)

GIS for Human Environments

Further develops key concepts of geographic information science as applied to human activity including retailing, population and health, crime analysis, tourism, consumer behaviour, and planning. Covers techniques for describing human artefacts and activities, ways of analysing and visualising activity in space, spatial analysis of census data, consumption, individual accessibility and activities in time, monitoring devices including remote imagery, locational technology, and privacy.

No formal prerequisite but an understanding of GEOG 210 is assumed.

Restriction: GEOG 208

GEOG 319 (15 Points)

GIS Project

This course builds on materials in GEOG 317 and/or GEOG 318 by providing an opportunity for students to pursue a topic of choice through an individual project. Project topics are developed by students in conjunction with the instructors, and input and ideas from other courses is encouraged.

GEOG 320 (15 Points)

Resources and Environmental Management

Examines the development and conservation of the environment in its use as a resource base, with particular reference to the way in which institutional

structures in society determine provision and allocation. Attention is balanced between international experience and the policy framework in New Zealand. The course provides an understanding of key concepts, practices and methods.

GEOG 322 (15 Points)

Culture and Environment in East Asia

This course takes a topical and regional approach to the geography of East Asia. The unity and diversity of East Asia, environment and cultural development, industrialisation and urbanisation, population problems and environmental management are emphasised.

GEOG 330 (15 Points)

Research Methods in Physical Geography

Research design and associated research methods from the component fields of physical geography. A residential field trip forms a focus for the course. On this trip, students will work under supervision in small groups and apply selected research methods and techniques to a research project. Fieldwork will be followed by the development and presentation of the research project.

GEOG 331 (15 Points)

Hydrology and Fluvial Geomorphology

An integrated study of hydrological and fluvial processes in a river basin context. Content includes: examination of the water balance, run-off generating processes and river hydrology, integrated with investigation of sediment sources and transport and resulting deposits. Scientific principles are applied to selected practical problems.

GEOG 332 (15 Points)

Climate and Environment

An exploration of the nature of atmospheric processes that affect our climatic environment with a focus on applications and contemporary issues.

GEOG 333 (15 Points)

Special Topic: Field-focused Research in Earth System Science

Prerequisite: Permission of Head of School

Restriction: GEOG 204, 315, 330

GEOG 334 (15 Points)

Environmental Change

An exploration of the nature and causes of change in selected aspects of the physical environment. A core element of the course is the examination of methods used to reconstruct and date the past, using examples from climatology, biogeography, and geomorphology. Emphasis is on natural environmental change of the past, but human-environment interactions also feature.

GEOG 351 (15 Points)

Coastal and Marine Geography

An investigation of natural processes and mechanisms operating at a range of scales in coastal and marine environments, with an emphasis on estuaries and open coast sandy beaches. This provides the basis for discussion of applications in modelling and resource management.

GEOG 352 (15 Points)

Landscape, Environment and Heritage

The historical and cultural processes of environmental transformation, landscape and heritage making and representation are examined. Attention is directed to theories of and approaches to landscape and environment including Maori ideas of human-

environment relations. The course explores how ideas about environment and landscape shape places.

GEOG 690 (30 Points)

GEOG 690A (15 Points)

GEOG 690B (15 Points)

Graduate Diploma Dissertation (Geography)

To complete this course students must enrol in GEOG 690 A and B, or GEOG 690

Postgraduate Courses

GEOG 711 (15 Points)

Emerging Economic Spaces

Examines globalising economic processes, localising forces, and the practices of economic actors in the production of emerging economic spaces. The course considers contemporary analytical and conceptual debates, including global value chains, geographic imaginaries, new economies, and diverse economies. *Restriction: GEOG 724*

GEOG 712 (15 Points)

Land, Place and Culture

Contemporary geographic perspectives on society and culture, focusing on a review of traditional and new cultural geographic approaches to the constructions of place and environment, ethnicity, gender and identity.

GEOG 714 (15 Points)

Population, Mobilities and Health

An exploration of the changing nature of human populations, the dynamics of human mobilities, the determinants of health status and evolving modes of health care provision.

Restriction: GEOG 725, 726

GEOG 715 (15 Points)

Development and New Regional Geographies

'Development' is place-dependent and takes place at a range of scales. This course considers economic, socio-cultural, geopolitical and environmental transformations of nations, regions, communities, and emerging or post-foundational political spaces focussing on examples from Pacific, Asia and New Zealand.

Restriction: GEOG 721

GEOG 717 (15 Points)

Contemporary Issues in Human Geography

A critical review of selected issues and debates in contemporary human geography.

GEOG 732 (15 Points)

Quaternary Environmental Change

The use and interpretation of the output of a range of paleoclimate reconstruction tools including dendroclimatology, palynology and environmental isotopes with a focus on New Zealand archives of past environments. The dating tools used to constrain and help explain the timing of the events interpreted from the paleoclimate data will also be considered.

GEOG 738 (15 Points)

Future Food and Biological Economies

Investigates contemporary understandings, issues and strategies relating to the development of biological economies and food networks in the context of the globalising food economy. Addresses transformations in agro-food complexes and questions of nature-society

relationships to do with 'sustainable' and 'resilient' food production and consumption.

GEOG 739 (15 Points)

Research Topics in Geography

Directed research on an approved topic or topics.

Prerequisite: Approval of the Programme Coordinator

GEOG 745 (15 Points)

Hydrogeomorphology and River Restoration

Catchment-scale perspectives are used to analyse spatial and temporal variability in river forms and processes. River responses to human disturbance are placed in a longer-term evolutionary context. Prospective 'river futures' are appraised, linking principles from geomorphology and hydrology to provide a physical platform with which to frame management applications (especially river rehabilitation options).

GEOG 746 (15 Points)

Dynamic Coasts

An advanced study of the driving mechanisms and associated processes that shape coastlines. Uses and explores the morphodynamic concept as an integrating theme. Lecture topics examine wave hydrodynamics; surfzone circulation; fluid-sediment interactions and larger scale morphodynamics. Using sandy beach systems as the starting point, the dynamics of other coastal settings (eg, gravel beaches, estuaries, coral reefs) are considered to examine approaches to model coastal behaviour.

GEOG 748 (15 Points)

Fragile Coasts, Vulnerable Communities

Coastal communities are commonly perceived to be threatened by coastal change. Evaluate management responses. Case studies: highlight any geographic variation in local-scale vulnerability; critically evaluating methods that assess physical and social vulnerability; and demonstrating the importance of understanding these factors in coastal management decision-making.

GEOG 749 (15 Points)

Climate and Society

An examination of inter-relationships between climate and society. The sensitivity of selected biophysical and human activity systems to climate will be investigated and the actual and potential impacts of climatic variability and change investigated. Impact themes will vary from year to year, but are likely to be drawn from hydrology and water resources, agriculture, human health, ecosystems, and energy.

GEOG 759 (15 Points)

Research Topics in Geography

Directed research on an approved topic or topics.

Prerequisite: Approval of the Programme Coordinator

GEOG 760 (15 Points)

Special Topic in Geography

GEOG 771 (15 Points)

Spatial Analysis and Geocomputation

Approaches and challenges to analysing spatial data. Specific techniques covered will include measures of spatial autocorrelation, geographical regression, point pattern analysis, interpolation, overlay analysis, and an introduction to some of the newer geocomputation methods such as neural networks and cellular automata. Students will conduct a significant analysis task as part of this course.

GEOG 772 (15 Points)**Sensing Technology and Data Analysis**

Acquisition of airborne imagery, very high resolution satellite imagery, ground penetrating radar data, and LiDAR data. Geospatial data referencing, geometric and thematic accuracy of geospatial data, image classification and accuracy assessment, multitemporal data analysis, integrated processing of images using GPS and GIS data.

GEOG 773 (15 Points)**Visualisation and Cartography**

Introduction to field of cartography, drawing contrasts with new approaches to geovisualisation facilitated by information visualisation and statistical graphics. Human perceptual and cognitive systems as related to visual displays. Principles of sound perceptual and cognitive map design. Planning, creation and delivery of cartographic and visualisation-based projects. Review of emerging and future trends in this fast-changing field.

GEOG 779 (15 Points)**Programming, GIS Customisation and Web-mapping**

Spatial databases, spatial data structures and algorithms and converting and handling spatial data. Introduction to programming (in Python). Principles of object- and component-oriented architectures including details relating to ArcGIS as an example. Open source and open standards, web-mapping as a case-study.

GEOG 789 (30 Points)**GEOG 789A (15 Points)****GEOG 789B (15 Points)****Honours Dissertation in Geography**

To complete this course students must enrol in GEOG 789 A and B, or GEOG 789

GEOG 796A (60 Points)**GEOG 796B (60 Points)****Masters Thesis in Geography**

To complete this course students must enrol in GEOG 796 A and B

Geology**Stage I****GEOLOGY 103 (15 Points)****Introduction to Planet Earth**

The principles of processes that occur in Earth's interior and in neighbouring space, formation of the Earth, plate tectonics, volcanoes, the formation of rocks, mineral and energy resources, and comparison with other planets.

Restriction: GEOLOGY 101, 102

GEOLOGY 104 (15 Points)**Introduction to Earth's History**

The principles of processes that occur on Earth's surface, and the history of Earth and life. Topics include evolution, extinctions, geologic mapping, sediment transport and deposition, landscape evolution, and ice ages.

Restriction: GEOLOGY 101, 102

Stage II**GEOLOGY 201 (15 Points)****Introduction to Field Geology**

An introduction to basic techniques of geological field

work and mapping. Focuses on the compulsory seven days of field work during which each student will be required to produce a geological map and supporting field records, rocks, fossils and a brief report based on a field mapping exercise. Field trip: refer to School for details.

Prerequisite: 30 points from GEOLOGY 103 and 104 or GEOLOGY 101 and 15 points from GEOLOGY 102 or 110

GEOLOGY 202 (15 Points)**Earth History**

Geological time and sedimentary records. Global cycles, extraterrestrial impacts and biotic events. Modern, integrative stratigraphic principles and paleontology. Historical development of landscapes. Earth and life history, both global and New Zealand.

Prerequisite: Any 75 points

GEOLOGY 203 (15 Points)**Earth Materials**

Principles of crystallography, optical mineralogy, identification of minerals in thin section, classification of rocks, interpreting rock textures, rock forming processes.

Prerequisite: 15 points from GEOLOGY 101 or 103

GEOLOGY 204 (15 Points)**Earth Structure**

Methods of structural geology, analysing sequences of deformation, introduction to applied geophysics, geophysics of plate boundaries and lithosphere.

Prerequisite: 15 points from GEOLOGY 101 or 104

GEOLOGY 205 (15 Points)**GEOLOGY 205G (15 Points)****New Zealand: Half a Billion Years on the Edge**

Faults and earthquakes in central and southern New Zealand, volcanism in the North Island, Gondwanan and New Zealand flora, evolution of New Zealand biota, development of the New Zealand land mass, New Zealand in the South-West Pacific.

Prerequisite: Any 75 points

Stage III**GEOLOGY 301 (15 Points)****Advanced Field Geology**

Introduction to photogeology and advanced field techniques. Students will be required to undertake a variety of field studies and produce field reports and geological maps of selected areas.

Prerequisite: GEOLOGY 201 and 30 points from GEOLOGY 202-204

GEOLOGY 302 (15 Points)**Introductory Geochemistry and Hydrogeology**

Geochemical tools used to solve problems in earth sciences. Introductory hydrogeology. Integrated case histories. Laboratories include problem sets, alteration petrology and hydrogeology.

Prerequisite: GEOLOGY 201, 203

GEOLOGY 303 (15 Points)**Paleoenvironments and Paleoecology**

Investigation and interpretation of past environments, illustrated with case studies from the fossil record and Quaternary sediments. Examination of the high-resolution records of Quaternary environments, as well as the dynamic signatures of evolution, paleobiology and paleoecology.

Prerequisite: Any 30 points at Stage II in Geology, Geography or Biological Sciences

GEOLOGY 304 (15 Points)**Magmas, Metamorphism and Volcanism**

Magmatic systems and processes, metamorphic reactions and processes and their role in the evolution of the crust.

Prerequisite: GEOLOGY 203

GEOLOGY 305 (15 Points)**Tectonics and Crustal Evolution**

Global mass balances, tectonics, basin analysis, rock associations and plate tectonics. Geochemical evolution of the lithosphere through geologic time.

Prerequisite: GEOLOGY 204

Restriction: 435.311

GEOLOGY 340 (15 Points)**Introduction to Mineral Deposits**

An introduction to the recognition of geological settings, use and assessment of fossil fuel, metallic and industrial mineral deposits. Environmental impact of resource extraction and use. Each student will be required to attend a one-day field class, usually arranged at a weekend during the semester.

Prerequisite: GEOLOGY 301

GEOLOGY 361 (15 Points)**Applied Geophysics**

Geophysical techniques and their application to geological investigations, including the design and execution of field surveys, critical assessment of data, data processing, computer modelling and interpretation. Each student will be required to attend a total of three days of field classes, arranged during the mid-semester break and a weekend during the semester.

Prerequisite: 15 points from GEOLOGY 204, PHYSICS 230

GEOLOGY 372 (15 Points)**Case Histories in Engineering Geology**

The geology of dams, canals, tunnels, roads, viaducts, waste management and land development. Geotechnical hazards, seismotectonic hazard evaluation, photogeology, core logging and outcrop mapping. Site investigation methods. Each student will be required to attend two one-day field classes, usually arranged at weekends during the semester.

Prerequisite: Either CIVIL 220 or GEOLOGY 201

GEOLOGY 381 (15 Points)**Topics in Geology 1**

Prerequisite: Permission of the School Director

Restriction: GEOLOGY 302, 303, 304, 305

To complete this course students must enrol in GEOLOGY 690 A and B, or GEOLOGY 690

Postgraduate Courses**GEOLOGY 701 (15 Points)****Engineering Geological Mapping**

A field-based course which provides hands-on experience in outcrop mapping, geomorphic mapping, and simple field testing of rocks and soils for geotechnical purposes.

Prerequisite: GEOLOGY 372

GEOLOGY 703 (15 Points)**Geothermal Geology**

Geothermal systems are dynamic and of vital significance to national energy requirements. The course overviews the geologic, hydrologic, and geochemical features of geothermal systems with emphasis on those occurring in New Zealand. Topics include the geologic setting of geothermal fields, exploration, heat and mass transfer, fluid compositions and boiling and mixing, geology of reservoirs, fluid/mineral equilibria, alteration, and reservoir geothermometry.

GEOLOGY 704 (15 Points)**Special Topic****GEOLOGY 705 (15 Points)****Geohazards**

Introduction to contemporary methods used to identify and assess natural hazards, techniques used for the probabilistic forecasting, spatial representation and communication of hazards. How the relationship between hazard information, risk mitigation and emergency management is addressed. There will be a strong focus on the use of case studies.

GEOLOGY 706 (30 Points)**Special Topic****GEOLOGY 707 (30 Points)****Research Topics in Geology**

Admission to research project by approval of Programme Coordinator.

GEOLOGY 713 (15 Points)**Tectonic Geomorphology**

New Zealand is an ideal location in which to investigate the interplay between tectonics and geomorphic processes. This will be demonstrated by combining relevant case studies and field practise whereby students will develop skills in report writing and handling of some of the data, literature and tools necessary to conduct field research in active tectonics and landform generation.

Restriction: GEOG 743, GEOLOGY 712, 773

GEOLOGY 721 (15 Points)**Past Life and Ancient Environments**

Paleontological data are used in hydrocarbon exploration, resource assessment, sequence stratigraphy, sedimentary basin analysis, dating/correlation of rocks, and evaluation of global biodiversity, paleobiogeography, and life's evolution. This course examines fossils as research tools to decipher past biology, events and environments (Archean to Quaternary in age).

GEOLOGY 741 (15 Points)**Mineral Deposit Geochemistry**

Advanced teaching in geochemistry that relates to mineral deposits, and examines case histories of ore deposits, to allow critical assessment of recent advances in research that underpins understanding of ore deposits.

Prerequisite: GEOLOGY 302

Restriction: GEOLOGY 742

GEOLOGY 752 (15 Points)**Understanding Volcanic Systems**

Understanding how and why volcanoes erupt from magma processes in mantle to eruption at the surface. All tectonic settings and explosive and effusive processes are examined. Volcanic hazards and resource exploration in volcanic terrain is also covered.

Restriction: GEOLOGY 751

GEOLOGY 754 (15 Points)**Pure and Applied Sedimentology**

An integrated account of aspects of advanced sedimentology from sediment source to sink. Critical examination of recent and ongoing, pure and applied research into the dynamics of sedimentary environments and their recognition in the ancient record.

GEOLOGY 771 (15 Points)**Engineering Geology**

Geology applied to engineering investigation, design and construction and to land evaluation. Contemporary practice in engineering geology. Attendance is expected at relevant Geotechnical Society meetings and seminars.

GEOLOGY 772 (15 Points)**Hydrogeology**

Examination of groundwater processes, use and management.

GEOLOGY 789 (30 Points)**GEOLOGY 789A (15 Points)****GEOLOGY 789B (15 Points)****BSc(Hons) Dissertation in Geology**

To complete this course students must enrol in GEOLOGY 789 A and B, or GEOLOGY 789

To complete this course students must enrol in GEOLOGY 796 A and B

Geophysics**Stage III****GEOPHYS 330 (15 Points)****Physics of the Earth**

Discussion of the physics of the solid earth includes: the gravitational field, the rotation and figure of the earth, seismology and the internal structure of the earth, the earth's internal heat, the geomagnetic field, paleomagnetism and geodynamics. The applied geophysics section covers the theoretical basis of geophysical exploration techniques, including seismic methods.

No formal prerequisite, but it will be assumed that students have either passed (PHYSICS 213, 230 and 15 points in Geology) or (GEOLOGY 204, and PHYSICS 111 or MATHS 150, and 15 other points in Physics)

GEOPHYS 331 (15 Points)**Physics of the Atmosphere and Ocean**

The application of fluid dynamics to the motion of the

atmosphere and oceans. Marine topics include: ocean structure, oceanic circulation, underwater acoustics, tides and waves. Atmospheric topics include: boundary layer meteorology and the microphysics of clouds and precipitation. A weekend field trip is a component of the course.

No formal prerequisite, but an understanding of the material in PHYSICS 211, 213, 220 and 230 will be assumed.

Restriction: GEOPHYS 332, 333

Postgraduate Courses**GEOPHYS 761 (15 Points)****Advanced Applied Geophysics 1**

The theory and practice of seismic and ground-penetrating radar methods. Topics include: basic theory, theory of methods, data acquisition, data processing, and interpretation. Students are required to select four of the five topics.

Prerequisite: GEOLOGY 361 and GEOPHYS 330

Restriction: GEOPHYS 763

GEOPHYS 762 (15 Points)**Advanced Applied Geophysics 2**

The theory and practice of potential field, electrical and electro-magnetic methods. Topics include: basic theory, theory of methods, data acquisition, data processing and interpretation of gravity and magnetic data and of electrical data. Students are required to select four of the five topics.

Prerequisite: GEOLOGY 361 and GEOPHYS 330

Restriction: GEOPHYS 763

GEOPHYS 763 (15 Points)**GEOPHYS 763A (7.5 Points)****GEOPHYS 763B (7.5 Points)****Advanced Applied Geophysics 3**

A selection of four of the topics in GEOPHYS 761 and 762. Either the physical principles of applied geophysical methods, or the practice of applied geophysical methods, including data acquisition, data processing, and interpretation.

Prerequisite: Either 15 points in Stage III Physics or Geophysics, or GEOLOGY 361

Restriction: GEOPHYS 761, 762

Information Technology

Prescriptions for courses included in this programme are listed under their respective subject codes.

Marine Science

Stage II

MARINE 202 (15 Points)

Principles of Marine Science

An introduction to the physical and biological structure of the oceans, sea floor, coastlines and the biological communities that inhabit them. Subject matter includes an overview of the nature and scope of marine science globally and within the New Zealand and Auckland contexts. A wide coverage of marine science issues are presented with an emphasis on multidisciplinary examples.

No formal prerequisite, although an understanding of Stage I level science is assumed.

Restriction: 423.202, 424.201, ENVSCI 202

Stage III

MARINE 302 (15 Points)

Dynamics of Marine Systems

Fundamental processes in the marine environment with an emphasis on interdisciplinary linkages in the functioning of marine ecosystems. Topics include: the role of fluid dynamics in the lives of marine animals and in shaping the physical marine environment, and interdisciplinary studies of marine ecosystems.

No formal prerequisite although an understanding of marine science to the level of MARINE 202 will be assumed

Restriction: 423.302, 424.301, ENVSCI 302

Postgraduate Courses

MARINE 701 (15 Points)

Current Issues in Marine Science

A seminar-based examination of selected current issues in Marine Science. Seminars will be jointly run using a web link between the Universities of Auckland, Otago and Victoria. The topics and material will recognise the wide range of undergraduate experience across participants and emphasise the value of cross-disciplinary approaches to Marine Science.

MARINE 702 (15 Points)

Field Techniques in Marine Science

An advanced course in the development of practical skills in research design, implementation and analysis

in Marine Science. Students participate in two field units. A compulsory field unit at The University of Auckland and a choice of either the unit offered by the University of Otago or the unit offered by Victoria University of Wellington. Each course focuses on different themes in Marine Science.

MARINE 703 (15 Points)

Marine Protected Areas

A review of current science related to MPA, including biogeographical and ecological principles in the design of marine reserve networks, MPA as controls in ecosystem research, conservation of biological diversity, interaction with fisheries, and case studies and experiences involving guest lecturers. Practicals may include visits to Goat Island marine reserve and other locations, and analysis and interpretation of data related to MPA.

Restriction: ENVSCI 726

Mathematics

MATHS 91F (15 Points)

Foundation Mathematics 1

This first mathematics course for students enrolled in the Tertiary Foundation Certificate programme aims to promote an understanding of number skills, including an introduction to algebra. Students will learn how to use simple technology and develop their problem solving abilities.

Restriction: MATHS 91W

MATHS 92F (15 Points)

Foundation Mathematics 2

This second mathematics course for students enrolled in the Tertiary Foundation Certificate programme aims to use the skills learnt in MATHS 91F to develop an understanding of functions in their tabular, algebraic and graphical representations. This course prepares students for either MATHS 101 or 102.

Recommended preparation: MATHS 91F or 93F

Restriction: MATHS 92W

MATHS 93F (15 Points)

Foundation Mathematics 3

This Extension Mathematics course for students enrolled in the Tertiary Foundation Certificate Programme aims to promote an understanding of numerical and algebraic skills at a deeper level than MATHS 91F. Students will learn how to use simple technology and develop their problem solving abilities.

Restriction: MATHS 93W

MATHS 94F (15 Points)

Foundation Mathematics 4

This second Extension Mathematics course for students enrolled in the Tertiary Foundation Certificate Programme aims to use the skills learnt in MATHS 93F to develop an understanding of functions, including differential functions, in their tabular, algebraic and graphical representations. This course prepares students for either MATHS 101 or 102.

Recommended preparation: MATHS 93F

Prerequisite: MATHS 93F

Restriction: MATHS 94W

Stage I**MATHS 101 (15 Points)****MATHS 101G (15 Points)****Mathematics in Society**

Students will encounter the role mathematics plays in understanding and guiding human activity. The teaching is thematic and students experience how fundamental mathematical ideas occur in modelling diverse features of our society such as the environment (eg, air pollution) and medicine (eg, burns, drug dosages).

Recommended preparation: For students who have not studied Mathematics at NCEA Level 3 (or equivalent)

Restriction: MATHS 101 may be taken with or after MATHS 190. It may not be taken with or after any other Mathematics course at Stage I or above. MATHS 101 is not available for students who passed NCEA Level 3 Mathematics or equivalent

MATHS 102 (15 Points)**Functioning in Mathematics**

This introduction to calculus focuses on the development of mathematical skills and concepts leading up to calculus, through active participation in problems using functions to model real life contexts. Prepares students for further study, for instance, MATHS 108, 150.

Recommended preparation for students who have achieved fewer than 12 credits in Calculus or Statistics at NCEA Level 3, or who have achieved at least 18 credits in Mathematics at NCEA Level 2 (or equivalent) and fewer than 12 credits in Calculus or Statistics at NCEA Level 3.

Restriction: MATHS 102 may be taken with or after MATHS 190, or after MATHS 101. It may not be taken with or after any other Mathematics course at Stage I or above.

MATHS 108 (15 Points)**General Mathematics 1**

A general entry to mathematics for commerce and the social sciences, following Year 13 mathematics. Selected topics in algebra and calculus and their applications including: sets, real numbers, integers; linear functions, linear equations and matrices; functions, equations and inequalities; limits and continuity; differential calculus of one and two variables; integral calculus of one variable. These are studied in general settings using applications from science, commerce and information systems.

Recommended preparation: MATHS 102 or at least 12 credits in NCEA Level 3 Calculus or at least 18 credits in NCEA Level 3 Statistics (or equivalent)

Restriction: ENGSCI 111, MATHS 130, 151, 153, 208, 250, PHYSICS 111, 210. May not be taken after MATHS 150

MATHS 150 (15 Points)**Advancing Mathematics 1**

The gateway to further mathematics courses for students intending to major in mathematics, statistics, physics, economics, finance or mathematical biology. An introduction to the use of careful mathematical language and reasoning applied to univariate optimisation, matrix methods for linear equations, integration techniques and the solution of differential equations, and builds a strong foundation for further mathematical study. Recommended preparation for MATHS 250.

Prerequisite: B+ in MATHS 102, or MATHS 108, or 18 credits in NCEA Mathematics with Calculus including at least 6 credits at merit or excellence, or B in CIE A2 Mathematics, or equivalent

Restriction: MATHS 109, 151, 130, 250, ENGSCI 111, PHYSICS 111, 210

MATHS 153 (15 Points)**Accelerated Mathematics**

A version of MATHS 150 for high achieving Year 13 students.

Enrolment requires permission from Department
Restriction: MATHS 108, 109, 130, 150, 151, ENGSCI 111, PHYSICS 111

MATHS 162 (15 Points)**Modelling and Computation**

In this introduction to mathematical modelling and scientific computing, students will learn how to formulate mathematical models and how to solve them using numerical and other methods. A core course for students who wish to advance in Applied Mathematics.

Corequisite: One of MATHS 108, 150, 153, ENGSCI 111, ENGGEN 150

MATHS 190 (15 Points)**MATHS 190G (15 Points)****Great Ideas Shaping our World**

Mathematics contains many powerful and beautiful ideas that have shaped the way we understand our world. This course explores some of the grand successes of mathematical thinking. No formal mathematics background is required, just curiosity about topics such as infinity, paradoxes, cryptography, knots and fractals.

Stage II**MATHS 202 (15 Points)****Tutoring in Mathematics**

This is a mainly practical course in which selected students learn tutoring skills that are put to use in MATHS 102 tutorials. In a small interactive class, students learn to mark, to question strategically and to facilitate learning. The theory and issues of mathematics education as a research field are also introduced.

Prerequisite: 30 points from courses in Mathematics and Departmental consent required

MATHS 208 (15 Points)**General Mathematics 2**

This sequel to MATHS 108 features applications from the theory of multi-variable calculus, linear algebra and differential equations to real-life problems in statistics, economics, finance, computer science, and operations research. Matlab is used to develop analytical and numerical methods of solving problems.

Prerequisite: 15 points from ENGSCI 111, PHYSICS 111, MATHS 108, 130, 150, 151, 153

Restriction: Cannot be taken, concurrently with, or after, MATHS 250, 253, PHYSICS 210, 211

MATHS 250 (15 Points)**Advancing Mathematics 2**

This preparation for advanced courses in mathematics is intended for all students who plan to progress further in mathematics. Covers topics from multivariable calculus and linear algebra that have many applications in science, engineering and commerce, including vector spaces, eigenvalues, power series, least squares and improper integrals. The emphasis is on both the results and the ideas underpinning these.

