Nau mai, haere mai ki te kura neehi

A warm welcome to the School of Nursing

Haere mai Hakatau mai ra koutou ki Te Kura Neehi ki te hakanui atu o koutou matauranga mo nga mahi o nga neehi. Ko nga Kaako e awhi e tautoko ia koutou mai te timatanga taie noa ki te whakamutunga i o koutou mahi ki Te Kura Neehi. Ko to matou hiahia kua eke koutou ki nga taumata mo te tangata mo a muri nei. No reira Huri noa Huri noa Tenatautu katoa.

Ngā mihi

We are so excited to welcome you to our School of Nursing whānau. The school is full of vibrant and dynamic people who are dedicated to your learning and growth. We are committed to providing a warm and welcoming environment for our students and staff, and if there is anything we can do to help you get started on your postgraduate journey, please do not hesitate to ask. We are here to help you start your journey today and will continue to support you to become the person you want to be tomorrow.

Our postgraduate programmes

Postgraduate study enables you to deepen your understanding, develop specialist skills and knowledge, follow your passion for research, stand out in a competitive job market or change careers. We offer a wide range of postgraduate nursing programmes to help you reach your goals. Below is a flow chart of possible pathways for your postgraduate nursing study.

**MNurs Eligibility**
Note: If you are interested in the MNurs but do not have the required GPA (B average), please contact the School of Nursing to explore your options.
Email: postgradnursing@auckland.ac.nz
Entry and progression requirements

For entry into any postgraduate nursing programme, you must:
- have either completed an appropriate undergraduate degree or hold a professional nursing qualification
- hold nursing registration
- hold a current New Zealand practising certificate
- have had recent clinical nursing experience

Generally, initial enrolment is into Postgraduate Certificate in Health Sciences (PGCertHSc). On completion of the PGCertHSc, you may apply to have the certificate awarded and exit the programme, or you may proceed to the Postgraduate Diploma in Health Sciences (PGDipHSc). On completion of the PGDipHSc, you may apply to have the PGDipHSc awarded and exit the programme. A grade point average of 5 (B) enables you to proceed to a Master of Nursing (MNurs) or Master of Health Sciences (MHSc) programme.

Completion times

Most of our postgraduate students complete their studies part-time due to work and other commitments. It is wise to take note of completion and progression requirement timeframes and seek advice from the School of Nursing to ensure you can meet University regulatory requirements. If you have a need to complete your postgraduate study in a full-time capacity, please contact the School of Nursing.

Credit points

120 credit points at Waipapa Taumata Rau | The University of Auckland equates to a full-time academic year. One full-time semester is, therefore, 60 points. Postgraduate courses in the school are usually 30 points.

Credit transfer

This information will be of interest to all nurses who have undertaken postgraduate study at other universities, including NETP programmes, and who wish to continue their studies at Waipapa Taumata Rau | The University of Auckland.

Our current regulations state that:
- Credit from another institution can only be credited to a PGDip, not a PGCert.
- Credit of 30 points from another institution must be into a PGDip and must be within 3 semesters of commencing the course for which credit is sought.
- Credit of a completed PGCert must be into a PGDip and must be within 5 years of completing the PGCert.
- A student who has been awarded 60 internal credits from a PGCert to PGDip will not be able to externally credit any further points.
- If a student has completed either a 30-point course or a PGCert and wishes to transfer to Waipapa Taumata Rau | The University of Auckland, they must contact our postgraduate Academic Advisors prior to applying to the University. This will ensure that they receive the best advice for their individual pathway of study.

Course selection advice

Waipapa Taumata Rau | The University of Auckland offers a range of courses tailored to meet the needs of a variety of disciplines within Nursing. These can include research, leadership, education, mental health, paediatrics, older adult health, primary health care, specialty clinical courses, and courses tailored to the Registered Nurse Designated Prescribing and Nurse Practitioner Training Pathways. The School of Nursing provides a student-centric approach of course advice to facilitate course selection that meets the needs of the student’s career goals and the populations they serve.

Contact

To connect with an Academic Advisor from any of these areas, please indicate what type of course advice you are seeking by emailing: postgradnursing@auckland.ac.nz

For returning students, please include your student ID number.
Early postgraduate study

If you are new to postgraduate study, you may want to follow the pathway that most of our nursing students take – enrolling in a postgraduate certificate, followed by a postgraduate diploma. If you are eligible and wish to, you may consider progressing to a Master of Nursing.

Our PGCertHSc (Advanced Nursing), PGDipHSc (Advanced Nursing), and MNurs programmes are approved by Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand as appropriate educational preparation for advanced nursing practice.

Postgraduate Certificate in Health Sciences

(PGCertHSc) (60 points)
The PGCertHSc allows students to start their postgraduate study with us from a wide range of courses found in this book.

Specialisations:
When applying for this programme, students should choose between these two specialisations:
- Advanced Nursing
- Mental Health Nursing

Entry requirements:
Registered Nurse registration with the Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand and a current practising certificate.

Structure/content:
60 points from MNurs schedule.

Progression:
May have the qualification awarded. May also proceed to a PGDipHSc with credit, so long as it commences within five years of completing the PGCertHSc.

Contact
postgradnursing@auckland.ac.nz

Postgraduate Diploma in Health Sciences

(PGDipHSc) (120 points)
The PGDipHSc allows students to start or continue their postgraduate study with us from a wide range of courses found in this book.

Specialisations:
When applying for this programme, students should choose between these two specialisations:
- Advanced Nursing
- Mental Health Nursing

Entry requirements:
Registered Nurse registration with Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand, and a current practising certificate.

Structure/content:
120 points from the MNurs Schedule; if students have completed a PGCert at Waipapa Taumata Rau | The University of Auckland within the last five years, they will have the 60 points from it internally credited to the PGDip and will only have to complete a further 60 points.

Progression:
May have the qualification awarded. May also apply for a master’s programme if they attained a B average (GPA 5) or higher.

Note: If you are interested in the MNurs but do not have the required GPA (B average), please contact the School of Nursing to explore your options.

