

Injured?

Wellnz has been contracted by the University of Auckland to assist in injury management for you.

Injuries that occur at work

- If you have a workplace injury, make sure you let your Manager know. The incident will also need to be recorded in the University's online incident reporting system, **on the day it occurs**.
- Seek treatment from a medical provider; this could include a doctor or physiotherapist. The medical provider can help you lodge an ACC claim for your injury.
- If you are given time off work due to the injury, **let your Manager know immediately**. This includes providing any medical certificates issued by your doctor.
- You can contact Wellnz for advice; alternatively they will contact you if you have been given time off work.

**For more information,