Prerequisite: 15 points from ENGSCI 111, MATHS 150, 153, PHYSICS 111 or an A pass in MATHS 108, or B+ in MATHS 208

Restriction: MATHS 109, 152, 230, PHYSICS 112, 210

MATHS 253 (15 Points)
Advancing Mathematics 3

The standard sequel to MATHS 250. It covers topics in linear algebra and multi-variable calculus including linear transformations, quadratic forms, double and triple integrals and constrained optimisation. It is a preparation for a large number of Stage III courses in mathematics and statistics, and for many advanced courses in physics and other applied sciences. All students intending to advance in mathematics should take this course.

Prerequisite: 15 points from MATHS 152, 250, PHYSICS 112, 210, or an A pass in MATHS 208

Restriction: PHYSICS 211

MATHS 255 (15 Points)
Principles of Mathematics

An introduction to mathematical thinking and communication: how to organise arguments logically and prove results. Rigorous notions are developed using topics that are central to the foundations of algebra and analysis including set theory, logic, abstract vector spaces and elementary number theory. An essential course for all students advancing in pure mathematics.

Prerequisite: 15 points from MATHS 152, 250, PHYSICS 112, 210, or an A pass in MATHS 208

MATHS 260 (15 Points)
Differential Equations

The study of differential equations is central to mathematical modelling of systems that change. Develops methods for understanding the behaviour of solutions to ordinary differential equations. Qualitative and elementary numerical methods for obtaining information about solutions are discussed, as well as some analytical techniques for finding exact solutions in certain cases. Some applications of differential equations to scientific modelling are discussed. A core course for Applied Mathematics.

Prerequisite: One of MATHS 150, 153, 208, 250, PHYSICS 111, ENGGEN 150, ENGSCI 111, or at least A- in MATHS 108

Restriction: PHYSICS 211

MATHS 269 (15 Points)
Mathematics of Money

An introduction to the mathematics of the personal finance of saving and investment. Topics include interest, inflation, annuities, bonds, shares, mortgages and pension plans. Aspects of KiwiSaver will be covered. This course will provide a useful introduction to STATS 370 but is not a prerequisite.

Prerequisite: One of MATHS 150, 153, 208, 250, PHYSICS 111

MATHS 270 (15 Points)
Numerical Computation

Many mathematical models occurring in Science and Engineering cannot be solved exactly using algebra and calculus. Students are introduced to computer-based methods that can be used to find approximate solutions to these problems. The methods covered in the course are powerful yet simple to use. This is a core course for students who wish to advance in Applied Mathematics.

Prerequisite: One of MATHS 108, 150, 153, PHYSICS 111, ENGGEN 150, ENGSCI 111, and one of MATHS 162, COMPSCI 101, 105, INFOSYS 110, 120 (recommended MATHS 162)

Restriction: MATHS 267

Stage III
MATHS 302 (15 Points)
Teaching and Learning Mathematics

For people interested in thinking about the social, cultural, political, economic, historical, technological and theoretical ideas that influence mathematics education, who want to understand the forces that shaped their own mathematics education, or who are interested in teaching. Students will develop their ability to communicate ideas in essay form.

Recommended preparation: At least 45 points from courses in Mathematics or Statistics

MATHS 307 (15 Points)
Special Topic in Mathematics Education 1

Both MATHS 307 and 308 deal with some special topic(s) of contemporary interest in mathematics education.

MATHS 308 (15 Points)
Special Topic in Mathematics Education 2

Both MATHS 307 and 308 deal with some special topic(s) of contemporary interest in mathematics education.

MATHS 310 (15 Points)
History of Mathematics

A study of some of the topics occurring in the history of mathematics which facilitate the understanding of modern mathematics. These include: concepts of number, geometry, algebra, and the differential and integral calculus.

Corequisite: At least 30 points at Stage III in Mathematics

MATHS 315 (15 Points)
Mathematical Logic

Logic addresses the foundations of mathematical reasoning. It models the process of mathematical proof by providing a setting and the rules of deduction. Builds a basic understanding of first order predicate logic, introduces model theory and demonstrates how models of a first order system relate to mathematical structures. The course is recommended for anyone studying high level computer science or mathematical logic.

Prerequisite: COMPSCI 225 or MATHS 255 or PHIL 222

MATHS 320 (15 Points)
Algebraic Structures

This is a framework for a unified treatment of many different mathematical structures. It concentrates on the fundamental notions of groups, rings and fields. The abstract descriptions are accompanied by numerous concrete examples. Applications abound: symmetries, geometry, coding theory, cryptography and many more. This course is recommended for those planning graduate study in pure mathematics.

Prerequisite: MATHS 255 or 328, or an A- pass in MATHS 253

MATHS 326 (15 Points)
Combinatorial Computing

Combinatorics is a branch of mathematics that studies collections of objects that satisfy specified criteria. An important part of combinatorics is graph theory, which is now connected to other disciplines including bioinformatics, electrical engineering, molecular chemistry and social science. The use of combinatorics in solving counting and construction problems is covered using topics that include algorithmic graph theory, codes and incidence structures, and combinatorial complexity.

Prerequisite: MATHS 255, or COMPSCI 225 and a B+ in either MATHS 208 or 250

MATHS 328 (15 Points)
Algebra and Applications

The goal of this course is to show the power of algebra and number theory in the real world. It concentrates on concrete objects like polynomial rings, finite fields, groups of points on elliptic curves, studies their elementary properties and shows their exceptional applicability to various problems in information technology including cryptography, secret sharing, and reliable transmission of information through an unreliable channel.

Prerequisite: MATHS 255, or B+ pass in COMPSCI 225 and one of MATHS 208, 250, 253

MATHS 332 (15 Points)
Real Analysis

A standard course for every student intending to advance in pure mathematics. It develops the foundational mathematics underlying calculus, it introduces a rigorous approach to continuous mathematics and fosters an understanding of the special thinking and arguments involved in this area. The main focus is analysis in one real variable with the topics including real fields, limits and continuity, Riemann integration and power series.

Prerequisite: MATHS 253 and 255, or 253 and a B+ in MATHS 260

MATHS 333 (15 Points)
Analysis in Higher Dimensions

By selecting the important properties of distance many different mathematical contexts are studied simultaneously in the framework of metric and normed spaces. Examines carefully the ways in which the derivative generalises to higher dimensional situations. These concepts lead to precise studies of continuity, fixed points and the solution of differential equations. A recommended course for all students planning to advance in pure mathematics.

Prerequisite: MATHS 332

MATHS 340 (15 Points)
Real and Complex Calculus

Calculus plays a fundamental role in mathematics, answering deep theoretical problems and allowing us to solve very practical problems. Extends the ideas of calculus to two and higher dimensions, showing how to calculate integrals and derivatives in higher dimensions and exploring special relationships between integrals of different dimensions. It also extends calculus to complex variables.

Prerequisite: MATHS 253

Restriction: MATHS 347

MATHS 353 (15 Points)
Geometry and Topology

A selection of topics providing an introduction to a range of concepts in geometry and general topology, with emphasis on visualisable aspects of these subjects. Topics include some or all of the following: axiom systems, affine geometry, Euclidean and non-Euclidean geometry, projective geometry, symmetry, convexity, the geometric topology of manifolds, and algebraic structures associated with topological spaces.

Prerequisite: MATHS 255

MATHS 361 (15 Points)
Partial Differential Equations

Partial differential equations are used to model many important phenomena in the real world (such as heat flow and wave motion). An introductory course on methods of solution for linear partial differential equations in one, two and three dimensions.

Prerequisite: MATHS 260 and 253, or PHYSICS 211

MATHS 362 (15 Points)
Methods in Applied Mathematics

Techniques such as variational methods, Green's functions, and perturbation analysis are a crucial part of the applied mathematician's toolbox. Covers a selection of such advanced topics in detail, and is suitable for those students intending to advance in Applied Mathematics or Physics.

Recommended preparation: MATHS 340 and 361

Prerequisite: MATHS 260 and 253, or PHYSICS 211

MATHS 363 (15 Points)
Advanced Modelling and Computation

Much of modern research in applied mathematics, physics and engineering relies heavily on the construction and numerical solution of mathematical models. Covers the theory and practice of such computational approaches, including the study of numerical linear algebra and differential equations, and bifurcations in ordinary differential equations. Matlab is used extensively.

Prerequisite: MATHS 260 and 270

Restriction: MATHS 367

MATHS 372A (7.5 Points)**MATHS 372B (7.5 Points)****Industrial Mathematics Clinic**

An industrial case study involving the formulation, solution and interpretation of a problem presented by an industrial client. Field work, team effort, project presentation and report writing are emphasised.

Recommended preparation: MATHS 267

Prerequisite: Departmental consent required

To complete this course students must enrol in MATHS 372 A and B

MATHS 381 (15 Points)
Special Topic in Mathematics 1**MATHS 382 (15 Points)****MATHS 382A (7.5 Points)****MATHS 382B (7.5 Points)****Special Topic in Mathematics 2**

To complete this course students must enrol in MATHS 382 A and B or MATHS 382

MATHS 383 (15 Points)
Special Topic in Mathematics 3**MATHS 384 (15 Points)**
Special Topic in Mathematics 4

Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 386 (15 Points)**MATHS 386A (7.5 Points)****MATHS 386B (7.5 Points)****Special Topic in Applied Mathematics 1**

To complete this course students must enrol in MATHS 386 A and B, or MATHS 386

MATHS 387 (15 Points)
Special Topic in Applied Mathematics 2

Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 388 (15 Points)**Special Topic in Applied Mathematics 3**

Each of these courses deals with some special topic(s)

of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 389 (15 Points)

Special Topic in Applied Mathematics 4

Each of these courses deals with some special topic(s) of contemporary interest in applied and computational mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

Diploma Courses

MATHS 681 (15 Points)

PG Topic in Mathematics 1

Deals with some topic(s) from pure mathematics, applied mathematics or mathematics education.

MATHS 682 (15 Points)

PG Topic in Mathematics 2

Deals with some topic(s) from pure mathematics, applied mathematics or mathematics education.

MATHS 690 (30 Points)

MATHS 694 (15 Points)

PG Diploma Project 1

Involving participation in a research project or investigation in a topic from pure mathematics, applied mathematics or mathematics education under the supervision of one or more staff members, and presentation by the student of the results in a written report and a seminar.

MATHS 695 (15 Points)

PG Diploma Project 2

Involving participation in a research project or investigation in a topic from pure mathematics, applied mathematics or mathematics education under the supervision of one or more staff members, and presentation by the student of the results in a written report and a seminar.

Postgraduate Courses

MATHS 701 (15 Points)

Research Skills in Mathematics Education

Prepares students for postgraduate study in mathematics and statistics education. Its emphasis is on workshops in the key research skills required by students working at this level. It will cover a range of research issues and techniques.

MATHS 702 (15 Points)

Mathematics Curriculum

A theoretical approach to mathematical curricula, broadly interpreted, with particular emphasis on cultural and linguistic perspectives, especially Maori. Additional issues will include a selection from history of mathematics curricula, influences on the development of a mathematics curriculum, and the aims and objectives of secondary and tertiary mathematics curricula.

MATHS 703 (15 Points)

Theoretical Issues in Mathematics Education

An analysis of theoretical perspectives that inform research in mathematics education, with a focus on learning theories, both social and psychological, and their implications for teaching and learning in mathematics.

MATHS 705 (15 Points)

Socio-political Issues in Mathematics Education

This course will examine mathematics teaching and learning from a sociological perspective. Topics covered will include gender differences in mathematics, grouping students by ability vs. mixed ability teaching, and the performance of students from working class and ethnic minority backgrounds. Equity issues will be a central focus, and we will discuss the ways in which sociological ideas complement other approaches to research in mathematics education.

MATHS 706 (15 Points)

Technology and Mathematics Education

Practical and theoretical perspectives on ways that technology, especially calculators and computers, can enhance teaching at senior secondary and university levels, with a particular focus on calculus. Identification of affordances, constraints and obstacles in the use of technology. Consideration of issues of teacher and lecturer development in implementation of technology.

MATHS 712 (15 Points)

Teaching and Learning in Algebra

Recent theoretical perspectives on the teaching and

learning of school and university mathematics are linked to the learning of either calculus or algebra. The focus is on the mathematics content, applications, and effective learning at school and university.

Students taking this course should normally have studied mathematics or statistics at 200 level

MATHS 713 (15 Points) **Logic and Set Theory**

A study of the foundations of pure mathematics, formalising the notions of a “mathematical proof” and “mathematical structure” through predicate calculus and model theory. It includes a study of axiomatic set theory.

Prerequisite: MATHS 315 or PHIL 305

MATHS 714 (15 Points) **Number Theory**

A broad introduction to various aspects of elementary, algebraic and computational number theory and its applications, including primality testing and cryptography.

Prerequisite: B+ in MATHS 328 or 320

MATHS 715 (15 Points) **Graph Theory and Combinatorics**

A study of combinatorial graphs (networks), designs and codes illustrating their application and importance in other branches of mathematics and computer science.

Prerequisite: B+ pass in MATHS 326 or 320

MATHS 720 (15 Points) **Group Theory**

A study of groups focusing on basic structural properties, presentations, automorphisms and actions on sets, illustrating their fundamental role in the study of symmetry (for example in crystal structures in chemistry and physics), topological spaces, and manifolds.

Prerequisite: MATHS 320

MATHS 721 (15 Points) **Representations and Structure of Algebras and Groups**

Representation theory studies properties of abstract groups and algebras by representing their elements as linear transformations of vector spaces or matrices, thus reducing many problems about the structures to linear algebra, a well-understood theory.

Prerequisite: MATHS 320

MATHS 725 (15 Points) **Lie Groups and Lie Algebras**

Symmetries and invariants play a fundamental role in mathematics. Especially important in their study are the Lie groups and the related structures called Lie algebras. These structures have played a pivotal role in many areas, from the theory of differential equations to the classification of elementary particles. Strongly recommended for students advancing in theoretical physics and pure mathematics.

Prerequisite: MATHS 320 and 332

Recommended preparation: MATHS 333

MATHS 730 (15 Points) **Measure Theory and Integration**

Presenting the modern elegant theory of integration as developed by Riemann and Lebesgue, it includes powerful theorems for the interchange of integrals and limits so allowing very general functions to be integrated, and illustrates how the subject is both an essential tool for analysis and a critical foundation for the theory of probability.

Strongly recommended: MATHS 333.

Prerequisite: MATHS 332

MATHS 731 (15 Points) **Functional Analysis**

Provides the mathematical foundations behind some of the techniques used in applied mathematics and mathematical physics; it explores how many phenomena in physics can be described by the solution of a partial differential equation, for example the heat equation, the wave equation and Schrödinger's equation.

Recommended preparation: MATHS 730 and 750.

Prerequisite: MATHS 332 and MATHS 333

MATHS 735 (15 Points) **Analysis on Manifolds and Differential Geometry**

Studies surfaces and their generalisations, smooth manifolds, and the interaction between geometry, analysis and topology; it is a central tool in many areas of mathematics, physics and engineering. Topics include Stokes' theorem on manifolds and the celebrated Gauss Bonnet theorem.

Strongly recommended: MATHS 333 and 340.

Prerequisite: MATHS 332

MATHS 740 (15 Points) **Complex Analysis**

Studies analytic functions and their properties, which often reflect the topology of the region on which the functions are defined. This relationship yields powerful conceptual and computational tools and results, including the uniformisation theorem of Riemann which is a cornerstone in conformal geometry. The concepts and objects have applications in many branches of mathematics, physics, and engineering.

Strongly recommended: MATHS 333 and 340.

Prerequisite: MATHS 332

MATHS 745 (15 Points) **Chaos, Fractals and Bifurcation**

Presents the classical fractals of computer science and art such as Julia and Mandelbrot sets, iterated function systems and higher-dimensional strange attractors, and illustrates applications of chaos, fractals and bifurcation to areas including commerce, medicine, biological and physical sciences.

MATHS 750 (15 Points) **Topology**

Unlike most geometries, topology models objects which may be stretched. Its ideas have applications in other branches of mathematics as well as physics, chemistry, economics and beyond. Its results give a general picture of what might happen rather than precise details of when and where. The course covers aspects of general and algebraic topology.

Strongly recommended: MATHS 333.

Prerequisite: MATHS 332 or 353

MATHS 761 (15 Points) **Dynamical Systems**

Mathematical models of systems that change are frequently written in the form of nonlinear differential equations, but it is usually not possible to write down explicit solutions to these equations. This course covers analytical and numerical techniques that are useful for determining the qualitative properties of solutions to nonlinear differential equations.

Prerequisite: MATHS 340 and 361

MATHS 762 (15 Points) **Nonlinear Partial Differential Equations**

A study of exact and numerical methods for non-linear partial differential equations. The focus will be on the kinds of phenomena which only occur for non-linear partial differential equations, such as

blow up, shock waves, solitons and special travelling wave solutions.

Prerequisite: MATHS 340 and 361

MATHS 763 (15 Points)

Advanced Partial Differential Equations

A study of exact and approximate methods of solution for the linear partial differential equations that frequently arise in applications.

Prerequisite: MATHS 340 and 361

MATHS 764 (15 Points)

Mathematical Biology

A course introducing central concepts in mathematical biology, with emphasis on modelling of physiological systems and gene dynamics.

MATHS 769 (15 Points)

Applied Differential Equations

Systems taken from a variety of areas such as financial mathematics, fluid mechanics and population dynamics can be modelled with partial differential equations and stochastic differential equations. This course uses such applications as the context to learn about these two important classes of differential equations.

Prerequisite: MATHS 340 and 361

MATHS 770 (15 Points)

Advanced Numerical Analysis

Covers the use, implementation and analysis of efficient and reliable numerical algorithms for solving several classes of mathematical problems. The course assumes students have done an undergraduate course in numerical methods and can use Matlab or other high-level computational language.

Prerequisite: MATHS 270 and one of MATHS 340, 361, 363

Optometry and Vision Science

Stage I

OPTOM 110 (15 Points)

Optics of the Eye

Evolution and optics of the vertebrate and invertebrate eye. Schematic eyes. Ocular ametropia, mechanisms of accommodation. Light transmission in the eye. Aspherical and gradient index structures in the eye. Ocular aberrations. Measurement of ocular dimensions. Refractive errors of the human eye. Optical correction of refractive errors.

OPTOM 161 (15 Points)

Optics of Lenses and Lens Systems

Optics relevant to optometry, but of interest to other science students seeking a background in geometrical optics. Includes a study of the principles of image formation by lenses and lens systems, mirrors and prisms. In addition to an introduction to ophthalmic lenses, includes basic instruments such as telescopes, microscopes and projection systems.

OPTOM 165 (15 Points)

Physical Optics

Includes physical optics relevant to optometry but is also directed towards students taking other science courses. Gives an understanding of the basic principles of physical optics and will involve a study of phenomena including interference, diffraction and polarisation.

Restriction: OPTOM 160

OPTOM 171A (15 Points)

OPTOM 171B (15 Points)

Visual Science 1: Structure and Function of the Visual System

Anatomy and physiology of the eye and visual pathway. Topics include composition and structure of the tear film, neural processing in the visual cortex, aspects of visual function including spatial and temporal vision, motion perception and colour vision. Investigation of visual perception using psychophysical and electrophysiological techniques.

Restriction: OPTOM 151, 170

To complete this course students must enrol in OPTOM 171 A and B

OPTOM 191A (7.5 Points)

OPTOM 191B (7.5 Points)

Issues in Optometry

Topics of special interest to students entering

Optometry from overseas and from the graduate entry quota.

Prerequisite: Permission of Head of Department

To complete this course students must enrol in OPTOM 191 A and B

Stage II

OPTOM 211A (15 Points)

OPTOM 211B (15 Points)

Optometry

The history and development of optometry as a health care profession, scope of optometric practice. Introduction to the optometric examination: vision and visual acuity, contrast sensitivity, visual fields, colour vision, slit lamp biomicroscopy, ophthalmoscopy, objective and subjective examination, near visual examination, routine binocular vision examination, history taking, communication skills, clinical problem-solving.

Restriction: 450.210, 450.220

To complete this course students must enrol in OPTOM 211 A and B

OPTOM 245A (7.5 Points)

OPTOM 245B (7.5 Points)

Principles of Ocular Pharmacology

General principles of pharmacology. Pharmacodynamics. Drug absorption, distribution and metabolism. Mechanism of drug action at receptors. Drugs and their application on ophthalmic practice. The autonomic nervous system: anatomy and physiology. Mechanisms of action of ocular pharmaceutical agents. Principles of pharmacological treatment of ocular disease. Drug interactions. Legislation on use of ocular pharmaceutical agents by optometrists in New Zealand and internationally. Introduction to therapeutic agents in optometric practice. Scope of treatment. Shared care.

Prerequisite: OPTOM 151

Restriction OPTOM 241, 361

To complete this course students must enrol in OPTOM 245 A and B

OPTOM 251A (7.5 Points)

OPTOM 251B (7.5 Points)

Ocular Pathology

Pathophysiology of the eye. Histopathology of eye disease. Pathology of orbit, lacrimal system, conjunctiva, cornea, uvea, lens and retina. Developmental anomalies of the eye.

To complete this course students must enrol in OPTOM 251 A and B

OPTOM 260 (15 Points)

Applied Optics – Dispensing

Optics of ophthalmic lenses, ophthalmic lens materials, strength of materials, ophthalmic prisms, tinted lenses, coatings, multifocal and progressive addition lenses, special lens designs, diffractive ophthalmic lenses, magnification, isogonal and isekonic lens design. Finite ray tracing, optical design, chromatic and monochromatic aberrations of ophthalmic lenses. Ophthalmic dispensing, fabrication of ophthalmic aids. Principles of optical instruments.

OPTOM 270 (15 Points)

Visual Science 2

Models of spatial vision. Velocity perception. Signal detection theory. Theories of colour vision, defective colour vision. Visually evoked potentials. Binocular space perception. The development of vision. Recent advances in visual science. Aetiology of refractive errors

– hereditary factors, environmental factors. Prevalence of ametropia and changes with age.

Stage III

OPTOM 312A (22.5 Points)

OPTOM 312B (22.5 Points)

Clinical Optometry

The routine optometric examination, diagnosis and management of disorders of the visual system, case analysis, myopia control, visual ergonomics, elements of illumination engineering, vision screening, visual standards. Principles of industrial safety. Ocular and vision problems in the elderly. Low vision, electronic, optical and non optical low vision appliances. Examination and treatment of patients in the Optometry Clinic under supervision.

To complete this course students must enrol in OPTOM 312 A and B

OPTOM 330A (7.5 Points)

OPTOM 330B (7.5 Points)

Contact Lens Practice

Examination procedures for contact lens practice. Principles of contact lens fitting. Optics of contact lenses. Complications of contact lenses. Materials used in contact lens manufacture. Designs of contact lenses. Scleral lens impressions. Recent advances in contact lenses. Practical sessions in contact lens fitting, verification techniques and patient care.

To complete this course students must enrol in OPTOM 330 A and B

OPTOM 341A (7.5 Points)

OPTOM 341B (7.5 Points)

Paediatric Optometry and Binocular Vision

Anatomy and physiology/modeling of normal and abnormal eye-movement systems. Developmental aspects of infant and children's vision and eye coordination. Visual examination of infant and child patients. Investigation of idiopathic and acquired vergence eye-movement disorders: Strabismus and Heterophoria. Treatment of Strabismus and Heterophoria by refractive correction, visual training and surgery. Sports Optometry, Visual aspects of learning disabilities.

To complete this course students must enrol in OPTOM 341 A and B

OPTOM 352A (15 Points)

OPTOM 352B (15 Points)

Diseases of the Eye and Visual System: Diagnosis and Management

Signs, symptoms and diagnosis of diseases of the eye, ocular adnexa and visual system, including neurological dysfunction and signs of systemic disease. Management of diseases of eye, ocular adnexa and visual system, including the use of therapeutic agents. Indications, contraindications and side effects of therapeutic agents for the treatment of ocular disease.

Restriction: OPTOM 351, 355

To complete this course students must enrol in OPTOM 352 A and B

OPTOM 372A (7.5 Points)

OPTOM 372B (7.5 Points)

Visual Science 3

To provide an understanding of visual information processing by the visual pathways (retino-geniculate-striate system) and the physiology of other ocular components. A problem-oriented approach, which develops students' skills in reading, analysing and debated scientific papers in the vision sciences, will be used to achieve a high level of critical thinking and problem solving skills. It is expected that students will acquire the ability to seek, evaluate and retrieve scientific information on which to base their clinical practice. Clear and concise communication of scientific information both in written and oral form will be required.

To complete this course students must enrol in OPTOM 372 A and B

OPTOM 391A (7.5 Points)

OPTOM 391B (7.5 Points)

Topics in Optometry 3

A number of special topics in Clinical Skills. Further information may be obtained from the Department of Optometry and Vision Science.

Prerequisite: Permission of Head of Department

To complete this course students must enrol in OPTOM 391 A and B

Stage IV

OPTOM 410A (15 Points)

OPTOM 410B (15 Points)

Advanced Clinical Optometry 1

Clinical work with responsibility, under supervision, for patients.

To complete this course students must enrol in OPTOM 410 A and B

OPTOM 420A (15 Points)

OPTOM 420B (15 Points)

Advanced Clinical Optometry 2

Clinical work with greater emphasis on particular areas in optometry including: contact lenses, low vision, binocular vision, paediatric optometry and practice management.

To complete this course students must enrol in OPTOM 420 A and B

OPTOM 462A (15 Points)

OPTOM 462B (15 Points)

Optometry in Practice

Supervised clinical work in locations external to the Grafton Campus Optometry Clinic. These locations may include University satellite clinics, private optometry practice, hospital eye departments, overseas institutions, or experience in other approved locations. Lectures address; legislation relevant to health care including registration and competency, occupational safety and health, ethics, practice management, small business management.

To complete this course students must enrol in OPTOM 462 A and B

OPTOM 475A (15 Points)

OPTOM 475B (15 Points)

Research in Advanced Optometric Science

Study modules on a range of topics in optometry and vision science, with the focus being on developing an evidence-based approach on selected topics. Study will include supervised investigations into an approved

topic relating to optometry and vision science, including clinical and applied research.

Prerequisite: Enrolment in Part IV of the Optometry Programme

Restriction: OPTOM 470, 480

To complete this course students must enrol in OPTOM 475 A and B

OPTOM 491 (15 Points)

OPTOM 491A (7.5 Points)

OPTOM 491B (7.5 Points)

Topics in Optometry 4

A number of special topics in Clinical Skills. Further information may be obtained from the Department of Optometry and Vision Science.

Prerequisite: Permission of Head of Department

To complete this course students must enrol in OPTOM 491 A and B, or OPTOM 491

Diploma Courses

OPTOM 691A (15 Points)

OPTOM 691B (15 Points)

PG Diploma Dissertation (Optometry)

To complete this course students must enrol in OPTOM 691 A and B

Postgraduate Courses

OPTOM 756 (15 Points)

Special Topic in Vision Science

The study of selected fields in vision science at an advanced level with detailed study of one particular field. The topic will be prescribed by the Head of Department.

OPTOM 757A (15 Points)

OPTOM 757B (15 Points)

Special Topic in Optometry

The study of selected fields of clinical optometry at an advanced level with detailed study of the particular field. The topic will be prescribed by the Head of Department.

To complete this course students must enrol in OPTOM 757 A and B

OPTOM 781 (30 Points)

Principles of Ocular Disease

The basic anatomy, physiology, pharmacology, pathology, immunology and microbiology necessary for an understanding of ocular disease and its treatment. The course is presented as a number of lectures combined with a significant self-directed learning component. Assessment is by written examination and completion of written assignments based on specified ocular disease conditions with the overall theme being an evidence-based approach to learning.