We offer first rate postgraduate and PhD qualifications and our graduates are highly sought after by employers.

Masters study

We offer three masters degrees that will enable you to increase your knowledge in your chosen field, gain a professionally-accredited qualification, or follow your passion for research while gaining an advanced qualification.

Master of Nursing (MNurs) (120 points)

This programme is aimed at Registered Nurses seeking to advance their clinical knowledge and skills.

Entry requirements:
Students must hold current registration as a nurse in Aotearoa-New Zealand and have a B average (GPA 5) or higher in one of the following qualifications:
- Bachelor of Nursing (Honours)
- PGDipHSc specialisation in Advanced Nursing (or their equivalent)

Options:
Students can decide between the following two options:
- Research (120 points)
- Taught (120 points)

Note: If you are interested in the MNurs but do not have the required GPA (B average), please contact the School of Nursing to explore your options.

Part-time 4 semesters/full-time 2 semesters – continuous study
Part-time 8 semesters/full-time 2 semesters

1Need to have completed a research course prior to commencing

Option 1: Master of Nursing (Research)

Structure/content:
Research 120 points (study must be continuous)
- NURSING 796 Thesis (120 points, must have completed an approved research methods course prior to entering the programme)
OR
- NURSING 797 Research Portfolio (120 points, must have completed an approved research methods course prior to entering the programme)
OR
- NURSING 790 Research Portfolio (90 points) + NURSING 782 Research Methods in Nursing and Health (30 points, or equivalent research course)

What does Masters Research entail?
For both the research portfolio and the thesis, you will be assisted by a supervisor from the School of Nursing.

What is a 90-point Research Portfolio?
A research portfolio represents a coherent, rigorous research-based collection of linked scholarly work related to a specified area of specialisation or scope of practice. It will be about 30,000 words in length (including tables, figures and references). The portfolio is presented for examination at the completion of the work in the same manner as a thesis. A research portfolio must address a clearly articulated research question and include a rationale for all elements of the portfolio. The portfolio may include one or more of: a critical review of literature; one or two small studies or clinical projects, or maybe an audit of a taught course related to the area of study. Normally the portfolio will require the collection of primary data through interviewing, survey, documents etc. A portfolio may include a rework of a conference presentation and/or paper prepared for publication.

What is a 120-point Masters Thesis?
A 120-point thesis is conducted over one academic year (full-time) or two years (part-time) and represents one full-time year’s work.

Length will vary with the nature of the topic, but it is expected that most theses will be about 40,000 words (including tables, figures and references).

The learning outcome of a thesis is that the student demonstrates an ability to conduct research that makes an original contribution to knowledge.

The thesis should provide a coherent and competently organised document forming a conclusive piece of work. The thesis will include the rationale for the study, a review of the relevant literature, the research question, aim and objectives, methodology, findings and discussion, including the study’s implications and recommendations for theory and/or practice.

Contact
Please contact the School of Nursing to discuss your master’s plan before applying for the programme.
postgradnursing@auckland.ac.nz
Option 2: Master of Nursing (Taught)

Structure/content:
Taught 120 points (study does not have to be continuous, but needs to be completed within the timeframes stipulated on page 5).
• NURSING 795 Dissertation (60 points)
• And 60 points from MNurs Schedule
OR
30 points from either:
• NURSING 701 Research Project (30 points)
• HLTHSCI 789 Research Project (30 points)
And 30 points from either:
• NURSING 785 Clinical Reasoning in Pharmacotherapeutics (30 points)
• NURSING 746 Evidence-based Practice and Implementation (30 points)
• NURSING 740 Nurse Practitioner Prescribing Practicum (30 points)
And 60 points from MNurs Schedule
The key to being eligible to graduate with your MNurs is to ensure that your taught master’s degree includes a minimum of 60 points of level 9 courses. There are three primary ways to achieve this, demonstrated in the picture on page 7.

Note, if you are not completing NURSING 795 A/B (Dissertation), it becomes mandatory to include either NURSING 701 (Research Project) OR HLTHSCI 789 (Research Project) in your MNurs qualification.

The 60 more points of taught courses can be chosen from the MNurs Schedule (page 27).

Master of Health Sciences
(MHSc, 120 points)
This programme is aimed at health professionals who wish to pursue postgraduate study and work in a range of settings, not necessarily clinical nursing practice, such as education, research and management. This qualification is also appropriate for other health professionals who wish to pursue postgraduate study and advanced roles in health-related fields. They may select from a broader range of courses, including multidisciplinary courses.

Entry requirements:
To be eligible to enter a 120 point MHSc, an applicant must have completed a PGDip (or equivalent qualification) with a B average (GPA 5) or higher in 75 points above stage II.

Eligible applicants will also be required to attend a selection interview. English language proficiency and Fitness to Practice requirements also apply.

Options:
Students can decide between the following two options:
• Research (120 points)
• Taught (120 points)

Option 1: Master of Health Sciences (Research)

Structure/content:
HLTHSCI 796 Thesis (120 points, must have completed an approved research methods course prior to entering the programme)
OR
HLTHSCI 797 Research Portfolio (120 points, must have completed an approved research methods course prior to entering the programme)
OR
HLTHSCI 793 Research Portfolio (90 points) and 30 points from approved courses listed in the MHSc Schedule (available online).

Option 2: Master of Health Sciences (Taught)

Structure/content:
Taught 120 points
• HLTHSCI 790 Dissertation (60 points)
• And 60 points from the courses listed in the MHSc Schedule, including an approved research methods course if such a course has not already been passed.
OR
• POPLHLTH 755 Applied Research Project (60 points)
• And 60 points from the courses listed in the MHSc Schedule, including an approved research methods course if such a course has not already been passed.

Master of Nursing Science
(MNsc, 240 points)
This full-time two-year programme gives graduates with a relevant Undergraduate degree the opportunity to complete the requirements to become a Registered Nurse in Aotearoa-New Zealand.

Entry requirements:
Students must have completed a relevant undergraduate degree (such as health sciences or science with some human science subjects, such as physiology and anatomy) with a B average (GPA 5) or higher in 75 points above stage II.

