It's time to get

SET

What you say matters!

SET Evaluations Announcement

This course and its teaching staff are due for evaluation through the University's SET (Summative Evaluation Tool) system.

SET is an online system which students can access through Canvas, or through an invitation email which you will receive when the evaluation period opens.

You will be asked questions about the course and each teacher, and we ask you to respond honestly and constructively to the questions.

Feedback will be secure and confidential and your anonymity will be preserved.

The evaluations are open for [two weeks] and it's really important that you log on to the system and complete the evaluation. There will be reminders!

SET results are used to improve individual courses and teaching, and for the University to assure the quality of the student learning experience.