OPTOM 784 (30 Points)

Ocular Disorders and their Management

The clinical presentation and differential diagnosis of eye diseases with emphasis on those likely to be diagnosed and managed by a therapeutically-qualified optometrist and the principles and actions of therapeutic agents as a basis for their safe use in the management of ocular disease. The overall theme of the course is an evidence-based approach to the use of therapeutic agents.

Prerequisite: Permission from the Head of Department

OPTOM 787A (15 Points)

OPTOM 787B (15 Points)

Clinical Ocular Therapeutics

The clinical application of the therapeutic and management practices covered in OPTOM781 and 784. Students attend a series of ophthalmological clinical rotations in which they examine patients under direct supervision and observe treatment of ocular conditions by an ophthalmologist. The emphasis is on developing practical therapeutic management plans for different disease conditions.

Prerequisite: OPTOM 781, 784 and registration to practice optometry in New Zealand or Australia

To complete this course students must enrol in OPTOM 787 A and B

OPTOM 796A (60 Points)

OPTOM 796B (60 Points)

MSc Thesis in Optometry

To complete this course students must enrol in OPTOM 796 A and B

Physics

PHYSICS 91F (15 Points)

Foundation Physics 1

An introductory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line, including the concepts of momentum and energy; an introduction to heat.

Restriction: PHYSICS 91W

PHYSICS 92F (15 Points)

Foundation Physics 2

A second foundation course for students who understand the basic mechanics of motion in a straight line. Further mechanics, including equilibrium, projectile motion, rotational motion and gravitation. Electromagnetism, including electrostatics, elementary circuits and the effects of magnetic fields.

Restriction: PHYSICS 92W

Stage I

PHYSICS 102 (15 Points)

Basic Concepts of Physics

A non-advancing course in physics for students interested in understanding the physics of everyday phenomena. The course requires a minimal background in mathematics and physics, and will stress the conceptual understanding of important physical ideas. Demonstration experiments are a major feature.

Restriction: Cannot be taken either with or after any of PHYSICS 120–160

PHYSICS 107 (15 Points)

PHYSICS 107G (15 Points)

Planets, Stars and Galaxies

A non-advancing course in physics for students interested in astronomy. Topics include a survey of astronomical objects in the universe, the tools of observational astronomy, stellar evolution, quasars and black holes, cosmology. This course does not require a formal background in mathematics or physics.

PHYSICS 108 (15 Points)

PHYSICS 108G (15 Points)

Science and Technology of Sustainable Energy

Leading-edge science behind the various technologies

which underpin new sustainable energy sources will be discussed in a way which will lead to understanding of the advantages, disadvantages, and compromises involved. Case-study examples include solar energy, wind energy, biofuels, geothermal energy, tidal energy, wave energy, and hydrogen energy.

PHYSICS 120 (15 Points)
Physics of Energy

A course designed for students either advancing in physical science or with a major interest in field studies offered at both campuses. It covers motion and its causes, as well as the production, transformation and propagation of energy in its thermal and mechanical forms. Physics and mathematics at NCEA level 3 or equivalent or a pass in PHYSICS 102 are recommended for students intending to enrol in this course.

Restriction: PHYSICS 160

PHYSICS 130 (15 Points)
Properties of Matter

Static equilibrium of solids and fluids with an introduction to fluid mechanics. The physical properties of condensed matter including strength, elasticity, and other mechanical characteristics. The electrical, optical and thermal characteristics of materials with technological applications including alloys, ceramics, polymers, glasses and plastics. Physics and mathematics at NCEA level 3 or equivalent, or a pass in PHYSICS 102 are recommended for students intending to enrol in this course.

Restriction: CHEMMAT 121

PHYSICS 140 (15 Points)
Digital Fundamentals

Logic components, Boolean algebra, combinational logic analysis and synthesis, synchronous and asynchronous sequential logic analysis and design, digital subsystems, computer organisation and design.

Restriction: PHYSICS 219, 243

PHYSICS 150 (15 Points)
Physics of Technology

Prescribed for students advancing either in the physical sciences or in the special science and technology programmes offered on both campuses. It covers basic aspects of circuits, fields, optical systems and quantum effects common to modern communication systems and devices. Physics and mathematics at NCEA level 3 or equivalent, or a pass in PHYSICS 102 are recommended for students intending to enrol in this course.

PHYSICS 160 (15 Points)
Physics for the Life Sciences

Designed for students intending to advance their studies in the life sciences. Topics covered will be especially relevant to biological systems: mechanics, thermal physics, wave motion, electricity and instrumentation. This course requires a knowledge of physics and mathematics to at least NCEA level 2.

Restriction: PHYSICS 120

Stage II

Note: For the purposes of recommended preparation for Stage II Physics courses: PHYSICS 120 and 160 are equivalent; PHYSICS 111, MATHS 107, 108, 130, 150 and 152 are equivalent; PHYSICS 210, MATHS 208 and 250 are equivalent; and COMPSCI 101 and INFOSYS 110 are equivalent.

PHYSICS 211 (15 Points)

Analytical Techniques in Physical Sciences 3

Covers analytical techniques associated with Stage II Physics courses, relating appropriate mathematical concepts to various physical systems and including laboratory work. Provides a minimal preparation in mathematical techniques for Stage III Physics courses. Topics include: oscillations and waves, numerical and analytical solution of differential equations describing physical systems, vector calculus, description of physical systems by sets of linear equations.

No formal prerequisite, but an understanding of the material in PHYSICS 210, MATHS 208 or 250 will be assumed

Restriction: MATHS 230, 253, 260

PHYSICS 213 (15 Points)

The Geophysical Environment

An understanding of the atmospheric, oceanic and solid earth environment in terms of physical principles. Topics include: the shape of the Earth, gravitational variations, seismic waves, global heat balance and atmospheric dynamics, ocean waves and tides, and general properties of fluids applied to the environment. A weekend fieldtrip is a component of the course.

No formal prerequisite, but an understanding of Stage I level Physics and Mathematics will be assumed.

PHYSICS 220 (15 Points)

Electromagnetism and Thermal Physics

Develops the principles of electric and magnetic field phenomena and magnetism and introduces the mathematical formalisms used. It covers the electrical and magnetic properties of materials. It also provides an introduction to the laws of thermodynamics and their application to the properties of materials and technology.

No formal prerequisite, but an understanding of the material in PHYSICS 111, 120 and 150 will be assumed.

PHYSICS 230 (15 Points)

Materials and Waves

Classical mechanics including combined rotational and translational motion and rotating reference frames. The properties of materials including fluid statics and dynamics, and elasticity. Travelling and standing waves on a string. Forced oscillations. Coupled oscillations.

No formal prerequisite, but an understanding of the material in PHYSICS 111 and 120 will be assumed.

PHYSICS 240 (15 Points)

Networks and Electronics

Covers AC circuit theory with phasors and complex operators, including network theorems, resonance, and operational amplifiers treated as linear components. Principles of semiconductor physics, diodes, transistors, and associated analogue and digital applications.

No formal prerequisite, but an understanding of the material in PHYSICS 111 and 150 will be assumed.

Restriction: PHYSICS 242

PHYSICS 250 (15 Points)

Quantum Physics

An introduction to quantum behaviour and microscopic physics. The Schrödinger equation is used to treat one-dimensional bound systems and quantum tunnelling and also the three-dimensional hydrogen atom, which is extended to include a first treatment of angular momentum and spin. Further topics include the periodic table, molecules, and solids.

No formal prerequisite, but an understanding of the material in PHYSICS 111, 120 and 150 will be assumed.

PHYSICS 260 (15 Points)
Optics

Develops the principles and applications of classical optics and the modern science of photonics, including geometrical optics, fibre optics, polarisation, interference and diffraction. The course also includes an introduction to optical radiators such as lasers, LEDs and thermal optical sources.

No formal prerequisite, but an understanding of the material in PHYSICS 111, 120 and 150 will be assumed.

PHYSICS 270 (15 Points)
Astrophysics

An introduction to topics selected from planetary science, stellar astrophysics, cosmology, gravitation, history of the early universe, high-energy astrophysics, and astrobiology. Observations are made with an optical telescope, and topics in current research are included.

No formal prerequisite, but an understanding of the material in MATHS 108 or 150, PHYSICS 120 or 160, and PHYSICS 150 will be assumed.

PHYSICS 280 (15 Points)
Medical Physics

An overview of the field of Medical Physics including the biophysical basis of biomedical measurement, radiation, physics, biology and dosimetry.

Recommended preparation: PHYSICS 160

Stage III

Note: For the purposes of recommended preparation for Stage III Physics courses: PHYSICS 211 is equivalent to the combination MATHS 253 and 260; MATHS 208 and 253 are equivalent; and MATHS 260 and 267 are equivalent.

PHYSICS 315 (15 Points)
Classical and Statistical Physics

Statistical physics topics emphasise the description of macroscopic properties using microscopic models and include: temperature, the partition function and connections with classical thermodynamics, paramagnetic solids, lattice vibrations, indistinguishable particles, classical and quantum gases. Classical mechanics topics include: vector mechanics, coordinate transformations, rotating frames, angular momentum, rigid body dynamics, variational formulation, constraints, Lagrange equations, Hamiltonian mechanics and relationships with quantum mechanics.

Prerequisite: B- average in PHYSICS 211 or MATHS 253, and PHYSICS 220 and 230

PHYSICS 325 (15 Points)
Electromagnetism

A systematic development of Maxwell's theory of electromagnetism and its applications to optics. Topics include: electrostatics, dielectrics, polarisation, charge conservation, magnetostatics, scalar and vector potentials, magnetic materials, Maxwell's equations, the wave equation. Propagation of electromagnetic waves in vacuum, dielectrics and conducting media. Energy and momentum in electromagnetic waves.

Prerequisite: B- average in PHYSICS 211 or MATHS 253, and PHYSICS 220

PHYSICS 326 (15 Points)
Optics and Laser Physics

Lasers: electron oscillator model, rate equation model, Einstein coefficients, Fabry Perot etalons and resonators, optimum output coupling, reflection at a dielectric surface, waveguide theory, thin films, matrix

techniques for optical elements, Gaussian beams and applications.

No formal prerequisite, but an understanding of the material in PHYSICS 211, 220 and 260 will be assumed. Concurrent enrolment in PHYSICS 390 or 391 is recommended.

PHYSICS 340 (15 Points)
Electronics and Signal Processing

An introduction to analogue and digital electronics. Topics will be selected from: linear circuit theory, analytical and numeric network analysis, steady state and transient response of networks, feedback and oscillation, transistor circuits, operational amplifier circuits, sampling theory, digital filter design, the fast Fourier transform and digital signal processing.

No formal prerequisite, but an understanding of the material in PHYSICS 211 and 240 will be assumed. Concurrent enrolment in PHYSICS 390 or 391 is recommended.

Restriction: PHYSICS 341

PHYSICS 350 (15 Points)
Quantum Mechanics and Atomic Physics

Non-relativistic quantum mechanics will be developed using the three-dimensional Schrödinger equation, and will be applied particularly to the physics of atoms and molecules. The interaction of like particles and the quantisation of angular momentum will be studied.

Prerequisite: B- average in PHYSICS 211 or MATHS 253, and PHYSICS 250

PHYSICS 355 (15 Points)
Condensed Matter and Sub-Atomic Physics

An introduction to the quantum and statistical foundations of modern studies in condensed matter and sub-atomic physics. Topics covered include quasiparticles, the band theory of electronic structure, semiconductors, magnetism, superconductivity, nuclear models, applications of nuclear processes in fields such as medicine and archaeology, the main properties of strong, weak and electromagnetic interactions, an introduction to Feynman diagrams and quark models.

No formal prerequisite but an understanding of the material in PHYSICS 211 and 250 will be assumed. Concurrent enrolment in one of PHYSICS 390–391 is recommended.

Restriction: PHYSICS 356

PHYSICS 390 (15 Points)
Experimental Physics 1

Students may select experiments from a wide spectrum of physics that are appropriate to the lecture courses being taken from PHYSICS 315–356.

No formal prerequisite, but concurrent enrolment in one or more of PHYSICS 315–356 is recommended.

PHYSICS 391 (15 Points)
Experimental Physics 2

Experimental work as for PHYSICS 390.

No formal prerequisite, but concurrent enrolment in one or more of PHYSICS 315–356 is recommended.

Diploma Courses**PHYSICS 625 (15 Points)**
Selected Topics 1

Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 626 (15 Points)
Selected Topics 2

Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 681 (15 Points)
Experimental Physics

A selection of experiments appropriate to the student's lecture courses for the Diploma. Requires the approval of the Head of Department.

PHYSICS 690A (15 Points)**PHYSICS 690B (15 Points)****Graduate Diploma Dissertation (Physics)**

To complete this course students must enrol in PHYSICS 690 A and B

PHYSICS 691A (15 Points)**PHYSICS 691B (15 Points)****PG Diploma Dissertation (Physics)**

To complete this course students must enrol in PHYSICS 691 A and B

Postgraduate Courses**PHYSICS 701 (15 Points)****Linear Systems**

Many physical situations are treated by making linear approximations to actual behaviour and analysing the resulting systems. Topics include: generalised functions, Green's function, convolution, sampling theory, Fourier, Laplace and Hilbert transforms, with applications to statistics, optics, solution of differential equations, filtering and digital signal processing.

Prerequisite: 30 points from PHYSICS 315–380, or MATHS 361

PHYSICS 703 (15 Points)**Advanced Quantum Mechanics**

Includes a review of the general formalism of quantum theory, making use of: Dirac notation, scattering theory, time-dependent perturbation theory, relativistic quantum mechanics and spin, many-body quantum mechanics, rotations and other symmetry operations, quantum theory of radiation and introductory quantum field theory. Applications are taken from atomic, nuclear and particle physics.

PHYSICS 705 (15 Points)**Advanced Electromagnetism and Special Relativity**

An introduction to tensors, development of the Special Theory of Relativity including kinematics, dynamics, properties of waves and a covariant formulation of electrodynamics. Charges, currents and fields in different inertial frames, electromagnetic wave propagation in media and radiation from moving charges.

PHYSICS 706 (15 Points)**Quantum Field Theory**

Follows on from PHYSICS 703 Advanced Quantum Mechanics. The first part treats relativistic generalisations of the Schrödinger equation and many-particle quantum mechanics. The second part is an introduction to quantum electrodynamics, using Feynman diagram techniques. Applications are made to atomic, condensed matter and particle physics.

PHYSICS 707 (15 Points)**Inverse Problems**

Inverse problems involve making inferences about physical systems from experimental measurements. Topics include: the linear inverse problem, regularisation, and introduction to multi-dimensional optimisation, Bayes theorem, prior and posterior probabilities, physically-based likelihoods, inference and parameter estimation, sample based inference,

computational Markov chain, Monte Carlo, and output analysis.

Prerequisite: PHYSICS 701, or MATHS 340 and 361

PHYSICS 708 (15 Points)**Statistical Mechanics and Stochastic Processes**

Phase transitions and critical phenomena, stochastic methods, master equations, Fokker-Planck equations and stochastic differential equations.

PHYSICS 715 (15 Points)**Selected Topics 1**

Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 726 (15 Points)**Optoelectronics**

Laser physics including a discussion of resonator theory and laser beam diagnostics, together with mode-locked lasers, frequency stabilised lasers, non-linear optics and interferometry.

PHYSICS 727 (15 Points)**Optoelectronics and Communications**

Optical data storage systems, scanners and printers, propagation in optical waveguides, non-linear effects in optical fibres, amplifiers, semiconductor laser sources, LEDs and the detection of optical radiation, optical communication systems architecture and an introduction to network topology.

PHYSICS 731 (15 Points)**Wave Propagation**

A general treatment of wave propagation including rays, normal modes and reflection coefficients, with applications principally to underwater acoustics, seismology and electromagnetic waves.

PHYSICS 732 (15 Points)**Fluid Mechanics and Applications**

Principles and phenomena of fluid dynamics, including the Navier-Stokes equations, viscous flow and non-viscous flow, with applications in areas including geophysics, medical physics and soft materials.

PHYSICS 751 (15 Points)**Selected Topics 2**

Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 754 (15 Points)**Condensed Matter Physics**

Modern aspects of condensed matter physics including liquids, glasses, amorphous solids, soft matter and low dimensional systems.

PHYSICS 755 (15 Points)**Particle Physics**

An introduction to particle physics: the particles and their interactions, QED and field theory, gauge invariance (consequences, its role in particle physics), electroweak interaction (left-handed neutrinos, W and Z, bosons, neutrino mass) and strong interaction (quark model, problems, colour, confinement and QCD compared with QED).

PHYSICS 756 (15 Points)**Nuclear Physics**

General properties of nuclei as described by the Liquid Drop and Fermi Gas and Shell models; properties of beta decay, and recent developments in neutrino mass theory and experiments; relativistic nuclear

collisions, and recent theory and experiments of highly compressed nuclear matter leading to the quark-gluon plasma.

PHYSICS 760 (15 Points)
Quantum Optics

Light, non-classical, squeezed and anti-bunched light, quantum theory of the interaction of light with atoms, manipulations of atoms by light.

PHYSICS 780 (15 Points)
Advanced Imaging Technologies

The physical basis and use of new imaging technologies in medicine, biomedicine and biotechnology, including electron microscopy, ultrasonic imaging, magnetic resonance imaging, CAT scanning and PET imaging. Biological applications of fluorescence and other areas of biophotonics, microarray analysis.

Recommended preparation: No formal prerequisite, but an understanding of material to at least a C+ standard in PHYSICS 340 and 211 or ENGSCI 211 will be assumed.

PHYSICS 788 (15 Points)
Project in Physics

PHYSICS 789 (30 Points)
BSc(Hons) Dissertation in Physics

PHYSICS 791 (15 Points)

Polymers and Coatings Science

Diploma Courses

POLYMER 692A (15 Points)

POLYMER 692B (15 Points)

PG Diploma Dissertation (Polymers and Coatings Science)

To complete this course students must enrol in POLYMER 692 A and B

Postgraduate Courses

POLYMER 701 (15 Points)
Polymer Science

Polymer structures, polymerisation processes, polymer solutions and polymer characterisation. Properties of thermoplastic polymers, network polymers and elastomers.

Prerequisite: Permission of Programme Director

POLYMER 702 (15 Points)
Synthetic Resin Technology

The chemistry of synthetic resins used in adhesive, ink and coatings applications. The aim is to provide the student with the knowledge to formulate resins for specific applications.

Prerequisite: Permission of Programme Director

POLYMER 711 (15 Points)

Interfacial Science and Coatings Technology

Principles of surface and interfacial science and modification of surfaces by coatings. Coatings manufacture and related topics.

Prerequisite: Permission of Programme Director

POLYMER 796A (60 Points)

POLYMER 796B (60 Points)

MSc Thesis in Polymers and Coatings Science

Prerequisite: Permission of Programme Director

Psychology

Stage I

PSYCH 108 (15 Points)

Individual, Social and Applied Psychology

Topics covered may include: developmental and social psychology including group behaviour, the measurement of mental abilities, intelligence, models of personality, clinical and health psychology, methods of therapeutic intervention, and the psychological similarities and differences between cultures. A laboratory component, in which students are required to participate as subjects, forms part of the course.

Restriction: PSYCH 128, 461.118

PSYCH 109 (15 Points)

PSYCH 109G (15 Points)

Mind, Brain and Behaviour

Topics covered may include: the nature of sensory and perceptual processes, the cause of perceptual illusions, the structure and function of the human brain, approaches to animal and human learning, models of human language and memory, and the design of psychological experiments. A laboratory component, in which students are required to participate as subjects, forms part of the course.

Restriction: PSYCH 129

Stage II

PSYCH 201 (15 Points)

Perception and Cognition

An introduction to a variety of topics in human experimental psychology. Topics covered may include: perceptual processes, attention, memory, mental imagery, language development, theory of mind, problem solving and decision making. Participation in the laboratory component of this course is compulsory.

Prerequisite: 30 points in Stage I Psychology

Restriction: PSYCH 261, 461.220

PSYCH 202 (15 Points)

Biopsychology

Provides a basic introduction to the structure and function of the brain, neuropsychology, and genetic and hormonal influences on behaviour. This course includes a compulsory laboratory component.

Prerequisite: 30 points in Stage I Psychology or 15 points from BIOSCI 101, 103

Restriction: 461.230

PSYCH 203 (15 Points)

Learning and Behaviour

A consideration of the environmental factors that control and modify animal (including human) behaviour. Generally, an experimental laboratory approach is

taken, and quantitative theories are stressed. Topics include: classical and operant conditioning, theories of reinforcement, the stimulus control of operant behaviour, behavioural analyses of problem solving, concept learning and language, choice, self control, remembering and experimental design. This course includes a compulsory laboratory component.

Prerequisite: 30 points in Stage I Psychology or 15 points from BIOSCI 101, 103

Restriction: 461.250

PSYCH 204 (15 Points) **Social Psychology**

Focuses on humans as social beings. Covers topics such as social cognition, attitudes, group processes, interpersonal relationships, and language communication. The course may include participation in and completion of a research project.

Prerequisite: 30 points in Stage I Psychology

Restriction: PSYCH 263, 461.240

PSYCH 207 (15 Points) **Theories of Personality and Development**

The major personality theories are presented including: Behavioural, Cognitive, Social-Cognitive, Psychodynamic, Humanistic/Phenomenological, Trait/Dispositional and Biological/Evolutionary. The hypotheses generated by these theories, about development from early childhood onwards and about 'normal' and 'abnormal' behaviour, will be discussed and evaluated in terms of empirical evidence and utility. Attention will be paid to cultural issues of relevance in a New Zealand context.

Prerequisite: 30 points at Stage I in Psychology

Restriction: PSYCH 206, 461.205

PSYCH 208 (15 Points) **Producing Psychological Knowledge**

How do you go about answering a research question? What is a research question anyway? Which research methodology and method will best provide the types of answers you are looking for? Examines what we do and can know in psychology, and why and how we know it, including philosophy of science, methodology, ethics, research outcomes, and particular methods.

Prerequisite: 30 points at Stage I in Psychology

Restriction: PSYCH 262

Stage III

PSYCH 303 (15 Points) **Cognitive Science**

Provides an introduction to cognitive science and cognitive neuroscience. Topics covered include: visual and auditory perception, attention, memory, thinking and problem-solving. Participation in the laboratory component of this course is compulsory.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

PSYCH 305 (15 Points) **Human Neuroscience**

Covers material relating to the neural basis of cognitive processes, including perception, attention, memory and language. Students will be introduced to different methods of inferring mind-brain relations in normal and neurologically-impaired individuals, and different ways of conceptualising mind-brain relations, such as connectionism and modularism.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191, or 15 points from either PHYSIO 220 or MEDSCI 206

PSYCH 306 (15 Points)

Research Methods in Psychology

This course deals with principles and practices relevant to psychological research, including philosophy of science, research ethics, research design, measurement of dependent variables, describing and analysing data, and interpreting results. Participation in the laboratory component of this course is compulsory.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

PSYCH 308A (7.5 Points)

PSYCH 308B (7.5 Points)

Research Topic

A course of research supervised by a staff member and written up as a course for publication instead of a final examination. A list of available supervisors and topics is published each year in the Psychology Department Undergraduate Handbook.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

Corequisite: Student must be enrolled in (or have completed) an additional 45 points of Stage III in Psychology courses plus Head of Department approval

To complete this course students must enrol in PSYCH 308 A and B

PSYCH 309 (15 Points) **Learning**

A discussion of how behaviour is controlled and modified by discriminative stimuli and by consequential reinforcers and punishers. The emphasis is on laboratory research with animals, but with some human data also considered. Topics include: choice behaviour, punishment, avoidance, psychophysics, memory, and cognition. This course includes a compulsory laboratory component.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191 or 45 points at Stage II in Biological Sciences

Restriction: PSYCH 362

PSYCH 310 (15 Points) **Introduction to Clinical Psychology**

Describes and evaluates psychological approaches to the assessment and treatment of those mental health problems, in adults and children, most commonly encountered by clinical psychologists. Consideration is given to work in mental health, corrections, child protection and neuropsychology rehabilitation. Issues relevant to Maori mental health, gender, cross-cultural work and prevention are included.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

Restriction: 461.315

PSYCH 311 (15 Points) **Advanced Topics in Social Psychology**

This paper focuses on a number of key topics in social and community psychology. One module examines issues in identity and well-being, a second module looks at interpersonal influence and intimate relationships, and a third module addresses collective behaviour and social issues.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

PSYCH 313 (15 Points) **Psychology of Communication Disorders**

This course studies the links between psychological processes and communication disorders. Hearing and speech and language development will be covered. A range of communication disorders will be introduced. Psychosocial aspects of communication disorders

including impact on self-esteem, health-related quality of life, peer/interpersonal relationships and educational and behavioural consequences of communication disorders in children will also be discussed.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

PSYCH 317 (15 Points)

Evolution, Behaviour and Cognition

How does behaviour in non-human animals evolve? Do other animals have language? Do they have culture? Can human behaviour be explained in evolutionary terms? This course addresses these questions and the methods that can be used to answer them.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191, or 45 points at Stage II in Biological Sciences

PSYCH 319 (15 Points)

Psychology and Gender

The study of gender is crucial to understanding many everyday aspects of our lives, as well as many contemporary social issues. This course provides an introduction to selected key issues in the critical psychology of gender, from a social constructionist perspective. Topics that will be covered include gendered bodies, masculinity and femininity, sexuality, rape, and mental health.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191, or 30 points at Stage II in Women's Studies

PSYCH 320 (15 Points)

Special Topic

PSYCH 322 (15 Points)

Industrial, Work and Organisational Psychology

An introduction to core areas of industrial, work and organisational Psychology. This field of Psychology is concerned with improving the performance and well-being of people at work at individual, group and organisational levels, recognising the interdependencies among these levels, and between people and their environments. Emphasis is given to the interplay between science and practice.

Prerequisite: 45 points in Stage II Psychology, or MGMT 211 and 15 points from STATS 101–125, 191

Restriction: PSYCH 312, 314

PSYCH 326 (15 Points)

Life Span Development

The development of people across the life span is studied. Describes key milestones in development and examines the causes and processes that produce stability and change in people's development over time. Topics discussed will include aspects of cognitive, social and physical development with consideration given to biological, societal and family influences. Attention will also be given to development within the New Zealand context.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 101–125, 191

Restriction: PSYCH 316

PSYCH 364 (15 Points)

Health Psychology

An introduction to the study of links between psychological processes and health/illness. The course discusses a number of psychological issues relating to serious illnesses (cancers, coronary heart disease etc.) and links to other aspects of physical well-being (eg, exercise, diet). Consideration will be given both to the theoretical models which have been developed within

health psychology and to the types of methodology used in their investigation.

Prerequisite: 45 points in Stage II Psychology and 15 points from STATS 101–125, 191

Diploma Courses

PSYCH 651A (30 Points)

PSYCH 651B (30 Points)

Practicum

This includes a practical component of up to 1,500 hours of supervised work in an approved applied psychology setting, with an emphasis on the application of research principles and designs. Evaluation is by internal assessment and assessment by field supervisors.

Restriction: PSYCH 650

To complete this course students must enrol in PSYCH 651 A and B

PSYCH 690A (15 Points)

PSYCH 690B (15 Points)

Graduate Diploma Dissertation in Psychology

To complete this course students must enrol in PSYCH 690 A and B

PSYCH 691A (15 Points)

PSYCH 691B (15 Points)

PG Diploma Dissertation in Psychology

To complete this course students must enrol in PSYCH 691 A and B

Postgraduate Courses

PSYCH 707 (15 Points)

Forensic Psychology

Covers psychological theories of crime and violence, empirical research relevant to the assessment and treatment of youth and adult offenders, with particular emphasis on violent and sexual offenders, and the range of roles for clinical psychologists in forensic and correctional settings such as prisons, community and forensic psychiatric hospitals.

