

ASSENT FORM – Children 5-15 years at Auckland site

(This form will be held for a period of 6 years)

Multiple case study of binocular treatment for childhood amblyopia using a handheld gaming device

Principal Investigator: Steven Dakin

Co-investigators: Joanna Black, Tina Gao, Kathryn Sands, Lisa Silva

I understand that I am being asked to take part in a research study.

If I need to wear glasses or contact lenses, I will need to wear my lenses every day for as much of the day as I can.

If my vision doesn't get better from just wearing lenses, I will be asked to watch some special binocular movies on a Nintendo to help my lazy eye. I can choose the cartoons and movies that I want to watch, and I'll be asked to watch them for 1 hour per day.

The movies will be made especially for my eyes, so I should not give the Nintendo to anyone else to use.

I will need to return the Nintendo at the end of the study.

I will have a vision check at the university eye clinic every 6 weeks.

I can choose to stop taking part in this research study at any time.