Eligible applicants will also be required to attend a selection interview. English language proficiency and Fitness to Practice requirements also apply.

Doctoral study

There are many reasons that you might consider doing a doctoral degree. Ultimately, doing so means you will have expert-level knowledge in your chosen field and gives you the highest level of degree you can achieve. Doctoral study will allow you to undertake in-depth research and exploration in your chosen area.

A doctoral degree can broaden career opportunities; help you undertake rigorous research; develop your critical thinking skills; sharpen your writing abilities; develop your confidence and ability to advocate for change; develop a research platform; foster national and international collaboration with your area of expertise and help you learn new skills, knowledge, problem-solving and stamina to pursue your aspirations.

Doctor of Health Sciences
(DHSc, 360 points)

Entry requirements:
The entry criteria for the DHSc are extensive. Please see the University Calendar for the full and most up-to-date regulations, which include a B+ (GPA 6) average in the student’s most recent attempt at a relevant qualification, i.e. BNHons, master’s in a relevant subject area.

Structure/content:
This named doctorate will provide experienced health professionals and leaders working in diverse roles within the health sector with a pathway to a research-based higher degree. This programme provides a combination of taught courses and a thesis which will develop candidates’ professional understanding and expertise in leadership, research, evaluation and professional practice.

Students will address contemporary issues challenging the health sector, influencing local, national and potentially international health policy and practice.

The DHSc comprises a combination of taught courses (120 points) and a thesis (240 points) which will develop candidates’ professional understanding and expertise in leadership, research, implementation, evaluation and professional practice. The DHSc programme is designed for health professionals and senior leaders in healthcare in Aotearoa-New Zealand who want to continue working while they study.

Doctor of Philosophy
(PhD, 360 points)

Entry requirements:
The entry criteria for the PhD are extensive. Please see the University Calendar for the full and most up-to-date regulations, which include a B+ (GPA 6) average in the student’s most recent attempt at a relevant qualification, i.e. BNHons, a master’s degree in a relevant subject area.

Structure/content:
The PhD is a well-recognised postgraduate research degree and the highest level of degree you can achieve. PhD students are critical, curious, creative thinkers who undertake original research over at least 3 years.

Candidates will undertake independent and original research supervised by academic experts and research leaders. During your doctoral studies, you will have opportunities to expand and develop your personal, professional and academic skills. Our doctoral candidates present their work at local and international conferences and are encouraged to network and collaborate with a wide range of experts in their research field.

You will undertake independent research and submit for examination a 360-point research thesis.

Course descriptions

We have a wide variety of courses available to postgraduate students studying in Mātauranga Hauora – Faculty of Medical and Health Sciences. The NURSING and NURSPRAC (Nursing Practice) courses are facilitated by the School of Nursing. Below you'll find a list of our courses and an indication of what format they're available in – which region, online, dual or blended. An asterisk (*) indicates the courses that need a concession. Our courses that have a focus on Mental Health and Addiction, Child and Youth Health and Palliative Care are found on pages 14, 16 and 18, respectively. You can also find the full schedule of our courses on page 27. To find out more online click on the course title.

**NURSING 701***  
Research Project - Level 9  
Semester One – Auckland, Semester Two – Auckland  
A personal scholarly exploration of an area of clinical nursing practice that reflects an understanding of research purpose and process. The project includes a critical and comprehensive review of relevant literature which results in new insights and understandings and considers how the application of these might affect existing service delivery or clinical practice models.

**NURSING 732**  
Leading and Managing Changes in Healthcare  
Semester Two – Auckland, Northland, Waikato  
Theoretical and practice principles of leadership and management in the context of healthcare organisations. Utilises an action-based learning model, mentorship and project work.

**NURSING 735**  
Clinical Education Practicum  
Semester Two – Auckland  
Application and critical analysis of educational theories and concepts in a clinical learning environment. Utilises an action-based learning model and project work.

**NURSING 740***  
Nurse Practitioner Prescribing Practicum – Level 9 (NPTP)  
Semester Two – Auckland  
Clinical practicum facilitating mastery of the Nursing Council of New Zealand Nurse Practitioner (NP) competencies for autonomous clinical practice in the Nurse Practitioner scope of practice. Critically analyse clinical cases and develop evidence-informed and innovative solutions through expert consultation and primary literature review. Students will prepare a portfolio demonstrating expert autonomous clinical practice for complex medical and nursing problems.  
Prerequisite: NURSING 743

**NURSING 741**  
Education for Clinical Practice  
Semester One – Auckland (Blended)  
Professional learning is essential to enable healthcare professionals to function competently in the complex world of clinical practice. Health care professionals are required to become actively involved in teaching colleagues involved in healthcare and patients. Effective clinical teaching and learning is enabled by laying a foundation in educational theory and practice.

**NURSING 742**  
Biological Science for Practice  
Semester One – Online, Semester Two – Online  
Focuses on common pathologies acknowledging the New Zealand Health Strategy, giving particular attention to areas where health promotion, preventative care, chronic disease management and cost impact for New Zealand.

**NURSING 743***  
Nurse Practitioner Advanced Practicum (NPTP)  
Semester One – Auckland  
Synthesises advanced clinical decision-making within the Nurse Practitioner competency framework and prepares for autonomous clinical practice.  
Prerequisite: NURSING 785

**NURSING 744**  
Specialty Nursing Practice  
Semester Two – Waikato  
Gives nurses the opportunity to extend their clinical skills and practice knowledge and to advance clinical decision-making by utilising a range of guided learning experiences. The focus is on continued development of clinical expertise, using a practice development approach emphasising person-centred, evidence-based practice, and critical thinking practice to improve health outcomes.

**NURSING 744 A/B***  
Specialty Nursing Practice (Critical Care Specialty Nursing)  
Semester One (A) – Auckland, Semester Two (B) – Auckland  
Gives nurses the opportunity to extend their clinical skills and practice knowledge and to advance clinical decision-making by utilising a range of guided learning experiences. The focus is on continued development of clinical expertise, using a practice development approach emphasising person-centred, evidence-based practice, and critical thinking practice to improve health outcomes.