PSYCH 708A (15 Points)

PSYCH 708B (15 Points)

Clinical Neuropsychology

Consists of: an introduction to neuroanatomy and neuropathology, seminars on the major areas of neuropsychological dysfunction, introduction to community-used test materials and theoretical issues of neuropsychological assessment, neuropsychological dysfunction, individual assessment and individual case studies.

To complete this course students must enrol in PSYCH 708 A and B

PSYCH 711A (15 Points)

PSYCH 711B (15 Points)

Advanced Operant Behaviour

A seminar course on advanced treatments of learning and behaviour including both reinforcement and stimulus control. A research-oriented approach is stressed in both pure and applied areas and in the technological application of basic principles in educational and clinical procedures.

To complete this course students must enrol in PSYCH 711 A and B

PSYCH 712 (15 Points)

The Psychology of Psychosis

A summary and critique of recent research concerning the psycho-social causes of psychotic symptoms such

as hallucinations and delusions, the psychological mechanisms by which adverse life events increase the risk of psychosis, and the effectiveness of psychological treatments for psychosis. Includes discussion of reductionist, biological approaches to psychosis from historical, economic and sociological perspectives.

PSYCH 713A (15 Points)

PSYCH 713B (15 Points)

Advanced Child Psychology

This course is seminar-based involving critical evaluation of research and theory in child psychology. Set readings will be discussed on topics in areas such as: early cognitive development, language and reading development, attachment and temperament, self-regulation, social competence, behavioural problems and parenting.

To complete this course students must enrol in PSYCH 713 A and B

PSYCH 714 (15 Points)

Cognitive Neuroscience

An advanced seminar on cognitive neuroscience. Topics may include: neuroanatomy, neuroimaging methodologies, neurological and developmental disorders, and the organisation of higher cognitive functions such as attention, language, memory and executive functions. Emphasis will be placed on current developments relevant to the understanding of human psychological processes.

Restriction: 461.724

PSYCH 716 (15 Points)

Social Psychology

Key empirical and theoretical areas in modern social psychology form the basis of this seminar-based course. Topics will include social cognition, interpersonal influence, communication, and close personal relationships. Students will also conduct small research projects investigating central topics covered in the course.

Restriction: 461.712

PSYCH 717 (15 Points)

Community Psychology

This course is about the application of psychological knowledge and research skills to issues faced by communities. Students will design an intervention relevant to a social issue. Theoretical approaches to working in community settings and the practical challenges involved will be discussed.

Restriction: 461.728

PSYCH 718 (15 Points)

Psychotherapeutic Assessment and Formulation

Major theories used in clinical practice to understand psychological problems will be discussed, including behavioural, cognitive-behavioural, systems and psychodynamic models. Emphasis is on assessment and formulation of clients' problems rather than therapeutic intervention. Approaches covered are those that are most commonly employed by psychologists practicing in New Zealand.

Prerequisite: PSYCH 747

Restriction: PSYCH 709

PSYCH 720A (15 Points)

PSYCH 720B (15 Points)

Research Topic in Psychology

A research topic undertaken under the direct supervision of a staff member and written up for presentation, instead of a final examination paper. A list of staff available for supervision, and their areas

of interest and expertise, is published each year in the Psychology Department Handbook.

To complete this course students must enrol in PSYCH 720 A and B

PSYCH 721 (15 Points)

Consciousness and Cognition

This course will discuss recent research on consciousness from the perspective of cognitive neuroscience. Topics covered may include: implicit learning, implicit memory, blindsight, the split-brain syndrome, amnesia and hemineglect.

Restriction: 461.724

PSYCH 725 (15 Points)

Evolutionary Psychology

This course will cover evolutionary concepts as they apply to psychological issues. Specific topics may include: the evolution of tool use, language, cerebral asymmetry, theory of mind, culture and the sociobiology/evolutionary psychology debates.

PSYCH 730 (15 Points)

Professional Psychology Practice In New Zealand

Aims to equip students with knowledge and skills required for registration as a psychologist with the New Zealand Psychologists Board. Topics include the structure and functions of the Psychologists Board/Health and Disability Commissioner, cultural competency (obligations under the Treaty of Waitangi and cultural safe practice), professional ethics (Code of Ethics for Psychologists Working in Aotearoa/New Zealand) and related legislation. For students enrolled in the PGDipAppPsych.

PSYCH 731 (15 Points)

Group Processes and Social Behaviour

Focuses on the application of social psychological knowledge and theory to the understanding of broad social and cultural processes and phenomena, such as violence, prejudice, group behaviour and conflict, intergroup dynamics, collective behaviour, social beliefs, cultural differentiation and contact.

Restriction: 461.728

PSYCH 737 (15 Points)

Work Analysis and Design

Reviews basic concepts and methods of the multidisciplinary field of work psychology (human factors/ergonomics/engineering psychology) and examines current research in selected topics in this field.

Restriction: 461.726

PSYCH 739 (15 Points)

Reading Acquisition

Reading is a developmental milestone. How children learn to read, why they fail, and the cognitive processes underlying reading are the main issues addressed in this course. Adult models of reading and acquired dyslexia will also be considered, as they relate to developmental models.

PSYCH 740 (15 Points)

Sensory Science

A range of methods commonly used to measure sensory capacity will be explored, with an emphasis on the difference between methods commonly used by technicians and scientists and how these methods can be improved. Appropriate methods for use in psychological science as well as in industry will be explored.

PSYCH 741 (15 Points)
Special Topic

PSYCH 742 (15 Points)
Special Topic

PSYCH 743 (15 Points)
Critical Qualitative Research

An in-depth focus on critical and discursive approaches to psychological research will be provided in this seminar-based course. Content will include examination of key theoretical underpinnings of critical qualitative research, as well as the practical application of such approaches.

PSYCH 744 (15 Points)
Experimental Design and Quantitative Methods for Psychology

Covers applications of the general linear model to research design and analysis. Topics include: univariate techniques (analysis of variance, analysis of covariance, regression) and multivariate techniques (multivariate analysis of variance, discriminant analysis, multivariate regression, and factor analysis).

Prerequisite: PSYCH 306 or consent of Department

PSYCH 745 (15 Points)
The Psychology of Death and Dying

Introduction to psychological aspects of death and dying. There will be a brief introduction to psychological models and demography. Death rituals and culture, communication, timeliness of death, palliative care and end of life decision making will also be discussed.

Restriction: PSYCH 734

PSYCH 746 (15 Points)
Perception, Cognition, Action

Seminar-based introduction to theories and models linking (human, animal and machine) perception, cognition and action, with emphasis on competing approaches to perceptual-motor control and learning, using evidence from classic and contemporary research in experimental psychology and cognitive neuroscience.

Restriction: PSYCH 735

PSYCH 747 (15 Points)
Psychological Assessment

This course focuses on developing skills in the assessment and evaluation of constructs commonly used in psychology research and practice. We will cover the critical aspects of psychometric theory and test construction including assessments of reliability and validity, item analysis, cultural sensitivity and potential biases in measurement, and assessments involving diagnostic practices, interviewing, and behavioural observations.

Restriction: PSYCH 701

PSYCH 748 (15 Points)
Health Psychology Interventions

This course focuses on theoretical, practical and ethical issues concerning the design and evaluation of health-related interventions. Covers research on a variety of clinic-based and community interventions including programmes for promoting healthy diet and exercise habits, psychosocial interventions for individuals with chronic illnesses and pain management interventions.

Restriction: PSYCH 701

PSYCH 750A (15 Points)
PSYCH 750B (15 Points)

Applied Behaviour Analysis: Methods

A study of the principles and issues involved with the observation, measurement, and functional analysis of an individual human or animal's behaviour in some applied setting. Particular emphasis will be placed on the rationale behind single-subject research designs, and their application to the validation of interventions aimed at modifying behaviour.

To complete this course students must enrol in PSYCH 750 A and B

PSYCH 751A (15 Points)
PSYCH 751B (15 Points)

Applied Behaviour Analysis: Behaviour Modification

A study of the techniques and issues involved with modifying an individual human or animal's behaviour in some applied setting. Appropriate and effective applications of scientific principles of learning will be taught, as will pertinent topics researched in the Experimental Analysis of Behaviour. Topics will include the application of research into associative learning, reinforcement, punishment, extinction, avoidance, stimulus control and choice.

To complete this course students must enrol in PSYCH 751 A and B

PSYCH 754 (15 Points)
Developmental and Intellectual Disabilities

Study of the behavioural aspects, aetiologies and therapeutic interventions for disorders usually diagnosed during childhood that are associated with reduced abilities to learn. Examples include intellectual disabilities (mental retardation) and pervasive developmental disorders (eg, autism).

Restriction: PSYCH 722, 752

PSYCH 755 (15 Points)
Gender, Power, and Sexuality

This seminar-based course will allow students to explore a broad range of topics such as: sexual coercion, prostitution, rape, pornography, safer sex, lesbian and gay sexuality, heterosexuality, bisexuality, sexology, sex therapy, intersex, transgender, sexuality and culture. The emphasis will be on looking at questions from the perspective of theoretical approaches such as Foucault's work on sexuality and feminist theories.

PSYCH 757 (15 Points)
Advanced Applied Behaviour Analysis

Advanced education and training in applied behaviour analysis (ABA) in preparation for a professional career. Topics include ethical, professional, and practical issues confronting behaviour analysts in employment; recent research in ABA and other sciences with respect to clinical, educational, and other populations with whom behaviour analysts typically work.

Prerequisite: PSYCH 750, 751

Corequisite: PSYCH 651

Restriction: PSYCH 753

PSYCH 760 (15 Points)
Workplace Assessment and Development

Focuses on assessing and developing employees at work. Both organisation and employee/candidate perspectives are considered through the process of recruitment, assessment, selection, socialisation, performance, and training and development. Students will be encouraged to adopt a scientist-practitioner perspective, through class discussions and assignments.

PSYCH 761 (15 Points)**Organisational Psychology**

Focuses on attitudes and behaviours at work that reflect or impact on the relationship between employee and employer, with a particular emphasis on topics that are proposed to impact on employee well-being and productivity (eg, job satisfaction, motivation, leadership). Students will be encouraged to adopt a scientist-practitioner perspective, through class discussions and assignments.

PSYCH 762 (15 Points)**Advanced Industrial, Work and Organisational Psychology**

Investigates current research in selected topics in industrial, work and organisational psychology, such as occupational stress, work-related fatigue, human-machine-environment interactions, decision making, automation, technology at work and safety management.

Prerequisite: PSYCH 737

Restriction: 461.726

PSYCH 763A (22.5 Points)**PSYCH 763B (22.5 Points)****Portfolio of Professional Practice Reports**

A portfolio of original reports associated with the student's practicum experience and demonstrating the ability to make appropriate use of the scientific literature in solving problems in professional practice, as required by the New Zealand Psychologists Board for the practice of psychology. For students enrolled in the PGDipAppPsych specialising in IWO.

Corequisite: PSYCH 651

To complete this course students must enrol in PSYCH 763 A and B

PSYCH 771A (30 Points)**PSYCH 771B (30 Points)****Clinical Practice 1 and Professional Issues**

Consists of two parts: First, psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy and family therapy are central, but other models are included. Consideration of psychotherapy research and practical exercises are incorporated. Secondly, ethics, bicultural and cross-cultural practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment.

To complete this course students must enrol in PSYCH 771 A and B

PSYCH 772A (30 Points)**PSYCH 772B (30 Points)****Clinical Practice 2**

Advanced psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy, narrative therapy, psychodynamic therapy, and the trauma model are emphasised. Includes two, 200 hour placements, in either an adult setting or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

To complete this course students must enrol in PSYCH 772 A and B

PSYCH 773A (60 Points)**PSYCH 773B (60 Points)****Clinical Internship**

Includes a practical component of supervised clinical work of not less than 1500 hours in an approved health setting. Emphasis is placed on the application

of research principles and designs in routing clinical practice. A university-based seminar series that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors.

To complete this course students must enrol in PSYCH 773 A and B

PSYCH 788A (22.5 Points)**PSYCH 788B (22.5 Points)****Honours Dissertation in Psychology**

Restriction: PSYCH 789

To complete this course students must enrol in PSYCH 788 A and B

PSYCH 796A (60 Points)**PSYCH 796B (60 Points)****Masters Thesis in Psychology**

To complete this course students must enrol in PSYCH 796 A and B

Special Topics**PSYCH 801 (30 Points)****Scientist-practitioner Model 1**

Research based psychological assessment and therapy skills for diverse clinical populations, including adult, child and family. Cognitive-behaviour therapy and family therapy are central, but other models are included. Advanced clinical research design, ethics, bicultural and cross-cultural practice, supervision practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment. Includes one 200-hour placement in either an adult or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

PSYCH 802 (30 Points)**Scientist-practitioner Model 2**

Advanced psychological assessment and therapy skills for diverse clinical populations, including adult, and child and family. Cognitive-behaviour therapy, family therapy, narrative therapy, psychodynamic therapy, and the trauma model are emphasised. Includes two 200-hour placements, in either an adult setting or child and family setting. One of these may, depending on staff availability, be in a specialist setting. Options may include: clinical neuropsychology, forensic psychology, assessment and psychological treatment of psychoses, child and adolescent clinical psychology, drug and alcohol addiction, and others. Evaluation is by internal assessment, including assessment by field supervisors.

Prerequisite: PSYCH 801

Restriction: PSYCH 813, 814

PSYCH 803 (60 Points)**Internship**

This includes a practical component of supervised clinical work of not less than 1,500 hours in an approved setting. Emphasis is placed on the application of research principles and designs in routine psychological clinical practice. A university based seminar course that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors.

Prerequisite: PSYCH 801, 802

Restriction: PSYCH 821

PSYCH 897 (90 Points)**Portfolio of Clinical Research**

Five original research projects demonstrating appropriate use of the scientist-practitioner model (single case design, programme evaluation or group research may be included). One project will be conducted within each of the three placements associated with the courses PSYCH 801 and 802, and two within the Internship, PSYCH 803. At least one project should be related to research with an adult population, and at least one with a child and family population. The Portfolio will be examined by two internal academic psychologists and assessed by the two external Thesis examiners.

Restriction: PSYCH 894, 895

PSYCH 899 (150 Points)
Thesis

An original research dissertation completed over the three years of the degree (75 points in year 1, 60 points in year 2, and 15 points in year 3). The research may be basic or applied, but must be relevant to some area of clinical psychology and represent a significant contribution to knowledge in the field.

Restriction: PSYCH 896

Science Enterprise

Postgraduate Courses**SCIENT 701 (15 Points)****Accounting and Finance for Scientists**

Builds upon scientific numeracy in exploring the sources, uses and reporting of accounting and financial information in science-based enterprises; application of capital budgeting and valuation theory to science-relevant situations; and key bases for financially-informed project and enterprise decision-making and the management of economic resources.

SCIENT 702 (15 Points)**Marketing for Scientific and Technical Personnel**

Examines the intermediaries and end-users of technical and research-related applications, products and services; their 'customers', 'value chain', 'marketing', and related concepts in both highly-regulated and open markets; and how effective science-related marketing strategies and promotional efforts are developed and communicated.

SCIENT 703 (15 Points)**Frontiers in Biotechnology**

An examination of how breakthrough discoveries in contemporary life sciences flow through to commercialisation. Current and emerging applications of biotechnology; includes guest lectures from New Zealand's leading biotechnologists and case studies focused particularly on medical applications.

SCIENT 704 (15 Points)**Law and Intellectual Property**

An explanation of the legal system including basic concepts of contract and corporate law in a biotechnology context. Emphasis will be upon intellectual property laws in particular patent law and practice and other means of protecting new ideas, discoveries and inventions. Also covered will be technology licensing and basic competition and marketing law.

SCIENT 705 (15 Points)**Research Commercialisation**

Integrative exploration of common theories, processes and models involved in commercialising scientific research. Topics include technology transfer, technological entrepreneurship, commercial potential, risk, and valuation assessment and related tools. Utilises multiple learning approaches including case studies and a "hands-on" term project.

Prerequisite: SCIENT 701, 702

SCIENT 706 (15 Points)**Commercialisation Project**

A supervised practical application of the theories, concepts and techniques of commercialisation, covered in courses SCIENT 701–705, to a research-based opportunity and its related intellectual property estate.

Prerequisite: SCIENT 701, 702, 704

Corequisite: SCIENT 703, 705

SCIENT 707 (15 Points)**Special Topic****SCIENT 720 (15 Points)****Science Enterprise Research Methods**

Students will become familiar with underlying theory and best practices in the principal qualitative and quantitative methods applicable to, and useful in, thesis research on commercialisation and science-based enterprise.

SCIENT 721 (15 Points)**Product Development and Regulatory Environments**

Aims to give students an understanding of the stages of product development for therapeutics, diagnostics and medical devices, as well as the regulatory requirements affecting product development in the Life Sciences. Project management tools and processes will also be covered in the context of product development.

SCIENT 722 (15 Points)**Current Issues in Bioscience Enterprise**

An exploration of trends and developments of importance to Life Sciences-related enterprises and industries. Utilises multiple learning approaches – eg, independent reading, case studies, projects, guest speakers, presentations and related discussions.

SCIENT 794A (45 Points)**SCIENT 794B (45 Points)****Thesis**

Research project addressing a topic relevant to the commercialisation of research. Overseen jointly by both academic and industry supervisors.

To complete this course students must enrol in SCIENT 794 A and B

Science – General

Stage I**SCIGEN 101 (15 Points)****SCIGEN 101G (15 Points)****Communicating for a Knowledge Society**

Effective communication is required for specialists in all fields to engage meaningfully with society. In this course students gain an understanding of the important role communication plays in a knowledge society. Through case studies and practical experience students learn about the responsibilities and skills required to communicate with a variety of audiences.

They learn how to effectively manage and present data and practice oral, written, visual and electronic communication.

SCIGEN 189 (10 Points)
Special Topic

Selected topics in Science designed as a short credit course for exchange students coming to New Zealand. This course is only available to inbound exchange students.

Prerequisite: Permission of Head of Department

Stage II

SCIGEN 201 (15 Points)
Managing Science and Technology

An interdisciplinary examination of issues relating to the management of science and technology. At a policy level, topics include the international context for science and technology, the role of business and research organisations, and policies for emerging technologies. At an organisational level, issues range from strategic analysis of the business environment to planning a corporate response. At project level, topics include the management of specialist staff and resources, and implementation of research strategies.

Stage III

SCIGEN 301 (15 Points)
Special Topic in General Science

Prerequisite: Any 180 points

Speech Science

Postgraduate Courses

SPCHSCI 711 (15 Points)
Introduction to Communication in Children and Adults

Communication development and disorders. Normal communication development across the lifespan, in the context of total child development, of major changes in expectations such as school and literacy, and of variations such as cultural differences and multilingualism. Applications of these concepts in an introduction to the assessment and management of communication disorders in children and of acquired disorders in adults.

SPCHSCI 712 (15 Points)
Linguistics for Speech Language Therapy

The study of articulatory phonetics, phonemic transcription using the International Phonetic Alphabet, and the relationship between phonetics and phonology. Additional language analysis covering morphology, syntax, semantics and pragmatics.

SPCHSCI 713 (15 Points)
Anatomy and Physiology for Speech Language Therapy

Anatomy and physiology of speech, language and hearing, including the respiratory, phonatory, articulatory, auditory and peripheral and central nervous systems underlying spoken communication. Application of this knowledge is through manipulation of human models and supported computer laboratories.

SPCHSCI 714 (15 Points)
Speech Language Therapy Clinical Practicum 1

Clinical observation under supervisor guidance in a variety of settings, establishing links between theory and practice. This course is supported by weekly tutorial sessions.

SPCHSCI 721 (15 Points)
Dysphagia

Assessment and management of adult and paediatric clients with dysphagia.

SPCHSCI 722 (15 Points)
Communication Disorders in Children

The nature of speech and language delay and disorder in children. Introduces a range of disorders focussing on: general language impairment, specific language impairment (SLI) and phonological disorders in children through pre-school and primary school ages, and language disorders in adolescence. Assessment and intervention in phonology, articulation, and all aspects of language, incorporating principles of inclusion and diversity and evidence-based practices.

SPCHSCI 723 (15 Points)
Acquired Neurogenic Communication Disorders

Assessment and management of adult and paediatric clients with acquired communication disorders.

SPCHSCI 724 (15 Points)
Speech Language Therapy Clinical Practicum 2

Clinical observation and practice in a variety of settings, enabling students to work with clients under supervision. This course is supported by weekly tutorials.

Prerequisite: SPCHSCI 714

SPCHSCI 731 (15 Points)
Voice and Fluency

Voice science and disorders – study of the voice, and the assessment and management of voice disorders. Fluency – assessment and management of clients with dysfluency disorders (adult and paediatric). Study of causative factors and differing approaches in dysfluency treatment.

SPCHSCI 733 (15 Points)
Audiology for Speech Language Therapy

Study of types of hearing impairment, pathologies of the hearing mechanism, tests and clinical procedures used in audiological evaluations and hearing instrumentation.

Restriction: SPCHSCI 732

SPCHSCI 734 (15 Points)
Speech Language Therapy Clinical Practicum 3

Clinical practice in a variety of settings with students taking responsibility for the assessment and management of cases with supervisor guidance. Weekly tutorials support the course.

Prerequisite: SPCHSCI 724

SPCHSCI 735 (15 Points)
Research Methods and Ethics for Speech Language Therapy

Research design, methods and data analysis. Critical evaluation of research literature. Ethical issues in research and clinical practice.

SPCHSCI 741 (15 Points)
Speech Language Therapy Professional Practice

Professional and organisational skills relevant to current speech language therapy practice. Legal and ethical issues, best practice, professional development and multi-disciplinary team work, evidence-based practice, and implications for SLT practice in a bi-cultural and multi-cultural environment.

SPCHSCI 743 (15 Points)
Advanced Study of Speech and Language Therapy in Children

Develops depth in specific areas of difficulty including language disorders in adolescents, pre-verbal stages, and working with disabilities, particularly intellectual

and physical disability and autism spectrum disorder. Develop best practice in cultural and linguistic diversity. Consolidate and extend knowledge of evidence-based practice in child speech and language.
Restriction: SPCHSCI 732

SPCHSCI 744 (15 Points)
Speech Language Therapy Clinical Practicum 4

Clinical practice in a variety of settings with the student demonstrating independent practice and problem solving skills. Supervisory guidance will be given and the course will be supported by weekly tutorials.

Prerequisite: SPCHSCI 734

SPCHSCI 745 (15 Points)
Speech Language Therapy Project

Research project relating to diagnosis and treatment of adult or paediatric communication disorders or dysphagia.

SPCHSCI 751 (15 Points)
Special Topic

SPCHSCI 752 (15 Points)
Research Project

SPCHSCI 796A (60 Points)
SPCHSCI 796B (60 Points)

MSc Thesis in Speech Science

To complete this course students must enrol in SPCHSCI 796 A and B

Sport and Exercise Science

Stage I

SPORTSCI 100G (15 Points)
Exercise and Fitness: Myths and Reality

An introduction to the principles of physical exercise, with a focus on understanding how the body moves and responds to exercise, how performance can be measured, and how fitness can be developed and maintained to optimise health. Particular emphasis will be placed on the debunking of common myths about exercise, and offering evidence-based advice on the benefits of appropriate physical activity.

SPORTSCI 101 (15 Points)
Foundations of Sport and Exercise Science

Essential scientific concepts, methods, and skills for progression to the biophysical sub-disciplines of Sport and Exercise Science: Biomechanics, Physiology, Neuroscience, and Psychology. Includes examples of research questions, key historical developments, professional organisations, training, and career pathways within each sub-discipline.

SPORTSCI 103 (15 Points)
Human Anatomy

The study of the gross anatomical organisation of the neural, muscular and skeletal systems, with particular reference to the neck, limbs, back and abdominal wall. Practical work includes gross anatomy laboratories and CD-ROM study.

Restriction: 470.101

SPORTSCI 104 (15 Points)
Functional Human Anatomy

Assessment of static and dynamic posture and balance, flexibility, strength and power, body composition, proportionality, and qualitative analysis of locomotion. Practical work will include techniques for measuring

the variables noted above, including their use in current human performance assessment.

Prerequisite: SPORTSCI 103

SPORTSCI 105 (15 Points)
Exercise Prescription

An introduction to the risks and benefits of exercise, exercise policy and safety, physical fitness testing, guidelines for exercise test administration, principles of exercise prescription, cardiorespiratory and neuromuscular training.

Restriction: SPORTSCI 205

Stage II

SPORTSCI 201 (15 Points)
Sport and Exercise Physiology 1

The biology and physiology of skeletal muscle, including its metabolism, energetics, activation and control. Training and assessment of neuromuscular strength, power and endurance. Physiological measurement of short-term power and aerobic metabolism.

Prerequisite: SPORTSCI 104, and 15 points from BIOSCI 107, MEDSCI 142

SPORTSCI 202 (15 Points)
Principles of Tissue Adaptation

Principles of adaptation in nerve, muscle, bone and other tissue that occur with increased use, disuse, or misuse including sports and exercise injuries. Coverage includes examples relevant to the maintenance of healthy tissues and the recovery and rehabilitation of tissue following injury or disease.

Prerequisite: SPORTSCI 104

SPORTSCI 203 (15 Points)
Introductory Biomechanics

Mechanical analysis of human movement, using qualitative, quantitative and predictive techniques. The focus is on sports techniques, musculoskeletal stress and locomotion.

Prerequisite: SPORTSCI 104

SPORTSCI 204 (15 Points)
Psychology of Physical Activity

An introduction to the study of psychology as it relates to sport, exercise, health and rehabilitation.

Prerequisite: 15 points from PSYCH 108, 109, 128, 129

SPORTSCI 206 (15 Points)
Exercise Nutrition

A cross-disciplinary focus on nutrition, examining nutritional enhancement of sports performance, diet and physiological function, eating disorders, energy balance, body composition and the role of diet in growth and exercise.

Prerequisite: 15 points from BIOSCI 107, MEDSCI 142

Stage III

SPORTSCI 301 (15 Points)
Sport and Exercise Physiology 2

Cardiopulmonary, endocrine and immune systems and their responses and adaptations to exercise and training. Physiological aspects of exercise and adaptation under different environmental conditions. Training and evaluation of anaerobic and aerobic power and endurance.

Prerequisite: SPORTSCI 201

SPORTSCI 302 (15 Points)
Sport and Exercise Physiology for Special Populations

Examination of the role of exercise for special populations. Physiological responses and adaptations

to exercise and training, and exercise and training recommendations for selected medical and athletic populations. Evaluation of cardiovascular, pulmonary, metabolic and neuromuscular function.

Prerequisite: SPORTSCI 301

SPORTSCI 303 (15 Points)

Advanced Biomechanics

Advanced quantitative techniques in biomechanics used to study human movement including mathematical modeling and signal processing. An application area such as occupational ergonomics or clinical gait analysis will be used to demonstrate the biomechanical techniques.

Prerequisite: SPORTSCI 203

SPORTSCI 304 (15 Points)

Sport Psychology

Examination of psychological factors affecting behaviour and performance in exercise and sport. The individual performer is the major consideration, but group influences on individual performance are also considered.

Prerequisite: SPORTSCI 204, or 45 points at Stage II in Psychology with at least a B- average grade

SPORTSCI 305 (15 Points)

Movement Neuroscience

Examines brain and spinal cord organisation and function related to movement, and the neurological mechanisms involved in the planning, execution and control of movement in health and disease. Introduces the concept of neural plasticity as it relates to motor skill learning and recovery after injury in both healthy and neurologically impaired populations.

