

## RE: University of California fact sheet

### Careful research and preparation are required for exchange at UC.

#### **Researching UC campuses:**

There are 9 campuses you can choose to study at, please note the San Francisco campus is not applicable for University of Auckland students.

UC has a unique application process where you could be placed at any of the three campuses listed in your application. If you find that only one campus is a viable option, we encourage you to look at other partner universities as UC will not be suitable if you have limited flexibility in your courses.

For specific majors (popular majors), you must demonstrate evidence of meeting UC prerequisites before you study at UC. Please check [Preparation for Specific Majors](#) to see if this applies to your major. If you do not meet the prerequisites for a particular major, it is very unlikely that you will be admitted for that major.

In addition to identifying appropriate courses, please consider the cost of insurance and living expenses at UC. The costs of living vary by campus.

#### **Application to 360 International:**

UC counts as **one choice** in your application to 360 International. However, you are still required to show evidence of researching courses at three campuses on your [Host University Preferences and Proposed Courses Form](#). We will not consider applicants who do not list three campuses on your application to 360 International.

#### **If nominated by 360 International to UC:**

You will apply to UC and will be required to research three campuses and submit a study plan for each. Flexibility of campus choice is required as UC makes the final decision as to where you are placed. Your first choice campus is not guaranteed.

If you have any questions, please contact the 360 International Team at [360international@auckland.ac.nz](mailto:360international@auckland.ac.nz).