**NURSING 745**  
Principles of Medication Management  
Semester One (Two streams: Online or Auckland (face-to-face))  
Semester Two (Two streams: Online or Auckland (face-to-face))  
Focuses on the principles and practice of medication management to improve and extend the knowledge and skills of Registered Nurses in clinical specialty roles and prepare them for delegated prescribing roles in partnership with clients and collaborating with medical colleagues and the health care team. It is not the intention of this course to prepare nurses for authorised prescribing (nurse practitioner).  
Restriction: NURSING 761

*Concession Required
NURSING 746 30 points
Evidence-based Practice and Implementation – Level 9
Semester One – Auckland, Semester Two – Auckland
Considers the types of evidence that inform nursing practice and implementation, and examines barriers and enablers to the application of evidence to practice. Provides students with the tools to locate and appraise evidence and requires the student to engage in research activities resulting in a substantial research essay.
Restriction: NURSING 720

NURSING 749 30 points
Special Topic: Whānau Ora Tahi
Semester One – Northland
The concept of Whānau Ora is to achieve maximum health and well-being for whānau. This course extends nurses’ knowledge to demonstrate an understanding of Whānau Ora in nursing praxis. Through guided learning experiences, clinical and academic support, students will self-reflect on nursing praxis and explore equity and social justice in the context of Te Tiriti o Waitangi.
*pending approval

NURSING 770 30 points (NETP)
Clinical Practice Development
Semester One – Multiple Sites, Semester Two – Multiple Sites
Develops knowledge, practice and skills within the scope of a beginning Registered Nurse; enhances client assessment, planning and delivery of client-centred care within a specific healthcare context. Also fosters critical exploration of knowledge and skills appropriate to professional, socio-political, legal-ethical, cultural aspects of practice.
Restriction: NURSING 725, 773

NURSING 773 30 points (Adult Health stream)
Advanced Assessment and Clinical Reasoning
Semester One – Auckland, BOP, Taranaki
Semester Two – Auckland, Lakes, Northland, Waikato
Nurses make a variety of diagnoses in their daily practice. Advanced nursing practice requires skilled health assessment, estimation of probabilities and evidence-based diagnostic reasoning. This complex cognitive process is developed in relation to skills and knowledge required for sound clinical reasoning.
Restriction: NURSING 770
Note: Child and Young Person Health stream is described on page 10

NURSING 775 30 points
Leadership and Management for Quality Health care
Semester One – Auckland, Northland, Waikato
Builds management and leadership knowledge, competence and business acumen through project-based learning. Focuses on critical thinking, quality service delivery and improvements and maximises organisational performance and change management.

NURSING 782 30 points
Research Methods in Nursing and Health
Semester One – Auckland, Semester Two – Auckland
Explores the philosophical underpinnings of research methodologies and assists students to understand the major distinctions between quantitative and qualitative approaches. Students will critique research studies and apply research findings to practice. They will gain a practical appreciation of research ethics. By the end of the course, students will be able to apply their learning to the development of a basic research proposal.
Restriction: NURSING 76B

NURSING 784* 30 points
Advanced Emergency Nursing Practicum
Semester Two – Auckland
Specialty Emergency nurses provide advanced nursing care and need expertise in assessment, diagnostic processes and therapeutic decision-making. Advanced assessment skills along with injury and condition-specific management models are taught with a focus on clinical decision-making for clients in emergency and accident and medical clinic settings. Designed to refine advanced emergency nursing skills for nurses working in specialty emergency nursing roles.
Pre-requisite: NURSING 773 or equivalent and practising in an advanced nursing role

NURSING 785* 30 points
Clinical Reasoning in Pharmacotherapeutics – Level 9
Semester One – Auckland, Semester Two – Auckland (Blended delivery Semester Two only)
Builds on prior knowledge to establish an advanced understanding of pharmacotherapeutics and the application of the principles of pharmacokinetics, pharmaco-dynamics to prescribing practice in advanced practice roles; and develops nursing skills in clinical reasoning for safe and effective prescribing.
Prerequisite: NURSING 742, NURSING 773 (or NURSING 770/ NURSPRAC 720)
Restriction: NURSING 706, 722

NURSING 790 A/B 90 points
Research Portfolio – Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent area of inquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or scope of practice.

NURSING 795 A&B 60 points
Dissertation – Level 9
Stream 1: 795A Semester One – Auckland, 795B Semester Two – Auckland
Stream 2: 795A Semester Two (2024) – Auckland, 795B Semester One (2025) – Auckland
The 60-point dissertation (15,000 to 20,000 words) is part-time over two semesters and can take the form of a literature review, secondary data analysis or small project. Students work with a supervisor to complete the dissertation and attend three study days per semester. Goal: Successful submission of an externally assessed dissertation in partial fulfilment of a masters degree.
Restriction: NURSING 792

NURSING 796 A/B 120 points
Thesis – Level 9

NURSING 797 A/B 120 points
Research Portfolio – Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent area of inquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or scope of practice.

*Concession Required
Please note: all our courses are run subject to sufficient course enrolments. Before booking flights or accommodation, please contact the School to ensure the course is still running.
NURSPRAC 701*
Cardiac Specialty Nursing
Semester One – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of cardiac patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of cardiac nursing.
Restriction: NURSING 730

NURSPRAC 702 A/B*
Critical Care Specialty Nursing
Semester One (A) – Auckland, Semester Two (B) – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of critical care patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of critical care nursing.
Restriction: NURSING 730

NURSPRAC 704*
Cancer Specialty Nursing
Semester Two – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients with cancer. Students will be expected to integrate evidence from a range of sources and apply this to the practice of cancer nursing.
Restriction: NURSING 730

NURSPRAC 707*
Registered Nurse First Surgical Assist
Auckland (next offered 2025)
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of surgical patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of RNFSA nursing.
Restriction: NURSING 730

NURSPRAC 708*
Emergency Specialty Nursing
Semester One – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients in the emergency setting. Students will be expected to integrate evidence from a range of sources and apply this to the practice of emergency nursing.
Restriction: NURSING 730