Prerequisite: SPORTSCI 104, or 470.101 and 470.202, and SPORTSCI 204

SPORTSCI 306 (15 Points)

Technique Assessment in Movement Analysis

An overview of current biomechanics methodology for assessing various human movements, including sport and ergonomics. Emphasis is on image analysis, force measurement techniques and electromyography. A technique assessment project is completed.

Prerequisite: SPORTSCI 303

SPORTSCI 307 (15 Points)

Sporting Bodies

An examination of topical issues in sport and physical activity based in sociological theory. Includes an introduction to qualitative research methods and analysis. Specific topics follow student interests.

Prerequisite: SPORTSCI 102, 204

SPORTSCI 309 (15 Points)

Practicum in Sport and Exercise Science

This practicum provides an opportunity to combine theoretical knowledge with practical skills in exercise rehabilitation, physical/cognitive ergonomics, or sport science settings.

Prerequisite: Permission of Head of Department, and three of SPORTSCI 201, 202, 203, 204

To complete this course students must enrol in SPORTSCI 309 A and B

To complete this course students must enrol in SPORTSCI 692 A and B

Postgraduate Courses

SPORTSCI 702 (15 Points)

Project in Sport and Exercise Science

Provides students with an opportunity to collect data in an area of interest, with the aim of validating an area of study towards their theses.

SPORTSCI 703 (15 Points)

Cardiac Rehabilitation

The role of the exercise scientist in cardiac rehabilitation. Topics include electrocardiography, exercise testing and exercise prescription. The course combines theory and laboratory/clinical study of these topics.

SPORTSCI 704 (15 Points)

Advanced Techniques in Biomechanics

A laboratory-based course which explores the theoretical foundations of advanced data collection and analysis of biomechanical data and offers students opportunities to experience practical, hands-on laboratory experiences that will demonstrate these theoretical foundations.

SPORTSCI 705 (15 Points)

Seminar in Sport and Exercise Science

The role of science in sport – current developments and future needs. Practical seminar and research skills. Meta-analysis and critiquing of journal articles. Development and presentation of literature reviews.

SPORTSCI 706 (15 Points)

Seminar in Advanced Exercise Physiology

A seminar-based course examining the physiological responses and adaptations to physical exercise or inactivity. Students evaluate, present, and discuss seminal and contemporary research publications on selected topics largely focusing on the cardiovascular, metabolic, and musculoskeletal systems. Emphasis will be placed upon investigations of the explanatory elements of adaptation, from the level of the genome to the living human, and the use of relevant contemporary experimental techniques.

Restriction: PHYSIOL 706

SPORTSCI 707 (15 Points)

Advanced Seminar in Biomechanics

A seminar and laboratory-based course which examines theoretical and practical concerns in quantitative biomechanical data collection and analysis. Topics include: signal processing methods, 2-D and 3-D video analysis, human body modelling.

SPORTSCI 708 (15 Points)

Advanced Seminar in Movement Neuroscience

Seminar based course which examines brain organisation and function related to movement in health and disease. Emphasis is placed on contemporary techniques and paradigms in the field of movement neuroscience, with special emphasis on

clinical populations that exhibit impaired movement. Neural plasticity is a central theme.

SPORTSCI 710 (15 Points)
Exercise Rehabilitation

The role of exercise in a multi-component approach to rehabilitation. Risks and benefits of exercise, particularly with respect to sedentary individuals and/or those with medical considerations. Exercise test administration. Exercise prescription and monitoring, physical and functional assessment of performance.

SPORTSCI 712 (15 Points)
Advanced Exercise Prescription

Use of advanced techniques for interpreting physical test results used in the prescription of accurate and progressive exercise programmes for people with co-existing health problems including disease and injury. Applies the principles of exercise prescription in combination with scientific evidence for specific exercise modalities. Reviews the American College of Sports Medicine guidelines for exercise prescription and progression, their scientific evidence as well as baseline history taking, rationale, contraindications, privacy issues.

SPORTSCI 713 (15 Points)
Sport, Exercise and Rehabilitation Psychology

A course designed to provide a comprehensive perspective of the role of psychology and psychological techniques in the areas of sport and exercise. Historical, theoretical, clinical and methodological considerations will be examined.

SPORTSCI 714 (15 Points)
Special Topics in Sport and Exercise Science

Prerequisite: Permission of Head of Department

SPORTSCI 788A (22.5 Points)

SPORTSCI 788B (22.5 Points)

Statistics

Stage I

STATS 101 (15 Points)

STATS 101G (15 Points)

Introduction to Statistics

Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance, simple linear regression, correlation, tables of counts and the chi-square test.

Restriction: STATS 102, 107, 108, 191

STATS 108 (15 Points)

Statistics for Commerce

The standard Stage I Statistics course for the Faculty of Business and Economics or for Arts students taking Economics courses. Its syllabus is as for STATS 101, but it places more emphasis on examples from commerce.

Restriction: STATS 101, 102, 107, 191

STATS 125 (15 Points)

Probability and its Applications

Probability, conditional probability, Bayes theorem, random walks, Markov chains, probability models. Illustrations will be drawn from a wide variety of applications including: finance and economics; biology; telecommunications, networks; games, gambling and risk.

Corequisite: MATHS 108 or 150

Restriction: STATS 210

STATS 150 (15 Points)

STATS 150G (15 Points)

Lies, Damned Lies, and Statistics

Examines the uses, limitations and abuses of statistical information in a variety of activities such as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying data-based arguments will be explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

Stage II

STATS 201 (15 Points)

Data Analysis

A practical course in the statistical analysis of data. Interpretation and communication of statistical findings. Includes exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection.

Prerequisite: 15 points from STATS 101–108, 191

Restriction: STATS 207, 208

STATS 207 (15 Points)**Data-centred Investigation and Analysis**

A practical course in the statistical analysis of data, with hands on experience in research design and execution. Includes exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection. The primary coursework assessment will be a group project.

Prerequisite: 15 points from STATS 101, 108, 191

Restriction: STATS 201, 208

STATS 208 (15 Points)**Data Analysis for Commerce**

A practical course in the statistical analysis of data. There is a heavy emphasis in this course on the interpretation and communication of statistical findings. Topics such as exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection will be covered.

Prerequisite: 15 points from STATS 101–108, 191

Restriction: STATS 201, 207

STATS 210 (15 Points)**Statistical Theory**

Probability, discrete and continuous distributions, likelihood and estimation, hypothesis testing. This course is a prerequisite for the BSc(Hons) and Master's degree in Statistics.

Corequisite: 15 points from MATHS 208, 250 or equivalent

STATS 220 (15 Points)**Data Technologies**

Explores the processes of data acquisition, data storage and data processing using current computer technologies. Students will gain experience with and understanding of the processes of data acquisition, storage, retrieval, manipulation, and management. Students will also gain experience with and understanding of the computer technologies that perform these processes.

Prerequisite: 15 points at Stage I in Computer Science or Statistics.

STATS 255 (15 Points)**Introduction to Operations Research**

Emphasises the relationship between business and industrial applications and their associated operations research models. Software packages will be used to solve practical problems. Topics such as linear programming, transportation and assignment models, network algorithms, queues, Markov chains, inventory models and simulation will be considered.

Prerequisite: 15 points at Stage I in Statistics or Mathematics

Restriction: ENGSCI 255

Stage III**STATS 301 (15 Points)****Statistical Programming and Modelling using SAS**

Introduction to the SAS statistical software with emphasis on using SAS as a programming language for purposes of database manipulation, simulation, statistical modelling and other computer-intensive methods.

Prerequisite: 15 points from STATS 201, 207, 208, or at least B+ in BIOSCI 209

STATS 302 (15 Points)**Applied Multivariate Analysis**

Covers the exploratory analysis of multivariate data, with emphasis on the use of statistical software and reporting of results. Topics covered include: techniques for data display, dimension reduction and ordination, cluster analysis, multivariate ANOVA and associated methods.

Prerequisite: 15 points from STATS 201, 207, 208, or at least B+ in BIOSCI 209

STATS 310 (15 Points)**Introduction to Statistical Inference**

Estimation, likelihood methods, hypothesis testing, multivariate distributions, linear models.

Prerequisite: STATS 210 and 15 points from MATHS 208, 250 or equivalent

STATS 320 (15 Points)**Applied Stochastic Modelling**

Introduction to stochastic modelling, with an emphasis on queues and models used in finance. Behaviour of Poisson processes, queues and continuous time Markov chains will be investigated using theory and simulation.

Prerequisite: 15 points from STATS 125, 210, or 15 points from STATS 201, 207, 208, 220, or at least B+ in BIOSCI 209

STATS 325 (15 Points)**Stochastic Processes**

Introduction to stochastic processes, including generating functions, branching processes, Markov chains, random walks.

Prerequisite: 15 points from STATS 125, 210, 320, with at least a B pass, or 15 points from MATHS 208, 250, 253

STATS 326 (15 Points)**Applied Time Series Analysis**

Components, decompositions, smoothing and filtering, modelling and forecasting. Examples and techniques from a variety of application areas.

Prerequisite: 15 points from STATS 201, 207, 208, or at least B+ in BIOSCI 209

STATS 330 (15 Points)**Statistical Modelling**

Application of the generalised linear model and extensions to fit data arising from a range of sources including multiple regression models, logistic regression models, and log-linear models. The graphical exploration of data.

Prerequisite: 15 points from STATS 201, 207, 208, or at least B+ in BIOSCI 209

STATS 331 (15 Points)**Introduction to Bayesian Statistics**

Introduces Bayesian data analysis using the WinBUGS software package and R. Topics include the Bayesian paradigm, hypothesis testing, point and interval estimates, graphical models, simulation and Bayesian inference, diagnosing MCMC, model checking and selection, ANOVA, regression, GLMs, hierarchical models and time series. Classical and Bayesian methods and interpretations are compared.

Prerequisite: 15 points from STATS 201, 207, 208, or at least B+ in BIOSCI 209

STATS 340 (15 Points)**Design and Analysis of Surveys and Experiments**

Design, implementation and analysis of surveys including questionnaire design, sampling design and the analysis of data from stratified, cluster and multistage sampling. Design and implementation issues for scientific experiments including blocking,

replication and randomisation and the analysis of data from designs such as complete block, balanced incomplete block, Latin square, split plot, factorial and fractional designs.

Prerequisite: 15 points from STATS 201, 207, 208, 210, or at least B+ in BIOSCI 209

Restriction: STATS 341, 351

STATS 341 (15 Points)

Design and Analysis of Surveys

Design, implementation and analysis of surveys including such topics as questionnaire design, sampling design and the analysis of data from stratified, multistage and cluster sampling.

Prerequisite: 15 points from STATS 201, 207, 208, 210, or at least B+ in BIOSCI 209

Restriction: STATS 340

STATS 351 (15 Points)

Design and Analysis of Experiments

Design and implementation issues for statistically designed experiments and the analysis of data from designs such as incomplete block, Latin square, split plot, factorial and fractional designs.

Prerequisite: 15 points from STATS 201, 207, 208, 210, or at least B+ in BIOSCI 209

Restriction: STATS 340

STATS 370 (15 Points)

Financial Mathematics

Mean-variance portfolio theory; options, arbitrage and put-call relationships; introduction of binomial and Black-Scholes option pricing models; compound interest, annuities, capital redemption policies, valuation of securities, sinking funds; varying rates of interest, taxation; duration and immunisation; introduction to life annuities and life insurance mathematics.

Prerequisite: 15 points in Stage II Statistics, or at least B+ in BIOSCI 209, and 15 points at Stage II in Mathematics

STATS 380 (15 Points)

Statistical Computing

Statistical programming using the R computing environment. Data structures, numerical computing and graphics.

Prerequisite: 15 points from STATS 201, 207, 208, 220, or at least B+ in BIOSCI 209

STATS 390 (15 Points)

Topics in Statistics

Postgraduate Courses

STATS 701 (15 Points)

Special Topic in Statistics 1

STATS 702 (15 Points)

Special Topic in Statistics 2

STATS 708 (15 Points)

Topics in Statistical Education

Covers a wide range of research in statistics education at the school and tertiary level. There will be a consideration of, and an examination of, the issues involved in statistics education in the curriculum, teaching, learning, technology and assessment areas.

STATS 710 (15 Points)

Probability Theory

Fundamental ideas in probability theory; sigma-fields, laws of large numbers, characteristic functions, the Central Limit Theorem.

Prerequisite: STATS 310, 320 or 325

STATS 720 (15 Points)

Stochastic Processes

Continuous-time jump Markov processes. A selection of topics from: point processes, renewal theory, martingales, Brownian motion, Gaussian processes and inference for stochastic processes.

Prerequisite: STATS 320 or 325

STATS 721 (15 Points)

Special Topic in Applied Probability

STATS 722 (15 Points)

Financial Mathematics

Prerequisite: STATS 210

STATS 723 (15 Points)

Stochastic Methods in Finance

Contingent claims theory in discrete and continuous time. Risk-neutral option pricing, Cox-Ross-Rubinstein and Black-Scholes models, stochastic calculus, hedging and risk management.

Prerequisite: STATS 210

STATS 724 (15 Points)

Operations Research

Continuous-time Markov processes; optimisation for jump Markov processes; Markov decision processes; queueing theory and stochastic networks.

Prerequisite: 15 points from STATS 320, 325, 720 with at least B+

STATS 725 (15 Points)

Topics in Operations Research

STATS 726 (15 Points)

Time Series

Stationary processes, modelling and estimation in the time domain, forecasting and spectral analysis.

STATS 727 (15 Points)

Special Topic in Time Series

STATS 730 (15 Points)

Statistical Inference

Fundamentals of likelihood-based inference, including sufficiency, conditioning, likelihood principle, statistical paradoxes. Theory and practice of maximum likelihood. Examples covered may include survival analysis, GLM's, nonlinear models, random effects and empirical Bayes models, and quasi-likelihood.

Prerequisite: STATS 310

STATS 731 (15 Points)

Bayesian Inference

A course in practical Bayesian statistical inference covering: the Bayesian approach specification of prior distributions, decision-theoretic foundations, the likelihood principle, asymptotic approximations, simulation methods, Markov Chain Monte Carlo methods, the BUGS and CODA software, model assessment, hierarchical models, application in data analysis.

Prerequisite: STATS 210

STATS 732 (15 Points)

Topics in Statistical Inference

STATS 740 (15 Points)

Sample Surveys

This is a course in the design, management and analysis of sample surveys. Topics such as the following are studied. Types of Survey. Revision of statistical aspects of sampling. Preparing surveys. Research entry: problem selection, sponsorship and collaboration. Research design: methodology and data collection; Issues of sample design and sample

selection. Conducting surveys: Questionnaires and questions; Non-sampling issues; Project management; Maintaining data quality. Concluding surveys: Analysis; Dissemination.

Prerequisite: 15 points from STATS 340, 341

STATS 741 (15 Points)
Special Topic in Sampling

STATS 747 (15 Points)
Statistical Methods in Marketing
Stochastic models of brand choice, applications of General Linear Models in marketing, conjoint analysis, advertising media models and marketing response models.

STATS 750 (15 Points)
Experimental Design
The design and analysis of data from experiments involving factorial and related designs and designs which have the property known as general balance (this includes most of the standard designs), and more general designs with blocking and replication. Response surface methodology. Sequential experimentation.
Prerequisite: 15 points from STATS 340, 351

STATS 751 (15 Points)
Special Topic in Experimental Design

STATS 760 (15 Points)
A Survey of Modern Applied Statistics
A survey of techniques from modern applied statistics. Topics covered will be linear, non-linear and generalised linear models, modern regression including CART and neural networks, mixed models, survival analysis, time series and spatial statistics.
Prerequisite: STATS 330, STATS 310

STATS 761 (15 Points)
Mixed Models
Statistical techniques for analysis of data from medical studies, with an emphasis on mixed modelling. Topics such as the use of SAS for analysing medical data with applications in epidemiology. Analysis of multicentre trials (random effects models), repeated measures data (covariance pattern and random coefficient models), matched case-control studies and the use of generalised linear models in medical statistics will be studied.

STATS 762 (15 Points)
Special Topic in Regression

STATS 764 (15 Points)
Analysis of Failure Time Data
Topics in the theory and analysis of survival data. Survival data arises both in the Health Sciences and in industrial testing. Such data is often subject to censoring and truncated data. Both parametric and nonparametric methods, such as Kaplan-Meier estimates, will be covered. Other topics may include: proportional hazards regression, censored data and reliability.

Prerequisite: STATS 310

STATS 766 (15 Points)
Multivariate Analysis
A selection of topics from multivariate analysis, including: advanced methods of data display (eg. Correspondence and Canonical Correspondence Analysis, Biplots, and PREFMAP) and an introduction to classification methods (eg. various types of Discriminant Function Analysis).
Prerequisite: STATS 302

STATS 767 (15 Points)
Topics in Multivariate Analysis

STATS 770 (15 Points)
Introduction to Medical Statistics
An introduction to ideas of importance in medical statistics, such as measures of risk, basic types of medical study, causation, ethical issues and censoring, together with a review of common methodologies.

STATS 771 (15 Points)
Topics in Biostatistics 1

STATS 773 (15 Points)
Design and Analysis of Clinical Trials
The theory and practice of clinical trials, including: design issues, data management, common analysis methodologies, intention to treat, compliance, interim analyses and ethical considerations.

STATS 775 (15 Points)
Design of Ecological Experiments
Factorial designs, nested hierarchies and mixed models; variance components and expected mean squares; precision and power analysis; multivariate analysis in ecology; designs to detect environmental impact; resampling methods and permutation tests for complex designs.

STATS 776 (15 Points)
Topics in Environmental and Ecological Statistics

STATS 779 (15 Points)
Professional Skills for Statisticians
Statistical software, data management, data integrity, data transfer, file processing, symbolic manipulation, document design and presentation, oral presentation, professional ethics.

STATS 780 (15 Points)
Statistical Consulting
Students will learn about the practicalities of statistical consulting. Students will carry out a statistical consulting project, including the writing of a report, under the supervision of a member of the academic staff.

STATS 781 (30 Points)

STATS 781A (15 Points)

STATS 781B (15 Points)

Honours Project in Statistics

Restriction: STATS 789

To complete this course students must enrol in STATS 781 A and B, or STATS 781

STATS 782 (15 Points)
Statistical Computing
Professional skills, advanced statistical programming, numerical computation and graphics.

STATS 783 (15 Points)
Simulation and Monte Carlo Methods
A practical introduction to modern simulation and Monte Carlo techniques and their use to simulate real situations and to solve difficult statistical inferential problems whose mathematical analysis is intractable.

STATS 784 (15 Points)
Statistical Data Mining
Data cleaning, missing values, data warehouses, security, fraud detection, meta-analysis, and statistical techniques for data mining such as regression and decision trees, modern and semiparametric regression, neural networks, statistical approaches to the classification problem.

STATS 785 (15 Points)
Topics in Statistical Data Management

Wine Science

Postgraduate Courses

WINESCI 701 (15 Points)
Winemaking in a New Zealand Setting

The principles and practices of local winemaking are reviewed and compared with international counterparts to highlight the distinctive characteristics of winemaking in New Zealand. A microvinification project is undertaken in which students begin with an allotment of grapes, monitor the fermentation using a range of analytical techniques, and make decisions which affect the style of wine they produce.

WINESCI 702 (15 Points)
The Science Behind Grape Production

Develops understanding of the contemporary scientific knowledge and research that is of relevance to grape production for winemaking. The application of traditional and modern molecular methods in plant science and plant pathology will be discussed in relation to the selection, improvement and management of vines and grape attributes. Research issues of national and international relevance to viticulture will also be addressed.

WINESCI 703 (15 Points)
The Science Behind Winemaking

Follows on from 702 and focuses on the contemporary scientific knowledge and research that is of relevance to winemaking, commencing from the point of grape harvest. The application of traditional and modern methods in biochemistry and microbiology will be discussed. Research issues of national and international relevance to winemaking will also be addressed.

WINESCI 704 (15 Points)
Sensory Evaluation and Statistical Methods
The principles of sensory science, sensory analysis of

wine, differences among wine types, regional styles and grape types will be covered. Emphasis will be placed on those components which influence sensory appeal. The application of statistical methods to wine sampling and to the design of sensory panels will be overviewed.

WINESCI 705 (15 Points)

WINESCI 705A (7.5 Points)

WINESCI 705B (7.5 Points)

Project in Wine Science
Students will gain a thorough understanding of the current knowledge on a selected topic associated with wine science and have experience in writing a research proposal and in giving a presentation to the peer group.

To complete this course students must enrol in WINESCI 705 A and B, or WINESCI 705

WINESCI 706 (15 Points)

The Business of Wine Production
Students will be introduced to the economics of grape growing, winemaking, winery design and management. Distribution and marketing will be introduced. Special topics including wine law, use and negotiation of contracts small business development, stock valuation, issues of appellations, labelling and brand development will be taught. Environmental and resource management issues and health and safety regulations will be covered.

WINESCI 707 (15 Points)

WINESCI 707A (7.5 Points)

WINESCI 707B (7.5 Points)

Topics in Wine Science
A number of advanced or special topics in wine science. This course may not be offered every year; further information may be obtained from the Department of Chemistry.
To complete this course students must enrol in WINESCI 707 A and B, or WINESCI 707

WINESCI 796A (60 Points)

WINESCI 796B (60 Points)

MSc Thesis in Wine Science
Advanced research on an aspect of wine science. This may be undertaken with the Wine Industry CRIs and University staff.
To complete this course students must enrol in WINESCI 796 A and B

General Education

Stage I

ACCTG 151G (15 Points)
Financial Literacy

People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Developing an understanding of how to be in control of spending and savings; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; and recognise scams and considers whether money is the key to happiness.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

ANTHRO 104G (15 Points)**Peoples and Cultures of the Pacific**

A survey of the peoples of Pacific Islands through the perspectives of archaeology, biological anthropology, ethnomusicology, linguistics and social anthropology.

ANTHRO 105G (15 Points)**Question of Race and Racism**

International, cross-cultural and interdisciplinary perspectives question 'race' and 'racism'. Why does the concept have such social and political potency? What are the impacts of concepts of race and practices of racism and anti-racism on individuals, families, communities, nation-states and empires, and in Aotearoa New Zealand and the Pacific in particular?

ANTHRO 106G (15 Points)**Issues and History in Popular Music**

A survey of popular music styles, artists, sub-cultures and issues that explores facets such as genre, the music industry, music and politics, music videos, the sales process, race and identity, and gender theory. Core theory and writers in popular music studies are introduced and popular music is used to explore societal changes in class, ethnicity, gender, sexuality, youth, and global economic and cultural processes.
Restriction: POPMUS 106, 106G

ARCHHTC 102G (15 Points)**Modern Architecture and Urbanism**

- 2 Interpretation
- 3 Constitution of the University
- 4 University District and Court of Convocation

Powers of the Council

- 20 Award of certificates, etc
- 21 Lectures to members of the public

An Act to consolidate and amend certain enactments of the General Assembly relating to The University of Auckland

Be it enacted by the General Assembly of New Zealand in Parliament assembled, and by the authority of the same, as follows:

1 Short Title and Commencement

- (1) This Act may be cited as The University of Auckland Act 1961.
- (2) This Act shall come into force on the first day of January, nineteen hundred and sixty two.

2 Interpretation

In this Act, unless the context otherwise requires:

'the Council' means the Council of The University of Auckland constituted in accordance with Part XV of the Education Act 1989;

'Lecturer' means a member of the staff of The University of Auckland who is in terms of his appointment an associate professor, a reader, a senior lecturer, or a lecturer of the University; and includes such other persons and classes of persons as the Council from time to time determines:

'Minister' means the Minister of the Crown for the time being responsible for the administration of this Act:

'Professor' means a professor of The University of Auckland; but does not include an associate professor:

'the Registrar' means the Registrar of The University of Auckland:

'the University' means The University of Auckland constituted under this Act.

3 Constitution of the University

- (1) For the advancement of knowledge and the dissemination and maintenance thereof by teaching and research there shall be

a University to be called The University of Auckland.

- (2) The University shall consist of the Council, the professors emeriti, the professors, lecturers, junior lecturers, Registrar and Librarian of the University for the time being in office, the graduates and undergraduates of The University of New Zealand whose names are for the time being on the register of the Court of Convocation of The University of Auckland, and such other persons and classes of persons as the Council may from time to time determine.
- (3) The University shall be a body corporate with perpetual succession and a common seal, and may hold real and personal property, and sue and be sued, and do and suffer all that bodies corporate may do and suffer.
- (4) The University established under this Act is hereby declared to be the same institution as the institution of that name existing immediately before the commencement of this Act under The University of Auckland Act 1954 (as amended by The University of Auckland Amendment Act 1957), which institution was originally established under the name of the Auckland University College under the Auckland University College Act 1882.

4 Court of Convocation

- (1) – repealed.
- (2) – repealed.
- (3) There shall be a Court of Convocation of the University.
- (4) The said Court of Convocation shall consist of the persons whose names are enrolled on a register to be kept by the Registrar.
- (5) Every person shall be entitled to have his name enrolled on the register of the Court of Convocation who
 - (a) is a graduate of the University; or
 - (b) being a graduate of The University of New Zealand either by examination at any time or by reasons of having been admitted *ad eundem gradum* before the first day of January, nineteen hundred and forty-three, is not by reason of that qualification, enrolled on the register of the Court of Convocation for any other University, and is otherwise qualified in accordance with statutes made by the Council to be enrolled on

- the register of the Court of Convocation of the University; or
- (c) not being such a graduate, is a professor or graduate full-time member of the staff of the University or a graduate member, approved by the Council as being of University status, of the staff of an institution affiliated to the University; or
 - (d) is otherwise entitled in accordance with statutes made by the Council to have his name enrolled on the said register.
- (6) The power of the Council under Section 194 of the Education Act 1989 to make statutes extends to making statutes for the keeping of the register of the Court of Convocation, which statutes may include provisions prescribing the persons and classes of persons who are eligible under paragraph (b) or paragraph (d) of subsection (5) of this section for membership of the said Court of Convocation and the conditions (whether as to payment of fee or otherwise) on which persons are entitled to have their names enrolled in the register of the said Court; and, subject to this Act and to the said

statutes, if any, the said Court shall have power to make such rules for the conduct of its business as it thinks fit as the Council may determine.

- (7) The said Court may make representations to the Council on any matter concerning the interests of the University.

Sections 5 to 19 – repealed

20 Awards of Certificates, etc

The Council shall have power, under such conditions as it thinks fit, to award certificates, fellowships, scholarships, bursaries and prizes, and to make other awards.

21 Lectures to Members of the Public

The Council shall have power to provide such lectures and instruction for any persons, whether or not they are members of the University, as it thinks fit, and on such conditions as it thinks fit, and may award certificates to any of them.

Sections 22 to 53 – repealed

UNIVERSITY STATUTES

The Disciplinary Statute 1998

Under Review

1 Title and Commencement

This Statute may be cited as The Disciplinary Statute 1998 and comes into force on 1 March 1998.

2 Interpretation

'Appeals Committee' means the Committee constituted by the Council with delegated authority to exercise the powers conferred on it by Statute.

'Authorised Person' means the Vice-Chancellor, the Registrar, any Staff Member, a Warden or a member of the staff of the Students' Association.

'Class' means any lecture, tutorial, seminar, laboratory, or other assembly of Students at which tuition is being given and includes any lecture or address within the University at which Students are present.

'Council' means the Council of the University.

'Discipline Committee' means the committee constituted by the Council with delegated authority to exercise the powers conferred on it by Statute.

