

Have you experienced **chronic** or **neuropathic pain**?

Are you aged **16 years or older**?

If so, you are invited to participate in an online survey about:

**Medicinal cannabis perceptions and dosage form preferences  
amongst neuropathic pain patients in New Zealand**

In this study participants will complete a short form questionnaire about their pain experience, current treatments, preferences around the form of medicine they would like to take (e.g. pills vs mouth spray vs tinctures), and their perceptions around the use of medicinal cannabis as a potential treatment.

**Eligibility criteria**

individuals 16 years or older who have experienced chronic or neuropathic pain defined as pain lasting for more than 3 months.