NURSPRAC 711*
Pain Nursing Specialty Nursing
Semester Two – Auckland (next offered 2025)
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients experiencing pain. Students will be expected to integrate evidence from a range of sources and apply this to the practice of nursing patients with pain.
Restriction: NURSING 730

NURSPRAC 712*
Diabetes Specialty Nursing
Semester Two – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of diabetic patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of nursing patients with diabetes.
Restriction: NURSING 730

NURSPRAC 716*
Ophthalmology Specialty Nursing
Semester Two – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of ophthalmology patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of ophthalmology nursing.
Restriction: NURSING 719

NURSPRAC 717*
Practicum for RN Designated Prescribers
Semester One – Auckland, Semester Two – Auckland
Prepares Registered Nurses to apply for prescribing rights as Designated Prescribers. Provides nurses with the opportunity to develop knowledge and skills in the application of pharmacotherapeutic concepts to prescribing as a Designated Prescriber. This includes direct supervision of prescribing activities in the clinical area and the ability to work closely and effectively in a multidisciplinary team environment.
Prerequisite: NURSING 742, 773 (or NURSPRAC 720), NURSPRAC 727*

NURSPRAC 727*
Special Topic: Perioperative Nursing Specialty
Semester Two – Auckland
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients across the perioperative continuum. Students will integrate evidence from a range of sources and apply this to the practice of caring for people requiring surgical intervention.

NURSPRAC 728*
Special Topic: Frailty in Aged Care Nursing
Semester Two – Auckland
Frailty is an age-related, progressive geriatric syndrome related to pathological changes in underlying physiological and psycho-social function and the leading cause of mortality and morbidity in older people. Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of older people affected by frailty.

HLTHSCI 700
Working with People with Long-term Conditions
Semester One – Auckland, Waikato
Long-term conditions present one of the most challenging global epidemics of the twenty-first century. This course is designed to support the development of a responsive person-centred healthcare workforce to meet the needs of people living with long-term conditions and to work with them to improve their self-efficacy and health outcomes.

HLTHSCI 701
Self-management for People Living with Long-term Conditions
Semester Two – Auckland, Waikato
Self-management is a key strategy to maximise quality of life for individuals and their families living with long-term conditions. This course is designed to strengthen assessment of self-management, collaborative person-centred goal setting and planning. It focuses on developing motivational communication skills and collaborative strengths-based approaches which support efficacy and activation.
Restriction: NURSING 771

*Concession Required
HLTHSCI 705*  
Mental Health and Addiction for Health Professionals  
Semester One – Auckland  
Uses a person-focused theoretical framework to explore mental health and addiction problems presenting in non-specialist mental health settings. Conceptualises mental health and addiction problems as frequently co-occurring. Engagement, assessment, collaborative solution-focused interventions, referral and care coordination will be explored.

HLTHSCI 789*  
Research Project – Level 9  
Semester One and Semester Two – Auckland

POPLPRAC 758  
Biology of Ageing  
Semester One – Online  
The systematic analysis of the physiological changes in ageing and the relationship of these changes to current beliefs and theories around the ageing process. Current issues around biogerontology are discussed.  
Restriction: POPLHLTH 749

POPLPRAC 761  
Mental Health in Old Age  
Semester Two – Auckland  
This course will explore therapeutic interventions for people presenting to inpatient and community older adult mental health services. There will be a focus on practice in the context of multidisciplinary teams and on collaboration between primary and secondary services. The course content will cover the psychological aspects of ageing, common psychiatric presentations in older people, sleep disturbance, grief and loss, anxiety disorders, drug and alcohol abuse, depression, delirium, dementia, behavioural disorders, psychosis, and medico-legal aspects.

POPLPRAC 767  
Dementia Care  
Semester Two – Auckland (next offered 2025)  
A clinically focused course that explores dementia within three specific areas; the brain, the diseases, and the person. It explores theoretical concepts and models of dementia care, and focuses on the partnership of individuals, carers and health professionals in the delivery of dementia care.

*Concession Required
Mental Health and Addiction

You may wish to specialise in your programme in Mental Health Nursing (i.e. PGCertHSc, specialisation Mental Health Nursing). If you don't currently work in Mental Health and Addiction, but would like to explore this pathway, you can consider HLTHSCI 705, Mental Health and Addiction for Health Professionals.

Before starting my study, I was an assistant language teacher. I decided to change my career and wanted a job where I could care for people and apply some fantastic technology. Medical Imaging was a perfect fit for me as it requires you to adapt and think creatively about how you place patients in the centre of care when using the technology.

One of the deciding factors behind studying at the University of Auckland was the academic aspect. As tech develops, I think more leaders in Medical Imaging will be needed – people who can develop the field with research-based solutions, such as improving access in rural communities.

There may be a misconception about what it means to work in the field of Medical Imaging. Some people see us as technicians rather than technologists. The difference is, technologists are the interface between humans and machines, so there is a high level of patient care required that I think may surprise people.

I feel so proud to be a nurse, doing my part in challenging the stigma and misconceptions around people experiencing mental health issues – and helping patients with their recovery.

I can attest to the difference nurses make when it comes to medical assessments and patient experience. Nurses possess a balance of competence in both medical knowledge and values that provide patients with hope and comfort in times of vulnerability.

“I decided to specialise in Adult Mental Health because I believe mental wellbeing is crucial if we want to live purposeful and meaningful lives.

“The mental health sector has progressed in multiple ways in terms of safety, cultural competency, and holistic recovery for clients. I feel privileged to do my part in maintaining this progression for the wellbeing of the diverse range of clients in Aotearoa.”

Mikkol Gabriel Macabali

Graduate: Bachelor of Nursing (BNurs), Postgraduate Certificate in Health Sciences – specialising in Mental Health Nursing (PGCertHSc)

auckland.ac.nz/nursing-pg
If you're interested in Child and Youth Health, further your knowledge in this specialist area by studying courses with a focus on Child and Youth Health. To find out more online click on the course title.