'Enrolment' means enrolment in a course of study or training at the University and 'enrol' has a corresponding meaning.

'Facility' means premises and equipment made available by the University for the

recreation of Students and Staff Members as, for example:

Common Rooms
Physical Fitness Facilities
Playing Fields
Student Union
The Maidment Theatre.

'Field Trip' means a trip beyond University Premises undertaken by Students and conducted by the University for the purposes of study or research.

'Hall' means any hostel or hall of residence or other student accommodation under the control of the University and intended for the occupation of students.

'Registrar' means the person for the time being holding office as the Registrar of the University.

'Rule' means any rule of conduct made by the Council, Senate, or any Authorised Person of which notice has been given:

- (i) by publication in the *University Calendar*; or
- (ii) by other means; or
- (iii) to the person charged with misconduct before the alleged misconduct has occurred.

'Senate' means Senate of the University.

'Specified Statutes' means the Examination Regulations, the Fees Regulations,

the Information and Communications Technology Statute, the Library Statute as published in the most recent *University Calendar* and includes any other Regulations or Statutes so published which prescribe offences for misconduct (whether or not penalties are also prescribed for those offences).

'Staff Member' means a member of the staff of the University.

'Statute' means a Statute made by the Council and includes this Statute, a Specified Statute and all Regulations of the University made before 1 January 1991 and not since revoked.

'Student' means a duly enrolled student of the University and includes, for the purposes of section 3 of this Statute, a person applying to enrol.

- a acting in that capacity; or
- b acting as a Deputy of the Chief Executive.

'Warden' means the person for the time being in charge of any Hall; and includes a deputy of that person.

Good Government and Discipline

3 Observance of Statutes and Rules

- a Every Student shall observe and comply with the provisions of the Statutes and Rules of the University.
- b Students who, on Enrolment or in the course of their attendance at the University, are subject to conditions imposed on their attendance to prevent disturbance or to maintain good order and discipline shall comply with those conditions.
- c The Discipline Committee shall have the power to hear and determine recommendations from the Registrar that a person not be permitted to enrol as a student of the University consistent with section 224(13)(a) of the Education Act 1989, on the grounds that the person is not of good character or has been guilty of misconduct or a breach of discipline.

4 Prohibitions and Directions

- a No Student or Staff Member shall:

- (i) Wilfully act (on University Premises or elsewhere) in a manner contrary to the good government of the University or so as to bring the University into disrepute.
- (ii) Wilfully damage, deface or destroy University Premises, any property on University Premises or any property of a Student, a Staff Member, or the Students' Association.
- (iii) Wilfully impede the activities of the University, whether in teaching, research or otherwise.
- (iv) Wilfully obstruct any Authorised Person in the due performance of the functions or duties of that Authorised Person.
- (v) Wilfully create any nuisance in or on University Premises.
- (vi) Wilfully interfere with the pursuit of work or study by any Student or Staff Member or his or her proper enjoyment of the amenities of the University.
- (vii) Be in University Premises when the Student knows or ought to know that he or she is not entitled to be there at that time.
- (viii) Smoke in any place where smoking is prohibited in terms of the Smoke Free policy of the University for the time being.
- (ix) Cause any unnecessary disturbance or annoyance to persons living in residential quarters on University Premises or to residents in the immediate neighbourhood of University Premises.
- (x) Ride, drive or park a cycle or motor vehicle in the University grounds except in compliance with the directions notified from time to time regulating the entry, exit and speed of cycles and vehicles and the places where they may be parked.
- (xi) Be accompanied by a dog (other than a guide dog) or any other pet on University Premises.
- (xii) Refuse any reasonable request to identify himself or herself by an Authorised Person who has reason to suspect that the Student is involved in a breach of any Statute or Rule.
- (xiii) Post notices elsewhere than on the permanent notice boards provided for the purpose and except in compliance with the conditions prescribed by the Executive of the Students' Association in that regard.
- (xiv) Bring or consume alcoholic liquor on University Premises other than:
 - (a) on licensed premises; or
 - (b) any other premises where permission has been given to consume alcohol and then only in accordance with any conditions imposed.
- (xv) Use the Personal Identification Card of

another Student (so as to impersonate that other Student) or permit his or her Personal Identification Card to be used by another Student.

- b All Students shall comply with:
 - (i) Such directions as may reasonably be given by an Authorised Person to maintain good order and discipline.
 - (ii) (While in a Class): any requirements as to behaviour or attire made for the orderly conduct of the Class or the safety of persons or property.
 - (iii) (While using any Facility): the Rules applicable to its use and any directions by the person in charge to preserve the safety of the persons using the Facility.

 - (v) (While on a Field Trip): any Rules by the person in charge of the Field Trip to preserve the safety of the persons engaged on the Field Trip or to prevent misconduct during the Field Trip.
 - (vi) (While present in the Student Union): requests made by an Authorised Person to prevent unruly behaviour or to cause it to cease.

5 Members of the Security Intelligence Service

- a No member of the Security Intelligence Service enrolled as a Student at the University shall carry out any inquiries into security matters within the University Premises.
- b The proposed attendance of a member of the Security Intelligence Service at the University shall be discussed between the Security Intelligence Service and the Registrar before his or her enrolment.
- c After those discussions have been held, Senate shall determine each year what special conditions (if any) as to attendance at Classes shall apply to students who are members of the Security Intelligence Service in order to maintain discipline among the students of the University by preventing any possible disturbance to the carrying out of normal teaching activities.
- d In this Section 5 'Member of the Security Intelligence Service' means an officer or employee engaged in the Security Intelligence Service established under the New Zealand Security Intelligence Service Act 1969.

Imposition of Penalties on Students

6 Misbehaviour in Classes or Facilities

- a Where a Student commits a breach of any Statute or Rule:
 - (i) In any Class: the person in charge of the Class; or

- (ii) In any Facility: the person in charge of the Facility; may
 - (a) Exclude the Student from the Class (and up to 3 subsequent sessions of the Class) or the Facility (for such period as the person in charge may determine); and
 - (b) Refer the breach to the Discipline Committee.

7 Misbehaviour in Halls

- a Where a Student commits a breach of any Statute or Rule in any Hall, the Warden of that Hall may:
 - (i) Impose a fine not exceeding \$1,000 on the Student; and/or
 - (ii) Suspend or terminate the Student's right to reside in the Hall; and/or
 - (iii) Refer the breach to the Discipline Committee.

8 Misbehaviour in the Student Union Building or its Precincts

- a Where a Student commits a breach of any Statute or Rule in the Student Union the Executive of the Students' Association may:
 - (i) Impose a fine not exceeding \$500; and/or
 - (ii) Refer the breach to the Discipline Committee.

9 Other Penalties

- a The Discipline Committee may of its own motion or on reference to it pursuant to:
 - (i) This Statute; or
 - (ii) Any other Statute or Rule
 impose on a Student who commits a breach of any Statute or Rule, any one or more of the penalties prescribed in clauses 9b, 9c or 9d or require any such Student to pay an amount by way of restitution pursuant to clause 9e.
- b For a breach of Examination Regulations the Discipline Committee may:
 - (i) As provided in those Regulations:
 - (a) Suspend for such time as it may prescribe the release to the candidate of the results of any examination;
 - (b) Decline to credit to the candidate's course any subject or subjects;
 - (c) Cancel any pass with which that candidate may have been credited in the subject or examination in respect of which the breach occurred;
 - (d) Disqualify the candidate from sitting any examination for such period as it may prescribe;
 - (e) Impose any one or more of those penalties; and/or
 - (ii) Impose any of the penalties prescribed in clause 9d.
- c For breach of any other Specified Statute the Discipline Committee may impose:

- (i) The penalties prescribed in that Specified Statute; and/or
- (ii) The penalties prescribed in section 9d.
- d For a breach of any Statute (not being a Specified Statute) or any Rule, the Discipline Committee may impose:
 - (i) A fine not exceeding \$1,000.
 - (ii) A limitation or prohibition on attendance at any Class or Classes or the use and enjoyment of any of the Facilities.
 - (iii) A suspension from attendance at the University or any Class or Classes for such period as it thinks fit.
 - (iv) Cancellation of Enrolment of a Student at the University or in a course of study or training at the University.
 - (v) A penalty in the form of requiring the offender to remove any defacement to University Premises or property or to render services to the benefit of the University or its students.
 - (vi) Any one or more of those penalties.
- e In determining any allegation of a breach of paragraph (ii) of clause 4a of this Statute (damage to property) the Discipline Committee may, with or without imposing a penalty, require an offending Student to pay such amount by way of restitution as the Discipline Committee thinks fit.
- f On default of payment, within the time prescribed, of:
 - (i) A fine; or
 - (ii) Any amount to be paid by way of restitution pursuant to clause 9e of this Statute;
 the Discipline Committee may suspend the Student in default from attendance at the University or any Class or Classes until that fine or that amount is paid.

10 Reprimands

- a Where the Discipline Committee has investigated a complaint that a Student has committed an offence under any Specified Statute it may:
 - (i) Through its Chairperson or any Authorised Person it has nominated for the purpose; and
 - (ii) Whether or not it has imposed any penalty for the offence;

issue a reprimand orally or in writing to the Student charged with the offence in terms that it considers appropriate in all the circumstances.

11 Review of Penalties

- a Any Student:
 - (i) Upon whom a penalty is imposed under any Statute or any Rule; or
 - (ii) Who is required to pay any amount by way of restitution; may by giving written notice to the Registrar within 14 days of the penalty having been imposed apply to the Appeals Committee of the Council to review:
 - (i) The amount of that penalty; or
 - (ii) The imposition of that penalty; or
 - (iii) Both those matters; or
 - (iv) Any amount required to be paid by way of restitution.
- b The decision of the Appeal Committee on any such review is final.

12 Saving

- a Nothing in this or any other Statute prejudices the rights and remedies of the University at law in respect of the misconduct or negligence of any Student or Staff Member.

13 Transitional Provisions

- a Notwithstanding the revocation of the Disciplinary Regulations 1972:
 - (i) Proceedings may be commenced in respect of any offence under those Regulations alleged to have been committed before their revocation; and
 - (ii) Proceedings previously commenced under those Regulations may be continued;
 as if those Regulations remained in force.
- b Where any proceedings that are commenced or continued pursuant to clause 13a relate to an offence under the Examination Regulations, those Regulations will be deemed not to have been amended for the purpose of those proceedings.

Membership of Associations of Students Referenda and Elections of Student Representatives on Council Statute 2008

Pursuant to section 171(2) (e)(ii) of Education Act 1989.

1 Title and Commencement

This Statute may be cited as the Membership of Associations of Students Referenda and Elections of Student Representatives on Council Statute 2008 and comes into force on 23 June 2008.

2 Interpretation

'Academic Year' means a period of 12 months commencing on 1 January.

'Act' means the Education Act 1989.

'Vice-Chancellor' means the person holding office for the time being as the Chief Executive Officer of the University; and includes any person for the time being:

- a Acting in that capacity; or
- b Acting as a Deputy of the Chief Executive.

Conduct of Referenda

3 Returning Officer

- 3.1 The Council shall appoint a Returning Officer to conduct referenda under this Statute.
- 3.2 Unless Council determines otherwise the Returning Officer for referenda conducted under this Statute shall hold office until his or her removal by the Council, or his or her resignation, incapacity or death, in any of which events the Council shall appoint a Returning Officer in his or her place.
- 3.3 Every referendum conducted under this Statute shall be conducted by the Returning Officer, but, if for any reason he or she is unable to fulfil the duties of his or her office at any referendum, the Council shall appoint a substitute, who, for the purposes of that referendum, shall be deemed to be the Returning Officer.

4 Request for Referendum

- 4.1 Where the membership of an Association of Students is compulsory students of

the University may request the Council to conduct a vote of all students at the University on whether membership of that Association should continue to be compulsory.

- 4.2 Where membership of an Association of Students is not compulsory students of the University may request the Council to conduct a vote of all students at the University on whether membership of a specified Association of Students at the University should become compulsory.
- 4.3 A request under subsection 4.1 or subsection 4.2 is not effective unless it is accompanied by a petition requesting the vote, signed by at least 10 percent (as calculated according to figures provided by the Ministry) of all students currently enrolled at the University.
- 4.4 Each student who makes such a request must provide sufficient details to enable the Returning Officer to determine whether he or she is so enrolled at the University.
- 4.5 No such vote may be held more than once every two years.

5 Date of Referendum

- 5.1 Where a request for a referendum is received by the Council and the Returning Officer has determined that the request was made by 10 percent of Students enrolled at the University in accordance with section 4.3 above, a referendum shall be held at a time determined by the Council.
- 5.2 The Returning Officer shall give advance notice of the commencement date and closing date of a referendum by a notice, which shall be published in such University Publications as the Returning Officer sees fit.

6 Referendum to be Held Over One Month Period

- 6.1 The closing date of a referendum shall be one month from the opening date of that referendum.

7 Students Eligible to Vote

- 7.1 The Returning Officer shall compile a list of Students eligible to vote in a referendum, which will include all Students enrolled at the University at a date to be determined by the Returning Officer.

8 Referendum to be Conducted Electronically

- 8.1 The Returning Officer shall conduct referenda under this Statute by electronic vote.

9 Issue of Voting Instructions

- 9.1 The Returning Officer shall, not later than the date on which the referendum is to be held, send by email to each Student at their University email address an email message with Instructions for Voting which:
 - a States that the instructions are for the conduct of a referendum;
 - b States that the referendum is for the purpose of establishing whether

membership of associations of Students at the University is to be voluntary or compulsory;

c Gives instructions for voting in that referendum;

d States the commencement date and closing date of the referendum.

9.2 The voting shall take place in a manner prescribed in the Instructions for Voting email sent by the Returning Officer.

10 Method of Voting

10.1 On receipt of the Instructions for Voting from the Returning Officer, the Student shall alone exercise his or her vote in accordance with the Instructions for Voting.

10.2 Where any Student:

a Is wholly or partially blind; or

b Suffers from any other disability which makes it difficult to cast his or her vote in the prescribed manner, that Student's vote may be recorded by another person in accordance with the instructions of the Student.

11 Invalid Votes

11.1 A vote shall only be valid if:

a The Student exercises his or her vote in accordance with the Instructions for Voting;

b The Student has not yet exercised his or her vote; and

c The Student's vote is received by the Returning Officer on or after the commencement date of the referendum and on or before the closing date of the referendum.

12 Counting of Votes

12.1 Votes shall be counted by such means as are prescribed by the Returning Officer.

12.2 The Returning Officer shall make arrangements for votes to be counted as soon as reasonably practicable after the close of voting.

12.3 The Returning Officer shall appoint scrutineers if requested to do so by interested parties to the referenda. Such scrutineers shall have the right to inspect records of electronic voting, consistent with current best practice in local body elections.

13 Declaration of Result

13.1 No later than one month after the closing date of the referendum, the Returning Officer shall declare, by means of notices in such University Publications as the Returning Officer sees fit:

a The number of votes in favour of membership of associations of Students being voluntary;

b The number of votes in favour of membership of an Association of Students being compulsory; and

c Whether the majority of votes are in favour of membership of associations

of Students being voluntary or compulsory.

14 Recount

14.1 Where any Student, officer of an Association of Students or member of the Council has reason to believe that the declaration by the Returning Officer of the number of votes in favour of membership of associations of Students being voluntary or compulsory is incorrect, and that on a recount thereof the result of the referendum, namely whether the majority of votes are in favour of membership of associations of Students being voluntary or compulsory, might be found to be different, he or she may within seven days after the declaration, apply to the Returning Officer for a recount of the votes.

14.2 Every application for a recount in accordance with section 14.1 above shall:

a Be accompanied by a deposit of \$500, which shall be refunded if, following a recount of the votes, the declaration by the Returning Officer of the number of votes in favour of membership of associations of Students being voluntary or compulsory proves to be incorrect;

b State the grounds upon which the applicant believes that the declaration by the Returning Officer of the number of votes in favour of membership of associations of Students being voluntary or compulsory is incorrect, and that on a recount thereof the result of the referendum, namely whether the majority of votes are in favour of membership of associations of Students being voluntary or compulsory, might be found to be different; and

c State the name of the applicant and whether he or she is a Student, officer of an Association of Students or member of the Council.

14.3 If the Returning Officer is satisfied that an applicant for a recount has reasonable cause to believe that the Returning Officer's declaration of the number of votes in favour of membership of associations of Students being voluntary or compulsory is incorrect and that on a recount the result of the referendum, namely whether the majority of votes are in favour of membership of associations of Students being voluntary or compulsory, might be found to be different, the Returning Officer shall, as soon as reasonably practicable after receiving the application and deposit as aforesaid, arrange for a recount of the votes.

14.4 Where the Returning Officer arranges for a recount of the votes in accordance with section 14.3 above, he or she shall:

a Notify the applicant in writing of the result of the recount; and

b Where the result of a recount is that the

declaration by the Returning Officer of the number of votes in favour of membership of associations of Students being voluntary or compulsory is incorrect, declare, by means of notices in such University Publications as he or she sees fit:

- (i) That upon a recount of the votes, the declaration by the Returning Officer of the number of votes in favour of membership of associations of Students being voluntary or the number of votes in favour of membership of an Association of Students being compulsory was found to be incorrect; and
- (ii) The number of votes in favour of membership of associations of Students being voluntary;
- (iii) The number of votes in favour of membership of an Association of Students being compulsory; and
- (iv) Whether the majority of votes are in favour of membership of associations of Students being voluntary or compulsory.

15 Destruction of Votes

- 15.1 The Returning Officer shall, no earlier than one month after the declaration of the result of a referendum, and if an application for a recount is made, not before the declaration of the result of the recount, arrange for all records of Students' votes to be destroyed in a manner which ensures the confidentiality of the voting information is preserved.

16 Recognition of Associations of Students

- 16.1 Where the result of a referendum is that membership of Associations of Students is to be voluntary, the Council may decide whether it wishes to recognise one or more Associations of Students and if so, what form that recognition will take.

The Election of Student Representatives on the Council

17 Student Representatives on the Council

- 17.1 Student representatives serving as members of the Council at the time of a referendum shall remain on the Council until the completion of their term of membership.
- 17.2 Where the result of a referendum is that membership of associations of Students is to be voluntary, the Council shall conduct an Election in accordance with this Statute and the Constitution of the Council, subject to section 17.1 above.

Conduct of Elections

18 Returning Officer

- 18.1 The Council shall appoint a Returning Officer to conduct Elections under this Statute. Until otherwise determined the

Returning Officer shall be the Registrar of the University.

- 18.2 Unless the Council determines otherwise the Returning Officer for Elections conducted under this Statute shall hold office until his or her removal by the Council, or his or her resignation, incapacity or death, in any of which events the Council shall appoint a Returning Officer in his or her place.
- 18.3 Every Election conducted under this Statute shall be conducted by the Returning Officer, but, if for any reason he or she is unable to fulfil the duties of his or her office at any referendum, the Council shall appoint a substitute, who, for the purposes of that referendum, shall be deemed to be the Returning Officer.

19 Date of Election and Term of Office

- 19.1 Elections conducted under this Statute shall be held at a time in the second semester in each Academic Year determined by the Returning Officer.
- 19.2 Successful Candidates shall hold office during the Academic Year immediately following their Election.

20 Students Eligible to Vote

- 20.1 The Returning Officer shall compile a list of Students eligible to vote in an Election, which will include all Students enrolled in the University at a date to be determined by the Returning Officer.

21 Notice of Election, Nomination of Candidates, and Closing Date for Nominations

- 21.1 No less than 30 days and no more than 60 days before the day or days fixed by the Returning Officer for an Election, except where a second election for want of candidates may be required in which case as soon as reasonably practicable, the Returning Officer shall give advance notice thereof in such University Publications as the Returning Officer sees fit and the University website and shall in that notice state the number of positions to be filled on the Council and request the nomination of Candidates in writing and a closing date for the receipt of such nominations.

22 Nomination of Candidates

- 22.1 To be eligible for Election a nominee must:
 - a be enrolled as a Student at the time when nominations close; save that a nominee who is a sitting Student member seeking re-election need not be enrolled as a Student at that time; and
 - b neither be employed for a continuous period of more than six months on a full-time basis by the University or under terms and conditions of fulltime employment set by the University nor have been so employed at any time during the two years preceding the date of the Election.

22.2 Nomination of Candidates for Election under this Statute must:

- a be in the form scheduled to this Statute; and
- b be signed by not less than two Students as the nominators; and
- c carry the written consent of the nominee and a declaration of eligibility; and
- d contain a declaration by the nominee as to whether the nominee has or has not ever been employed (as described in sub-section 22.1b) by the University and an undertaking to include such information in all material circulated in connection with the nominee's nomination.

22.3 Every Candidate for election may submit to the Returning Officer with his or her nomination paper a short statement about the Candidate:

- a The statement shall not exceed 250 words.
- b The statement must be submitted electronically.
- c The statement shall include the name, occupation, degrees, and any other relevant information about the candidate and may include a passport photograph of the Candidate.
- d The Returning Officer may require a Candidate whose statement does not comply with the requirements of this section to revise the statement so as to comply and may refuse to make available any statement which does not comply.
- e The Returning Officer shall ensure that the information in each statement which complies with this section is included in the Instructions for Voting sent to each Voter.

22.4 Every nomination paper shall be lodged with or given to the Returning Officer not later than noon on Nomination Day. The Returning Officer shall acknowledge receipt of every nomination paper on that nomination paper.

22.5 Every Candidate shall be nominated by a separate nomination paper.

23 Rejection of Nominations

23.1 The Returning Officer shall reject the nomination of a nominee who does not qualify for Election under sub-section 22.1

23.2 Where a nomination is rejected the Returning Officer will notify the nominee in writing giving the reasons for the rejection.

24 Withdrawal of Nomination

24.1 Any Candidate may withdraw his or her nomination at any time before noon on Nomination Day, by notice in writing to the Returning Officer, signed by the Candidate.

25 Death of Candidate Before Close of Nominations

25.1 Where before the close of nominations the Returning Officer receives advice that a Candidate who has been nominated and has not withdrawn his or her nomination has died or has become incapable of holding the position for which he or she is a Candidate, his or her nomination shall be treated as if the Candidate had withdrawn.

26 If Number of Candidates does not Exceed Number of Vacancies, Candidates to be Declared Elected

26.1 If the number of the Candidates does not exceed the number of vacancies to be filled, the Returning Officer shall, as soon as practicable after the close of nominations, by notice in such University Publications as he or she sees fit, declare the Candidate or Candidates so nominated to be duly elected to the Council.

27 Notice of Nominations and Election

27.1 If the number of Candidates exceeds the number of positions on the Council to be filled, the Returning Officer shall, as soon as practicable after the close of nominations, give notice in such University Publications as he or she sees fit of the day or days on which the Election is to be held and of the names of the Candidates.

28 Candidate May Retire

28.1 A Candidate at an Election may retire after the close of nominations at any time before a declaration has been made pursuant to section 26 of this Statute, or, where an Election is required to be held, at any time before the day or days of the Election, by notice in writing to the Returning Officer, signed by that Candidate.

28.2 Where the Returning Officer receives notice pursuant to section 28.1 above:

- a Where practicable, the Returning Officer shall before the day or days of the Election give notice of the retirement in such University Publications as he or she sees fit;
- b If a Candidate retires after the Instructions for Voting have been distributed, the Returning Officer shall take such steps as are practicable to advise Voters that the Candidate has retired;
- c Any vote cast for that Candidate shall be void.

28.3 If, by the retirement of a Candidate in accordance with section 28.1 above the number of Candidates is reduced to or below the number of positions to be filled on the Council:

- a The Returning Officer shall, by notice in such University Publications as he or she sees fit, before the day or days of the Election, declare the remaining Candidates to be duly elected; or

- b If the Candidate retires at such a time that it is not possible to give such a notice before the day or days of the Election, the Election shall not be held and the declaration shall be made on the day or days of the Election or as soon thereafter as possible.

29 Death or Incapacity of Candidate After Close of Nominations

29.1 Where:

- a After the close of nominations and before the day or days of the Election, any Candidate dies or becomes incapable of holding the position for which he or she is a Candidate; or
- b Any such Candidate dies or becomes incapable as aforesaid before the close of nominations but advice of his or her death or incapacity is received by the Returning Officer after the close of nominations, the provisions of section 28 of this Statute, so far as they are applicable and with the necessary modifications, shall apply as if the deceased or incapacitated Candidate had retired on the date of his or her death or incapacity, or, as the case may be, on the date on which advice of his or her death or incapacity is received by the Returning Officer.

30 Election to be Conducted Electronically

- 30.1 Unless sections 26.1 or 28.3 of this Statute apply, the Returning Officer shall conduct an Election by means of an electronic voting system.

31 Issue of Instructions for Voting

- 31.1 The Returning Officer shall, not later than the day or days on which the Election is to be held, send by email addressed to each Student at their University email address Instructions for Voting which:
 - a State that these are instructions for an Election of Student representatives on the Council;
 - b Give instructions for voting in that Election;
 - c State the day or days of the Election;
 - d State the name and Statement of the Candidates for the Election; and
 - e State the number of Student representative positions on the Council.

32 Method of Voting:

- 32.1 On receipt of the Instructions for Voting sent by the Returning Officer, the Student shall alone exercise his or her vote in accordance with the Instructions for Voting.
- 32.2 Where any Student:
 - a Is wholly or partially blind; or
 - b Suffers from any other disability which makes it difficult to cast his or her vote in the prescribed manner, that Student's vote may be recorded by

another person in accordance with the instructions of the Student.

33 Invalid Votes

- 33.1 A vote shall only be valid if:
 - a The Student's identification number is entered into the electronic voting system;
 - b The Student's duly chosen password is entered into the electronic voting system;
 - c The Student has not yet recorded his or her vote; and
 - d The Student's vote is recorded on the day or days of the Election.

34 Counting of Votes

- 34.1 Votes shall be counted by such means as are prescribed by the Returning Officer.
- 34.2 The Returning Officer shall make arrangements for votes to be counted as soon as reasonably practicable after the close of voting.

35 Declaration of Result

- 35.1 No later than one month after all the votes have been counted, the Returning Officer shall declare, by means of notices in such University Publications as the Returning Officer sees fit, the result of the Election, being the name or names of the Candidates elected as Student representatives on the Council.

36 Recount

- 36.1 Where any Student or member of the Council has reason to believe that the declaration by the Returning Officer of the result of the Election is incorrect, and that on a recount thereof the result of the Election might be found to be different, he or she may within seven days after the declaration, apply to the Returning Officer for a recount of the votes.
- 36.2 Every application for a recount in accordance with section 36.1 above shall:
 - a Be accompanied by a deposit of \$500, which shall be refunded if, following a recount of the votes, the declaration by the Returning Officer of the result of the Election proves to be incorrect;
 - b State the grounds upon which the applicant believes that the declaration by the Returning Officer of the result of the Election is incorrect, and that on a recount thereof the result of the Election might be found to be different; and
 - c State the name of the applicant and whether he or she is a Student or member of the Council.
- 36.3 If the Returning Officer is satisfied that an applicant for a recount has reasonable cause to believe that the Returning Officer's declaration of the result of the Election may be incorrect and that on a recount the result of the Election might be found

to be different, the Returning Officer shall, as soon as reasonably practicable after receiving the application and deposit as aforesaid, arrange for a recount of the votes to be made by such means as the Returning Officer thinks fit.

36.4 Where the Returning Officer arranges for a recount of the votes in accordance with section 36.3 above, he or she shall:

- a Notify the applicant in writing of the result of the recount; and
- b Where the result of a recount is that the declaration by the Returning Officer of the result of the Election is incorrect, declare, by means of notices in such University Publications as he or she sees fit:
 - (i) That upon a recount of the votes, the declaration by the Returning Officer of the result of the Election was found to be incorrect; and
 - (ii) The Candidates elected as Student representatives on the Council.

37 Destruction of Votes

37.1 The Returning Officer shall, no earlier than one month after the declaration of the result of an Election, and if an application for a recount is made, not before the declaration of the result of the Election, arrange for all records of Students' votes to be destroyed in a manner which ensures the confidentiality of voting information is preserved.

38 Vacation of Office

38.1 A member of the Council elected under this Statute ceases to hold office as a member if that member becomes employed for a continuous period of more than six months on a full-time basis by the University or under terms and conditions of full-time employment set by the University. The casual vacancy occurring for that reason shall be filled in accordance with section 176 of the Act.

39 Casual Vacancies

39.1 A casual vacancy arises in the office of a Student Representative on the Council during his or her term if he or she:

- a Dies; or
- b Becomes disqualified to hold office under this Statute; or
- c Is declared bankrupt; or
- d Becomes mentally disordered within the meaning of the Mental Health (Compulsory Assessment and Treatment) Act 1992; or

- e Resigns office by notice in writing to the Chancellor; or
- f Is convicted of an offence and sentenced to imprisonment; or
- g Is absent without leave from three consecutive meetings of the Council.

39.2 A Casual Vacancy that occurs within [three] months of the end of a term of office of a Student Representative need not be filled.

39.3 Where a Casual Vacancy occurs any earlier in the term of office of a Student Representative it shall be filled for the remainder of the term in accordance with section 176 of the Act:

Signature of Nominee

Court of Convocation Statute 2007

Title and Commencement

1. This Statute is made pursuant to section 4 of The University of Auckland Act 1961, as amended by the Education Act 1989 and may be cited as the Court of Convocation Statute 2007. It comes into force on 30 March 2007.

Interpretation

2. In this Statute:
 - 'Act'** means the Education Act 1989
 - 'Candidate'** means a person duly nominated and eligible for election in accordance with sections 20 and 21 of this Statute.
 - 'Communicate'** includes printed and electronic communications.
 - 'Council'** means the Council of The University.
 - 'Election'** means an election of Court of Convocation representatives to the Council by the Court of Convocation.
 - 'Graduate'** means a person who has graduated from The University of Auckland.
 - 'Member'** means a person who is enrolled on the Register in accordance with section 5.
 - 'Register'** means the list of Members of the Court of Convocation as described in section 4 and 5 of this Statute.
 - 'Returning Officer'** shall be the Registrar of the University.
 - 'Signature'** includes an electronic signature.
 - 'Roll'** means the roll of Voters eligible to vote in an election prepared in accordance with this Statute.
 - 'University'** means The University of Auckland.
 - 'Voter'** means a Member whose name is shown on the Roll with a contact address sufficient, assuming the validity of such address, to enable the Voter to receive the Voting Documents.
 - 'Voting Form'** means the form or forms prepared in accordance with section 32 on which the vote is recorded and includes both the electronic and the hard copy versions of the Voting Form distributed to Voters.
 - 'Voting Documents'** include the documents which list the names of the candidates, the envelope in which the postal Voting Form must be placed, instructions for casting a valid vote and those Candidate information statements which comply with section 26 of this Statute and, for the avoidance of doubt, includes the Voting Form.

Register

3. The Returning Officer shall ensure that the Register is prepared and maintained. The Register may be maintained in such a format (or formats) as the Returning

Officer, after consultation with the Council, determines.

4. The Register shall (subject to section 5) contain the names and the contact addresses of persons entitled to be enrolled on the Register under section 4 of The University of Auckland Act 1961 and under section 5 of this Statute.
5. Consistent with the provisions of subsection 5 of section 4 of The University of Auckland Act 1961 each person shall be entitled to have his or her name enrolled on the Register of the Court of Convocation (without fee) who:
 - (i) Is a graduate of the University; or
 - (ii) Not being such a graduate is a professor or graduate full time member of the staff of the University.
 - (iii) Being a graduate of The University of New Zealand is not by reason of that qualification enrolled on the Register of the Court of Convocation for any other University in New Zealand, and
 - (a) under section 23A of the New Zealand University Act 1908 was enrolled or entitled to be enrolled on the register of the Court of Convocation of The University of Auckland at the 31st day of December, 1961, or
 - (b) was an undergraduate member of The University of Auckland at the 31st day of December, 1961, and became a graduate of The University of New Zealand after that date.
6. A person who is not enrolled on the Register and who believes that he or she is entitled to be enrolled on the Register under the provisions of this Statute or section 4 of The University of Auckland Act 1961, may apply to the Returning Officer for enrolment. Each application for enrolment shall contain such evidence of the facts and matters the Returning Officer may reasonably require to determine whether or not the applicant satisfies the requirements for enrolment on the Register.
7. A Member may, by notifying the Returning Officer in writing, object to the inclusion on the Register of the name of a person who does not satisfy the requirements of section 5.
8. The Returning Officer shall enquire into and decide whether to uphold or dismiss any objection made under section 7.
9. A person who believes on reasonable grounds that a decision or act of the Returning Officer relating to the Register has unfairly disadvantaged that person may appeal that decision or act to the Council by written notice to the Chancellor setting out the grounds for the appeal. The

written notice must be communicated to the University not later than fourteen days before the date of an impending election.

10. Every appeal shall be heard and determined by the Council or a Committee appointed by the Council and the Returning Officer shall amend the Register in such manner as the Council or the Committee when deciding the appeal directs.
11. The Returning Officer, having sighted such evidence as the Returning Officer may reasonably require, shall:
 - (a) remove from the Register the name of a person who has died or has ceased to be entitled to be enrolled;
 - (b) amend the name of any person appearing on the Register which has changed by marriage, deed poll or other lawful reason; and
 - (c) amend the contact address or addresses of a Member appearing on the Register being satisfied that the address or those addresses have changed.
12. The Returning Officer may, from time to time, communicate with Members seeking details of current contact addresses or to advise of changes to voting procedures.

Elections to the Council of Court of Convocation Representatives

13. The date of each election and number of members to be elected by the Court of Convocation shall be determined by the Returning Officer in accordance with the Act and reported to the Council.
14. Each Voter will be entitled to receive Voting Documents. For the election to be held in 2007, Members may elect to receive Voting Documents either by post or by email. Each Member who has an email address recorded on the Register shall receive Voting Documents by email unless:
 - (a) they have elected not to receive the Voting Documents; or
 - (b) they have elected to receive the Voting Documents by post.
15. For each subsequent Court of Convocation election after 2007, the Council will determine whether it is appropriate to continue a dual (postal and electronic) voting system. The Council, in making that determination, shall consider the desirability of maintaining access to a voting system by the maximum practicable number of Voters.

Roll

16. The Returning Officer shall prepare the Roll for the election. Subject to clauses 17 and 18 below, every member on the Register shall be included on the Roll.
17. The Returning Officer shall ensure that any Member who has elected not to receive Voting Documents is not listed on the Roll.
18. A Member who previously elected not to receive Voting Documents may be listed

on the Roll, provided that they advise the Returning Officer in writing that they wish to receive Voting Documents at least twenty one days before the date on which the election is to be held.

19. The Returning Officer shall ensure the Roll is closed at 5 p.m. on the twenty-first day immediately preceding the day of the election and the Roll shall continue to be closed and no further names entered on the Roll for that election.

Nomination of Candidates

20. Whenever an election is to be held the Returning Officer shall, not less than thirty five days before the election, by notice in at least two University publications, on the University Website (<http://www.auckland.ac.nz>), and using such other communication media as the Returning Officer determines, announce the date of the election, and call for nominations of Candidates to be lodged with the Returning Officer on or before a day, to be fixed by the Returning Officer, being not less than 10 days from the date of publication of the first notice. The notice shall be in the following form (or form to the like effect):

The University of Auckland

Election of Member(s) of the Council by the Court of Convocation for The University of Auckland.
An election of member(s) will be held at 5.00 pm. on the day of 20..... at the office of the Registrar of the University, Princes Street, in the City of Auckland.

No person shall be recognised as a candidate at this election unless he or she shall have been previously nominated in a document signed by two electors, and unless such nomination paper shall have been delivered to the Returning Officer by postal delivery or otherwise not later than 5.00 pm. on the day of 20.....

The roll of electors will remain open for inspection and additions until 5.00 pm. on the twenty-first day before the election and will then be closed. The Returning Officer will then communicate the Voting Documents to the Voters.

..... Returning Officer/contact details

21. To be eligible for election and to remain in office if elected, a nominee must:
 - (a) Be a Member or be entitled to be a Member; and
 - (b) Neither be employed for a continuous period of more than six months on a full-time basis by the University or under terms and conditions of full-time employment set by the University nor have been so employed at anytime during the five years preceding the date of the election;
 - (c) Not be enrolled as a full-time student (as the term applies under current University enrolment policies); and
 - (d) Be able to attend Council meetings and participate in Council business, including serving on Council Committees.

22. The Returning Officer shall reject the nomination of a nominee who:
 - (a) Does not qualify for election under section 21; or
 - (b) Not being enrolled as a member of the Court of Convocation does not become enrolled within the time notified in writing to the nominee by the Returning Officer.
23. Where a nomination is rejected the Returning Officer will notify the nominee in writing giving the reasons for the rejection.
24. A member of the Council elected under this Statute ceases to hold office as a member if that member ceases to be eligible for election in terms of section 21. The casual vacancy occurring for that reason shall be filled in accordance with section 176 of the Act.
25. Nomination of Candidates for election under this Statute must:
 - (a) Be in the form prescribed in section 26; and
 - (b) Be signed by 2 Members whose names are on the Roll; and
 - (c) Carry the written consent of the nominee and a statement of eligibility.
26. Nomination Papers shall be in the following form or a form to the like effect:

<p style="text-align: center;">The University of Auckland</p> <p>Election to be held on the day of 20.... of (number) Members of the Council by the Court of Convocation for The University of Auckland. We and (print full names) being duly qualified voters, hereby nominate (print full names) for election to the Council by the Court of Convocation for The University of Auckland. Datedday of20.... Signatures of Nominators (being Members whose names are on the Roll)</p> <p>_____</p> <p>_____</p> <p>As nominee I consent to this nomination and declare that: (a) either (strike out the option which does not apply) I am enrolled as a member of the Court of Convocation: or I am entitled to be enrolled as a member of that court and will become so enrolled before the Election Date (failing which my candidacy will be deemed to be withdrawn) and (b) I am not now employed for a continuous period of more than 6 months on a full-time basis by the University or under terms and conditions of full-time employment set by the University and have not been so employed at any time during the 5 years preceding the date of the election; and (c) I am not enrolled as a full-time student of the University (d) I am able to attend Council meetings and participate in Council business, including serving on Council Committees.</p> <p>_____</p> <p>Signature of Nominee</p>

27. Each Candidate for election may submit to the Returning Officer with his or her nomination paper a short statement about the Candidate:
 - (a) The statement shall not exceed 250 words.
 - (b) The statement must be submitted electronically.
 - (c) The statement shall include the name, occupation, degrees, and any other relevant information about the candidate and may include a passport photograph of the Candidate.
 - (d) The Returning Officer may require a Candidate whose statement does not comply with the requirements of this section to revise the statement so as to comply and may refuse to make available any statement which does not comply.
 - (e) The Returning Officer shall ensure that the information in each statement which complies with this section is included in the Voting Documents made available to each Voter.
28. If the nominations received do not exceed the number of vacancies, the Returning Officer shall, on the nominated day of the election, declare the candidate(s) duly elected.

Voting

29. If there are more Candidates than the number of vacancies to be filled, as soon as reasonably possible following the closing of the Roll, the Returning Officer shall issue the Voting Documents to the Voters in accordance with the provisions of this Statute.
30. Notwithstanding anything set out above, the Returning Officer shall, prior to the date of the election and in a manner consistent with section 14 or section 15 of this Statute, communicate the Voting Documents to any Voter whose name appears on the Roll and who notifies the Returning Officer in writing that they have not received the Voting Documents.
31. Where a Voter has elected to receive the Voting Documents by post the Voting Documents shall be sent and received in sealed envelopes issued by the Returning Officer and shall be in the form prescribed by this Statute (or to like effect). The completed Voting Form must be received by the Returning Officer on or before the day and time fixed for holding the election, or posted within New Zealand to the Returning Officer in a sealed envelope on or before that day. The Voting Documents posted to the Voter will be accompanied by an envelope, addressed to the Returning Officer. The Voter must place their vote in the envelope, seal the envelope, complete the declaration and fill in the details required on the panel on the back of the envelope which will be in the form following, or to like effect:

The Voter must sign his/her name and complete the address panel below.

I
 (Full name in block letters)
 declare that I am not, by reason of my being
 a graduate of The University of New Zealand,
 enrolled on the register of the Court of Convocation
 of any University in New Zealand other than The
 University of Auckland.
 Signature of Voter
 Address

 Email address (only supply this if you are not
 voting by post in future elections)

 (I request the Registrar to record my address on
 the roll as above.)
 If recorded on University records under another
 name, eg, maiden name, please state

32. The Voting Form on which a Voter records their vote shall be in the form following or to like effect:

Voting Form
Council of The University of Auckland
Election of Members

By the Court of Convocation
 for The University of Auckland

Directions

There are.....vacancies. The Voter may vote for
 any number of candidates up to the maximum
 number of candidates to be elected.
 The Voter is to put a cross (x) in the square beside
 the name of each candidate for whom he or she
 desires to vote.

33. Where a Voter has supplied a valid operating email address and is not a Voter who has requested to vote by post, the Returning Officer shall forward to that Voter at their email address:
- the electronic address of the site at which the Voter shall vote;
 - instructions for accessing the site;
 - a unique personal identifier; and
 - the password the Voter must use to access the Voting Documents and record their vote.
34. The election shall close at 5.00 p.m. on the day of the election.

Counting of Votes

- All valid electronic votes received by the close of the election shall be counted electronically and appropriate steps taken to record those votes and the results for scrutineering purposes.
- For each election where postal voting is permitted, but not thereafter, the results of the counting of the valid electronic votes shall be withheld until all valid postal voting papers are received and counted, provided the Returning Officer is satisfied that each such postal vote counted was posted in accordance with the provisions of section 31 of this Statute and received by the Returning Officer before the close of the sixth day after the day of the election. On the seventh day after the day of the election the Returning Officer shall open the postal votes. As soon as the voting papers have been checked against the Roll and against the electronic votes to ensure no Voter has voted more than once, the name and address shall be removed from each voting paper before the votes are counted.
- Each candidate shall be entitled to nominate a scrutineer, who shall have the right to be present when the postal votes are counted and to inspect records of electronic voting, consistent with best practice in local body elections.
- Upon completion of the counting of votes, the Returning Officer shall forthwith declare the results of the election.
- The Returning Officer is authorised to destroy all the Voting Forms three months following the date of the official announcement of the result of the election.

General

- The Returning Officer shall, subject to the provisions of this Statute, determine conclusively all questions of detail concerning the election.
- The Council Elections (Court of Convocation Representatives) Statute 1990 and the Court of Convocation Register Statute 1990 are repealed.

STAFF AND STUDENT INFORMATION

Accommodation Services

Accommodation Services offer a range of accommodation options to New Zealand and international students. These are:

- Halls of Residence
- Self-catered apartments and flats
- Private accommodation in flats and homestays.

The University of Auckland residences have been independently quality-assured by Qualmark and have been graded from 3 Star Plus to 4 Star Plus in the Student Accommodation category. They have also been peer assessed and accredited by the New Zealand Association of Tertiary Education Accommodation Professionals.

Halls of Residence

Three of the four Halls of Residence (Grafton Hall, International House and O'Rorke Hall) are fully-catered while Huia Residence offers self-catered facilities and an optional meal plan. Conveniently located close to the City Campus and Grafton Campus, the Halls provide students with excellent study facilities and a supportive living environment. Social and sporting activities, study groups and study tutorials are arranged by the Residential Management teams. Libraries, internet access, games, television rooms and outdoor areas such as tennis or volleyball courts are some of the facilities available at most of the Halls. The Halls are particularly suitable for recent school-leavers but offer accommodation to students at all stages of their academic career. O'Rorke Hall has larger rooms that meet the needs of postgraduate students. All residents enjoy access to the University Recreation Centre membership as part of their fees.

Self-catered Flats

More mature students are accommodated at the Number Fourteen Whitaker Place Flats and at Parnell Student Village in partially furnished accommodation in four to six bedroom apartments. Accommodation particularly suitable for postgraduate students is available at the Park Road Student Flats in furnished bedsit apartments en-suite, sharing a communal kitchen. Unfurnished apartments for families are provided at The Royal. The costs of utilities, such as electricity, are included in the fees. Recent school leavers are not eligible to apply for accommodation in these properties.

Private Accommodation in Flats and Homestays

In a homestay, a student lives with a family in a separate room, with meals and laundry service provided. Accommodation Services use a professional placement service to match students with the homestay situation that best suits their needs. A placement fee is charged. International students under 18 years old can only be accommodated in a homestay.

Information about private flats is available on www.nzflatmates.co.nz. Students will be responsible for payment of their utilities and will have to provide their own furniture.

Applications

Applications for University accommodation are made online on www.auckland.ac.nz/accommodation from 1 August of the preceding year for the full academic year or for Semester One. Semester Two applications can be made from 1 April of the year of study. There is no closing date but domestic applicants are urged to apply before 1 October as the first offers and Residential Contracts are sent out soon thereafter. International students are recommended to apply by 1 November. There is a \$75 application fee for all applicants, partially refundable under certain conditions. A signed Residential Contract and payment of a deposit of \$650 will be required to confirm acceptance. Full details about how to apply and the process are on the website.

Catering and Room Bookings

Accommodation Services offer a full catering service to a variety of functions, conferences and other University events and also deal with bookings by the public for University lecture theatres for seminars and functions.

Academic and Visitors' Accommodation

Academic visitors can stay at the apartments of Old Government House during the year. Applications may only be made by the faculties or departments for guests at Old Government House. Visiting interns and researchers can apply to stay at Huia Residence, depending on availability.

Summer and Conference Accommodation

From mid-November to mid-February, summer accommodation is offered at the Halls of Residence and the self-catered apartments at special summer rates to students attending Summer School or working over the summer vacation period. Other visitors to Auckland, including sports teams, conference delegates and educational tour groups, are also hosted at some of these residences. Special conditions and rates apply and pre-booking is required. Details of rates and the booking forms are on the website.

Contact Details

Full details about all accommodation options are available on the website, or contact:

Tamaki Sports Facilities

UniSports

The UniSports Training Centre is a facility of UniSports Centre for Sports Performance located in West Campus Colin Maiden Park. It is a venue for testing and training athletes, and for teaching and research. However, it is also open for student and public use. The centre's facilities include fitness equipment and a main hall with a state-of-the-art sprung wooden floor. It also has highly qualified staff who provide training advice and conduct fitness assessments. Membership is available on a yearly or six-monthly basis and casual workouts are also available.

UniSports Training Centre Hours:

Monday to Thursday	6am–9pm
Fridays	6am–8pm
Weekends	9am–1pm
Phone: +64 9 373 7599 ext 82541.	

Sports Fields and Facilities

There are high quality cricket, rugby and soccer fields on the Campus in Colin Maiden Park. Members of staff and students may use them subject to availability and weather conditions.

Phone: +64 9 373 7599 ext 83942 or +64 21 437 962 or Grounds and Precinct Manager +64 9 373 7599 ext 87389 or +64 21 775 948

Adjacent to the Campus are two sports centres:

- Scarbro Tennis Centre, which offers discounted rates to University staff and students to use indoor and outdoor tennis facilities. Phone: +64 9 528 9782
- Auckland Netball Centre. Phone: +64 9 570 0030 ext 203.

Chaplaincy

There is a team of chaplains who work together within the University providing pastoral care and support for students and staff.

Chaplains

The Catholic Chaplain can be contacted through Newman Hall, and the Maclaurin Chaplain through Maclaurin Chapel.

Newman Hall

Newman Hall is the centre for Catholic Chaplaincy and is situated at 16 Waterloo Quadrant. Mass is celebrated each weekday in the Newman Hall Chapel and the sacrament of reconciliation is available on request. Newman Hall is also a place for prayer, recreation, study and activities organised by the Catholic Students Society (Cathsoc).

Maclaurin Chapel

Maclaurin Chapel complex is situated on the corner of Princes Street and Waterloo Quadrant and consists of a Chapel, study hall and offices. The Chapel is open 9am–5pm weekdays and may be used as a place of prayer for students and staff. The hall may be used by students for study and relaxation. A theological library is situated in the hall and books may be borrowed. The Chapel complex may be used by student and staff groups and hired for meetings or services of worship.

Early Childhood Centres

The University operates seven early childhood centres for children of students and staff. Children may attend any of these centres for a minimum of four hours per day. The six-hour sessions are very popular and full day care caters for the children of the staff of the University.

All of the centres are regularly reviewed and chartered by the Ministry of Education. The University policy is to employ trained and experienced early childhood educators. Early enrolment for places at all of the centres is advised.

Summer School

Summer School for preschool children is available at the early childhood centres from early January. Early enrolments are necessary. Enrolment forms are available in October from each of the centres. The venue for summer school will be notified to parents at the time of enrolment.

For further information please contact either the centres or the administration office. Phone: +64 9 373 7599 ext 85894

The English Language Self-Access Centre (ELSAC)

The English Language Self-Access Centre is part of the Centre for Academic Development and provides support to University of Auckland students who require English language enrichment for success in their programmes of study. At ELSAC students have access to a range of resources including language advisers, collaborative language learning activities, hard copy and computer-based language learning tools, audio programmes and DVDs. All the language skills (listening, speaking, reading and writing) and systems (vocabulary and language structure) can be addressed. ELSAC is located on Level 1 of the Kate Edger Information Commons, opens every weekday and is free to all enrolled students. There is more information on the website at www.elsac.auckland.ac.nz

Information Commons Services (University Library)

The Kate Edger Information Commons on the City Campus, the Grafton Information Commons on the Medical and Health Sciences Campus, and the Epsom Information Commons on the Epsom Campus provide a learning environment with a variety of group and individual study spaces, multi-purpose computers and easy access to core information resources and technologies for all students. Students are able to retrieve information from the library databases, e-journals and e-books, access course work through Cecil, the University's e-learning system, send email and browse the Internet, use MS Office and other specialist programs – all on the same computer.

The Kate Edger Information Commons has over 1300 study and casual seats, including around 500 multi-purpose computers and 38 laptops. It also houses the Short Loan collection for Arts, Business, Science and Engineering. The Grafton Information Commons has over 100 multi-purpose computers, 10 laptops and a number of group study seats. The Epsom Campus provides students with access to about 60 multi-purpose computers and 13 laptops. Students also have access to printers, scanners, photocopiers and wireless networking technology in these locations.

The Information Commons facilities and services offer opportunities to develop IT, information literacy, English language and learning skills in a supportive environment. The IC Help Desk is the main student IT help desk and provides walk-in, roaming, email and telephone support with all aspects of student computing resources and services including NetID and password, email, Cecil, Library resources, and using Information Commons computers. The IC Help Desk operates in all Information Commons locations.

More information, including hours of opening and other operational details, can be found on the Information Commons website at www.information-commons.auckland.ac.nz

The Research Office

The Research Office provides information and services in support of research activities carried out within the University and funded from public domain sources including government agencies, non-commercial foundations, trusts and charities.

The objective of the Office is to assist the University community in gaining and managing research grants and contracts. The strategy is to ensure that the University engages effectively with funders, end users and the private sector nationally and internationally,

and to support Faculties in the development of funding applications across disciplines and organisations.

The Office incorporates the Performance Based Research Fund Office and the Research Ethics and Biological Safety Administration Office, and provides secretariat services and support for:

- The University of Auckland Research Committee (UARC)
- The University of Auckland Human Participants Ethics Committee (UAHPEC)
- the Biological Safety Committee (UABSC)
- the Animal Ethics Committee (AEC).

The UARC is responsible for developing research policy, and the allocation of research funds within the University through the General Research Support Pool. All policies relating to research are to be found in the Research Policy Manual. The Manual and other research information are available on the Research website www.researchinfo.auckland.ac.nz.

The UAHPEC, the UABSC, and the AEC are responsible for the assessment of applications for approval to use human participants, biologically active organisms, and animals conducted by The University of Auckland researchers. Such research activities must have the necessary approvals prior to the research commencing.

The Research Office is located on the second and third floors of 76 Symonds Street.

Phone: +64 9 373 7599 ext 87956

Open: Monday to Friday 8.30am–5pm

Note: The Research Ethics and Biological Safety Administration Office is open Monday to Thursday 8am–4.30pm, and Friday 8am–3.30pm.

Student Counselling

Student Counselling is a free service that provides counselling on a wide range of issues including: stress, anxiety, depression, relationship issues, and the impact of personal difficulties on academic performance. The service also provides students and staff with support in the event of an emergency on campus.

The members of the team are all well-qualified, experienced counsellors and psychologists. Where possible, culturally or gender appropriate counsellors are available.

An initial appointment to begin counselling can be booked ahead or on the day, after which further counselling is available as required. There are also Duty Counsellor sessions available daily for emergencies.

Level 3, Student Commons Building, 2 Alfred Street
Phone: +64 9 373 7599 ext 87681
Open: Monday to Friday 9am–5pm (and some evenings). Hours are available at the Grafton Campus on Wednesday and Thursday.

Student Learning Centre

The Student Learning Centre (SLC) is staffed by lecturers and tutors who facilitate the development of academic skills for students of the University. Students at all levels, from first year undergraduate to PhD, are catered for.

A wide range of skills are developed including academic writing, reading and note-taking, critical thinking, study organisation, workload management, memory and concentration, test and exam skills and motivation. Maths and statistics workshops are offered for students who have not studied these subjects for some years or who do not have the assumed background for first year courses in these subjects.

The Centre caters for the academic needs of Māori students through its Te Puni Wananga Programme, and for the needs of Pacific Islands students through the Fale Pasifika Programme.

The Centre has a comprehensive postgraduate skills development programme offering courses on topics

such as thesis writing, research design and data analysis. The Computer Skills Development Programme provides courses and online resources to upskill students on computer and software use at all levels.

The SLC is committed to providing learning support to students who have English as an additional language (EAL students). It provides services with a wide range of topics including sentence/paragraph writing, grammar, writing style and oral presentation skills. The Language Exchange Programme provides students with learning support by offering a comprehensive language skills exchange service as well as classes to practice academic conversation. In addition, a number of tutors at the Centre can assess the needs of students who may have specific learning difficulties and provide the appropriate advice and/or support.

The SLC offers individual consultations by appointment to those students requiring learning support in addition to the assistance provided in workshops. The purpose of both individual consultations and workshops is to empower students to carry out academic tasks independently. Students are also encouraged to access online skills development resources.

The Centre's main office is Room 320 on Level 3 of the Kate Edger Information Commons Building, 9 Symonds Street. The Centre is also located in the Student Resource Centre, Room 710.110 at the Tamaki Campus; in Z Block at the Epsom Campus and at the Tai Tokerau Campus.

There is a small registration fee for the use of the Centre. Visit the SLC website at www.slc.auckland.ac.nz

The University Library

The University Library system consists of the General Library, on the corner of Princes and Alfred Streets, together with 12 specialist libraries: Architecture, Audiovisual, Business Information Centre, Engineering, Fine Arts, Davis Law, Leigh Laboratory, Philson Medical and Health Sciences, Music and Dance, Sylvia Ashton-Warner Library (Education), Tamaki (Science and Population Health), and Tai Tokerau (Education). The prime focus of the General Library is to serve the needs of the staff and students of the faculties of Arts, Science and Business and Economics; it also houses Special Collections and central infrastructural services for the Library system.