**NURSING 773**  
(Child and Young Person Health stream)  
**30 points**

**Advanced Assessment and Clinical Reasoning**  
**Semester One – Auckland**

Nurses make a variety of diagnoses in their daily practice. Advanced nursing practice requires skilled health assessment, estimation of probabilities and evidence-based diagnostic reasoning. This complex cognitive process is developed in relation to skills and knowledge required for sound clinical reasoning.

**Restriction:** NURSING 770

---

**NURSPRAC 703 A/B**  
**30 points**

**Paediatric Cardiac Specialty Nursing**

**Semester One (A) – Auckland, Semester Two (B) – Auckland**

Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of paediatric cardiac patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of paediatric cardiology nursing.

**Restriction:** NURSING 730  
*Note: NURSPRAC 703 A/B is intended for nurses working in the Paediatric Intensive Care environment while undertaking study.*

---

**NURSPRAC 713**  
**30 points**

**Paediatric Intensive Care Nursing**

**Semester One – Auckland (next offered 2025)**

Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of paediatric intensive care patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice.

**Restriction:** NURSING 730  
*Note: NURSPRAC 713 is intended for nurses working in the Paediatric Intensive Care environment while undertaking study.*

---

**NURSPRAC 723**  
**30 points**

**Special Topic: Paediatric Intensive Care**

**Semester Two – Auckland (next offered 2025)**

Extends specialised nursing skills for the nurse in paediatric cardiac and intensive care settings. Through guided learning experiences and support from clinical and academic mentors, students set and achieve individual learning goals. Focus is on practice development and clinical leadership, demonstrating understanding of quality healthcare and the socio-political and cultural contexts of health and well-being.

**Prerequisite:** NURSPRAC 713  
**Restriction:** NURSING 730, 744  
*Note: NURSPRAC 723 is intended for nurses working in the Paediatric Intensive Care environment while undertaking study.*

---

**Youth Health courses**

The following Youth Health courses are available within the wider Faculty of Medical and Health Sciences. Please note to incorporate any of the Youth Health courses under Paediatrics, below in your Nursing programme (up to 30 points); you must seek preapproval from the School of Nursing.

The Youth Health courses are all 15 points. PAEDS 712 is the foundation course for clinicians working with young people. This can be taken alone or together in the same semester as any other Youth Health course.

**PAEDS 708**  
**15 points**

**Population Youth Health**

**Semester One – Online**

Youth injury prevention, resiliency factors and reproductive issues, and advocacy for young people. How do you make a difference in youth health? This course introduces key concepts in population youth health and utilises an evidence-based approach and New Zealand practice examples to consider how youth health can be improved in communities and populations.

**Restriction:** POPLHLTH 732

---

**PAEDS 712**  
**15 points**

**Youth Health Clinical Skills**

**Semester One – Online, Semester 2 – Online**

Develops and extends knowledge and skills in clinical interviewing, comprehensive assessments and effective interventions with young people.

---

**PAEDS 719**  
**15 points**

**Health, Education and Youth Development**

**Semester Two – Auckland (Blended)**

Examines the overlap of health and education in the context of youth development by exploring the impact of past and current developments and strategies in both sectors on the well-being of young people. It reviews the ‘business’ of schools, the Health and Physical Education curriculum, school-based health and support services, whole school approaches to health, and the health and education needs of students not engaged with the school system.

---

**PAEDS 721**  
**15 points**

**Clinical Care of Adolescents and Young Adults with Cancer**

**Semester Two – Online**

To develop and advance skills, knowledge and expertise in the clinical care of adolescents and young adults with cancer.

**Prerequisite:** PAEDS 712

Getting sound advice at the beginning and throughout your academic journey can be helpful when deciding what pathway to take. The Child and Youth Health network is a group of academics from throughout the University who can be contacted to support you in your academic progression, including mentorship and research supervision.

Parham Alishahi
Student: Bachelor of Medical Imaging (Honours) (BMedImag(Hons))

“I chose to study at Waipapa Taumata Rau | The University of Auckland because of the programme it offered, the support provided and the convenient location. The support and services were instrumental in helping me to complete my Postgraduate Diploma in Health Sciences, specialising in Advanced Nursing.

“The teaching staff and tutors were exceptional – they provided me with the individual support I needed and supported my learning with relevant clinical cases, online resources and insights on their own experience in the field. My diploma also allowed me to be part of the wider community of nurses and experience their collegial support whilst undertaking the same study path.

“I was fortunate enough to follow a study path that prepared me for my current role. I am working as a Mātanga Tapuhi, Nurse Practitioner in Child and Youth at Starship Blood and Cancer Centre. The skills and knowledge that I covered as part of my studies is essential and invaluable to my current role, as was the support I received from my tutors and teachers. It enabled me to apply what I learned in the classroom into my nursing practice.

“It’s an absolute privilege to provide nursing care for tamariki, young people and their whānau. Tamariki require specialised nursing expertise and care to manage smaller equipment, utilising distraction techniques and understanding the physical and developmental changes of the child and adolescent and working closely with the whānau to provide excellence in nursing care.”

Erin Kavanagh
Graduate: Postgraduate Diploma in Health Sciences, Specialisation in Advanced Nursing

Palliative Care

Our courses in Palliative Care are designed for clinicians working within palliative care. Learn how to develop the attitudes and knowledge needed to care for patients and families living with a serious, life-changing or end-of-life illness. Palliative Care focuses on patient care for those facing life-challenging illness and embraces the essential elements and principles of patient-centred, holistic care.

Educational pathway for Nurse Practitioner

Nurse Practitioners are highly skilled autonomous health practitioners with masters-level educational preparation and advanced clinical skills. Nurse Practitioners are registered as such with Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand and have the legal authority to practice in the Nurse Practitioner Scope of Practice.

Preparation for Nurse Practitioner

- Successfully completed prerequisite courses.
- Masters level qualification.
- Nurses must be practising clinically at an advanced level as they complete the Nurse Practitioner pathway.
- It is important to have the support of your employer to develop towards the Nurse Practitioner role as you complete your postgraduate studies.
- Completed the one-year Nurse Practitioner Training Programme.