The Library manages three Information Commons facilities: the Kate Edger Information Commons on the City Campus, the Grafton Information Commons on the Medical and Health Sciences Campus and the Epsom Information Commons on the Epsom Campus. Access to The Catalogue and electronic resources is available at all times via the Library's website (www.library.auckland.ac.nz). Hours of opening for all libraries are available via the Library's website. Hours of opening for the Information Commons, together with other operational details, are available at www.information-commons.auckland.ac.nz

ASSOCIATIONS

The New Zealand University Students' Association

NZUSA is a federation of five of the eight university students' associations (Auckland, Massey Palmerston North, Massey Albany, Victoria and Lincoln). In partnership with Te Mana Akonga, the national Māori university students' association, NZUSA represents university students nationally.

NZUSA has an office in Wellington which houses the two full-time Co-Presidents, a Research Officer and the NZUSA Women's Network Coordinator, in conjunction with Te Mana Akonga, the Aotearoa Polytechnics Students' Union and Student Job Search, with whom the building is shared.

NZUSA was established to represent the common and collective concerns of students. It is a political body, which works for change for students. Government,

media and other national bodies look to NZUSA as the voice for students. As such, NZUSA gives Auckland University Students Association political clout, as well as providing a vehicle for student unity.

Auckland University Students' Association

The Association is an Incorporated Society which was founded in 1891. For more than 100 years the Students' Association (AUSA) has acted for the benefit of Auckland students both within and outside the University. The student body is an integral part of the University community and the members of AUSA are involved not only in the control of the University but also in fostering social, political, cultural and sporting activities within the University. AUSA is a society that is concerned with the problems and needs of students in their widest context.

In 1999, a referendum was held and voluntary membership of Associations of Students was adopted. Membership of AUSA is currently free to all enrolled students of the University.

Activities

There are over 120 clubs and societies affiliated to the Association covering many spheres of student interest. The sports clubs cater for a range of sporting interests and most participate in the local Auckland inter-club competitions and in national tournaments. The cultural societies cater for a wide range of religious, academic, social, cultural and political interests.

Administration

The control of AUSA's business and affairs lies with the Executive Committee which is elected annually. It comprises a full-time President, four part-time Officers and 13 portfolio holders.

Advocacy and Representation Services (WAVE)

AUSA also provides representation and advocacy services to support students in the form of the Welfare, Advocacy, Voice and Education (WAVE) service. Through this service, AUSA administers the Class Representative System and Student Committee Representatives (Class Representatives, who are elected to sit on Central University committees), the Advocacy Service and the Student Advocacy Network (trained student volunteers), who can help to resolve

a variety of academic, financial, personal and social issues, and a Student Parent Resource Officer (SPRO) who assists parents on campus. The WAVE Department is located on the second floor of the Kate Edger building and staff can be contacted by phone on +64 9 309 0789 ext 202, or via email at advocate@auckland.ac.nz.

Cafeterias and Tavern

AUSA operates a number of campus cafeterias (QUAD Cafe, Engineering, HSB, Law School, and the 'HANGAR coffee bar'), as well as the City Campus tavern 'Shadows', 'Toasted Bar and Grille' licensed cafe and the 'Cap and Gown' functions lounge.

Campus Radio 95bFM

Campus Radio 95bFM provides an alternative-programme radio station on campus, based in the Student Union.

University Book Shop

AUSA has a full interest in the University Book Shop which stocks university texts and other books, stationery, Alumni memorabilia etc. AUSA members are entitled to a 10 percent discount.

For further information contact AUSA Reception, AUSA House, 4 Alfred Street. Phone: +64 9 309 0789, email ausa@auckland.ac.nz or visit the website at www.ausa.auckland.ac.nz

UNIVERSITY POLICY

Mediation and Harassment Policy

Mediation

The guiding principle adopted by The University of Auckland is to encourage individuals to work together to resolve their disputes or disagreements. To this end, it may be helpful to seek assistance from the Mediation Service. Mediators assist people to have difficult conversations with each other by facilitating a process which is focused on clarifying what the problem/s might be and finding mutually acceptable solutions. If a problem or dispute has arisen discussing it with the Mediator sooner rather than later is likely to increase the chances of a satisfactory outcome.

The University of Auckland provides a Mediation Service accessible to all members of the University Community, including academic, general and management staff and by students. This service is free, private and informal.

Harassment

The University is a large and complex community made up of diverse groups of people from many different backgrounds. The University is committed to providing an environment which is free from harassment and discrimination but sometimes difficulties with another person's behaviour or attitudes may arise. If behaviour

is serious, ongoing, unwanted, or offensive, and the person has been asked to stop but they continue, it may be harassment.

Discrimination and harassment are unethical as well as illegal and therefore there are procedures in place to investigate and deal with such matters. In the first instance the Mediator can assist by listening and discussing options. Anyone who considers they have experienced harassment is encouraged to contact the Mediation Service.

Student Learning and Research Grievances

If a grievance or dispute or problem arises between a student and their supervisor/s it is recommended that this is addressed as soon as possible. The University considers that in the first instance, attempts should be made to resolve any dispute in an informal way if possible. The rationale for this is the efficient and timely handling of any problems.

Informal processes include raising the matter with the other person/people or approaching the Departmental Postgraduate Advisor or Head of Department or by approaching the University's Mediation Service.

It can also be helpful to consider the suggestions available in *Policy for Resolution of Research Problems – Postgraduate Research Students*. Visit

www.auckland.ac.nz >Current students >Academic information >Postgraduate >Postgraduate policies and guidelines.

Where a student considers that it is advisable to use an advocate for assistance in dealing with the matter/s, they should approach the AUSA or WAVE representatives (www.ausa.auckland.ac.nz/WAVE/advocacy.html) or alternatively bring a friend or support person to any meeting.

All informal attempts to resolve any issues are in confidence and are free for all staff and students of the University. If informal processes are unsuccessful, any entitlements to more formal resolution are preserved. The formal processes are also set out in the links to Postgraduate policies and guidelines or are available from the ClockTower Student Information Service or from AUSA and WAVE.

To make an appointment to discuss your situation in confidence, please contact the Mediation Service at mediation@auckland.ac.nz or phone +64 9 373 7599 ext 88905.

Equity Strategy

The University of Auckland is committed to maintaining a diverse, collegial, scholarly community in which people are valued, respected, and treated equitably. Its status as a university of international standing, recognised for excellence in teaching and research, and its service to local, national and international communities, requires an academic environment in which talented staff and students from a wide range of backgrounds can flourish.

The University's equity strategy is conducted in compliance with statutory obligations under the State Sector Act 1989 and the Education Act 1990. It also acknowledges our special responsibilities under the Treaty of Waitangi. The University's academic and cultural life benefits from a strong core of Māori students and staff, and the contributions they make to Māori intellectual and social advancement. The production of high quality research on Māori issues, and of Māori staff and students with advanced academic and professional qualifications are a significant aspect of our service to New Zealand.

The equity strategy also aims to deliver equity outcomes to Pacific people and other ethnic groups, to those from low socio-economic backgrounds, to those with disabilities, to women in areas where they are under-represented, and to general staff.

A university serving a small country must draw upon the widest possible pool of gifted people for its students and staff, in order to fulfil its academic potential. A diverse and high calibre student body contributes to a rich teaching and research environment, producing leaders for all sectors of New Zealand society. A diverse and high calibre staff can best cater for an increasingly cosmopolitan, multi-ethnic student body, linking the University with its regional and global communities.

The University opposes unfair discrimination on the grounds of gender, race or colour, ethnic or national origins, employment status, disability, family status, marital status, sexual orientation, gender identity, age, religious or ethical belief, political opinion, or any other grounds. The equity strategy thus requires that all selection, appointment, promotion and evaluation processes should be based on impartial assessment of merit and the definition of merit is inclusive of diverse skills and contributions. Where necessary, procedures will be reviewed, training provided and assistance given in achieving the successful delivery of equal opportunities.

The development and monitoring of the equity strategy (see the Equity Office Strategic Plan) are the responsibility of the Pro Vice-Chancellor (Equity), together with the Equity Office and the Equity Committee. Faculty equity committees also contribute to Equity Office planning, reporting and consultation. Responsibility for disseminating and implementing the strategy is widely shared, ie, among Council, Senate, and their committees, and the Vice-Chancellor, Registrar, Deans and heads of departments. The Equity Office provides advice on all equity issues.

The University of Auckland Intellectual Property Created by Staff and Students Policy

1 Introduction and Objectives

- 1.1 This policy seeks to establish a framework for managing the intellectual property created by staff and students within the University.
- 1.2 The objectives of this policy are to:
 - a Preserve and enhance a climate of creativity, innovation and inventiveness among staff and students.
 - b State clearly the respective ownership rights of the University and its members in relation to intellectual property.
 - c Foster an awareness of the importance of intellectual property among staff and students.
 - d Assist in establishing appropriate mechanisms for the more effective commercial exploitation of intellectual property for the benefit of the University and its members.
- 1.3 In giving effect to this policy the University acknowledges the need to be guided by the aims laid down in its mission statement and its obligations under the Education Act 1989. Particular regard shall be had to:

- ### 3 Policy
- 3.1 Ownership Issues – Staff
- Where staff members create any form of intellectual property other than an excluded copyright work
 - in the course of their employment; or
 - using University resources
 the University is acknowledged as having rights to that intellectual property unless those rights are abandoned under the provisions of clauses 6.3 and 6.4 of this policy.
- 3.2 The University shall also retain ownership of any physical object or tangible material embodying or incorporating its intellectual property rights.
- 3.3 Subject to the conditions set out in §3.4 and §3.5 the University agrees that copyright in an excluded copyright work belongs in the first instance to the staff member or members who create it.
- 3.4 Where an excluded copyright work is produced in whole or in part in the course of a staff member's employment or using University resources, the University shall have a non exclusive, royalty free, worldwide and irrevocable licence to exploit or use that work either itself or through other academic institutions provided that such exploitation or use
- is confined to the delivery of courses or programmes offered by the University; and
 - complies with the prescribed copying limit.
- 3.5 Staff wishing to enter into an agreement of assignment or licence with a third party

in relation to any excluded copyright work are to notify the third party of the existence and extent of the University's licence under §3.4.

4 Ownership Issues – Students

- 4.1 Students do not relinquish their intellectual property rights by enrolling in a course of study offered by or on behalf of the University.
- 4.2 The University may require students to assign their intellectual property rights to itself or a third party as a condition of participation in a particular research project or exercise. In such cases the student shall be given an explanation of the need for such assignment and an opportunity to seek independent legal advice.
- 4.3 The University agrees that students are to be the first owners of copyright in their theses, dissertations and other assessable work.

5 Moral Rights

- 5.1 The University undertakes to respect and protect the moral rights which the law confers on staff and students.
- 5.2 The University accepts that the creators of excluded copyright works are to have their full moral rights as first owners of copyright in such works.
- 5.3 The University will not require staff or students to waive their moral rights as a condition of employment or funding.

6 Identification and Notification

- 6.1 When staff or students create intellectual property to which the University has any claim in law or in terms of this policy and which in the creators' view offers possibilities for commercial exploitation the creators shall promptly make that fact known to the Intellectual Property Manager of UniServices Ltd.
- 6.2 Whenever disclosure is made under §6.1, the University may require the staff or students concerned to provide further details of the intellectual property in question including:
 - a The date upon which the intellectual property was created.
 - b The identity of any person or persons who contributed to the creation of the intellectual property.
 - c The details of any pre-existing intellectual property which was used in creating the intellectual property.
 - d Whether any person other than the creator claims any entitlement or interest in the intellectual property.
 - e The details of any University facilities or

resources used to create the intellectual property.

- f The details of any likely existing or potential use for, or commercial exploitation of, the intellectual property.
- g Any financial or other interest in a third party which might affect the commercial exploitation of the University's intellectual property.
- h The details of all expenditure made, and its source, in relation to the creation of the intellectual property.

- 6.3 Within 90 days of first being notified of the existence of intellectual property, or within 90 days of receiving any additional information requested under the provisions of section 6.2, whichever is the later, the University, shall:
 - a Make a decision as to whether it may wish to exploit the intellectual property; and
 - b Communicate that decision to the creator of the intellectual property.

- 6.4 Failure to decide and notify in terms of §6.3 shall be treated as an abandonment by the University of its rights in the intellectual property in question.

7 Commercialisation and Protection

- 7.1 The decision whether or not to exploit its intellectual property lies with the University, not individual staff or students. The University undertakes to consult with creators as to the appropriate mode of commercialisation.
- 7.2 The commercialisation of intellectual property may be carried out by Auckland UniServices Limited or other organisation or person appointed for the purpose.
- 7.3 Staff and students must not do any of the following things in relation to the University's intellectual property:
 - a Apply for the grant of a patent or other registrable intellectual property right; or
 - b Enter into any contracts, discussions, or negotiations with third parties without the permission of the University; or
 - c Knowingly act in any way which is inconsistent with the University's intellectual property rights or which diminishes or lessens the value of those rights.
- 7.4 Staff or students who create intellectual property to which §6.1 relates shall provide the University with all reasonable assistance in its exploitation or development including:
 - a Providing information when required.
 - b Executing specified documents.
 - c Entering into agreements to undertake

particular research or produce other stated outcomes.

- d Participating in appropriate marketing or promotional activities.

7.5 Where staff or students are unwilling or unable to execute documents as provided in §7.4 above, the University shall be deemed to have an irrevocable authority to execute on their behalf any document which is consistent with the objectives of this policy.

7.6 The University will share the benefits of commercialisation with the creator on an agreed case by case basis.

8 Publication and Information Exchange

8.1 In accordance with its obligation to protect and enhance academic freedom, the University acknowledges the right of staff and students to:

- a Exchange information with colleagues in other academic and research institutions,
- b Present and publish the results of their research and scholarly endeavours in a full and timely way.

8.2 In order to protect its intellectual property against the effects of premature disclosure, the University may in particular cases, and for a limited period, require staff and students to:

- a Inform the recipients of information relating to the University Intellectual Property or the physical material embodying it that they:
 - (i) may only use the information or material for stated purposes;
 - (ii) may not further disclose the information (or transmit the material) without the consent of the University.
- b Suspend publication or presentation of all or part of particular research outcomes for as long as may be reasonably necessary for the University to complete the successful commercialisation of those outcomes or comply with the University's pre-existing obligations to third parties. In normal circumstances such a period would not be expected to exceed twelve months and staff and students would usually be informed of the need to restrict publication or disclosure before they embark on the research in question. Agreements with third parties containing such restrictions must first be submitted to the Deputy Vice-Chancellor (Research) for approval.

8.3 The University shall take all steps necessary so as to ensure that the protection and/or commercialisation of Intellectual Property consistent with the provisions of §8.2 does

not unreasonably delay the conferment of a degree or other academic qualification on the creator of the intellectual property.

9 Administration and Legal Effect

9.1 Where there is any inconsistency between this Policy and an employment agreement with staff, such agreements will prevail over the Policy.

9.2 The University is free to waive or relinquish its intellectual property rights whether by agreement, contract or otherwise as circumstances may dictate.

9.3 This Policy only relates to intellectual property which comes into existence after 30 December 2000.

9.4 The University acknowledges that disputes arising from the interpretation or application of this Policy should as far as possible be settled without resort to litigation or other legal process. The University will consult with all interested parties as to how this may be achieved.

Public Correspondence and Media Statements

Responding to Media Inquiries

Staff may make statements to the media on a subject in which they have special expertise, competence or responsibility. Before making such statements, staff must ensure that their views are within the law and that they do not use their association with the University to imply they are speaking for the University, or that all staff of the University necessarily support their views. This is to ensure that the University maintains the 'highest ethical standards' in accordance with the accountability requirements in the Education Act 1989. Advice on handling media inquiries is available from Communications and Marketing. Phone: +64 9 373 7599 ext 87467.

If staff are asked to comment on any other matters, before responding they should take advice from Communications and Marketing, their line manager and/or head of department. In particular, inquirers asking about individual departments, centres or other units, should in the first instance be referred to the head of the department or centre concerned. Staff should also ensure the head of that department or centre is made aware of the inquiry.

Normally all requests from the news media to comment on University policies, procedures or management should be referred to the Vice-Chancellor or his/her nominee responsible for the area concerned.

Use of University Title

Staff must ensure that, in communicating with the media or the public, their University title or association is used only when they are providing information

about, or commenting on, a subject in which they have special expertise, competence or responsibility and when no commercial or legal implications arise. On other subjects, members of the University should not normally use their University title as they will be writing or speaking in their private capacity.

Use of University Letterhead/Logo/Email

As outlined above, staff communicating or corresponding with the media or members of the public must clearly distinguish between situations where they are commenting in their private capacity, rather than commenting as a member of the University on a subject in which they have special expertise, competence or responsibility.

When acting in their private capacity, staff should not use University letterhead paper or envelopes as the recipient might otherwise believe that the individual is writing on behalf of the University. Equally, when using email, and particularly the University email address, for private purposes, staff should make it clear that they are expressing a personal view and should not use their University title as this could imply they are speaking for the University. Students at all times communicate in a private capacity.

The University of Auckland Smoke Free Policy

Purpose

This policy seeks to provide a smoke free environment on University Campuses, and Facilities. As from the 31 December 2009 this policy is to replace the Smoke Free Policy last amended in December 2004, and endorsed by Council in 2007.

1 Definitions

- 1.1 **'Campus'** includes all land or interests in land owned, occupied or used by The University of Auckland, and for avoidance of doubt includes leased or licensed land or buildings.
- 1.2 **'Facilities'** means and includes a physical location or building, a teaching or research site or location, a teaching or research entity of any kind, air space, ground space, and rights and things of any nature or description owned, operated or administered by the University.
- 1.3 **'Members'** means members of The University of Auckland and shall include members of Council, Council committees and other committees, students, staff, committee appointees and the University's companies' staff and board members.
- 1.4 **'Rule'** means a Rule as defined in the Disciplinary Statute 1998.
- 1.5 **'Smoke'** and **'Smoking'** shall have the

meaning set out in S2 of the Smoke-Free Environments Act 1990.

- 1.6 **'Visitor'** means any person who is not a Member but who is on or in a University Campus or Facility.

2 Policy and Rule

- 2.1 No person, whether a Member or Visitor, shall Smoke on any Campus or when in or on any Facility of The University of Auckland unless Smoking is carried out for experimental or research purposes under conditions and terms laid down by the University's Human Participants' Ethics Committee. This Policy shall also be a Rule.

3 Audience

- 3.1 This Policy applies to all Members and Visitors.

4 Legislation

- 4.1 The Smoke-free Environments Act 1990
The Health and Safety in Employment Act (HSE) 1992

5 Non-compliance

- 5.1 If a Member breaches this Policy one or more of the following may result:
 - 5.1.1 A warning or direction to the Member written or oral, to comply.
 - 5.1.2 On a failure to comply with a warning or direction that failure where the Member is a student, will be a breach of the Disciplinary Statute (Clause 4(b)) and will carry disciplinary consequences.
 - 5.1.3 Where the Member is a student as a breach of a Rule, the Penalties set out in Clauses 6, 7 and 8 of the Disciplinary Statute 1998 may be imposed.
 - 5.1.4 Where the Member is a student or staff member, that Member will be specifically in breach of clause 4(a)(viii) of the Disciplinary Statute which states:
*"No Student or Staff Member shall:
...(viii) Smoke in any place where smoking is prohibited in terms of the Smoke Free Policy of the University for the time being."*
 - 5.1.5 Where the Member is a staff member a breach of this Policy and/or a breach of a reasonable direction given under it, will constitute Misconduct in terms of the applicable employment agreement.
 - 5.1.6 Where a Member is a student in addition to the provisions set out in Clauses 6, 7 and 8 of the Disciplinary Statute which do not require reference to Discipline Committee, the matter may also be referred to Discipline Committee which may impose the penalties set out in clause 9(d) of the Disciplinary Statute which include a fine of up to \$1000.00, prohibitions, suspension, cancellation of enrolment and restitution.
- 5.2 Visitors who breach this Policy on Campuses and Facilities where Smoking is prohibited

by the law of New Zealand are subject to all reasonably practicable steps by the University to ensure no person Smokes in a workplace. Such steps may include a request for them to not Smoke or to exclude them from any workplace.

- 5.3 Members are expected to ensure, where this is reasonably within their control, that Visitors are aware of this Policy and again where reasonably possible to incorporate in any contract, or access provisions, an acknowledgement of, and an undertaking to comply with, clause 2.1 of this Policy where any Visitor is on or in a Campus or Facility. 'Contracts' in this context extends

to grants of lease, licences or occupation rights. Visitors in this context include, but is not limited to, contractors and sub-contractors, volunteers and persons attending performances, lectures or events, sports functions and similar.

6 Related Procedures

- 6.1 All hazard assessment procedures and guidelines.
- 6.2 Any procedural terms and conditions imposed or required by a relevant Human Participants' Ethics Committee having jurisdiction.

GLOSSARY OF TERMS

Note: The descriptions below are not intended to be legal definitions. The Regulations in the Calendar should also be referred to when interpreting these terms.

Ad Eundem Statum: A means of admission to the University on the basis of a qualification awarded by a body other than the New Zealand Qualifications Authority or The University of Auckland.

Admission: The process by which a student applies, and is approved, for entry to the University and to a University qualification.

Bachelors degree: A first degree.

Campus: A geographical location where University of Auckland qualifications are taught, eg, City Campus, Epsom, Tamaki, Grafton.

Certificate: A qualification awarded after academic study of a coherent programme of between 60 and 120 points.

Class: A component of a course, eg, a lecture stream.

Completing student: A student whose current enrolment is designed to complete a certificate, diploma or degree.

Corequisite course: A course which should be taken in the same semester as another unless it has previously been satisfactorily completed.

Course: The basic component of all academic programmes. A course is normally taught and assessed over one semester. A double-semester course is taught over the consecutive semesters of the same academic year.

Course prescriptions: A list of courses including course code, title, points value, description of content, prerequisites, corequisites and restrictions.

Course schedule: A list of the courses prescribed for a programme which forms part of the regulations.

Coursework: Assessable work produced by students, normally submitted during teaching weeks, eg, essays, assignments, reports, tests, and practical, tutorial and seminar work.

Cross credit: A course which is common to two University of Auckland undergraduate diplomas or Bachelors degrees and is credited to both.

Current enrolment: Courses or other work taken by a student in a particular academic year or semester.

Degree: Principal qualification awarded by The University of Auckland, ie, Bachelors, Masters and doctoral degrees.

Diploma: A University qualification, generally awarded at graduate or postgraduate level.

Direct entry: Entry into a higher level of a subject or later part of a degree without the prerequisites.

Dissertation: A written research component of a degree or diploma worth between 30 and 80 points.

Distance education: Courses or programmes of study which provide content and support services to students who rarely, if ever, attend for face-to-face or for on-campus access to educational facilities.

Doctoral degree: A qualification at an advanced level requiring an original contribution to knowledge.

Electives: A defined set of courses for a diploma or degree from which a student may make a choice.

End of lectures: The final day of the final teaching week of a semester. The final lecture for a particular course might occur before this day.

Enrolment: The process by which a student, having gained admission to the University and to a qualification, selects and gains entry to courses and classes.

Examination: Formal assessment under supervision occurring after the teaching in a course has been completed.

Extramural campus: Applies to courses where the teaching occurs mainly through paper-based study materials without a requirement for students to attend scheduled, on-campus classes. Students' study is guided by work books and written interaction with teaching staff.

Extramural students: Students who have exemption from receiving instruction on campus.

Flexible learning: Learning characterised by a mixed mode of delivery and assessment of instructional material.

Grade Point Average (GPA): A means of measuring a student's performance at this University. The average grade achieved over a period of time expressed numerically on a scale between 0 (no passes) and 9 (A+ average). GPAs include:

Cumulative GPA: calculated from all grades achieved by a student. Used for selection purposes unless an alternative has been indicated by the Faculty.

Satisfactory Progress GPA: calculated from the grades achieved by a student in the last two semesters of enrolment.

Grade Point Equivalent (GPE): A means of measuring a student's prior relevant academic performance and experience. Grades or marks achieved at external institutions and/or in examinations (such as NCEA) expressed as an equivalent to a Grade Point Average on the scale 0-9.

Graduand: A person who has completed the requirements for a degree but has not yet had the degree conferred.

Graduate: A person on whom a degree has been conferred.

Honours: Degrees, in some cases completed within prescribed time limits, may be awarded with honours which signify advanced or distinguished study.

Laboratory: A teaching session of a practical nature.

Lecture: A basic unit of instruction.

Limited entry: Applied to a course or programme for which the number of students that can be accepted is limited because of constraints on staffing, space or equipment.

Major: A required component of a degree, including a specified number of points in a subject at the most advanced level.

Masters degree: A degree programme at a higher level than a Bachelors degree.

Maximum full-time study: A student workload of 80 points per semester or 30 points in Summer School.

Minimum full-time study: A student workload of 50 points per semester or 25 points in Summer School.

Minor: A component of a degree including a specified number of points above Stage I in a subject.

Normal full-time study: A student workload of 120 points in one year.

Online campus: Applies to courses where the teaching occurs mainly through online computer-based interactions without the requirement to attend scheduled, on-campus classes. Communication between teachers and students is via asynchronous platforms such as email, web based texts and bulletin boards.

Part: A defined subdivision specified in the regulations of some degrees.

Plussage: A method of calculating the final result a student has gained in a course by counting either the final examination grade or a combination of final examination grade plus coursework, whichever is to the student's advantage.

Point(s): A value assigned to a course or other work to indicate its weighting within The University of Auckland's certificates, diplomas and degrees.

Postgraduate programme: A programme at a higher level than a Bachelors degree.

Prerequisite course: A requirement that must be met before commencement of study for a particular course or programme.

Prescribed texts: Textbooks which are considered essential to a course.

Programme: A prescribed set of one or more courses or other work which on satisfactory completion leads to the award of a University of Auckland certificate, diploma or degree.

Project: A piece of investigative written work on a topic approved by the relevant Head of Department and supervisor.

Quarter: A 10-week period of instruction for Graduate School of Enterprise students only for study on a part-time basis.

Reassigned course: A course satisfactorily completed for one programme which has been transferred to another programme.

Recognition of Prior Academic Study (ROPAS): A means of assessment of previous study for students from another institution for admission or credit to the University.

Regulation: A rule set down by the University.

Research essay: A research-based essay on a topic approved by the relevant Head of Department and supervisor.

Research portfolio: A coherent, integrated programme of research-based work.

Research project: A piece of research-based work on a topic approved by the relevant Head of Department, usually worth between 30 and 80 points.

Restriction (restricted course): A course in which the learning objectives, content and/or assessment are so similar to a second course that a student cannot be credited with both towards a certificate, diploma or degree. In some cases a restricted course may be taken and credited as Certificate of Proficiency.

Schedule: University lists of courses, credits or limitations, often in tabular form.

Semester: A period of about 15 weeks which includes about 12 teaching weeks and about three weeks for study and examinations. In addition there is a mid-semester break of up to two weeks.

Specialisation: A coherent group of related courses from different subjects.

Stage: The academic level of study in a subject.

Subject: An area of learning which may be provided by a school or a department, or by departments offering related courses.

Summer School: A six-week period during which a select range of courses is taught and assessed.

Thesis: A research component of a postgraduate programme having a value of 90 or more points which will have a written component but may also include design, creative or performative elements.

Transfer credit: Credit granted towards a University of Auckland qualification from work successfully completed at another tertiary institution.

Tutorial: A small group learning session.

Undergraduate: A person studying towards a first degree.

Unspecified campus: Applies to courses where the teaching occurs through scheduled face-to-face interactions on sites that are not recognised University of Auckland campuses. Examples include the provision of courses where the course material is delivered in students' local work-related environment.