Educational preparation

Early postgraduate study

The following courses are prerequisites for the Nurse Practitioner Training Programme and should be included in the PGCertHSc and PGDipHSc.

- One of the following assessment courses:
  - NURSING 773 Advanced Assessment and Clinical Reasoning (30 points)
  - NURSING 770 Clinical Practice Development (30 points, if completed after 2014)
  - NURSPRAC 720 Advanced Mental Health Assessment
  - NURSING 742 Biological Science for Practice (30 points)
- One 30-point course of the students choice. Preference for a course that relates to the students clinical specialisation.
- Both NURSING 785 Clinical Reasoning in Pharmacotherapeutics (30 points, mandatory) and NURSING 746 Evidence-based Practice and Implementation (30 points, recommended) need to be completed before applying for the Nurse Practitioner Training Programme. One of these courses should be included in the PGDipHSc, and the other MUST be left until the MNurs in order to meet regulatory requirements. Please note NURSING 773 (or NURSING 770, or NURSPRAC 720) and NURSING 742 are prerequisite courses for NURSING 785.

Strong clinical expertise is necessary for Nurse Practitioner practice. Nurses must be able to demonstrate advanced health assessment and clinical exam skills with clinical reasoning and knowledge of pathophysiology and pharmacology before proceeding to the final master’s stage of the pathway. Students must successfully complete the PGCertHSc and PGDipHSc, meeting the GPA criteria to proceed to MNurs. If a student has completed previous postgraduate study or completed a programme such as the MNSc prior to their nursing registration, they should contact the School of Nursing to discuss their options.

Masters level study

The Master of Nursing (MNurs) is a 120-point programme (see page 8, MNurs (taught)), courses that can be included in your 120-point master’s for the Nurse Practitioner pathway include:

- NURSING 746 Evidence-based Practice and Implementation (30 points, if not completed in the PGDip)
- NURSING 701* Research Project (30 points) (Must be completed as a requirement of the taught masters)

- NURSING 785* Clinical Reasoning in Pharmacotherapeutics (30 points, if not completed in the PGDip)

All students are required to contact the Nurse Practitioner Pathway Coordinator prior to enrolment into the MNurs for course advice.

Nurse Practitioner Practicum Year

The final practicum year is part of the Nurse Practitioner Training Programme. This is an application-based programme, and details are available at: [https://nurseworkforce.blogs.auckland.ac.nz/nptp/](https://nurseworkforce.blogs.auckland.ac.nz/nptp/)

Academically, the practicum year consists of two courses, NURSING 743 and NURSING 740.

- NURSING 743 Nurse Practitioner Advanced* Practicum (30 points, Semester One)
  - Prerequisite: Approval of the Course Director
- NURSING 740 Nurse Practitioner Prescribing Practicum* (30 points, Semester Two)
  - Prerequisite: Approval of the Course Director

NURSING 743 and NURSING 740 are designed to refine advanced clinical decision-making skills for nurses preparing for the Nurse Practitioner scope of practice. Nurse Practitioners provide primary and specialty care and need expertise in clinical decision-making. Nurse Practitioners utilise advanced assessment skills along with disease management models to develop evidence-based clinical decisions needed for prescribing pharmacologic and non-pharmacologic treatment plans.

It may be possible to include one or both of these courses within your taught master’s. However, if you complete your master’s programme before you are admitted to the Nurse Practitioner Training Programme, it is possible to complete these final courses as part of another qualification, such as a second PGCert (criteria applies), for example. If this situation is relevant to you, please contact the School of Nursing.

Eligibility for the Nurse Practitioner Practicum Year:

- Have completed a minimum of three years of full-time practice within the last five years, with at least one of the three years in full-time practice (0.8 FTE or higher) in Aotearoa-New Zealand. This experience should be in the area of practice that the Nurse Practitioner will be practising once registered.
- A solid foundation of clinical skills and knowledge is required to be able to practice at an advanced level.
- Have identified a clinical supervisor (senior Nurse Practitioner or senior doctor) who is willing to mentor the attainment of the advanced skills and competencies required for Nurse Practitioner practice.
- Written agreement from your employer must be provided with the application to confirm a minimum of 500 hours of supernumerary clinical release time, clinical supervisor availability, and release to attend university study days.

Educational pathway for Registered Nurse Designated Prescriber

A Registered Nurse (RN) Designated Prescriber is an RN who Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand has granted prescriptive authority (Medicines Regulation 2016). These nurses are authorised to prescribe treatment for a range of common and long-term conditions (e.g., diabetes, respiratory conditions or cardiovascular health concerns) within a structured multidisciplinary team (MDT).

Academic preparation for RN Designated Prescribing

The nurse will need to complete the following four courses to complete the educational requirements for registration with Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand:

- One of the following assessment courses:
  - NURSING 773 Advanced Assessment and Clinical Reasoning (30 points)
  - NURSING 770 Clinical Practice Development (30 points) (if completed after 2014)
  - NURSPRAC 720* Advanced Mental Health Assessment (30 points)
- NURSING 742 Biological Science for Practice (30 points)
- NURSING 785* Clinical Reasoning in Pharmacotherapeutics (30 points)
- NURSPRAC 717* Practicum for RN Designated Prescribers (30 points)

These courses provide educational support for experienced nurses to further develop advanced clinical skills in patient assessment and diagnostic reasoning in relation to the clinical management and prescribing for patients with common acute and long-term conditions. Advanced knowledge in pathophysiology and pharmacotherapeutics supports the nurse’s clinical decision-making skills.

These four courses can be completed within a PGDipHSc or other qualification. Please note that NURSING 773 (or 770 or NURSPRAC 720) and NURSING 742 are prerequisite courses for NURSING 785, and all three must be completed before enrolling in the prescribing practicum course, NURSPRAC 717.

The prescribing practicum includes a minimum of 150 hours of mentored clinical practice under the supervision of a prescribing mentor (senior Medical Practitioner or senior Nurse Practitioner). The practicum will be conducted in the area of practice and within the workplace and team, that the nurse will be working in as an RN Designated Prescriber. The practicum will include opportunities to consolidate the nurse’s patient consultation and assessment, diagnostic reasoning, clinical decision-making and treatment planning skills.

Students wishing to undertake NURSPRAC 717 must approach the School of Nursing before enrolment to discuss the nurse’s and employer’s readiness for the practicum.

Entry requirements for the prescribing practicum

The Registered Nurse must:

- Hold a current practising certificate with Te Kaunihera Tapuhi o Aotearoa | the Nursing Council of New Zealand, and have three years of full-time practice in the area they intend to prescribe on completion of the programme (with at least one year of the total practice in Aotearoa – New Zealand).
- Have identified and have access to an area of clinical practice in which to develop their prescribing skills and have up-to-date clinical knowledge relevant to their intended area of prescribing practice.
- Have the support of their employer and work with a multidisciplinary team prepared to support the nurse’s development as an RN Designated Prescriber through policy, audit, peer review and accessibility of continuing education.
- Have identified an authorised prescribing mentor (a senior Medical Practitioner or senior Nurse Practitioner) who will supervise the practicum hours (minimum 150 hours) and support the nurse’s development in clinical practice.
- Have completed and successfully passed one of the required assessment courses, along with NURSING 742 and NURSING 785.

How to apply

This guide will help you to complete the online Application for Admission to Waipapa Taumata Rau | The University of Auckland. To begin your application, please visit: applytostudy.auckland.ac.nz

Note: You MUST provide your official academic transcript and completion evidence to complete your application. You will also need to know your nursing registration number for the application.

If you have not studied with us before, click ‘Register for a new account’. Once you enter the required information and click on ‘Register’, the system will send you an email which will show as onelogon@auckland.ac.nz. Please check your inbox (or junk mail) and validate your email address by selecting the ‘Complete your Registration’ button.

If you have registered with the University of Auckland before, please use your Student ID or email address and password to log in. If you do not remember your login details please phone 0800 61 62 63 for help to reset it or email onelogon@auckland.ac.nz

Once your registration is complete, please sign in and begin your new application. If you have any questions or issues when completing the online application please email postgradnursing@auckland.ac.nz

Step 1 Apply online

1. To begin your application, please go to: applytostudy.auckland.ac.nz

   When you open your Application for Admission for the first time we will ask you to provide your personal information and details of your academic history and qualifications.

2. Complete Programme section. Select from the drop down boxes below:

   - Programme type: e.g., Postgrad Diploma/Certificate
   - Programme name: e.g., PG Cert in Health Sciences
   - Major or specialisation: e.g., Advanced Nursing or Mental Health Nursing

3. Choose the appropriate term. If you wish to study more than one course, please contact us.

4. Accept your 'Offer of Place' in programme

5. Enrol in your course

Select which semester you want to begin studying

Answer No if your DHB is funding your course – this is not classed as a scholarship.

**Specific questions:**

Answer and complete both fields

If you are a new student to the University of Auckland, you will not be able to proceed with your application without uploading this document. If you have not yet received your official transcript, please upload a screenshot of your latest transcript from your University/TEC dashboard. You will still need to provide an official transcript as soon as possible.

5. The next fields is required for statistical use by the Ministry of Education and the University of Auckland.

**Additional information:**

Please complete both fields for statistical records

6. Please review your application and check that the information you have provided are correct.

**Application details:**

You can go back and update any sections if required

7. Tick ‘I agree’ box. Click ‘Submit’ to complete your application. You will receive an acknowledgement email from us within two working days.
What happens next?

Check your email

Once you have submitted your application, you will receive an email with your ID number. Please monitor your email address for information and further requirements.

The acknowledgement email will be sent to the email address you registered your application with. It will include a list of specific certified documents (and, in some cases, other requirements) necessary to complete your application.

You can use your Student ID and the password you set up while applying, to sign into your Application for Admission, check your application status and see the documentation you need to provide at: applytostudy.auckland.ac.nz

Step 2 Submitting identification and residency documents

Once you have submitted your application, you must log back in to see if you also need to provide an ID/residency document. If it asks you to provide one, you must get this certified and then upload it to your application. Please do not send in a physical copy.

More information on this, including what documents we accept and how to get them correctly certified, can be found at: auckland.ac.nz/supporting-documents

If, when logging in to your application, you do not see anything indicating that you need to provide an ID/residency document, it means that we have managed to verify your identity through other means (e.g. RealMe, NSI number etc.) and do not have to upload anything for this.

Note: A certified document is a copy of the original endorsed with the statement "Original sighted. Certified true copy" by either a Justice of the Peace (JP), Solicitor, Notary Public (full details of the certifier must be included), or an authorised staff member of Waipapa Taumata Rau | The University of Auckland Student Information Centre.

If you are unable to source and submit any of your academic transcripts that have been requested for assessment, it is important that you notify us as soon as possible, outlining what you are unable to submit and why, by emailing admission@auckland.ac.nz.

Step 3 Assessment of your application and offer of place

This may take three to four weeks during peak admission periods. You can check the status of your Application for Admission at any time by signing in using your Student ID and password at applytostudy.auckland.ac.nz

You will be notified of the outcome of your application by email and will be able to view this by signing into your Application for Admission.

Step 4 Accept your offer of place online

Sign back into your Application for Admission and select Accept.

Congratulations! You are now a student at Waipapa Taumata Rau | The University of Auckland. All communication from now on will be sent to your university email.

Step 5 Enrol in your course

You can now apply to enrol in your chosen course/s using Waipapa Taumata Rau | The University of Auckland’s ‘Student Services Online’ portal.

Contact

For admission and enrolment support, please email:

admission@auckland.ac.nz

You can now apply to enrol in your chosen course/s using the University of Auckland’s ‘Student Services Online’ portal.
We want to do all we can to help you succeed as a postgraduate student in our School of Nursing. To help you achieve this success, a wide range of services are available to you throughout your study journey with us.

Awards, scholarships and grants
There are a wide range of awards, scholarships and research grants available to our postgraduate and doctoral students.
